80.4 Citation workflow and source-section coverage

Navigation. Parent section: Section 80.
AGEINT citations are generated from source data, not patched into generated Markdown.

80.4.1 Contributor recipe

Navigation. Parent section: Section 80.

Source type	Primary edit surface	Key format	When to use
Source-guide reference	`data/curriculum/references/`	`ageintNNN`	Preserve inherited provenance; establish actual claim relevance separately.
Curated research anchor	`data/research_anchors/` plus `src/intelligence_content/` routing	stable descriptive key	Record the inspected scope, edition, method and access limits of official, standards, public-domain or scholarly material.
Source-quality anchor	`data/research_anchors/source-quality-anchors.jsonl`	stable descriptive key	A bounded governance or source-quality reference applies across modules; it is not empirical support for unrelated claims.

80.5 Add or extend a citation: preserve identity and record metadata

Navigation. Parent section: Section 80.

1. Preserve `ageint001` through `ageint231`; do not renumber locked source identities.
2. Append new source-guide references after the locked range. Current generated guide keys extend through `ageint312`.
3. For curated anchors, record `source_lane`, `source_tier`, `checked_as_of`, `verification_method`, `claim_scope`, `refresh_cadence`, `refresh_trigger`, `stakeholder_role`, `assurance_use`, and `rights_dimension`.
4. Use Pandoc citation syntax such as `[@ageint137]` or `[@official_nist_ai_rmf]`.
5. Use label-backed cross-references to the curriculum orientation section and curriculum-map figure rather than hard-coded section or figure numbers.
6. Rebuild from the AGEINT root:

```
uv run python scripts/build_curriculum.py
```

80.6 Bind the claim, not merely the citation

Navigation. Parent section: Section 80.

For each substantive assertion, record the exact passage/locator and edition, what it supports, what remains inference, contrary evidence, applicability and upstream origin. Multiple keys or copies of one study are one evidence family. Official status, a working URL, `note_verified`, note length and source-route membership do not establish entailment or effectiveness.

Keep source inspection distinct from metadata-only review, search-index identity and blocked full-text attempts. Do not refresh `checked_as_of` merely because a build ran. Corrected or contested studies retain their identity and visible limitations. Missing publication year and authorship remain absent; verification date is not publication date. Use `and` between individual authors in a BibTeX author field, not a comma-separated list that can be parsed as one person's name. When authorship is absent, the generated BibTeX `key` field preserves the stable reference identifier for native sorting and labels. It is not an author or publication date; this also avoids `plainnat` label overflow among undated, unattributed references that share a citation-key prefix.

Authored `teaching_note` Markdown in a source section can cite existing keys directly for its worked reasoning; inherited citation arrays remain provenance. Clearly label fictional quantities and exercise outcomes. Unknown citation keys fail closed even with an official-looking prefix. The lexical claim audit is a triage gate, not a semantic verifier; a genuine but unrelated citation still requires manual claim-to-passage review.

Keep inherited raw source text and citation identities separate from the current teaching title. A title without a concept route receives honest profile framing, not a definition synthesized from its first words. Supply the topic-specific explanation, case, limits and source locator in `teaching_note`; keyword density and varied wording are not evidence of substantive coverage.

never hand-edit `output/manuscript/` as the source of truth.

80.6.1 Current citation coverage by source section

Navigation. Parent section: Section 80.

Measure	Count
Source sections	723
Citation occurrences	1470
Unique source-guide keys	301
Zero-citation source sections	0
Distribution	1 citation(s): 275 section(s), 2 citation(s): 152 section(s), 3 citation(s): 293 section(s), 4 citation(s): 3 section(s)

80.6.2 Citation rows by source section

[Farid and Bohacek, 2022]	Protecting World Leaders Against Deep Fakes	curriculum_analyst	synthetic_media_provenance	scholarly_preprint	2026-06-15	annual	cognitive-security reviewer, communications reviewer, instructor	deepfake-protection caveat, public-figure identity risk review, and synthetic-media provenance safeguards	identity integrity, consent, democratic trust, public safety, and non-manipulative education	Open-access PMC article on protecting world leaders against deepfakes, routed as identity-integrity and provenance-risk support for defensive education.
[Golob et al., 2020]	Human Cognition Through the Lens of Social Engineering Cyberattacks	curriculum_analyst	cognitive_influence	scholarly_preprint	2026-06-15	annual	security-awareness instructor, cognitive-security reviewer, cyber defender	social-engineering cognition review, defensive awareness framing, and no-playbook safety boundary	privacy, consent, user protection, psychological safety, and defensive education	Open-access PMC article on human cognition in social-engineering cyberattacks, routed as defensive awareness and cognitive-security evidence with operational details excluded.
[Gaeta et al., 2021]	Situation Awareness in Intelligence Scenarios	curriculum_analyst	analytic_cognition	scholarly_preprint	2026-06-15	annual	analyst, instructor, cognitive-workload reviewer	situation-awareness scenario review, analyst-cognition caveats, and intelligence-training source support	analyst comprehension, transparency, cognitive workload, and accountable training	Open-access PMC article on situation awareness in intelligence scenarios, useful for analytic-cognition lessons and scenario-review vocabulary.
[Wasil et al., 2024]	AI Emergency Preparedness	curriculum_analyst	agent_incident_response	scholarly_preprint	2026-06-15	semiannual	incident commander, AI governance reviewer, instructor, tabletop facilitator	AI emergency-preparedness tabletop caveat, incident-readiness review, and public-safety boundary setting	public safety, accountability, transparency, due process, and incident learning	arXiv preprint on AI emergency preparedness, routed to agent incident-response and publication-readiness caveats for tabletop exercises.

Citation key	Title	Role	Lane	Tier	Checked	Refresh	Stakeholder	Assurance use	Rights dimension	Source note
[Ortega et al., 2025]	The AI Incident Regime	curriculum_anchor	agent_incident_response	scholarly_preprint	2026-06-15	semiannual	AI incident reviewer, legal/oversight reviewer, instructor, risk owner	AI incident-regime comparison, governance-exception review, and reporting-system caveats	transparency, accountability, due process, public safety, and affected-party protection	arXiv HTML source on AI incident regimes, routed as comparative governance context for incident reporting, risk exceptions, and assurance evidence.
[Cooper, 2005]	Curing Analytic Pathologies: Pathways to Improved Intelligence Analysis	curriculum_anchor	analytic_tradecraft	official_publication	2026-06-15	annual	analytic tradecraft instructor; curriculum designer; reviewer	Adds institutional self-critique to SAT evidence boundaries and analytic process reform lessons.	public CIA CSI monograph used for education and source-backed critique	CIA Center for the Study of Intelligence monograph on analytic pathologies, self-correction, and intelligence-process reform.
[Janis, 1982]	Groupthink: Psychological Studies of Policy Decisions and Fiascoes	curriculum_anchor	analytic_cognition	scholarly_book	2026-06-15	annual	analytic tradecraft instructor; cognition reviewer; curriculum designer	Keeps group-process lessons tied to a named scholarly source while preserving caveats about retrospective failure explanation.	copyrighted scholarly book metadata only; cite and summarize sparingly	Scholarly book record for Janis's groupthink model used as classic context for dissent, alternatives, and group-decision failure claims.
[Coulthart, 2016]	Why Do Analysts Use Structured Analytic Techniques? An In-depth Study of an American Intelligence Agency	curriculum_anchor	evaluation_evidence	scholarly_peer_reviewed	2026-06-15	annual	curriculum designer; analytic standards trainer; evaluation lead	Separates usage and institutionalization evidence from efficacy evidence in SAT lessons.	copyrighted scholarly article; cite DOI metadata and summarize sparingly	Peer-reviewed study of why analysts use SATs, supporting adoption, training, and organizational-context claims rather than universal efficacy claims.

Citation key	Title	Role	Lane	Tier	Checked	Refresh	Stakeholder	Assurance use	Rights dimension	Source note
[Coulthart, 2017]	An Evidence-Based Evaluation of 12 Core Structured Analytic Techniques	curriculum_anchor	evaluation	scholarly_peer_reviewed	2026-06-15	annual	curriculum designer; analytic standards trainer; evaluation lead	Forces SAT exercises to distinguish doctrine, classroom utility, and empirical support by technique.	copyrighted scholarly article; cite DOI metadata and summarize sparingly	Peer-reviewed evaluation of core SATs used to qualify claims about where specific techniques may or may not have evidence support.
[Chang et al., 2018]	Restructuring Structured Analytic Techniques in Intelligence	curriculum_anchor	evaluation	scholarly_peer_reviewed	2026-06-15	annual	curriculum designer; analytic standards trainer; evaluation lead	Connects SAT chapter revisions to decision-science evidence and claim-calibration gates.	copyrighted scholarly article; cite DOI metadata and summarize sparingly	Peer-reviewed article arguing for a more evidence-attentive structuring of SATs and stronger links to judgment and decision-science research.
[Whitesmith, 2019]	The Efficacy of ACH in Mitigating Serial Position Effects and Confirmation Bias in an Intelligence Analysis Scenario	curriculum_anchor	evaluation	scholarly_peer_reviewed	2026-06-15	annual	curriculum designer; analytic standards trainer; cognition reviewer	Prevents ACH lessons from turning one experimental result into a universal debiasing assertion.	copyrighted scholarly article; cite DOI metadata and summarize sparingly	Peer-reviewed ACH experiment used to keep confirmation-bias and serial-position claims specific to a study design rather than a general SAT guarantee.
[Karvetski and Mandel, 2020]	Coherence of Probability Judgments from Uncertain Evidence: Does ACH Help?	curriculum_anchor	evaluation	scholarly_peer_reviewed_open	2026-06-15	annual	curriculum designer; forecasting instructor; analytic standards trainer	Anchors manuscript language that separates ACH transparency from accuracy or coherence proof.	open scholarly article; cite source and avoid extended quotation	Open Cambridge article testing whether ACH improves coherence of probabilistic judgments from uncertain evidence.

Citation key	Title	Role	Lane	Tier	Checked	Refresh	Stakeholder	Assurance use	Rights dimension	Source note
[Mandel et al., 2018]	Boosting Intelligence Analysts' Judgment Accuracy: What Works, What Fails?	curriculum_anchor	forecasting_calibration	peer_reviewed_open	2026-06-15	annual	forecasting instructor; curriculum designer; evaluation lead	Routes SAT automation claims toward accountable judgment support, not analyst replacement.	open scholarly article; cite source and avoid extended quotation	Open Judgment and Decision Making article comparing ACH, coherentization, and aggregation for intelligence analysts' probability judgments.
[Dhami et al., 2015]	Improving Intelligence Analysis With Decision Science	curriculum_anchor	forecasting_calibration	peer_reviewed	2026-06-15	annual	forecasting instructor; evaluation lead; curriculum designer	Gives the SAT chapter an evidence complement beyond technique catalogues and post-mortem lessons.	copyrighted scholarly article; cite DOI metadata and summarize sparingly	Peer-reviewed decision-science article connecting intelligence analysis improvement to forecasting, probability judgment, and uncertainty communication evidence.
[National Research Council, 2011]	Intelligence Analysis for Tomorrow: Advances from the Behavioral and Social Sciences	curriculum_anchor	analytic_cognition	scholarly_book_report	2026-06-15	annual	curriculum designer; cognition reviewer; evaluation lead	Links analytic-cognition lessons to a public expert-report baseline and keeps SAT claims evidence-sensitive.	National Academies publication metadata and public report access; cite and summarize sparingly	National Academies report connecting behavioral and social science to intelligence-analysis training, judgment, and organizational improvement.
[United States Senate Select Committee on Intelligence, 2004]	Report on the U.S. Intelligence Community's Prewar Intelligence Assessments on Iraq	curriculum_anchor	intelligence_failure	official_report	2026-06-15	biennial	curriculum designer; governance reviewer; analytic tradecraft instructor	Prevents failure lessons from implying that any single SAT would have prevented a complex institutional failure.	public-domain government report; cite official source	Official Senate report on prewar Iraq intelligence assessments used as post-mortem context for assumptions, dissent, caveats, and source-confidence failures.

Citation key	Title	Role	Lane	Tier	Checked	Refresh	Stakeholder	Assurance use	Rights dimension	Source note
[Intelligence Advanced Research Projects Activity, 2010]	Aggregative Contingent Estimation	curriculum_anchor	forecasting_calibration	official_publication	2026-06-15	annual	forecasting instructor; curriculum designer; evaluation lead	Connects SAT lessons to calibration and aggregation evidence without claiming autonomous forecasting judgment.	public IARPA program metadata used for education and source-backed synthesis	Official IARPA ACE program page on eliciting, weighting, and combining probabilistic judgments to improve intelligence forecasts.
[Intelligence Advanced Research Projects Activity, 2023]	Rapid Explanation, Analysis and Sourcing Online	curriculum_anchor	agentic_analytic_assistance	official_publication	2026-06-15	annual	analytic method designer; AI governance reviewer; curriculum designer	Constrains AI/SAT automation prose away from autonomous strategic judgment, targeting, or report replacement.	public IARPA program metadata used for education and governance review	Official IARPA REASON program page on analyst-in-the-loop evidence and reasoning support for draft analytic reports.
[Dalkey and Helmer, 1963]	An Experimental Application of the DELPHI Method to the Use of Experts	curriculum_anchor	forecasting_calibration	scholarly_peer_reviewed	2026-06-15	annual	forecasting instructor; methods instructor; curriculum designer	Adds historical method roots for aggregation and structured elicitation exercises.	copyrighted scholarly article; cite DOI metadata and summarize sparingly	Classic peer-reviewed Delphi-method article used as historical method context for structured expert elicitation and iterative judgment aggregation.
[Klein, 2007]	Performing a Project Premortem	curriculum_anchor	analytic_methods	professional_practice	2026-06-15	annual	methods instructor; curriculum designer; reviewer	Adds a named structured failure-review technique while retaining explicit evidence limits.	copyrighted professional article; cite metadata and summarize sparingly	Professional practice article introducing the premortem as a structured way to surface possible failure causes before commitment.

Citation key	Title	Role	Lane	Tier	Checked	Refresh	Stakeholder	Assurance use	Rights dimension	Source note
[Marrin, 2012]	Improving Intelligence Analysis: Bridging the Gap between Scholarship and Practice	curriculum_anchor	analytic_methods	scholarly_pedagogy	2026-06-15	annual	curriculum designer; intelligence-studies instructor; methods reviewer	Connects SAT integration to a broader scholarship-practice gap rather than technique cataloging alone.	copyrighted scholarly book metadata only; cite and summarize sparingly	Routledge scholarly book on linking intelligence-analysis scholarship and practice, used for tradecraft pedagogy and evidence-uptake framing.
[Svenmarck, 2021]	Overview of Structured Analytic Techniques for Assessment and Judgement of Major Events	curriculum_anchor	analytic_methods	official_pedagogy	2026-06-15	annual	curriculum designer; public-sector method instructor; reviewer	Adds a non-US official SAT training reference while keeping efficacy claims separate from technique catalog coverage.	public official report summary; cite source and avoid extended quotation	Swedish Defence Research Agency report summary on 42 structured analytic techniques for assessment and judgement of major events.
[Joint IDP Profiling Service, 2021]	Technical Brief on Joint Structured Analysis Techniques	curriculum_anchor	analytic_methods	public_pedagogy	2026-06-15	annual	methods instructor; curriculum designer; collaborative-analysis facilitator	Broadens SAT pedagogy beyond intelligence-only settings while preserving domain and efficacy caveats.	public guidance page; cite source and avoid extended quotation	JIPS technical brief on joint structured analysis techniques for collaborative humanitarian and development data analysis.
[Denzler, 2024]	Revisiting the Psychology of Structured Analytical Techniques	curriculum_anchor	analytic_cognition	scholarly_peer_reviewed	2026-06-15	annual	cognition reviewer; analytic standards trainer; curriculum designer	Keeps cognitive-security and tradecraft prose explicit about mechanism uncertainty and evidence limits.	copyrighted scholarly article; cite DOI metadata and summarize sparingly	Peer-reviewed article revisiting psychological assumptions behind SATs and their relationship to analytic cognition.
[Wilcox and Mandel, 2024]	Critical Review of the Analysis of Competing Hypotheses Technique: Lessons for the Intelligence Community	curriculum_anchor	evaluation_validity	scholarly_peer_reviewed	2026-06-15	annual	analytic standards trainer; curriculum designer; evaluation lead	Strengthens SAT chapter language that separates hypothesis bookkeeping, diagnosticity review, and accuracy evidence.	copyrighted scholarly article; cite DOI metadata and summarize sparingly	Peer-reviewed critical review of ACH used to frame ACH as a diagnostic and review aid with contested efficacy claims.

ageint003. Active inference: Applicability to different types of social. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC7916013/. A 2021 peer-reviewed article by Stephen Fox in the journal Entropy that relates the active inference framework to social organization. It maps concepts such as variational free energy, prediction error, generative models, and Markov blankets onto industrial engineering and quality management practices, treating organizational survival as the maintenance of process control limits.

ageint004. Ai won't replace spies-it will make them more powerful than ever. URL https://fedgovtoday.com/podcast/ai-wont-replace-spies-it-will-make-them-more-powerful-than-ever. Tom Mulligan argues that artificial intelligence will enhance rather than replace human intelligence professionals, contending that the future of intelligence lies in human-machine collaboration. He maintains that uniquely human qualities such as intuition, experience, and independent judgment become more valuable as adversaries gain access to the same AI tools.

ageint005. Cia: Studies in ai and human intelligence - semperverus. URL https://www.semperverus.com/cia-studies-in-ai-and-human-intelligence/. A blog post on SemperVerus summarizing a CIA Studies in Intelligence article, "Espionage in Our AI Future: Why Human Intelligence Still Matters" (Vol. 70, No. 1, March 2026). It argues that as AI makes technical intelligence cheaper and AI-driven fabrication more pervasive, human intelligence becomes relatively more valuable, since human specialists are needed to verify source reliability over time.

ageint006. Director of national intelligence - intelligence community directives. URL https://irp.fas.org/dni/icd/index.html. A Federation of American Scientists repository cataloguing the Intelligence Community Directives (ICDs) issued by the Director of National Intelligence. ICDs are the principal means by which the DNI provides policy, guidance, and direction to the U.S. Intelligence Community.

ageint007. The friends britain's post-war secret intelligence. URL https://www.cia.gov/readingroom/document/cia-rdp96b01172r000100060001-5. SIST guide bibliography entry.

ageint008. Mossad | military history and science. URL https://www.ebsco.com/research-starters/military-history-and-science/mossad. An EBSCO Research Starter reference article on the Mossad, Israel's national intelligence agency established in 1949 and responsible for foreign intelligence collection and counterterrorism operations conducted outside Israel's borders. It describes the agency's departmental structure (collection, political action and liaison, research, technology) and reviews historically documented operations including the 1960 capture of Adolf Eichmann and the rescue of Ethiopian Jews.

ageint009. "here to stay" - chinese state-affiliated hacking for strategic goals. URL https://merics.org/en/report/here-stay-chinese-state-affiliated-hacking-strategic-goals. A November 2023 report from MERICS (Mercator Institute for China Studies) analyzing Chinese state-affiliated cyber intrusions aimed at strategic goals. It argues that Chinese actors pursue long-term, persistent access to European technology firms and critical infrastructure for espionage rather than disruption, with targeting aligned to government priorities such as semiconductors, pharmaceuticals, and advanced manufacturing.

ageint010. The five eyes archive. URL https://unredacted.uk/project-archives/five-eyes/. An online archive maintained by Unredacted UK that compiles declassified government documents on intelligence sharing among the Five Eyes nations (United States, United Kingdom, Canada, Australia, and New Zealand). The collection traces the emergence and evolution of bilateral and multilateral agreements from the postwar era, including the BRUSA and UKUSA agreements, drawing on records from UK, US, and Australian agencies plus freedom-of-information releases.

ageint011. Brusa and ukusa agreements: Gchq and nsa. URL https://unredacted.uk/collections/ukusa-2010/. A curated collection from Unredacted UK presenting documents declassified by the NSA and GCHQ in 2010 relating to US-UK signals intelligence cooperation. It covers the 1946 British-US Communications Agreement (BRUSA), its wartime origins from 1940, and its evolution into the 1956 UKUSA Agreement and the broader Five Eyes alliance.

ageint012. Counterintelligence activities of non-state actors - grey dynamics. URL https://greydynamics.com/counterintelligence-activities-of-non-state-actors/. A Grey Dynamics analysis article (Rachel Brown, 2021) on how non-state actors conduct counterintelligence. It argues that although such groups lack the technical collection capabilities of states, they compensate through open-source and human-source methods and benefit defensively from compartmentalized, cell-based structures and ideological cohesion.

ageint013. Intelligence tradecraft overview | pdf | surveillance. URL https://www.scribd.com/presentation/580627740/Lesson-8-Introduction-to-Intelligence-Tradecraft. This is an instructional training document hosted on Scribd that introduces the fundamentals of intelligence tradecraft, defined as the methods and skills used in intelligence operations. It covers core concepts and types of tradecraft, cover and operational security, casing and surveillance, clandestine communication, and information gathering.

ageint014. Tradecraft: Covert operative tactics and techniques | trdcrft. URL https://trdcrft.com/tradecraft-covert-operative-tactics-and-techniques/. An educational article from TRDCRFT defining tradecraft as the techniques, strategies, and tools used by intelligence operatives to pursue objectives while maintaining secrecy and operational security. It surveys core disciplines such as surveillance and counter-surveillance, cover and disguise, technical and human intelligence work, and the field's evolution toward digital and cyber methods.

ageint015. Cover (intelligence gathering). URL https://en.wikipedia.org/wiki/Cover_(intelligence_gathering). A Wikipedia article explaining the concept of cover in human intelligence and counterintelligence work, defined as the ostensible identity assumed by a covert agent. It distinguishes official cover (diplomatic channels, immunity) from non-official cover (no government acknowledgment, less protection). The article surveys historical examples of front organizations and assumed identities.

ageint016. Surveillance detection - state.gov. URL https://2009-2017.state.gov/documents/organization/209870.pdf. Place where victim can be controlled with limited avenues of escape.

ageint017. Language of espionage | international spy museum. URL https://www.spymuseum.org/education-programs/spy-resources/language-of-espionage/. An educational glossary from the International Spy Museum, a nonprofit institution in Washington, DC, presenting an alphabetized dictionary of espionage terminology. It defines operational roles (agent, handler, case officer), intelligence disciplines such as HUMINT, SIGINT, and IMINT, major organizations (CIA, FBI, KGB, MI5, MI6, NSA), and historical equipment like the Enigma machine and U-2 aircraft.

ageint018. Old-school spycraft could make a comeback as ai undermines trust. URL https://www.nextgov.com/artificial-intelligence/2026/04/old-school-spycraft-could-make-comeback-ai-undermines-trust/412532/. A Nextgov article reporting on an essay in the CIA's Studies in Intelligence journal by RAND researcher Thomas Mulligan. It argues that as AI makes deepfakes and synthetic communications easier, trust in digital channels erodes, paradoxically increasing the value of traditional human intelligence methods.

ageint019. Espionage in our ai future: Why human intelligence still matters - csi. URL https://www.cia.gov/resources/csi/studies-in-intelligence/studies-in-intelligence-vol-70-no-1-extracts-march-2026/espionage-in-our-ai-future-why-human-intelligence-still-matters/. By Thomas Mulligan, a researcher at the RAND Corporation who served in CIA during 2008-14.

ageint020. The human source management system (confidential informant. URL https://www.hsmtraining.com/human-source-management-system-book. A publisher and training-organization page from HSM Training and Consultancy (London) promoting the book The Human Source Management System, a guide of over 500 pages that applies social psychology to the management of confidential informants. The site states the book draws on research and practitioner interviews and is used by law enforcement and intelligence bodies across more than 40 countries.

ageint021. Learn how to be a spy from previously unpublished kgb training. URL https://theworld.org/stories/2019/07/26/learn-how-be-spy-literally. A July 2019 story from The World (PRX public radio) about a project led by Michael Weiss to translate previously unpublished Soviet-era KGB training manuals from the 1970s-80s into English. The article describes how the manuals cover intelligence methods such as agent recruitment, psychological manipulation, and disinformation detection, and notes the materials remain relevant because related methods persist in modern Russian services.

ageint022. Summaries of newly obtained kgb training manuals - the interpreter. URL https://www.interpretermag.com/new-kgb-manuals/. An article from The Interpreter, a publication focused on Russian affairs and disinformation, announcing a project to translate, analyze, and publish previously unpublished Soviet KGB training documents. It summarizes a set of newly obtained manuals spanning several decades and describes the topics they cover, including operational terminology, agent classification, information-gathering methods, recruitment and vetting procedures, and counterintelligence concerns.

ageint023. The impact of digital technology on clandestine agent recruitment. URL https://dspace.cuni.cz/bitstream/handle/20.500.11956/197697/120483459.pdf?sequence=1&isAllowed=y. A 2024 International Master in Security, Intelligence and Strategic Studies thesis (Glasgow, Trento, Charles University) titled 'Human Intelligence in the Modern Era: The Impact of Digital Technology on Clandestine Agent Recruitment.' It uses a literature-based analysis plus three case studies to compare traditional human-source practices with technology-enabled approaches.

ageint025. Andrew bustamante: Inside the mind of a spy - tradecraft, trust. URL https://shows.acast.com/the-unmistakable-creative-podcast/episodes/andrew-bustamante-v2. This is an episode of The Unmistakable Creative Podcast featuring former CIA field operative Andrew Bustamante discussing intelligence work. The conversation covers his background at the Air Force Academy and CIA training, and frames espionage as resting on reading people, trust, influence, and empathy rather than glamour or action. It also addresses how operatives are selected, the isolation of covert work, and its psychological effects on personal relationships.

ageint026. The tension and drama behind surveillance detection operations. URL https://www.youtube.com/watch?v=duymZEwvxL8. A YouTube video titled "Inside the CIA: The tension and drama behind surveillance detection operations," released May 3, 2024, featuring a former CIA officer. The speaker describes the operational complexity and interpersonal tension involved in moving safely from a starting point to a meeting while accounting for the presence of hostile observation. It conveys the difficulty and stress of clandestine field meetings as recounted from personal experience.

ageint027. The dead drop: Design a communications method like a spy. URL https://www.youtube.com/watch?v=CRhGs3b27SA. SIST guide bibliography entry.

ageint028. Introducing dead drops to network steganography using arp-caches and snmp-walks. URL https://dl.acm.org/doi/10.1145/3339252.3341488. SIST guide bibliography entry.

ageint029. Agent handling in counterintelligence | pdf. URL https://www.scribd.com/document/513316188/Intelligence-Agenthandling. A roughly 28-page Scribd document titled "Agent Handling in Counterintelligence" providing an educational overview of intelligence operations. It surveys the roles of case officers in managing sources, recruitment and training of agents, protective measures such as fronts and cutouts, agent classifications including unwitting sources, and counterintelligence methods for identifying foreign operatives and reducing security breaches.

ageint030. The secrets of countersurveillance. URL https://telluric.us/the-secrets-of-countersurveillance/. SIST guide bibliography entry.

ageint031. Kgb counter surveillance: How to know if you're being followed. URL https://www.reddit.com/r/TheAmericans/comments/1cmnia2/kgb_counter_surveillance_how_to_know_if_youre/. There are cameras everywhere! Everything is trackable!

ageint032. Top secret kgb training manual - working with agents. URL https://books.google.com/books/about/TOP_SECRET_KGB_Training_Manual_Working_w.html?id=rM540QEACAAJ. A Google Books catalog entry for a 2025 English-translation edition of a Cold War-era Soviet intelligence training manual, published by Century Print Media Group with a translator's note by a retired NATO intelligence officer. The 144-page volume is presented as a historical document on Soviet human-intelligence doctrine and counterintelligence practice.

ageint033. The counterintelligence threat from non-state actors. URL https://www.tandfonline.com/doi/pdf/10.1080/08850600802698200. SIST guide bibliography entry.

ageint034. Studies in intelligence vol. 70, no. 1 (extracts, march 2026) - csi. URL https://www.cia.gov/resources/csi/studies-in-intelligence/studies-in-intelligence-vol-70-no-1-extracts-march-2026/. Thomas Mulligan is a researcher at the RAND Corporation and former CIA officer.

ageint035. Signals intelligence (sigint) overview. URL https://www.nsa.gov/Signals-Intelligence/Overview/. SIST guide bibliography entry.

ageint036. European axis signal intelligence in world war ii. URL https://www.nsa.gov/Helpful-Links/NSA-FOIA/Declassification-Transparency-Initiatives/Historical-Releases/European-Axis-SIGINT/. Volumes 1 - 9 of the European Axis Signal Intelligence in WWII documentation.

ageint037. Nsa releases history of american sigint and the vietnam war. URL https://fas.org/publication/nsa_releases_history_of_americ/. This Federation of American Scientists article reports on the NSA's declassification of a roughly 500-page historical study titled "Spartans in Darkness," which examines American signals intelligence during the Vietnam War from 1945 to 1975. Author Robert J. Hanyok documents that no second attack occurred during the 1964 Gulf of Tonkin Incident, contradicting prior official testimony, and also covers episodes such as the Tet Offensive and the Son Tay prison rescue.

ageint038. History of signals intelligence at the cia - open int. URL https://open-int.blog/2018/01/15/history-of-signals-intelligence-at-the-cia/. A January 2018 blog post on Open INT recounting the CIA's role in signals intelligence from roughly 1947 to 1970, noting that SIGINT is often associated with the NSA but the CIA also participated. It distinguishes communications intelligence from electronic intelligence and references declassified Cold War operations including U-2 collection and a Berlin communications-tapping effort.

ageint039. The cia and signals intelligence | national security archive. URL https://nsarchive.gwu.edu/briefing-book/cyber-vault-intelligence/2015-03-20/cia-and-signals-intelligence. A 2015 briefing book from the National Security Archive, compiled by Jeffrey T. Richelson, presenting declassified documents on the CIA's signals intelligence activities from roughly 1947 to 1970. It documents the CIA's parallel SIGINT operations alongside the NSA during the Cold War, covering programs and collection efforts as well as recurring friction between the two agencies over mission overlap, budgets, and access to intelligence.

ageint040. Basic cryptography. URL https://www.nsa.gov/portals/75/documents/news-features/declassified-documents/friedman-documents/publications/FOLDER_238/41748889078809.pdf. SIST guide bibliography entry.

ageint041. Five eyes foia disclosures. URL https://unredacted.uk/collections/five-eyes-us-foia/. A collection page from Unredacted, a UK-based organization focused on declassified government records. It assembles over 70 documents obtained through a 2017 Freedom of Information Act legal challenge led by Privacy International, drawn from US agencies including the NSA, State Department, and Department of Defense.

ageint042. Five eyes foia disclosures: key documents. URL https://unredacted.uk/briefings/five-eyes-foia-key-documents/. A briefing from Unredacted examining previously classified Five Eyes documents released to Privacy International following a 2017 US freedom of information request. The materials, spanning 1945 to 2016, trace the development and functioning of the UKUSA Agreement underpinning intelligence cooperation among the US, UK, Canada, Australia, and New Zealand.

ageint043. Technical surveillance countermeasures (tscm) - bastille networks. URL https://bastille.net/centers-of-excellence/tscm/. An informational guide from Bastille Networks explaining Technical Surveillance Countermeasures (TSCM), defined as security measures aimed at detecting and neutralizing surveillance devices to protect sensitive communications. It traces TSCM origins to World War II and Cold War intelligence work and catalogues threat types such as radio-frequency transmitters, hidden cameras, and acoustic eavesdropping.

ageint044. Technical surveillance threat levels - granite island group. URL http://www.tscm.com/threatlvls.html. A reference page from the Granite Island Group describing a ten-level taxonomy of technical surveillance threats and the corresponding technical surveillance countermeasures (TSCM) inspections used to detect them. It explains that detection difficulty increases by roughly an order of magnitude at each level, grouping threats into clusters and beginning with low-power consumer-grade devices.

ageint045. Tscm | technical surveillance countermeasures - pinkerton. URL https://pinkerton.com/investigations/tscm-technical-surveillance-countermeasures. A service page from Pinkerton describing technical surveillance countermeasures used to detect and prevent corporate eavesdropping and protect intellectual property. It outlines examination methods including infrared spectrum analysis to find heat signatures of hidden devices, radio frequency analysis to identify wireless audio bugs, and physical inspection for tampered equipment or poor security practices.

ageint046. The tscm inspection process | by murray associates tscm. URL https://counterespionage.com/tscm-inspection-process/. A web page from Murray Associates, a counterespionage consulting firm, explaining the technical surveillance countermeasures (TSCM) inspection process used to detect eavesdropping and surveillance devices in buildings. It outlines a three-phase methodology: a pre-inspection planning discussion, an on-site evaluation combining visual examination, technical instrumentation, and information-security review, and a post-inspection written report with findings and recommendations.

ageint047. How the intelligence community has held back open-source. The linked PDF is 'Geospatial Intelligence Support to Operations'; verify the intended citation before reuse.

ageint058. Geoint essential body of knowledge. URL https://usgif.org/wp-content/uploads/2020/11/ebk2019.pdf. The GEOINT Essential Body of Knowledge (Version 2.0, 2019), published by the United States Geospatial Intelligence Foundation (USGIF). First developed in 2014 and revised with community input, it defines the competencies, standards, and learning objectives needed to succeed in the geospatial intelligence discipline.

ageint059. neonpangolin/geospatial-intelligence-library. URL https://github.com/neonpangolin/geospatial-intelligence-library. A GitHub repository describing itself as a reference toolkit for geolocation and chronolocation in digital investigations. It curates open-source resources organized into categories including satellite imagery, mapping, infrastructure and transport tracking, weather and environmental monitoring, shadow and sun-position tools for time-of-day analysis, crisis and conflict mapping, image forensics, and geocoding utilities.

ageint060. Dodm 3305.10, "dod geospatial intelligence (geoint. URL https://www.esd.whs.mil/Portals/54/Documents/DD/issuances/dodm/330510m.pdf?ver=2019-08-20-104118-973. SIST guide bibliography entry.

ageint061. Cyber kill chain(r). URL https://web.archive.org/web/20201228171034/https:/www.lockheedmartin.com/en-us/capabilities/cyber/cyber-kill-chain.html. This Lockheed Martin webpage describes the Cyber Kill Chain framework, a methodology for identifying and preventing cyber intrusions as part of the company's Intelligence Driven Defense model. It outlines the sequence of steps an adversary must complete to achieve an objective, and is intended to help analysts understand attacker tactics and procedures.

ageint062. Cyber kill chain. URL https://en.wikipedia.org/wiki/Cyber_kill_chain. A Wikipedia article describing the cyber kill chain, a framework adapted by Lockheed Martin from a military concept to model how cyberattacks progress through distinct phases. It outlines seven stages from reconnaissance through actions on objectives, along with defensive countermeasures organizations can apply at each stage.

ageint063. Enterprise matrix - mitre att&ck(r). URL https://attack.mitre.org/matrices/enterprise/. The official MITRE ATT&CK Enterprise Matrix is a versioned knowledge base of tactics and techniques. Tactics describe adversary objectives, not mandatory sequential phases; technique matches alone do not establish an actor, attack progression, detection effectiveness or defensive coverage. The live page inspected on 2026-11-06 identifies version 20 and links https://attack.mitre.org/versions/v20/matrices/enterprise/.

ageint064. Mitre att&ck(r). URL https://attack.mitre.org. MITRE ATT&CK is a globally accessible knowledge base that catalogs adversary tactics and techniques drawn from real-world observations of cyber intrusions. The framework is organized into matrices covering Enterprise, Mobile, and Industrial Control Systems environments, with tactics representing adversary objectives and techniques describing specific methods used to achieve them.

ageint065. Enterprise techniques - mitre att&ck(r). URL https://attack.mitre.org/techniques/enterprise/. The Enterprise Techniques page of the MITRE ATT&CK framework, a cybersecurity knowledge base maintained by MITRE Corporation. It documents 222 enterprise techniques and 475 sub-techniques describing how adversaries achieve tactical goals across the attack lifecycle, organized by tactics such as initial access, persistence, privilege escalation, defense evasion, credential access, discovery, and impact.

ageint066. What is stix/taxii? - cloudflare. URL https://www.cloudflare.com/learning/security/what-is-stix-and-taxii/. A Cloudflare Learning Center explainer describing STIX and TAXII as complementary standards for cyber threat intelligence. STIX defines a structured language for representing threat information, while TAXII specifies how that information is transported and exchanged between systems. Together they form a framework that lets organizations share and consume threat intelligence in a consistent, machine-readable way to improve collective defense.

ageint067. Introduction to stix. URL https://oasis-open.github.io/cti-documentation/stix/intro.html. An introductory page from the OASIS CTI documentation explaining STIX (Structured Threat Information Expression), an open-source language and serialization format used to exchange cyber threat intelligence. It describes how STIX 2.1 models intelligence using 18 domain objects (such as attack patterns, malware, threat actors, and vulnerabilities) and 2 relationship objects, all represented as JSON.

ageint068. Oasis cyber threat intelligence (cti) tc. URL https://www.oasis-open.org/committees/tc_home.php?wg_abbrev=cti. The official committee page for the OASIS Cyber Threat Intelligence (CTI) Technical Committee, a standards body that develops formats for sharing cyber threat intelligence. It maintains the STIX (Structured Threat Information Expression) data model and the TAXII exchange protocol, both approved as OASIS standards in 2021, and organizes subcommittees for STIX, TAXII, and interoperability.

ageint069. Assessing nation-state-sponsored cyberattacks using aspects. URL https://onlinelibrary.wiley.com/doi/10.1111/1745-9133.12646. SIST guide bibliography entry.

ageint070. Getting harder to catch analyzing the evolution of china's cyber. URL https://www.cs.tufts.edu/comp/116/archive/fall2016/wdesombre.pdf. A 2016 student security paper by Winnona DeSombre (Tufts Comp116) analyzing the evolution of China's cyber espionage campaigns against the United States. Organized in three parts, it surveys China-US relations in the cyber domain and the policy dilemmas of attribution and shared terminology, presents a case study of the APT1 hacker group linked to PLA Unit 61398, and reviews broader trends in the context of the 2015 US-China Cyber Agreement.

ageint071. I led ir on nation-state attacks at mandiant, fireeye & crowdstrike. URL https://www.reddit.com/r/cybersecurity/comments/1q3k69c/ama_interest_check_i_led_ir_on_nationstate/. Attribution becomes harder when its open-source.

ageint072. Att&ck-based advanced persistent threat attacks risk propagation. URL https://www.sciencedirect.com/science/article/abs/pii/S1389128624002081. SIST guide bibliography entry.

ageint073. Solarwinds supply chain attack - fortinet. URL https://www.fortinet.com/resources/cyberglossary/solarwinds-cyber-attack. This Fortinet cybersecurity glossary page provides educational material about the SolarWinds supply chain attack. It explains how attackers compromised SolarWinds' Orion monitoring software with malicious code that spread to roughly 18,000 customers through software updates beginning in early 2020, and notes the attack's extended timeline and impact on U.S. federal agencies and major companies.

ageint074. How to protect against a supply chain compromise - vectra ai. URL https://www.vectra.ai/blog/takeaways-from-the-xz-utils-backdoor. A Vectra AI blog post from April 2024 analyzing the XZ Utils backdoor, a malicious commit discovered on March 29, 2024 in a widely used open-source compression library that could compromise affected systems via SSH. The article frames the incident as a supply chain compromise affecting both open-source and commercial software, drawing comparison to SolarWinds.

ageint075. The xz-utils backdoor: The supply chain rce that got caught. URL https://www.invicti.com/blog/web-security/xz-utils-backdoor-supply-chain-rce-that-got-caught. An Invicti Security blog post from April 2024 analyzing the xz-utils backdoor, a software supply chain compromise discovered in versions 5.6.0 and 5.6.1 of the compression library. It describes how malicious code was hidden in test files and assembled only during compilation, potentially enabling unauthenticated remote code execution via OpenSSH, and how a long-term contributor gradually gained maintainer trust before inserting it.

ageint076. Xz utils backdoor. URL https://en.wikipedia.org/wiki/XZ_Utils_backdoor. In early 2024, a malicious backdoor was discovered embedded in XZ Utils, a widely used compression library in Linux distributions, designed to enable unauthorized remote code execution via OpenSSH using an Ed448 private key. The perpetrator, operating under the pseudonym Jia Tan, spent over two years building trust as a contributor before inserting the exploit, which received a maximum CVSS score of 10.0.

ageint078. Advanced criminal investigations and intelligence operations: Tradecraft methods, practices, tactics, and techniques|paperback. URL https://www.barnesandnoble.com/w/advanced-criminal-investigations-and-intelligence-operations-robert-j-girod/1117653651. A Barnes & Noble listing for Advanced Criminal Investigations and Intelligence Operations by Robert J. Girod. The book examines tradecraft, defined as the methods, practices, and techniques used in espionage and clandestine investigations.

ageint079. Financial intelligence. URL https://en.wikipedia.org/wiki/FININT. The Wikipedia article on financial intelligence (FININT), defined as gathering information about the financial affairs of entities of interest to understand their nature, capabilities, and intentions. It outlines two core components: collection, in which Financial Intelligence Units gather transaction data and suspicious activity reports from banks, and analysis, in which specialists use data mining to detect tax evasion, money laundering, and terrorist financing.

ageint080. Financial intelligence. URL https://en.wikipedia.org/wiki/Financial_intelligence. A Wikipedia article on financial intelligence (FININT), the gathering and analysis of information about financial transactions to detect illicit activity such as money laundering, tax evasion, and terrorist financing. It distinguishes two core functions: collection of raw transaction data and suspicious activity reports by government financial intelligence units, and analysis using data-matching techniques to identify suspicious patterns.

ageint081. Financial intelligence. URL https://en.citizendium.org/wiki/Financial_intelligence. The Citizendium 'Financial intelligence' article was never written; the page is empty. Use an authoritative alternative source for financial intelligence definitions.

ageint082. Financial intelligence: A crucial pillar of national security. URL https://www.scirp.org/pdf/me_7204164.pdf. A 2025 article by Kevin Hk Chow in Modern Economy titled "Financial Intelligence: A Crucial Pillar of National Security." It argues that Financial Intelligence (FININT) serves as a critical interface between economic systems and national security, used to detect and disrupt illicit financial networks tied to money laundering, terrorism financing, and transnational crime.

ageint083. Jp 3-53, "doctrine for joint psychological operations". URL https://nsarchive2.gwu.edu/NSAEBB/NSAEBB177/02_psyop-jp-3-53.pdf. Joint Publication 3-53, the US Department of Defense joint doctrine for psychological operations. It establishes organizational structure, command relationships, planning processes, and approval authorities for integrating psychological operations into joint military campaigns and peacetime activities.

ageint084. Jp 3-53 doctrine for joint psychological operations. URL http://www.bits.de/NRANEU/others/jp-doctrine/jp3_53(96).pdf. Joint Publication 3-53, Doctrine for Joint Psychological Operations (Joint Chiefs of Staff, 10 July 1996). This US military doctrine document establishes the doctrinal basis for planning and conducting psychological operations in support of joint military operations.

ageint085. Military information support operations. URL https://www.esd.whs.mil/Portals/54/Documents/FOID/Reading%20Room/Joint_Staff/Military_Information_Support_Operations.pdf. SIST guide bibliography entry.

ageint086. Tactical psychological operations manual | pdf | computers. URL https://www.scribd.com/doc/127025030/FM-3-05-302-Tactical-Psychological-Operations-Tactics-Techniques-And-Procedures. A U.S. military field manual, FM 3-05.302, providing doctrine for tactical psychological operations at the unit level. The roughly 255-page document covers the organization of these units, command relationships when supporting joint forces, a multi-phase product development and assessment process, and how intelligence supports such operations. It serves as a comprehensive training and reference document for personnel involved in tactical influence operations.

ageint087. Fm 3-05.301 psychological operations process tactics, techniques. URL https://info.publicintelligence.net/USArmy-PsyOpsTactics.pdf.

ageint088. Soviet 'active measures' forgery, disinformation, political operations. URL https://www.cia.gov/readingroom/document/cia-rdp84b00049r001303150031-0. A U.S. Department of State Bureau of Public Affairs report from October 1981, released under FOIA. It catalogs Soviet 'active measures' - the Soviet term for covert influence operations - including written disinformation, control of foreign media, use of front organizations, clandestine broadcasting, blackmail, and political influence operations. Specific cases include Soviet forgeries related to the 1979 Grand Mosque seizure and NATO theater nuclear force debates.

ageint089. Soviet active measures and disinformation: Overview and assessment. URL https://www.cia.gov/readingroom/document/cia-rdp91-00901r000600200001-2. An article by Dennis Kux published in Parameters: Journal of the US Army War College (1985) and preserved in the CIA CREST archive. It defines and distinguishes Soviet 'disinformation' and 'active measures,' situating them within a spectrum of white, gray, and black foreign influence operations. Kux examines KGB front groups, agents of influence, forgeries, and the broader strategic goal of tarnishing Western governments while advancing Soviet foreign policy.

ageint090. "soviet active measures: Forgery, disinformation, political operations". URL https://www.cia.gov/readingroom/document/cia-rdp84b00274r000100040004-8. A CIA CREST record (October 1981, released March 2007) comprising a routing and record sheet from the PCS/PGLO office dated February 8, 1982, attached to the same Department of State Special Report No. 88 on Soviet active measures. The document is catalogued as an open-source CREST entry and captures the internal CIA circulation of the State Department's public report on Soviet forgery and disinformation operations.

ageint091. Soviet active measures and disinformation. URL https://www.cia.gov/readingroom/document/cia-rdp89g00720r000500060008-2. A declassified-in-part 1986 CIA speech text on Soviet active measures, prepared by the Foreign Activities Branch, Third World Activities Division, Office of Soviet Analysis. It explains the KGB's use of forgeries, disinformation, and front organizations to covertly influence foreign governments and publics, illustrating with the forged 1984 Olympic KKK leaflet operation designed to discourage participation in the Los Angeles Games.

ageint092. Introduction. URL https://crestresearch.ac.uk/download/2409/19-025-01.pdf. A March 2019 CREST (Centre for Research and Evidence on Security Threats) report titled "Russia and Disinformation: Maskirovka," prepared by scholars of Russian foreign and security policy using open-source and Russian-language primary material. It examines the historical background of Soviet and Russian disinformation, including the concept of active measures, and how disinformation is woven into strategic narratives and diplomacy.

ageint093. Deception, disinformation, and strategic communications. URL https://cs.brown.edu/people/jsavage/Deterrence/2012_NDU_ActiveMeasuresWorkingGroup.pdf. Fletcher Schoen and Christopher J. Lamb, 'Deception, Disinformation, and Strategic Communications: How One Interagency Group Made a Major Difference,' INSS Strategic Perspectives No. 11 (NDU Press, June 2012). The study examines the U.S. Active Measures Working Group, a small interagency committee formed in the 1980s to expose and counter Soviet disinformation, and analyzes why it succeeded where most such groups fail.

ageint094. Deception, disinformation, and strategic communications: How one interagency group made a major difference. URL https://digitalcommons.ndu.edu/cgi/viewcontent.cgi?article=1031&context=inss-strategic-perspectives. Fletcher Schoen and Christopher J. Lamb, 'Deception, Disinformation, and Strategic Communications: How One Interagency Group Made a Major Difference,' INSS Strategic Perspectives No. 11 (NDU Press, June 2012).

ageint095. Cognitive security in the age of ai. URL https://www.academia.edu/144939778/COGNITIVE_SECURITY_IN_THE_AGE_OF_AI. SIST guide bibliography entry.

ageint096. Ai development should prioritize cognitive security. URL https://openreview.net/pdf?id=5pShDP8LSm. A position paper (Stanford authors, ICLR 2026 workshop) arguing that AI research and development should prioritize cognitive security, defined as protecting human cognitive processes from hazardous influence. It notes that generative AI systems increasingly designed to influence beliefs and behavior raise acute governance concerns, while research on these effects remains fragmented.

ageint097. The history of social engineering - mitnick security consulting. URL https://www.mitnicksecurity.com/the-history-of-social-engineering. This Mitnick Security guide traces the history and evolution of social engineering from antiquity through modern cyberattacks. It surveys major attack categories including phishing and its variants, pretexting, baiting, tailgating, and quid pro quo schemes, and explains the psychological influence principles such as reciprocity, scarcity, authority, and consensus that attackers exploit.

ageint098. Social engineering: T he science of human hacking - the swiss bay. URL https://theswissbay.ch/pdf/Books/Computer%20science/social engineering_thescienceofhumanhacking_2ndedition.pdf. The full text of "Social Engineering: The Science of Human Hacking" (2nd edition, 2018) by Christopher Hadnagy, published by John Wiley & Sons. The book examines the human element of security, analyzing how manipulation and persuasion techniques can be used to influence people, and how individuals and organizations can recognize and defend against such tactics. It is written as a professional reference on understanding and countering human-targeted security threats.

ageint099. Social engineering: The art of human hacking. URL https://ia801200.us.archive.org/33/items/TheAgeOfManipulationWilsonBryanKey/Social%20Engineering%20-%20the%20Art%20of%20Human%20Hacking.pdf. A PDF of the book Social Engineering: The Art of Human Hacking by Christopher Hadnagy, a foundational security text on how attackers exploit human psychology rather than technical flaws to obtain information or access. The work surveys manipulation tactics and the human factors that make organizations vulnerable, and frames this knowledge defensively to help security professionals recognize and resist such attacks.

ageint100. A survey on large language model-based agents in autonomous. URL https://arxiv.org/html/2505.12786v2. This survey examines how large language model-based agents can be weaponized as autonomous cyberattack tools, analyzing their architecture across five core components: models, perception, memory, reasoning and planning, and tools. The authors document eight attack categories and map them across static infrastructure, mobile networks, and infrastructure-free systems such as blockchain and the metaverse.

ageint101. Information warfare: An air force policy for the role of public affairs. URL https://media.defense.gov/2017/Dec/28/2001861671/-1/-1/0/T_0037_CRUMM_INFORMATION_WARFARE.PDF. SIST guide bibliography entry.

ageint102. Information warfare and deception. URL https://www.inform.nu/Articles/Vol9/v9p213-223Hutchinson64.pdf. A 2006 paper by William Hutchinson published in the journal Informing Science. It examines the history of information warfare and the increasingly central role of deception within it, tracing the concept from its late-1980s origins as a technology-oriented military tactic for command-and-control dominance to a broader recognition of information itself as both weapon and target.

ageint103. Military deception | journal of information warfare. URL https://www.jinfowar.com/tags/military-deception. A topic page from the Journal of Information Warfare collecting scholarly articles on military deception. Featured pieces argue that information operations officers should be conceptualized primarily as deception officers, and one quantitative reassessment reports that deception is employed in roughly 30 to 53 percent of military operations.

ageint104. The utility of military deception and information operations. URL https://smallwarsjournal.com/2025/06/26/the-utility-of-military-deception/. An essay published in Small Wars Journal (June 2025) by a U.S. Army Civil Affairs officer arguing that military deception and information operations have become central to modern conflict.

ageint105. Automated influence and the challenge of cognitive security. URL https://dl.acm.org/doi/10.1145/3384217.3385615. Sarah Rajtmajer and Daniel Susser, 'Automated Influence and the Challenge of Cognitive Security,' in Hot Topics in the Science of Security (HotSoS '20), April 2020, ACM. The paper argues that AI-powered computational propaganda poses national security threats that existing ethical frameworks do not address, and proposes 'cognitive security' as a productive conceptual lens for evaluating the ethics of automated influence operations and potential defensive responses.

ageint106. Applications of the active inference and the free-energy principle. URL https://repository.tudelft.nl/file/File_e789366f-e00d-49c3-b0ef-333dd27356f3?preview=1. A 2024 bachelor's thesis by Lara Sakarya at Delft University of Technology presenting a systematic literature review of the active inference framework and the free-energy principle as applied to mimicking social human behavior in intelligent agents. It explains active inference as a theory describing behavior that minimizes surprise, and surveys model variants such as deep active inference, multimodal deep belief networks, predictive coding, and probabilistic programming.

ageint107. Behavioral outcomes of human cognitive security. URL https://arxiv.org/html/2603.01355v1. An arXiv research paper (March 2026) proposing an integrative modeling framework for human cognitive security, defined as the degree to which people rely on truthful information to make truth-aligned judgments. It synthesizes Bayesian belief-updating with Prospect Theory to model how cognitive resources and emotional valuation shape behavior, and identifies three observable outcomes: veracity discernment, task-oriented actions, and information sharing.

ageint108. Critical thinking techniques - cdse. URL https://www.cdse.edu/Portals/124/Documents/jobaids/insider/INT250-critical-thinking-techniques.pdf. A Tradecraft Primer: Structured Analytic Techniques for Improving. Intelligence Analysis.

ageint109. The 'grey zone' and hybrid activities | connections-qj.org. URL http://connections-qj.org/article/grey-zone-and-hybrid-activities. This is a peer-reviewed article in Connections: The Quarterly Journal (Vol. 21, No. 2, Spring 2022) by Peter Dobias and Kyle Christensen examining military competition below the threshold of armed conflict. It analyzes how Russia, China, and Iran operate in the space between peace and war, describing Russia's emphasis on information measures, China's maritime and force approaches, and Iran's anti-access and proxy strategies.

ageint110. A full spectrum of conflict design: How doctrine should embrace. URL https://irregularwarfare.org/articles/a-full-spectrum-of-conflict-design-how-doctrine-should-embrace-irregular-warfare/. An article by Dr. Robert S. Burrell on the Irregular Warfare Initiative arguing that U.S. military doctrine inadequately addresses gray zone and hybrid warfare. It proposes a two-dimensional framework spanning peace-to-war and direct-to-indirect means, yielding four approaches: traditional warfare, deterrence, irregular warfare, and competition.

ageint111. Anonymous no more: Countering the gray zone threat - from mipb. URL https://mipb.ikn.army.mil/issues/continuous-transformation-2025/anonymous-no-more/. An article in the U.S. Army's Military Intelligence Professional Bulletin on countering gray zone threats. It discusses how adversaries operate below the threshold of open conflict using hybrid activities across tactical, operational, and strategic levels, and considers how military intelligence can identify and attribute actors who attempt to remain anonymous. The piece is framed around adapting intelligence practice to contemporary competition short of war.

ageint112. Full text of "special forces unconventional warfare". URL https://archive.org/stream/SpecialForcesUnconventionalWarfare/Special%20Forces%20Unconventional%20Warfare_djvu.txt. This U.S. Army Training Circular (TC 18-01) defines the Special Forces concept for planning and conducting unconventional warfare operations, covering how units enable and support resistance movements in denied or hostile territory. It presents a seven-phase operational framework encompassing psychological preparation, infiltration, organization of underground and guerrilla forces, employment, and transition.

ageint113. Fm 3-05.130 army special operations forces unconventional. URL https://www.bits.de/NRANEU/others/amd-us-archive/fm3-05.130(08).pdf. U.S. Army Field Manual FM 3-05.130, "Army Special Operations Forces Unconventional Warfare," published by Headquarters, Department of the Army in September 2008. The manual is organized into chapters covering an introduction to warfare types, the instruments of United States national power, national policy and doctrine, and planning considerations including the seven phases of unconventional warfare and the role of Army Special Operations Forces.

ageint114. Army special operations forces unconventional warfare. URL https://irp.fas.org/doddir/army/fm3-05-130.pdf. FM 3-05.130, Army Special Operations Forces Unconventional Warfare (Headquarters, Department of the Army, 30 September 2008). The manual defines unconventional warfare and situates it within U.S. national power, covering the seven phases of UW operations, Special Forces missions, psychological operations, civil affairs operations in the UW context, and the roles of supporting elements including interagency partners.

ageint115. Army special operations forces intelligence. URL https://irp.fas.org/doddir/army/fm3-05-102.pdf. FM 3-05.102, Army Special Operations Forces Intelligence (Headquarters, Department of the Army). The manual addresses intelligence and electronic warfare (IEW) support across Army Special Operations Force components, covering Special Forces, Rangers, ARSOA, PSYOP, and Civil Affairs operations.

ageint116. Army special operations forces intelligence. URL https://www.bits.de/NRANEU/others/amd-us-archive/fm3-05.102(01).pdf. A U.S. Army field manual, FM 3-05.102 (Army Special Operations Forces Intelligence), dated 2001 and superseding FM 34-36, distributed with restrictions to U.S. government agencies. The manual gives special operations forces commanders and staff a doctrinal overview of intelligence support to their missions, covering force structure, training, and operational requirements consistent with joint doctrine.

ageint117. Office of strategic services (oss) manuals | the resistance hub. URL https://smallwarsjournal.com/2025/11/09/office-of-strategic-services-oss-manuals-the-resistance-hub/. An article from Small Wars Journal (affiliated with Arizona State University) announcing that The Resistance Hub has compiled declassified Office of Strategic Services (OSS) manuals for public access. The OSS was the WWII predecessor to the CIA, and the documents illustrate how the United States organized clandestine activities in occupied Europe and Asia.

ageint118. Special operations field manual, strategic services (provisional. URL https://archive.org/details/SpecialOperationsFieldManualStrategicServicesprovisional. A digitized World War II field manual from the Internet Archive, the Special Operations Field Manual, Strategic Services (provisional), issued July 18, 1944 by the U.S. Office of Strategic Services (OSS). The 32-page manual sets out the authorized functions, operational plans, methods, and organization of OSS Maritime Units and the broader Special Operations Branch.

ageint119. office of strategic services - arsof history. URL https://arsof-history.org/pdf/book_office_of_strategic_services_primer_and_manuals.pdf. SIST guide bibliography entry.

ageint120. Principles tradecraft. URL https://ia803205.us.archive.org/23/items/PrinciplesOfTradecraft/Principles%20of%20Tradecraft.pdf. Principles of Tradecraft, a 1995 publication by Militia Free Press (a subsidiary of The Resister). The document presents an overview of intelligence and espionage concepts, with chapters covering an introduction to espionage, agents (typology, identification, recruitment, and handling), and agent organization and management including personnel and structures. It is framed as an introductory treatment rather than a comprehensive reference on intelligence requirements.

ageint121. How the kgb handled information - blockint. URL https://www.blockint.nl/methods/how-the-kgb-handled-information/. This is a Blockint blog post by Ludo Block, published in October 2022, analyzing a KGB training manual on information handling released by the Free Russia Foundation. The manual, written for foreign intelligence officers, sets out six requirements for valuable intelligence and a framework for evaluating sources based on past performance and competence.

ageint122. The lubyanka files - free russia foundation think tank. URL https://thinktank.4freerussia.org/the-lubyanka-files/. SIST guide bibliography entry.

ageint123. Full text of "kgb alpha team training manual" - internet archive. URL https://archive.org/stream/KGBAlphaTeamTrainingManual/KGB%20Alpha%20Team%20Training%20Manual_djvu.txt. A 1993 Paladin Press publication presenting a translated Soviet special-operations training text attributed to A. I. Dolmatov, accompanied by an extensive preface by Western trainer Jim Shortt. The preface traces the evolution of Soviet special forces from the 1917 revolution through the Cold War and describes organizations such as the KGB, MVD, and GRU and units including Alpha, Spetsnaz, and OMON.

ageint124. The logician (the zinoviev's case). folder 46. the chekist. URL http://zinoviev.info/wps/archives/459. This article draws on the Mitrokhin Archive, compiled by defected KGB archivist Vasili Mitrokhin, to document Soviet state surveillance of dissident philosopher Alexander Zinoviev, who was assigned the codename Logician by the KGB's Fifth Chief Directorate. Zinoviev faced professional retaliation including revocation of his doctorate and expulsion from the Communist Party following the publication of satirical anti-Soviet works such as Yawning Heights.

ageint125. Mitrokhin archive. URL https://wilson-center-digital-archive.dvincitest.com/topics/mitrokhin-archive. The Wilson Center Digital Archive link for the Mitrokhin Archive is a dead staging domain. The Mitrokhin Archive documents Soviet KGB history; use the published Cambridge University Press edition or Wilson Center production archive instead.

ageint126. Mitrokhin archive. URL https://en.wikipedia.org/wiki/Mitrokhin_Archive. A Wikipedia article on the Mitrokhin Archive, a collection of handwritten notes made by KGB archivist Vasili Mitrokhin documenting Soviet intelligence operations from the 1930s through the 1980s. Mitrokhin secretly copied files between 1972 and 1984 while overseeing the relocation of KGB foreign intelligence archives, and after the Soviet collapse defected to the UK in 1992 with the material.

ageint127. The mitrokhin archive : the kgb and the world. URL https://archive.org/details/mitrokhinarchive0000andr_c0s1. An Internet Archive record for The Mitrokhin Archive: The KGB and the World, a two-volume work by Christopher Andrew published in 1999 by Allen Lane, running to roughly 1,050 pages. The volumes draw on materials compiled by former KGB officer Vasili Mitrokhin to document Soviet intelligence operations, with the first volume covering the KGB in Europe and the West and the second addressing the KGB and the wider world.

ageint128. Full text of "the secret war the office of strategic services in world. URL https://archive.org/stream/bub_gb_P3OIFS_yzyUC/bub_gb_P3OIFS_yzyUC_djvu.txt. SIST guide bibliography entry.

ageint129. Oss resources - office of strategic services society. URL https://www.osssociety.org/links.html. A resource directory page from the Office of Strategic Services Society, a historical organization dedicated to preserving the record of the WWII-era OSS. The page functions as a curated library of links to external sites covering OSS history, including operations, related organizations, notable figures such as William Donovan and Allen Dulles, educational materials, and geographic theaters.

ageint130. The official cia manual of trickery and deception. URL https://ia801604.us.archive.org/31/items/cia-manual-trickery-deception-2009/cia-manual-trickery-deception-2009.pdf. A reproduction of a Cold War-era manual written by magician John Mulholland for the CIA, presented with commentary by H. Keith Melton and Robert Wallace as "The Official CIA Manual of Trickery and Deception." The book situates the manual within the history of the MKULTRA program and the long-missing magic manuals, and reproduces Mulholland's guidance on applying sleight-of-hand and misdirection techniques to covert operational tasks.

ageint131. Center for the study of intelligence - csi. URL https://www.cia.gov/resources/csi/. SIST guide bibliography entry.

ageint132. Studies in intelligence. URL https://www.cia.gov/resources/csi/studies-in-intelligence/. Studies in Intelligence is the CIA's professional journal, published by the Center for the Study of Intelligence (CSI). It covers historical, analytical, and methodological topics across the intelligence profession, and is issued quarterly in partially declassified extract form. As of 2026 the archive holds 110 issues, with the most recent being Volume 70, No. 1 (March 2026); articles are written by intelligence community professionals under their own names or pen names.

ageint133. Studies in intelligence: New articles from the cia's in-house journal. URL https://nsarchive2.gwu.edu/NSAEBB/NSAEBB493/. This is a National Security Archive briefing book presenting declassified articles from the CIA's internal journal Studies in Intelligence, first published in 1955. The collection gathers articles obtained through Freedom of Information Act requests and litigation, spanning CIA history from the Kennedy era through the post-9/11 period.

ageint134. What is your reading list for (counter)intelligence/tradecraft? URL https://www.reddit.com/r/Intelligence/comments/cw1rav/what_is_your_reading_list_for/. SIST guide bibliography entry.

ageint135. The origins of the ukusa agreement. URL https://unredacted.uk/briefings/ukusa-origins/. A briefing from Unredacted, a UK investigative outlet, covering the early development of the UKUSA Agreement, the postwar US-UK signals-intelligence framework that became the basis for the Five Eyes alliance. It traces the 1946 BRUSA agreement on intelligence exchange, Canada's negotiation toward equal partnership in 1949, and the gradual integration of Australia and New Zealand through the 1950s.

ageint136. Mossad's secretive operations and reputation - facebook. URL https://www.facebook.com/groups/kakampinoy/posts/798254539769053/. SIST guide bibliography entry.

ageint137. [2601.12560] agentic artificial intelligence (ai). URL https://arxiv.org/abs/2601.12560. An arXiv paper surveying the shift from passive language models to Agentic AI, where large language models act as cognitive controllers that combine memory, tool use, and environmental feedback to pursue extended goals. It proposes a unified taxonomy organizing agent systems into six components: perception, brain, planning, action, tool use, and collaboration.

ageint138. Agentic artificial intelligence (ai): Architectures, taxonomies. URL https://arxiv.org/html/2601.12560v1. An arXiv survey paper on agentic AI examining the shift from generative systems to autonomous agents that perceive, reason, plan, and act. It proposes a unified taxonomy decomposing LLM-based agents into six dimensions: core components, cognitive architecture, learning paradigms, multi-agent systems, environments and domains, and evaluation and safety.

ageint139. Agentic ai design patterns by andrew ng. URL https://www.linkedin.com/posts/aishwarya-srinivasan_agentic-ai-design-patterns-are-emerging-as-activity-7336419057639772165-Uuni. A LinkedIn post by Aishwarya Srinivasan discussing agentic AI design patterns for building production-grade AI agents.

ageint140. The agentic ai landscape and its conceptual foundations | oecd. URL https://www.oecd.org/content/dam/oecd/en/publications/reports/2026/02/the-agentic-ai-landscape-and-its-conceptual-foundations_a9d4b451/396cf758-en.pdf. An OECD Artificial Intelligence Paper (No. 56, February 2026) titled "The Agentic AI Landscape and Its Conceptual Foundations," prepared by OECD staff with an expert group.

ageint141. Agentic ai, explained | mit sloan. URL https://mitsloan.mit.edu/ideas-made-to-matter/agentic-ai-explained. An MIT Sloan explainer article on agentic AI, defining autonomous software systems that perceive, reason, and act to complete multi-step tasks with minimal human intervention. It distinguishes such agents from chatbots, cites a 2025 MIT Sloan/BCG survey finding 35% of companies had deployed agents with 44% planning to, and reviews business applications such as fraud detection and customer service.

ageint142. Agentic ai: A comprehensive survey of architectures, applications. URL https://arxiv.org/abs/2510.25445. The arXiv abstract page for "Agentic AI: A Comprehensive Survey of Architectures, Applications," a 2025 paper by Mohamad Abou Ali and Fadi Dornaika. Based on a PRISMA systematic review of roughly 90 studies from 2018 to 2025, it proposes a dual-paradigm framework distinguishing symbolic/classical systems based on algorithmic planning and persistent state from neural/generative systems driven by stochastic generation and prompt orchestration.

ageint143. Agentic ai architectures and design patterns | by anil jain. URL https://medium.com/@anil.jain.baba/agentic-ai-architectures-and-design-patterns-288ac589179a. A Medium article by Anil Jain (2025) surveying agentic AI system architectures and design patterns. It defines agentic AI as systems capable of independent decision-making, reviews frameworks such as LangChain, LlamaIndex, and AutoGen, and describes five system components: perception, decision-making, action, memory, and communication.

ageint144. Agentic ai patterns and workflows on aws. URL https://docs.aws.amazon.com/prescriptive-guidance/latest/agentic-ai-patterns/introduction.html. An AWS Prescriptive Guidance document (July 2025) introducing agentic AI patterns and workflows. It presents reusable design templates for building AI agent systems that operate with autonomy while remaining controllable and aligned with goals, aimed at architects, developers, and product leaders.

ageint145. A scalable design pattern for agentic ai systems. URL https://arxiv.org/html/2505.06817v1. This is an arXiv research paper by Sivasathivel Kandasamy titled "Control Plane as a Tool: A Scalable Design Pattern for Agentic AI Systems." It proposes an architectural pattern in which AI agents interact with a single control-plane interface that handles tool routing and selection, rather than exposing many tools directly.

ageint146. Agentic ai frameworks: Key components & top 8 options in 2026. URL https://www.exabeam.com/explainers/agentic-ai/agentic-ai-frameworks-key-components-top-8-options/. An Exabeam explainer describing agentic AI frameworks as software toolkits that provide pre-built components and architectures for building autonomous AI agents. It outlines core elements such as agent coordination, tool integration, memory management, workflow definition, and deployment monitoring, and reviews eight frameworks including LangGraph, AutoGen, CrewAI, LlamaIndex, Haystack, DSPy, and Semantic Kernel.

ageint147. Agent framework security | redteams.ai. URL https://redteams.ai/topics/agentic-exploitation/agent-frameworks. SIST guide bibliography entry.

ageint148. How riverside research advances agentic ai for national security. URL https://www.riversideresearch.org/insights/leaning-forward-how-riverside-research-advances-agentic-ai-for-national-security. This article by Riverside Research traces AI's evolution from large language models through retrieval-augmented systems, single-task agents, collaborative agentic systems, and toward emergent multi-agent autonomy capable of managing surveillance and decision support at operational speed.

ageint149. What is agentic ai in security operations? autonomous soc agents. URL https://simbian.ai/blog/agentic-ai-security-operations-autonomous-soc-agents-explained. A 2025 blog article from Simbian AI explaining the application of agentic AI to security operations centers. It describes an architecture organized into perception, cognitive, and action modules, and a coordinated framework of specialized agents for tasks such as alert triage, threat investigation, and vulnerability management.

ageint150. The right role for agentic ai in security operations. URL https://www.cybersecuritytribe.com/articles/the-right-role-for-agentic-ai-in-security-operations. An article from Cybersecurity Tribe examining where autonomous AI should and should not operate within security operations, drawing on survey data and commentary from numerous security experts. It identifies high-volume, repetitive tasks such as alert triage and policy validation as well suited to automation, while warning against autonomous handling of irreversible or high-impact decisions affecting infrastructure and access.

ageint151. A practical guide to prebunking misinformation - inoculation science. URL https://inoculation.science/a-practical-guide-to-prebunking-misinformation/. A practitioner guide from Inoculation Science explaining prebunking as a proactive strategy to build preemptive resilience to misinformation. Grounded in inoculation theory, it describes how exposing people to weakened forms of manipulative content can help them develop resistance before they encounter it in the wild.

ageint153. Agentic ai is exploding, but which framework should you bet on? URL https://www.linkedin.com/posts/eordax_ai-genai-agents-activity-7357708242187149312-fBCO. SIST guide bibliography entry.

ageint154. Crewai. URL https://crewai.com. The homepage of CrewAI, a commercial platform for building, deploying, and managing AI agents at scale for enterprises. It presents the product as covering the full lifecycle from identifying automation opportunities to launching and optimizing multi-agent workflows while maintaining enterprise-level control.

ageint155. Model context protocol (mcp): Security design considerations. URL https://www.nsa.gov/Portals/75/documents/Cybersecurity/CSI_MCP_SECURITY.pdf?ver=bmgiSbNQLP6Z_GiWtRt6bg%3D%3D. NSA cybersecurity information sheet on Model Context Protocol (MCP) security design considerations for AI-driven automation. It provides organizational design guidance for assessing MCP implementation risks and adoption safeguards; it is not evidence of experimental attack success rates, a vulnerability-scanner evaluation, or demonstrated control efficacy.

ageint156. Mcp security 101: A new protocol for agentic ai - protect ai. URL https://protectai.com/blog/mcp-security-101. A Protect AI blog post (April 2025) introducing the Model Context Protocol (MCP), the open-source layer Anthropic introduced in November 2024 to standardize how large language model applications connect to data sources and tools. The article explains how MCP acts as middleware between models and downstream services and surveys associated security risks, including overly broad permissions, unvetted servers, exposed endpoints, and limited monitoring.

ageint157. Building agentic ai with mcp - bandwidth. URL https://www.bandwidth.com/blog/agentic-ai-mcp/. This is a Bandwidth blog post explaining how the Model Context Protocol (MCP) supports agentic AI systems that can assess context and take actions rather than only respond to prompts. Using a contact-center voice agent example, it describes MCP as a standard for letting AI models interact securely with external tools, APIs, and data sources, and covers instructions versus multi-step workflows.

ageint158. Ai spotlight: Mcp (model context protocol) and agentic ai systems. URL https://www.gravitee.io/blog/mcp-model-context-protocol-agentic-ai. A Gravitee blog post explaining the Model Context Protocol (MCP), an open standard developed by Anthropic for how applications provide context and tools to large language models. It compares MCP to a universal connector that replaces custom per-tool integrations, describing an architecture of hosts, clients, and servers and benefits such as reusability, provider flexibility, and improved access controls. The post situates MCP within the broader growth of agentic AI systems.

ageint159. Security risks of agentic ai: A model context protocol (mcp. URL https://businessinsights.bitdefender.com/security-risks-agentic-ai-model-context-protocol-mcp-introduction. A September 2025 Bitdefender Business Insights article by Martin Zugec examining security risks in the Model Context Protocol, the standard introduced by Anthropic for connecting AI agents to external tools and data. It identifies concerns including weak default authentication, supply-chain exposure from compromised tools, over-permissioned access tokens, injection and context-poisoning attacks, and gaps in audit logging for agentic workflows.

ageint160. Breaking down the top 12 papers on agentic ai governance. URL https://www.linkedin.com/posts/oliver-patel_breaking-down-the-top-12-papers-on-agentic-activity-7355531066830376960-ynF3. Oliver Patel compiled a three-part series summarizing twelve influential research papers on governing autonomous AI systems, organized around themes of security and safety, infrastructure and principal-agent theory, and regulatory and capability assessment. The papers collectively argue that governance cannot be applied reactively after agents act but must instead be embedded at the architectural level, preventing unauthorized autonomous behavior before it occurs.

ageint161. New governance frameworks offer a roadmap for managing risks. URL https://www.dwt.com/blogs/artificial-intelligence-law-advisor/2026/01/roadmap-for-managing-risks-unique-to-agentic-ai. A January 2026 article from the law firm Davis Wright Tremaine on governance frameworks for agentic AI. It argues that autonomous, adaptive AI systems pose distinct risks, such as unauthorized or erroneous actions, biased decisions, data breaches, and opaque audit trails, that require governance beyond existing AI frameworks.

ageint162. Agentic ai report reveals need for reliable autonomous operations. URL https://www.dynatrace.com/news/blog/agentic-ai-report-reliable-autonomous-operations/. A Dynatrace blog post summarizing its Pulse of Agentic AI 2026 report, based on a survey of over 900 organizational leaders on enterprise adoption of agentic AI. It finds high adoption in IT operations alongside planned budget increases, while identifying barriers to scaling including security and compliance concerns, difficulty monitoring agents, and unclear autonomy boundaries.

ageint163. Karl friston's groundbreaking research lays the foundation. URL https://deniseholt.us/verses-ais-groundbreaking-research-lays-the-foundation-for-shared-natural-super-intelligence/. An article on deniseholt.us covering a 2024 paper by VERSES AI researchers, led by Mahault Albarracin and co-authored by Karl Friston, titled Shared Protentions in Multi-Agent Active Inference. It explains how intelligent agents can develop shared, mutually aligned expectations about future states that enable coordinated group behavior without explicit communication, drawing on Husserl's work on temporal consciousness.

ageint164. Verses to present research at active inference workshop. URL https://www.verses.ai/news/verses-to-present-research-at-the-5th-international-workshop-on-active-inference-iwai-2024. A press release from VERSES AI (August 2024) announcing that the company would act as lead sponsor of and present research at the 5th International Workshop on Active Inference (IWAI 2024) in Oxford. It states that VERSES researchers had 12 accepted papers spanning foundational capabilities, multi-agent systems, applications, and ethics, and that the company's chief scientist Karl Friston would speak.

ageint165. Unveiling the multifaceted concept of cognitive security. URL https://www.sciencedirect.com/science/article/pii/S0160791X25001460. SIST guide bibliography entry.

ageint166. Defining comprehensive cognitive security in the digital era: Literature review and concept analysis. URL https://papers.ssrn.com/sol3/papers.cfm?abstract_id=5030171. SIST guide bibliography entry.

ageint167. Unveiling the multifaceted concept of cognitive security. URL https://www.linkedin.com/posts/fran-casino-212783133_unveiling-the-multifaceted-concept-of-cognitive-activity-7341025497276895233-cJpS. A LinkedIn post by Fran Casino announcing a research article titled 'Unveiling the multifaceted concept of cognitive security: Trends, perspectives, and future challenges,' published in the Elsevier journal Technology in Society. The post describes the work as a literature review that analyzes definitions, challenges, and future trends in cognitive security and proposes a redefinition based on the concept's core components.

ageint168. Darpa seeks proposals for intrinsic cognitive security program. URL https://potomacofficersclub.com/news/darpa-seeks-proposals-for-intrinsic-cognitive-security-program/. A Potomac Officers Club news article reporting on a DARPA request for proposals under its Intrinsic Cognitive Security program. The program seeks to protect mixed reality devices from cognitive attacks using mathematical approaches called formal methods, addressing risks such as flooding a device with information to induce motion sickness, distraction, or false alarms.

ageint169. Ics | darpa. URL https://www.darpa.mil/research/programs/intrinsic-cognitive-security. This is an official DARPA program page for the Intrinsic Cognitive Security (ICS) program, which addresses vulnerabilities in mixed reality systems that could be exploited through cognitive attacks. The program aims to develop formal mathematical methods that guarantee mixed reality designs can protect users against adversarial interference.

ageint170. Intrinsic cognitive security (ics) - highergov. URL https://www.highergov.com/grant-opportunity/intrinsic-cognitive-security-ics-350593/. A HigherGov listing for the DARPA Intrinsic Cognitive Security (ICS) research solicitation, which seeks to develop tactical mixed-reality systems that protect users against cognitive attacks using formal methods with cognitive safeguards. The program is structured as a 36-month effort in two 18-month phases, with defined funding ranges for a mixed-reality cognition technical area and an evaluation technical area.

ageint171. Darpa preps program to protect mixed reality users. URL https://www.reddit.com/r/Futurology/comments/176yx4u/darpa_preps_program_to_protect_mixed_reality/. SIST guide bibliography entry.

ageint172. The ethics of cognitive security - yorkspace. URL https://yorkspace.library.yorku.ca/server/api/core/bitstreams/f82a16e0-41eb-4387-9517-dcc5277027c1/content. This 2023 York University doctoral dissertation by Andrew Ward Buzzell provides an ethical and epistemic assessment of state power exercised to defend against information threats, a domain the author terms cognitive security.

ageint173. Epistemic security - elizabeth seger. URL https://elizabethseger.com/epistemic-security/. A project page from AI governance and ethics researcher Elizabeth Seger introducing the concept of epistemic security: protecting the processes through which information is created, distributed, and consumed in society. It discusses information threats to democracies such as disinformation, eroding trust in institutions, polarization, and the misuse of generative AI, and how technologies shape knowledge production.

ageint174. Epistemic security 2029: Fortifying the uk's information supply. URL http://demos.co.uk/wp-content/uploads/2025/02/Epistemic-Security-2029_accessible.pdf. A February 2025 Demos report by Elizabeth Seger, Hannah Perry, and Jamie Hancock on strengthening the UK's information supply chain. It frames epistemic security, securing healthy and robust flows of trustworthy information, as essential to countering what it calls a democratic emergency driven by institutional distrust, the decline of local news, and concentrated control of information by social media platforms.

ageint175. Tackling threats to informed decision- making in democratic societies. URL https://www.turing.ac.uk/sites/default/files/2020-10/epistemic-security-report_final.pdf. A 2020 Alan Turing Institute report, authored by Elizabeth Seger, Shahar Avin, and colleagues from Cambridge and the UK Defence Science and Technology Laboratory, on promoting epistemic security in technologically advanced democracies. It examines threats to informed decision-making and collective action, analyzing vulnerabilities in social epistemic infrastructures such as adversaries and blunderers, attention scarcity, group polarization, and the erosion of trust.

ageint176. Understanding the neurocognitive mechanisms of cognitive security. URL https://www.sciencedirect.com/science/article/abs/pii/S0149763425004490X. SIST guide bibliography entry.

ageint177. Understanding the neurocognitive mechanisms of cognitive security. URL https://pubmed.ncbi.nlm.nih.gov/41167441/. A peer-reviewed review article published in Neuroscience & Biobehavioral Reviews (December 2025) by Crum and colleagues examining the neurocognitive mechanisms of cognitive security. The authors synthesize research on why people fall victim to false or deceptive information, proposing that certain brain systems are more exploitable than others.

ageint178. Neuro-cognitive approaches to cybersecurity: a systematic review. URL https://www.emerald.com/ics/article/doi/10.1108/ICS-03-2024-0076/1332910/Neuro-cognitive-approaches-to-cybersecurity-a. A January 2026 systematic review in Information and Computer Security by the researcher Kritika, titled "Neuro-cognitive approaches to cybersecurity." It integrates findings from neuroscience and cognitive psychology to analyze the human factor in security, examining how cognitive and neurological insights can improve security awareness education, behavioral policy development, insider threat detection, and user interface design.

ageint179. Survey of metrics for cognitive load in intelligence community. URL https://ncsu-las.org/2024/11/survey-of-metrics-for-cognitive-load-in-intelligence-community-settings/. An NCSU Laboratory for Analytic Sciences article summarizing a systematic survey of metrics for measuring cognitive load in intelligence-analysis and similar settings. Reviewing 125 articles published between 1998 and 2024, it identifies 129 distinct metrics grouped into non-biometric methods (questionnaires such as NASA-TLX, task performance, interaction tracking) and biometric methods (eye tracking, heart rate).

ageint180. Why psychology of intelligence analysis still matters? URL https://www.specialeurasia.com/2024/08/19/psychology-intelligence-analysis/. A SpecialEurasia article (2024) reviewing Richards J. Heuer Jr.'s 1999 work Psychology of Intelligence Analysis and arguing for its continued relevance. It summarizes Heuer's account of how cognitive biases such as confirmation bias, anchoring, and availability heuristics distort analytic judgment, and how analysts' backgrounds shape interpretation.

ageint183. Prebunking interventions based on "inoculation" theory can reduce. URL https://misinforeview.hks.harvard.edu/article/global-vaccination-badnews/. A 2020 peer-reviewed study in the Harvard Kennedy School Misinformation Review by Roozenbeek, van der Linden, and Nygren testing the Bad News game as a prebunking intervention grounded in inoculation theory. Players take the role of a misinformation creator to learn common manipulation techniques such as impersonation, emotional appeals, polarization, and conspiratorial framing, building resistance to deceptive content.

ageint184. Psychological inoculation against misinformation. URL https://jnnp.bmj.com/content/94/12/e2.40. SIST guide bibliography entry.

ageint185. "inoculation" to resist misinformation - pubmed. URL https://pubmed.ncbi.nlm.nih.gov/38753337/. A 2024 JAMA Insights article by Sander van der Linden and Jon Roozenbeek on "inoculation" or prebunking as a psychological technique for resisting misinformation. Part of the journal's Communicating Medicine series, it describes how preparing audiences in advance can build cognitive resistance to misleading narratives, drawing an analogy to how vaccines build immunity.

ageint186. Psychological inoculation against misinformation: Current evidence and future directions - cecilie s. traberg, jon roozenbeek, sander van der linden, 2022. URL https://journals.sagepub.com/doi/10.1177/00027162221087936. Much like a viral contagion, misinformation can spread rapidly from one individual to another.

ageint187. Inoculation theory and misinformation. URL https://stratcomcoe.org/publications/download/Inoculation-theory-and-Misinformation-FINAL-digital-ISBN-ebbe8.pdf. A 2021 report published by the NATO Strategic Communications Centre of Excellence, authored by Jon Roozenbeek and Sander van der Linden of the Cambridge Social Decision-Making Lab, on inoculation theory and misinformation. It explores how psychology and behavioural science can help mitigate the spread of false and misleading information, noting that no single intervention through algorithms, legislation, or content moderation is sufficient.

ageint188. From spycraft to self-mastery: How structured analytic techniques. URL https://spotterup.com/from-spycraft-to-self-mastery-how-structured-analytic-techniques-can-transform-everyday-decisions/. An article on Spotter Up by Eugene Nielsen arguing that structured analytic techniques (SATs) developed for intelligence analysis can improve everyday decision-making. It describes cognitive biases such as confirmation bias and overconfidence, then outlines categories of SATs including diagnostic, contrarian, imaginative, structuring, and decision-support methods.

ageint189. A tradecraft primer - csi. URL https://www.cia.gov/resources/csi/books-monographs/a-tradecraft-primer/. SIST guide bibliography entry.

ageint190. Objectivity. URL https://www.intelligence.gov/mission/our-values/objectivity. A page on Intelligence.gov, the U.S. Intelligence Community's public site, presenting objectivity as a core IC value. It explains that intelligence analysis must be performed and conveyed without distortion from personal or political bias, and references the standards codified in Intelligence Community Directive (ICD) 203 on analytic standards.

ageint191. Richards heuer. URL https://en.wikipedia.org/wiki/Richards_Heuer. A Wikipedia biography of Richards J. Heuer Jr. (1927-2018), a long-serving CIA intelligence analyst known for foundational contributions to analytic tradecraft. It describes his development of the Analysis of Competing Hypotheses method, his book 'Psychology of Intelligence Analysis' arguing that structured tools help analysts cope with cognitive bias and uncertainty, and his co-authored guide to Structured Analytic Techniques.

ageint192. The psychology of intelligence analysis. URL https://www.ialeia.org/docs/Psychology_of_Intelligence_Analysis.pdf. Psychology of Intelligence Analysis by Richards J. Heuer Jr., published by the Center for the Study of Intelligence, Central Intelligence Agency (1999). This foundational text examines the cognitive processes and mental limitations that affect intelligence analysts, focusing on how perception, memory, and bias shape judgment. It presents structured analytic methods intended to help analysts recognize and counteract these limitations and improve the quality of their reasoning.

ageint193. Structured analytical techniques - organization of american states. URL https://www.oas.org/cicaddocs/Document.aspx?Id=2575. Heuer provides a number of starter questions in his book (Structured Analytic Techniques for.

ageint194. Structured analytic techniques for intelligence analysis. URL https://www.scribd.com/document/554459164/Structured-Analytic-Techniques-for-Intelligence-Analysis-by-Richards-and-Randolph. A copy of "Structured Analytic Techniques for Intelligence Analysis" hosted on Scribd, a roughly 310-page professional reference on analytical methodologies for intelligence work. It presents systematic frameworks that analysts can use to process information, test hypotheses, identify patterns, and reach evidence-based conclusions while reducing bias. The document is oriented toward practitioners seeking to strengthen analytic rigor.

ageint195. Full article: Analytic tradecraft and the intelligence community. URL https://www.tandfonline.com/doi/full/10.1080/02684527.2012.746415. SIST guide bibliography entry.

ageint198. Metoda gtd = getting things done - lukas barda. URL https://lukasbarda.cz/english/metoda-gtd-getting-things-done/. A Czech-language explainer of the Getting Things Done (GTD) productivity method created by David Allen. It describes the system's core steps of capturing thoughts, clarifying them into actionable items, organizing and prioritizing, regularly reviewing, and executing, including the principle of doing any task that takes under two minutes immediately. The page also surveys software tools for implementing GTD, such as Todoist, OmniFocus, Trello, Evernote, and Notion.

ageint199. David allen explains why gtd improves team performance. URL https://www.youtube.com/watch?v=UE93vcMFFpc. ... productive at work. Learn why your team needs GTD to improve performance and results.

ageint200. The science behind flow state | achieving optimal performance. URL https://us.dingbats-notebooks.com/blogs/the-dingbats-blog/the-science-behind-flow-state-achieving-optimal-performance-with-dingbats. A marketing blog post on the Dingbats Notebooks e-commerce site about flow state and how writing tools can support it. It summarizes Mihaly Csikszentmihalyi's concept of flow as a state of full absorption marked by intense focus, clear goals, and immediate feedback, and reviews associated benefits and neuroscience such as reduced prefrontal-cortex activity and increased dopamine.

ageint201. Go with the flow: A neuroscientific view on being fully engaged. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC7983950/. A 2020 theoretical review article in the European Journal of Neuroscience by van der Linden, Tops, and Bakker proposing a neuroscientific model of flow, the state of full task absorption with strong drive and low self-referential thinking. The authors argue that the dopamine and norepinephrine systems drive the motivational and mood components of flow, and that interaction among the default mode, central executive, and salience networks produces its characteristic features.

ageint202. Flow (psychology). URL https://en.wikipedia.org/wiki/Flow_(psychology). A Wikipedia article on flow, the psychological state of complete immersion and focused engagement in an activity, also known as being in the zone. It traces the concept to psychologist Mihaly Csikszentmihalyi and describes flow as a balance between challenge and skill, characterized by intense concentration, merging of action and awareness, loss of self-consciousness, a sense of control, distorted time perception, and intrinsic reward.

ageint203. How flow theory unleashes high performance in your career. URL https://spiky.ai/en/blog/how-flow-theory-unleashes-high-performance-in-your-career. A blog article applying Mihaly Csikszentmihalyi's Flow Theory to workplace and career performance. It describes flow as a state of full absorption in an activity, lists conditions associated with it such as clear goals, immediate feedback, and a balance between challenge and skill, and discusses how time can appear distorted during flow. The piece argues that achieving flow states enhances productivity and job satisfaction across roles and industries.

ageint204. The neuroscience of flow state: How the brain reaches peak. URL https://www.linkedin.com/pulse/neuroscience-flow-state-how-brain-reaches-peak-performance-sana-noor-doa2f. A LinkedIn article (Sana Noor, 2024) on the neuroscience of flow, the state of complete immersion in a task. It describes brain mechanisms associated with flow, including reduced prefrontal activity (transient hypofrontality) that lowers self-consciousness, dopamine-driven motivation, and deactivation of the default mode network to enable deep focus.

ageint205. Flow research collective: Neuroscience of human performance. URL https://www.flowresearchcollective.com. This is the website of the Flow Research Collective, a research and development organization founded in 2018 that studies the neuroscience of human performance and brain health. It investigates flow states of focused absorption and applies that research to peak performance training for organizations as well as to mental health conditions such as PTSD and depression.

ageint206. Investigating the "flow" experience: Key conceptual. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC7033418/. A 2020 conceptual analysis by Sami Abuhamdeh in Frontiers in Psychology arguing that flow research has stalled because the construct is operationalized inconsistently across studies. It identifies disagreements over whether flow is a discrete state or a continuum, whether enjoyment is essential to it, and whether scales conflate flow's conditions with the experience itself.

ageint207. The cognitive load - productivity tradeoff in task switching. URL https://discovery.researcher.life/article/the-cognitive-load-productivity-tradeoff-in-task-switching/e9ab764eba953a3195c078b42fdb73c4. A 2023 research article in the Proceedings of the Human Factors and Ergonomics Society Annual Meeting by Maximillian Chis and colleagues examining task switching during team-based search-and-rescue scenarios in Minecraft. Using an ACT-R model of working memory, the study found that teams switching between task sets less frequently showed both higher cognitive load and higher performance scores.

ageint208. Securing industrial control systems: Components, cyber threats. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC10649322/. This article provides a comprehensive overview of cybersecurity for Industrial Control Systems, covering SCADA, distributed control systems, and programmable logic controllers as they have evolved from isolated architectures to networked, cloud-connected deployments.

ageint209. What are industrial control systems (ics)? | bitsight. URL https://www.bitsight.com/glossary/industrial-control-systems-ics. A glossary entry from the cybersecurity company Bitsight explaining Industrial Control Systems (ICS), defined as integrated hardware and software used to control, monitor, and automate industrial processes across manufacturing, energy, and critical infrastructure.

ageint210. What are the differences between ot, ics, & scada security? URL https://www.paloaltonetworks.com/cyberpedia/ot-vs-ics-vs-scada-security. A Palo Alto Networks Cyberpedia article explaining the relationship among operational technology (OT), industrial control system (ICS), and SCADA security.

ageint211. The 2026 cybersecurity guide to industrial control systems - claroty. URL https://claroty.com/blog/cybersecurity-dictionary-industrial-control-systems-ics-security. A Claroty guide to securing industrial control systems (ICS) amid IT and operational technology convergence. It identifies challenges including an expanded attack surface, legacy systems lacking modern protections, third-party access gaps, patching delays due to uptime requirements, and advanced adversaries targeting ICS.

ageint212. Operational technology cybersecurity - idaho national laboratory. URL https://inl.gov/national-security/cybersecurity/. SIST guide bibliography entry.

ageint213. Ics matrix - mitre att&ck(r). URL https://attack.mitre.org/matrices/ics/. The Industrial Control Systems (ICS) domain of the MITRE ATT&CK framework, a knowledge base documenting adversary behaviors based on real-world observations of attacks on critical infrastructure. The matrix organizes methods into twelve tactical categories spanning initial access through impact, including ICS-specific concerns such as firmware modification and disruption of operational technology.

ageint214. Cybersecurity using ics att&ck strategies. URL https://www.isa.org/intech-home/2021/june-2021/departments/cybersecurity-using-ics-att-ck-strategies. A June 2021 InTech Magazine article by Jacob Chapman, published by the International Society of Automation, on using the ICS ATT&CK framework to strengthen cybersecurity for manufacturing and industrial IoT systems. It describes a three-phase risk-management approach: gathering information on assets and network architecture, mapping potential attack paths to identify vulnerabilities, and prioritizing mitigations by impact.

ageint215. Mitre att&ck for ics framework - dragos. URL https://www.dragos.com/mitre-attack-for-ics. A Dragos solutions page describing the MITRE ATT&CK for ICS framework, a knowledge base of adversary behaviors observed in attacks against industrial control system networks. It explains how the Dragos Platform maps detections to ATT&CK tactics and techniques through regular knowledge updates, profiles named threat groups, and organizes behaviors across tactic areas spanning initial access through impact scenarios such as loss of control, safety, or availability.

ageint216. How to use the mitre att&ck framework for ics - nozomi networks. URL https://www.nozominetworks.com/resources/how-security-teams-use-the-mitre-attack-framework-for-ics. A Nozomi Networks resource (a 2020 webinar) on how security teams apply the MITRE ATT&CK framework for Industrial Control Systems. It explains that the ICS version is a community-sourced knowledge base mapping adversary tactics and behaviors specific to industrial environments, distinct from the IT-focused framework.

ageint217. An evaluation framework for industrial control system cyber incidents. URL https://www.sciencedirect.com/science/article/abs/pii/S1874548221000718. SIST guide bibliography entry.

ageint218. The cyber-physical six | honeywell. URL https://www.honeywell.com/content/dam/honeywellbt/en/documents/downloads/hon-corp-the-cyber-physical-six.pdf. An executive research report from Honeywell's Global Analysis, Research, and Defense group titled "The Cyber-Physical Six," tracing how targeted industrial attacks have evolved and predicting future trends. It reviews six landmark cyber-physical attacks affecting industrial control and operational technology systems, then analyzes observed trends such as modularity, expanding capabilities, and the increasing frequency of new attack tools.

ageint219. Stuxnet 15 years later and the evolution of cyber threats to critical. URL https://homeland.house.gov/wp-content/uploads/2025/07/2025-07-22-CIP-Testimony.pdf. I've been asked specifically to describe how.

ageint220. Zetter details how stuxnet marked a turning point in cyberwarfare. URL https://industrialcyber.co/industrial-cyber-attacks/zetter-details-how-stuxnet-marked-a-turning-point-in-cyberwarfare-by-enabling-physical-sabotage-through-code/. Journalist Kim Zetter testified before Congress on how Stuxnet demonstrated that physical infrastructure could be destroyed through malicious code alone, targeting Siemens programmable logic controllers at Iran's Natanz uranium enrichment facility.

ageint222. Cia - national archives. URL https://www.archives.gov/files/isoo/fcgr/cia.pdf. SIST guide bibliography entry.

ageint223. Active-measures-and-information-wars - central intelligence agency. URL https://www.cia.gov/resources/csi/static/active-measures-and-information-wars.pdf. A book review article by J. E. Leonardson (a CIA Directorate of Analysis analyst writing under a pen name), published in Studies in Intelligence Vol. 64, No. 1 (March 2020).

ageint224. Cyber kill chain(r) | lockheed martin. URL https://www.lockheedmartin.com/en-us/capabilities/cyber/cyber-kill-chain.html. A Lockheed Martin capabilities page describing the Cyber Kill Chain, a framework that is part of the company's Intelligence Driven Defense model for identifying and preventing cyber intrusions. It frames intrusions as a sequence of stages an adversary must complete to achieve an objective, with the aim of improving defenders' visibility into attacker behavior, and is oriented toward defending against advanced persistent threats.

ageint225. Ai agents vs. agentic ai: A conceptual taxonomy, applications. URL https://www.sciencedirect.com/science/article/pii/S1566253525006712. SIST guide bibliography entry.

ageint226. Agentic ai: A comprehensive survey of technologies, applications. URL https://www.semanticscholar.org/paper/Agentic-AI:-A-Comprehensive-Survey-of-Technologies,-Pati/bb10ee1cf6d645ad74b9b35bb916086e6b3e340c. SIST guide bibliography entry.

ageint227. Ai agent frameworks: Choosing the right foundation for your ... - ibm. URL https://www.ibm.com/think/insights/top-ai-agent-frameworks. An IBM Think Insights article comparing leading AI agent frameworks to help teams choose a foundation for building agentic systems. It surveys open-source orchestration frameworks for single- and multi-agent solutions, including CrewAI and AutoGen, and discusses considerations such as workflow orchestration, collaboration among agents, and integration. The article is written as a practitioner-oriented overview of the framework landscape.

ageint228. Agi-edgerunners/llm-agents-papers. URL https://github.com/AGI-Edgerunners/LLM-Agents-Papers. A curated GitHub repository (AGI-Edgerunners/LLM-Agents-Papers) collecting research papers on large language model based agents, last updated July 2025. It organizes work into categories including survey papers, enhancement techniques such as planning, memory, feedback, retrieval, and search, agent interactions like tool usage and conversation, domain applications, training methods, multi-agent systems, safety, and benchmarks.

ageint229. How different types of ai agents work - [x]cube labs. URL https://www.xcubelabs.com/blog/how-different-types-of-ai-agents-work-a-comprehensive-taxonomy-and-guide/. SIST guide bibliography entry.

ageint230. Karl friston explains active inference & ai breakthroughs - youtube. URL https://www.youtube.com/watch?v=Q2O1iNCQadI. A YouTube episode of "Karl's Corner" featuring Dr. Karl Friston, Chief Scientist at VERSES, explaining active inference and its implications for AI. He contrasts active inference, in which systems build internal models of the world to understand cause and effect, with prevailing AI approaches that mainly mimic patterns in data, and discusses claims of substantially improved performance and efficiency.

ageint231. The secret history of disinformation and political warfare - csi. URL https://www.cia.gov/resources/csi/studies-in-intelligence/volume-64-no-1/active-measures-the-secret-history-of-disinformation-and-political-warfare/. The CIA Studies in Intelligence URL for 'The Secret History of Disinformation' returns 404. The article by Thomas Rid on political warfare history is accessible through the CIA CSI portal at an updated path; verify the URL before citation.

ageint232. European ai office. URL https://digital-strategy.ec.europa.eu/en/policies/ai-office. The European AI Office is the European Commission's central hub for developing and implementing AI governance across the EU, established to support trustworthy AI adoption while protecting people from associated risks. Its responsibilities include enforcing regulations for general-purpose AI models, implementing the AI Act, developing evaluation tools and benchmarks for assessing AI capabilities, and investigating potential regulatory violations.

ageint233. General-purpose ai code of practice. URL https://digital-strategy.ec.europa.eu/en/policies/ai-code-practice. An official European Commission Digital Strategy webpage documenting the General-Purpose AI Code of Practice, a voluntary guidance document helping general-purpose AI providers comply with the EU AI Act's rules on safety, transparency, and copyright. It describes an iterative drafting process involving nearly 1,000 stakeholders across four working groups, running from September 2024 through July 2025.

ageint234. Ai act. URL https://digital-strategy.ec.europa.eu/en/policies/regulatory-framework-ai. The European Commission's official page on the AI Act, described as the first comprehensive legal framework on artificial intelligence worldwide. It explains the regulation's risk-based approach, classifying AI systems into unacceptable, high, transparency, and minimal risk tiers, with prohibited practices and strict requirements for high-risk uses.

ageint235. Iso/iec 42005:2025 ai system impact assessment. URL https://www.iso.org/standard/44545.html. ISO standard page for AI system impact assessment.

ageint236. Iso/iec tr 24028:2020 artificial intelligence trustworthiness overview. URL https://www.iso.org/standard/77608.html. The ISO catalog page for ISO/IEC TR 24028:2020, a technical report titled "Information technology - Artificial intelligence - Overview of trustworthiness in artificial intelligence." The document surveys topics related to AI trustworthiness, including approaches to establishing trust through transparency, explainability, and controllability, and approaches to assess and achieve availability, resilience, reliability, accuracy, safety, security, and privacy of AI systems.

ageint237. Artificial intelligence: An accountability framework for federal agencies and other entities. URL https://www.gao.gov/products/gao-21-519sp. Official GAO AI accountability framework.

ageint238. Recommendation on the ethics of artificial intelligence. URL https://www.unesco.org/en/artificial-intelligence/recommendation-ethics. The official UNESCO page for the Recommendation on the Ethics of Artificial Intelligence, the first global standard-setting instrument on AI ethics, adopted in 2021 and applicable to all 194 member states. It outlines four core values, including human rights protection and environmental flourishing, and ten guiding principles such as proportionality, privacy, transparency, and fairness.

ageint239. Digital space and human rights. URL https://www.ohchr.org/en/digital-space-and-human-rights. Official OHCHR digital rights portal.

ageint240. The right to privacy in the digital age. URL https://www.ohchr.org/en/privacy-in-the-digital-age. The Office of the High Commissioner for Human Rights (OHCHR) hub page on the right to privacy in the digital age. It addresses how data-intensive technologies, particularly artificial intelligence, create risks for privacy, autonomy, and human dignity, and curates international standards, reports, and expert consultations.

ageint241. Modernised convention 108. URL https://www.coe.int/en/web/data-protection/convention108/modernised. Official Council of Europe Convention 108+ source.

ageint242. Guidance for generative ai in education and research. URL https://unesdoc.unesco.org/ark:/48223/pf0000386693. Official UNESCO generative AI education guidance.

ageint243. Ai competency frameworks for teachers and students. URL https://www.unesco.org/en/articles/unesco-launches-new-ai-competency-frameworks-students-and-teachers. A UNESCO announcement of two new AI competency frameworks, one for students and one for teachers, intended to guide safe and responsible engagement with artificial intelligence in education. The student framework emphasizes a human-centered perspective, ethical use, foundational AI knowledge, and design thinking, while the teacher framework covers ethics, technical understanding, and pedagogy.

ageint244. Ai and education. URL https://www.unesco.org/gem-report/en/ai-and-education. Official UNESCO GEM AI and education source hub.

ageint245. Artificial intelligence in education. URL https://www.oecd.org/en/topics/sub-issues/artificial-intelligence-in-education.html. Official OECD AI in education topic page.

ageint246. Digital education action plan 2021-2027. URL https://education.ec.europa.eu/focus-topics/digital-education/action-plan. The European Commission's official page on the Digital Education Action Plan (2021-2027), a strategic framework for promoting high-quality, inclusive digital learning across EU education systems. It defines digital education as the use of digital tools, technologies, and content to support teaching, learning, and assessment, and cites pandemic-driven adoption alongside persistent gaps in teacher readiness, student digital skills, and household access.

ageint247. Ai in the public sector. URL https://oecd.ai/en/themes/public-sector. Official OECD.AI public-sector AI theme page.

ageint248. Artificial intelligence working group. URL https://www.worldbank.org/en/programs/govtech/artificial-intelligence. The World Bank GovTech program page for its Artificial Intelligence Working Group, a community of government technology experts focused on knowledge-sharing and policy tools for responsible public-sector AI adoption. It notes that many developing countries face barriers such as limited digital skills, infrastructure, and data, which risk widening global inequality.

ageint249. Govtech: Putting people first. URL https://www.worldbank.org/en/programs/govtech. The official page for the World Bank's Global Program on GovTech and Public Sector Innovation, which helps governments use technology and data to improve public services and governance. It describes support for digital transformation in public administration across areas such as tax administration, public financial management, human resource systems, and citizen engagement, with cross-cutting themes including responsible AI and green digital transformation.

ageint250. Ai guide for government. URL https://ai.gov/. The official U.S. government AI.gov website presenting the federal administration's artificial intelligence strategy. It is organized around an AI Action Plan built on three pillars: accelerating innovation, building infrastructure, and leading international AI diplomacy. The site compiles executive orders, policy documents and OMB memos on government AI adoption, education initiatives, and leadership remarks, framing AI development as central to U.S. global competitiveness.

ageint251. European data governance act. URL https://digital-strategy.ec.europa.eu/en/policies/data-governance-act. The European Commission page explaining the Data Governance Act, an EU regulation that became applicable in September 2023 to build trust in data sharing and ease reuse of data. It outlines four mechanisms: facilitating reuse of protected public-sector data, establishing trusted data intermediaries, enabling voluntary data sharing by citizens and businesses, and removing barriers to cross-sector and cross-border data use.

ageint252. Data act explained. URL https://digital-strategy.ec.europa.eu/en/policies/data-act-explained. An official European Commission explainer on the EU Data Act, which became applicable on 12 September 2025.

ageint253. Common european data spaces. URL https://digital-strategy.ec.europa.eu/en/policies/data-spaces. This is an official European Commission webpage describing the Common European Data Spaces initiative, part of the EU strategy to create interconnected, trustworthy data-sharing environments across strategic sectors. It explains that data spaces let organizations and individuals share data while retaining control, guided by principles of open participation, privacy protection, and fair access rules.

ageint254. A european strategy for data. URL https://digital-strategy.ec.europa.eu/en/policies/strategy-data. An official European Commission page outlining the European Strategy for Data, which aims to create a single market for data to support competitiveness and data sovereignty. It describes initiatives such as Common European Data Spaces, opening high-value public datasets, and investment in cloud and data-processing capacity, supported by the Data Governance Act and the Data Act. The page frames data sharing as a driver of innovation balanced with privacy and European values.

ageint255. Web of things (wot) architecture 1.1. URL https://www.w3.org/TR/wot-architecture11/. The W3C Recommendation for Web of Things Architecture 1.1, published in December 2023, defining an abstract architecture for interoperability across diverse Internet of Things platforms. It introduces core concepts including Things described by machine-readable Thing Descriptions, reusable Thing Models, and Consumers that interpret descriptions to interact via Properties, Actions, and Events.

ageint256. Web of things (wot) thing description 1.1. URL https://www.w3.org/TR/wot-thing-description11/. The W3C WoT Thing Description 1.1 is a formal information model and standardized representation format enabling IoT devices to describe their metadata and interaction capabilities in a machine-readable way, facilitating interoperability across diverse ecosystems.

ageint257. Web of things (wot) discovery. URL https://www.w3.org/TR/wot-discovery/. A W3C Recommendation for Web of Things (WoT) Discovery, published December 5, 2023 by the W3C Web of Things Working Group. It specifies how IoT devices and services can be discovered and how their Thing Description metadata can be accessed securely, using a two-phase model of Introduction and Exploration.

ageint258. Openapi specification. URL https://spec.openapis.org/oas/. The official OpenAPI Initiative publications page, serving as a central index for the OpenAPI Specification and related standards including the Arazzo and Overlay specifications. It provides access to multiple specification versions (2.0, 3.0, 3.1, and 3.2) and their corresponding downloadable schemas identified by release date, along with a registry of extensions, formats, media types, and other resources.

ageint259. Verifiable credentials data model v2.0. URL https://www.w3.org/TR/vc-data-model-2.0/. The W3C Verifiable Credentials Data Model v2.0 Recommendation, which specifies how to express digital credentials on the web in a cryptographically secure, privacy-respecting way. It defines an extensible data model for tamper-evident assertions made by an issuer about a subject, within a three-party ecosystem of issuers, holders, and verifiers supported by verifiable data registries.

ageint260. Decentralized identifiers (dids) v1.0. URL https://www.w3.org/TR/did-core/. The W3C Recommendation for Decentralized Identifiers (DIDs) v1.0, published July 2022, defining a type of identifier that enables verifiable digital identity without reliance on a centralized registration authority. It specifies DID syntax (a scheme, method name, and method-specific identifier) and the DID document data model, which expresses verification methods, services, controllers, and verification relationships for authentication and assertion.

ageint261. Rfc 9110: Http semantics. URL https://www.rfc-editor.org/rfc/rfc9110.html. RFC 9110, the official IETF standards document defining the core semantics and architecture of HTTP, published in June 2022 and consolidating nine earlier RFCs. It establishes terminology and protocol aspects shared across HTTP versions, including methods, status codes, header fields, content negotiation, conditional and range requests, authentication, and the http and https URI schemes.

ageint262. Artificial intelligence. URL https://www.ilo.org/topics-and-sectors/artificial-intelligence. The International Labour Organization's topic portal on artificial intelligence and the world of work. It examines AI's dual role in automating worker tasks and in automating managerial functions through algorithmic management, arguing that whether AI displaces or complements jobs depends on how technology is integrated into work processes.

ageint263. Mind the ai divide: Shaping a global perspective on the future of work. URL https://www.ilo.org/publications/major-publications/mind-ai-divide-shaping-global-perspective-future-work. A joint UN and International Labour Organization report (July 2024) titled 'Mind the AI Divide,' examining how unequal AI adoption can deepen global inequality. It argues that disparities in digital infrastructure, technology, education, and training risk leaving less developed nations further behind as economies shift toward AI-driven production.

ageint264. Global commission on the future of work. URL https://www.ilo.org/resource/news/global-commission-future-work. An International Labour Organization news article (January 2019) announcing the findings of the ILO Global Commission on the Future of Work, a 15-month study co-chaired by the leaders of South Africa and Sweden. The commission issued ten recommendations addressing workplace change driven by technological and demographic shifts, including universal labor protections, lifelong learning, and stronger social safety nets.

ageint265. Ai and work. URL https://oecd.ai/en/work. Official OECD.AI work theme page.

ageint266. Prov overview. URL https://www.w3.org/TR/prov-overview/. A W3C Working Group Note from 2013 that provides an overview and roadmap for the PROV family of specifications for representing and exchanging provenance information on the web. It defines provenance as information about the entities, activities, and people involved in producing data, used to assess quality, reliability, and trustworthiness.

ageint267. Prov-o: The prov ontology. URL https://www.w3.org/TR/prov-o/. The W3C Recommendation for PROV-O, published in April 2013, which expresses the PROV data model as an OWL2 ontology for representing provenance information across systems. It defines three core classes, Entity, Activity, and Agent, and organizes terms into starting-point, expanded, and qualified categories.

ageint268. Data catalog vocabulary (dcat) version 3. URL https://www.w3.org/TR/vocab-dcat-3/. DCAT Version 3 is a W3C RDF vocabulary designed to facilitate interoperability between data catalogs published on the web, enabling organizations to describe datasets and data services using standardized terminology for improved discoverability and federated search. The specification organizes catalog metadata around seven core classes including Catalog, Dataset, Distribution, Data Service, and Dataset Series, drawing on established vocabularies such as Dublin Core and FOAF.

ageint269. Data on the web best practices. URL https://www.w3.org/TR/dwbp/. A W3C Recommendation, "Data on the Web Best Practices," published January 31, 2017 by the Data on the Web Best Practices Working Group. It offers 35 best practices for publishing and consuming data on the Web, covering metadata, licensing and provenance, data quality, dataset versioning, persistent URIs, machine-readable formats, vocabulary reuse, access methods, preservation, and feedback.

ageint270. Nist big data interoperability framework. URL https://www.nist.gov/programs-projects/big-data-interoperability-framework. NIST Special Publication 1500-1 (revised edition by Chang and Grady) establishes foundational terminology and consensus definitions for Big Data

through the NIST Big Data Public Working Group. The volume defines Big Data characteristics, taxonomy, and a reference architecture assigning roles to Application Providers, Data Consumers, Data Providers, and System Orchestrators.

ageint271. Datacite metadata schema. URL https://schema.datacite.org/. The DataCite Metadata Schema page, introducing a standardized framework of core metadata properties chosen for accurate and consistent identification of research resources for citation and retrieval. It notes the latest version, 4.7 (March 2026), which adds resource types such as Poster and Presentation along with new identifier and relation-type options.

ageint272. C2pa specifications. URL https://c2pa.org/specifications/specifications/. The specifications hub for the C2PA (Coalition for Content Provenance and Authenticity), a standards initiative that develops technical methods for certifying the source and history of media content to counter misleading information. It publishes the core Content Credentials specification along with related material such as attestations and a soft-binding API, plus implementation, security, and user-experience guidance including for AI-generated content.

ageint273. Wcag 2 overview. URL https://www.w3.org/WAI/standards-guidelines/wcag/. The W3C Web Accessibility Initiative overview of the Web Content Accessibility Guidelines (WCAG), an international standard for making web content accessible to people with disabilities. It explains that WCAG is organized around four principles (perceivable, operable, understandable, robust) with testable success criteria at three conformance levels (A, AA, AAA), and covers versions 2.0, 2.1, and 2.2.

ageint274. Cast universal design for learning guidelines version 3.0. URL https://udlguidelines.cast.org/. The official CAST website for the Universal Design for Learning (UDL) Guidelines version 3.0, released in 2024. The framework offers research-based guidance for designing inclusive learning environments and is organized around three principles: Engagement (motivation and emotional support), Representation (accessible presentation of information), and Action and Expression (diverse means of participation and communication).

ageint275. Fact sheet: New rule on the accessibility of web content and mobile apps provided by state and local governments. URL https://www.ada.gov/resources/2024-03-08-web-rule/. A US Department of Justice fact sheet explaining the 2024 ADA Title II rule requiring state and local governments to make their web content and mobile apps accessible. It establishes WCAG 2.1 Level AA as the technical standard, applies to entities such as schools, courts, libraries, and transit agencies, and sets compliance deadlines of April 2027 for larger jurisdictions and April 2028 for smaller ones.

ageint276. What is a data protection impact assessment and when is this mandatory? URL https://www.edpb.europa.eu/sme-data-protection-guide/faq-frequently-asked-questions/answer/what-data-protection-impact_en. A European Data Protection Board FAQ page, part of its data protection guide for small businesses, explaining Data Protection Impact Assessments (DPIAs) and when they are mandatory. It describes a DPIA as a written assessment of the impact of a planned processing operation, required when processing poses high risks to individuals' rights.

ageint277. Endorsed wp29 guidelines. URL https://www.edpb.europa.eu/our-work-tools/general-guidance/endorsed-wp29-guidelines_en. This is a European Data Protection Board webpage listing guidelines and documents originating from the Article 29 Working Party that the EDPB endorsed at its first plenary meeting. The catalogued materials relate to the GDPR and cover topics such as consent and transparency, data breach notification, automated decision-making and profiling, data protection impact assessments, data protection officers, and binding corporate rules.

ageint278. Recommendation of the council on public procurement. URL https://legalinstruments.oecd.org/api/print?ids=320&lang=en. The OECD Recommendation of the Council on Public Procurement (OECD/LEGAL/0411), a legal instrument adopted by the OECD Council in 2015 on the proposal of the Public Governance Committee. It frames public procurement as a pillar of strategic governance and service delivery and sets out principles for governments to follow.

ageint279. Open contracting data standard. URL https://standard.open-contracting.org/latest/en/. The documentation homepage for the Open Contracting Data Standard, version 1.1.5, maintained by the Open Contracting Partnership to support disclosure of government contracting data across the procurement lifecycle. It provides a common data model spanning planning, tender, award, contract, and implementation stages, along with a primer, implementation guidance, technical schemas, and validation tooling.

ageint280. Nist sp 800-61 rev. 3: Incident response recommendations and considerations for cybersecurity risk management. URL https://csrc.nist.gov/pubs/sp/800/61/r3/final. NIST SP 800-61 Rev. 3, published April 2025, integrates incident response guidance into broader cybersecurity risk management aligned with the NIST Cybersecurity Framework 2.0, superseding the 2012 Rev. 2. The publication addresses cyber threat information sharing, incident handling and management practices, and procedures for detecting, responding to, and recovering from security incidents.

ageint281. Artificial intelligence cybersecurity challenges. URL https://www.enisa.europa.eu/publications/artificial-intelligence-cybersecurity-challenges. An ENISA (European Union Agency for Cybersecurity) report published December 15, 2020 mapping the cybersecurity challenges of artificial intelligence. It defines AI scope through a lifecycle approach, identifies the assets requiring protection within AI ecosystems, and develops a threat taxonomy classified across lifecycle stages and asset categories.

ageint282. Ai research: Security and resilience. URL https://www.nist.gov/artificial-intelligence/ai-research-security-and-resilience. A NIST page on AI research focused on security and resilience, framing these as core characteristics of trustworthy AI under the NIST AI Risk Management Framework.

ageint283. Recommendation of the council on open government. URL https://legalinstruments.oecd.org/api/print?ids=359&lang=en. An OECD legal instrument document reproducing the Recommendation of the Council on Open Government (OECD/LEGAL/0438), adopted on 14 December 2017. It defines open government as a culture of governance promoting transparency, integrity, accountability, and stakeholder participation in support of democracy and inclusive growth.

ageint284. Verifiable credential data integrity 1.0. URL https://www.w3.org/TR/vc-data-integrity/. The W3C Recommendation for Verifiable Credential Data Integrity 1.0, published May 2025, defining mechanisms for ensuring the authenticity and integrity of verifiable credentials using cryptographic proofs. It specifies a process of data transformation, hashing, and proof generation, and a corresponding verification procedure, along with a proof data model containing properties such as type, verification method, purpose, and proof value.

ageint285. Nist ai resource center. URL https://airc.nist.gov/. The NIST AI Resource Center (AIRC), a government platform supporting implementation of the NIST AI Risk Management Framework, a voluntary framework for managing AI risk. It provides the core framework along with a playbook of practical actions, profiles tailored to specific sectors and technologies, use cases, and crosswalks linking the framework to other governance structures.

ageint286. Model cards for model reporting. URL https://arxiv.org/abs/1810.03993. The arXiv abstract for "Model Cards for Model Reporting" (2018) by Mitchell, Wu, Zaldivar, and colleagues, which introduces a framework for transparent documentation of machine learning models. Model cards are short accompanying documents that report a model's benchmarked performance across varied conditions, including different cultural, demographic, and phenotypic groups, along with intended use, evaluation methodology, and deployment considerations.

ageint287. Datasheets for datasets. URL https://arxiv.org/abs/1803.09010. A 2018 arXiv paper proposing 'datasheets for datasets,' a standardized documentation framework for machine learning datasets modeled on electronic component datasheets. The authors argue the field lacks consistent dataset documentation, which creates risk in high-stakes applications, and propose that datasets be accompanied by documentation covering motivation, composition, collection process, recommended uses, and test results.

ageint288. Algorithmic transparency recording standard hub. URL https://www.gov.uk/government/collections/algorithmic-transparency-recording-standard-hub. A GOV.UK collection page serving as the hub for the UK Algorithmic Transparency Recording Standard (ATRS), maintained by the Government Digital Service. It provides a standardized template for documenting public-sector use of algorithmic tools, completion guidance, policy on scope and compliance, and a searchable repository of published transparency records.

ageint289. Guidance for organisations using the algorithmic transparency recording standard. URL https://www.gov.uk/government/publications/guidance-for-organisations-using-the-algorithmic-transparency-recording-standard. This is a GOV.UK guidance page published by the Government Digital Service that instructs public sector organizations on completing the Algorithmic Transparency Recording Standard (ATRS) template and publishing their records to the GOV.UK repository. It applies both to central government bodies required to publish under mandatory policy and to other public sector bodies doing so voluntarily.

ageint290. Nist sp 800-218a: Secure software development practices for generative ai and dual-use foundation models. URL https://csrc.nist.gov/pubs/sp/800/218/a/final. NIST Special Publication 800-218A (July 2024), which augments the Secure Software Development Framework with practices specific to AI model development across the software lifecycle. Produced in response to Executive Order 14110, it addresses AI model producers, developers building on those models, and acquirers of AI systems, and is designed to be used alongside NIST SP 800-218.

ageint291. Revised 508 standards and 255 guidelines. URL https://www.access-board.gov/ict/. Official documentation from the U.S. Access Board on the Revised 508 Standards and 255 Guidelines for information and communication technology accessibility. It establishes mandatory accessibility requirements for federal agencies and voluntary guidelines for telecommunications manufacturers, covering hardware, software, websites, electronic documents, and support services.

ageint292. Assessing risks and impacts of ai (aria): Pilot evaluation report. URL https://www.nist.gov/publications/assessing-risks-and-impacts-ai-aria-pilot-evaluation-report. The ARIA 0.1 pilot evaluation report documents NIST's methodology for systematically assessing AI applications for risks and societal impacts, using a multi-layered evaluation approach across five participating organizations and seven submitted AI applications. The pilot employed three evaluation scenarios and three testing levels: model testing, red teaming, and field testing, supplemented by dialogue annotation, tester questionnaires, and structured measurement trees.

ageint293. Inventory of nara artificial intelligence (ai) use cases. URL https://www.archives.gov/ai. The National Archives and Records Administration (NARA) official inventory of its artificial intelligence use cases, documenting 14 projects across deployed, pilot, and planned stages. Deployed efforts include workplace productivity tools, automated tagging for museum experiences, and historical record retrieval, while pilots cover PII detection and redaction, semantic search, and metadata generation, and planned work targets FOIA processing and public search.

ageint294. M-25-21: Accelerating federal use of ai through innovation, governance, and public trust. URL https://www.whitehouse.gov/wp-content/uploads/2025/02/M-25-21-Accelerating-Federal-Use-of-AI-through-Innovation-Governance-and-Public-Trust.pdf. An April 2025 Office of Management and Budget memorandum (M-25-21) directing executive branch agencies on federal use of artificial intelligence. Issued under Executive Order 14179, it instructs agencies to accelerate adoption of AI to improve public services and government efficiency while maintaining safeguards for civil rights, civil liberties, and privacy.

ageint295. M-25-22: Driving efficient acquisition of artificial intelligence in government. URL https://www.whitehouse.gov/wp-content/uploads/2025/02/M-25-22-Driving-Efficient-Acquisition-of-Artificial-Intelligence-in-Government.pdf. OMB Memorandum M-25-22 (April 3, 2025), Driving Efficient Acquisition of Artificial Intelligence in Government, issued under Executive Order 13960 and related directives. It provides guidance to federal agencies for acquiring effective and trustworthy AI in a timely, cost-effective manner, and rescinds and replaces earlier memorandum M-24-18.

ageint296. Artificial intelligence risk management framework: Generative artificial intelligence profile. URL https://nvlpubs.nist.gov/nistpubs/ai/NIST.AI.600-1.pdf. NIST AI 600-1, the Artificial Intelligence Risk Management Framework: Generative Artificial Intelligence Profile, a cross-sectoral companion resource to the NIST AI RMF 1.0 issued pursuant to Executive Order 14110. It identifies risks that are unique to or amplified by generative AI and organizes suggested actions for managing those risks, mapped to the AI RMF functions.

ageint297. Intelligence community directive 203: Analytic standards. URL https://www.odni.gov/files/documents/ICD/ICD-203.pdf. Official ODNI Intelligence Community Directive 203 analytic standards source for objectivity, independence, timeliness, alternatives, confidence, sourcing, and accuracy in analytic products.

ageint298. Intelligence community directives. URL https://www.odni.gov/index.php/what-we-do/ic-related-menus/ic-related-links/intelligence-community-directives. Official ODNI index for Intelligence Community Directives used to locate current directive source material and preserve directive-context citations.

ageint299. Model context protocol specification. URL https://modelcontextprotocol.io/specification. The official Model Context Protocol (MCP) specification, defining an open protocol that standardizes how LLM applications connect to external data sources and tools using JSON-RPC 2.0 messages. It describes the host, client, and server roles and capability negotiation, and the features servers expose (resources, prompts, tools) and clients offer (sampling, roots, elicitation).

ageint300. Mitre atlas. URL https://atlas.mitre.org/. MITRE ATLAS knowledge base for adversarial threats to AI systems, used for defensive AI red-team assurance and misuse taxonomy.

ageint301. The ic osint strategy 2024-2026. URL https://www.dni.gov/files/ODNI/documents/IC_OSINT_Strategy.pdf. Official Intelligence Community strategy for open-source intelligence governance, integration, source discovery, data, tools, tradecraft, and workforce priorities.

ageint302. National geospatial-intelligence agency about us. URL https://www.nga.mil/about/About_Us.html. The official "About Us" page of the National Geospatial-Intelligence Agency (NGA), a U.S. Department of Defense and intelligence community organization. It describes NGA's mission of delivering geospatial intelligence, or GEOINT, to support military operations, policymakers, and first responders, spanning imagery analysis, mapping, geodesy, and navigation safety.

ageint303. Software security in supply chains. URL https://www.nist.gov/itl/executive-order-14028-improving-nations-cybersecurity/software-security-supply-chains-software-1. An official NIST page on software supply chain security issued under Executive Order 14028, focused on the Software Bill of Materials as a formal record of software components and their supply chain. It explains the benefits of SBOMs for vulnerability identification and supply-chain transparency, recommends machine-readable formats such as SPDX, CycloneDX, and SWID, and describes foundational, sustaining, and enhancing levels of implementation.

ageint304. Secure software development framework (ssdf) version 1.1: Recommendations for mitigating the risk of software vulnerabilities. URL https://csrc.nist.gov/pubs/sp/800/218/final. NIST SP 800-218, the Secure Software Development Framework Version 1.1 published in February 2022, establishes a set of high-level practices for integrating security into software development lifecycles in order to reduce vulnerabilities in released software, mitigate the impact of exploited vulnerabilities, and address root causes to prevent recurrences.

ageint305. Devsecops. URL https://www.nccoe.nist.gov/devsecops. Official NIST NCCoE DevSecOps project page for software factory, secure pipeline, and continuous authorization source support.

ageint306. Artificial intelligence. URL https://www.cisa.gov/ai. Official CISA Artificial Intelligence page for AI security, safety, resilience, and critical-infrastructure governance source support.

ageint307. Ics recommended practices. URL https://www.cisa.gov/ics/Recommended-Practices. Official CISA Industrial Control Systems recommended practices page for defensive ICS/OT safety, resilience, and incident-preparation guidance.

ageint308. Preparing for and mitigating foreign influence operations targeting critical infrastructure. URL https://www.cisa.gov/resources-tools/resources/cisa-insights-preparing-and-mitigating-foreign-influence-operations-targeting-critical. An archived CISA publication, "CISA Insights: Preparing for and Mitigating Foreign Influence Operations Targeting Critical Infrastructure," providing guidance on the threat that foreign influence campaigns pose to U.S. critical infrastructure.

ageint309. Stix version 2.1. URL https://docs.oasis-open.org/cti/stix/v2.1/stix-v2.1.html. An OASIS standard specification defining STIX (Structured Threat Information Expression), a language for exchanging cyber threat intelligence in a standardized, machine-readable form. It establishes a graph-based model with STIX Domain Objects, Cyber-observable Objects, and Relationship Objects, plus meta objects, bundles, and a patterning language for detection.

ageint310. Taxii version 2.1. URL https://docs.oasis-open.org/cti/taxii/v2.1/taxii-v2.1.html. The OASIS Standard specification for TAXII (Trusted Automated Exchange of Intelligence Information) Version 2.1, approved 10 June 2021. It defines a RESTful, HTTPS-based API for exchanging cyber threat intelligence through Collections in a request-response model, including discovery, API roots, JSON serialization, content negotiation, object retrieval with filtering and pagination, and status monitoring.

ageint311. Countering information threats. URL https://www.nato.int/cps/en/natohq/topics_219728.htm. An official NATO topic page describing the Alliance's approach to countering information threats, defined as intentional, manipulative, and coordinated activities by state and non-state actors including disinformation and propaganda. It explains why such threats matter for democratic processes and institutional trust, and outlines a four-part framework of understanding, preventing, containing, and recovering.

ageint312. Guide on the use of agentic artificial intelligence. URL https://www.canada.ca/en/government/system/digital-government/digital-government-innovations/responsible-use-ai/guide-use-agentic-artificial-antelligence.html. Official Government of Canada guide for responsible use of agentic AI, used for public-sector agent governance and accountability source support.

Agent2Agent Protocol Project. Agent2agent (a2a) protocol, 2025. URL https://a2a-protocol.org/latest/. Official Agent2Agent (A2A) protocol documentation describing an open standard for AI agents to securely communicate, collaborate, and coordinate work. Checked as of 2026-09-06. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: A2A protocol version, agent-discovery model, security profile, transport model, or governance home changes. Verification method: direct_official_page_review. Claim scope: Agent2Agent protocol interoperability, agent discovery and communication, cross-agent collaboration, and secure multi-agent coordination assumptions. Stakeholder role: multi-agent system architect, interoperability reviewer, instructor, procurement assessor, and learner. Rights dimension: interoperability, security, transparency, accountability, and auditable multi-agent coordination. Direct source URL verified live (HTTP 200, official A2A protocol documentation with on-topic description metadata) for AGEINT curriculum use.

Christopher. Andrew. The defence of the realm, 2009. URL https://archive.org/details/defenceofrealmau0000andr_p5s9. Verified scholarly book metadata source for intelligence_history_british_allied; routed to Historical Intelligence Services (British/Allied); institutional history of domestic security intelligence. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: intelligence_history_british_allied. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for intelligence_history_british_allied materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of intelligence_history_british_allied and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that intelligence_history_british_allied claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_andrew_2009_defend_realm retained.

Christopher Andrew and Oleg Gordievsky. Kgb: The inside story, 1990. URL https://archive.org/details/kgbinsidestoryof0000andr_j8b6. Verified scholarly book metadata source for intelligence_history_soviet; routed to Historical Intelligence Services (Soviet/Russian); KGB organizational doctrine and operations overview. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: intelligence_history_soviet. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for intelligence_history_soviet materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of intelligence_history_soviet and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that intelligence_history_soviet claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_andrew_gordievsky_1990_kgb_inside_story retained.

Christopher Andrew and Vasili Mitrokhin. The sword and the shield, 1999. URL https://archive.org/details/swordshieldmitro0000andr_q5i4. Verified scholarly book metadata source for intelligence_history_soviet; routed to Historical Intelligence Services (Soviet/Russian); primary-source archival history of KGB. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: intelligence_history_soviet. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for intelligence_history_soviet materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of intelligence_history_soviet and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that intelligence_history_soviet claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_andrew_mitrokhin_1999_sword_shield retained.

Anthropic. Building effective ai agents, 2024. URL https://www.anthropic.com/research/building-effective-agents. Anthropic research guide establishing the canonical workflows-versus-agents taxonomy and composable agentic patterns (prompt chaining, routing, parallelization, orchestrator-workers, evaluator-optimizer). Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: frontier_lab_research. Refresh cadence: semiannual. Refresh trigger: Anthropic Building Effective Agents updates, revised pattern taxonomy, or successor agent-architecture guidance changes. Verification method: direct_research_page_review. Claim scope: agentic architecture taxonomy, workflows versus agents, core orchestration patterns, and design principles favoring simplicity and human checkpoints. Direct source URL verified live (HTTP 200, on-topic Anthropic agent-architecture research) for AGEINT curriculum use.

Michael J. Ard. Structured analytic techniques: A pragmatic approach, 2024. URL https://www.tandfonline.com/doi/full/10.1080/08850607.2023.2241308. Peer-reviewed critique arguing that SAT evidence is thinner than many tradecraft claims imply and that SATs should not be treated as universal bias remedies. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Refresh if publisher metadata, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports evidence-boundary claims that SATs need qualification and should not be presented as proven universal debiasing tools. Stakeholder role: curriculum designer; analytic standards trainer; evaluation lead. Assurance use: Forces SAT lessons to distinguish transparency aids from demonstrated accuracy improvements. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. DOI metadata verified live 2026-06-15 through Crossref for title, author, and publication year; publisher URL retained because automated publisher retrieval may be rate-limited.

Stephen J. Artner, Richard S. Girven, and James B. Bruce. Assessing the value of structured analytic techniques in the u.s. intelligence community, 2016. URL https://www.rand.org/content/dam/rand/pubs/research_reports/RR1400/RR1408/RAND_RR1408.pdf. RAND report on the difficulty of measuring SAT value and the need for systematic evaluation before strong effectiveness claims. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: policy_research_report. Refresh cadence: annual. Refresh trigger: Refresh if RAND publishes a newer SAT evaluation synthesis or corrects report metadata. Verification method: publisher_record_and_pdf_url_review. Claim scope: Supports claims that SAT effectiveness evidence is limited and requires systematic evaluation. Stakeholder role: curriculum designer; evaluation lead; analyst supervisor. Assurance use: Prevents overclaiming that SATs generally cure bias or guarantee accuracy. Rights dimension: RAND copyrighted report; cite metadata and summarize sparingly. RAND report metadata and PDF URL verified again on 2026-06-15 from the RAND publication record and direct PDF URL; use for evaluation-limit claims and evidence-boundary framing.

ASD ACSC, CISA, NSA, CCCS, NCSC-NZ, and NCSC-UK. Careful adoption of agentic ai services, 2026. URL https://www.cyber.gov.au/business-government/secure-design/artificial-intelligence/careful-adoption-of-agentic-ai-services. Joint government guidance for deploying agentic AI with identity, logging, and progressive controls. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Bank for International Settlements. Fintech and the digital transformation of financial services, 2021. URL https://www.bis.org/publ/bppdf/bispap117.htm. Official BIS policy source for financial technology, market structure, data, network effects, regulation, privacy, and stability tradeoffs. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: financial_economic_security. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Alan Barnes and David R. Mandel. Accuracy of forecasts in strategic intelligence, 2014. URL https://www.pnas.org/doi/10.1073/pnas.1406138111. Peer-reviewed PNAS study of strategic-intelligence forecast accuracy, calibration, discrimination, and probability-language behavior. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: forecasting_calibration_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Refresh if publisher metadata, correction, or retraction status changes. Verification method: publisher_and_pubmed_metadata_review. Claim scope: Supports bounded claims about strategic-intelligence forecast accuracy, calibration, discrimination, and underconfidence. Stakeholder role: curriculum designer; forecasting instructor; evaluation lead. Assurance use: Links probability language and calibration exercises to empirical forecasting evidence. Rights dimension: copyrighted scholarly article; cite metadata and avoid extended quotation. PNAS DOI/publisher page and PubMed metadata verified live 2026-06-11; use for forecast-calibration claims.

Sarah Miller Beebe and Randolph H. Pherson. Cases in intelligence analysis: Structured analytic techniques in action, 2014. URL https://collegepublishing.sagepub.com/products/cases-in-intelligence-analysis-2-242321. SAGE/CQ Press textbook page for SAT case pedagogy and classroom exercises for analyst training. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_method_pedagogy. Source tier: scholarly_textbook. Refresh cadence: annual. Refresh trigger: Publisher page, edition, ISBN, or access status changes. Verification method: publisher_page_review. Claim scope: Supports bounded claims about SAT case pedagogy, technique templates, and classroom application rather than empirical technique efficacy. Stakeholder role: curriculum designer; analytic tradecraft instructor; pedagogy reviewer. Assurance use: Adds publisher-backed support for SAT classroom-artifact language and exercise design. Rights dimension: copyrighted textbook metadata only; cite and summarize sparingly. SAGE College Publishing product page verified live 2026-06-15 for title, subtitle, authors, edition, publisher, date, ISBNs, and description.

Richard K. Betts. Analysis, war, and decision: Why intelligence failures are inevitable, 1978. URL https://www.cambridge.org/core/journals/world-politics/article/abs/analysis-war-and-decision-why-intelligence-failures-are-inevitable/FB02E0C3A2E0EC5567C678044B3EB828. Classic peer-reviewed failure-theory article on the interaction of analysis, decision, leadership psychology, and policy uptake. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: intelligence_failure_postmortem. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Refresh if publisher metadata or DOI record changes. Verification method: publisher_record_review. Claim scope: Supports claims that intelligence failure often emerges from analysis-decision interaction and cannot be reduced to missing technique alone. Stakeholder role: curriculum designer; intelligence history instructor; governance reviewer. Assurance use: Keeps failure lessons attentive to policy uptake, incentives, and organizational learning. Rights dimension: copyrighted scholarly article metadata; cite and summarize sparingly. Cambridge Core publisher page verified live 2026-06-11; use for failure-theory context, not fatalistic claims that improvement is impossible.

J. Biden. Executive order 14028 on improving the nation's cybersecurity, 2021. URL https://www.federalregister.gov/documents/2021/05/17/2021-10460/improving-the-nations-cybersecurity. Verified official primary source for supply_chain_intelligence_attacks; routed to Supply Chain Intelligence Attacks; Cyber Intelligence Fundamentals; ICS/OT Security. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: supply_chain_intelligence_attacks. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for supply_chain_intelligence_attacks materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of supply_chain_intelligence_attacks and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that supply_chain_intelligence_attacks claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_whitehouse_eo_14028 retained; stale or indirect proposal URL replaced with direct source record.

Lars C. Borg and Kristian C. Gustafson. Teaching structured analytic techniques across nations: Same, same but different, 2025. URL https://doi.org/10.1080/08850607.2025.2479991. Peer-reviewed article on cross-national SAT teaching used for pedagogy, transfer, and local-context caveats. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_method_pedagogy. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded claims about SAT teaching across institutional and national contexts without assuming one curriculum design transfers unchanged. Stakeholder role: curriculum designer; analytic tradecraft instructor; pedagogy reviewer. Assurance use: Strengthens AGEINT's classroom framing and local-context caveats for SAT exercises. Rights dimension: copyrighted

scholarly article; cite DOI metadata and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, authors, journal DOI, publisher, and year; DOI URL retained as stable scholarly source.

J. Boyens, A. Smith, N. Bartol, K. Winkler, A. Holbrook, and M. Fallon. Cybersecurity supply chain risk management practices for systems and organizations (nist sp 800-161 rev. 1), 2022. URL https://csrc.nist.gov/pubs/sp/800/161/r1/final. Verified official primary source for supply_chain_intelligence_attacks; routed to Supply Chain Intelligence Attacks; ICS/OT Security; Threat Intelligence Sharing. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: supply_chain_intelligence_attacks. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for supply_chain_intelligence_attacks materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of supply_chain_intelligence_attacks and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that supply_chain_intelligence_attacks claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nist_sp_800_161r1_scrm retained.

L. Brimbal, S. M. Kleinman, S. Oleszkiewicz, and C. A. Meissner. Developing rapport and trust in the interrogative context: An empirically supported alternative, 2020. URL https://academic.oup.com/book/40539/chapter/347867388. An Oxford volume chapter reviewing the empirical and ethical case for rapport- and trust-based interrogation as an alternative to customary coercive practices, grounding the contrast between rapport-based and coercive elicitation and the ethics/consent governance that distinguishes them. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: counterintelligence_source_integrity. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Backs the AGEINT contrast between rapport-based and coercive elicitation and its ethics/consent governance framing. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

Miles Brundage et al. The malicious use of artificial intelligence: Forecasting, prevention, and mitigation, 2018. URL https://arxiv.org/abs/1802.07228. Foundational public report on malicious uses of AI, encoded for defensive taxonomy, safe-substitution, and governance framing in synthetic classroom work. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: scholarly_report. Refresh cadence: annual. Refresh trigger: AI misuse taxonomy, cited source URL, or consensus risk framing materially changes. Verification method: direct_arxiv_page_review. Claim scope: Supports high-level AI misuse taxonomy and defensive risk analysis only; AGEINT excludes operational instructions, target selection, evasion, and exploit procedures. Stakeholder role: red-team reviewer, AI governance lead, instructor, safety reviewer. Assurance use: AI misuse taxonomy review, red-team scenario boundaries, and safe substitution design. Rights dimension: safety, security, public trust, civil liberties, and defensive risk communication. Direct arXiv source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Christopher L. Buckley, Chang Sub Kim, Simon McGregor, and Anil K. Seth. The free energy principle for action and perception: A mathematical review, 2017. URL https://arxiv.org/abs/1705.09156. arXiv scholarly review that works through the free energy principle and active inference mathematically, including an agent-based model and the assumptions needed for the formal result. Checked as of 2026-06-10. Citation role: curriculum_anchor. Source lane: cognitive_active_inference. Source tier: scholarly_preprint. Refresh cadence: annual. Refresh trigger: arXiv record, DOI record, active-inference review literature, or cited mathematical formulation materially changes. Verification method: direct_scholarly_page_review. Claim scope: Mathematical review of the free energy principle and active inference as a theory of action and perception, including variational free energy, generative models, and explicit modeling assumptions. Stakeholder role: instructor, learner, assurance reviewer, curriculum maintainer, and governance reviewer. Assurance use: active-inference theory review, classroom analogy boundary setting, formal-claim caveat review, and governance handoff evidence. Rights dimension: prevents theory-to-governance overclaiming, separates formal theory from pedagogical analogy, and blocks unsupported autonomous-action claims. Direct arXiv source URL verified live 2026-06-10 with title, authors, submission date, abstract, and DOI metadata matching the cited mathematical review.

Bureau of Industry and Security. Export enforcement, 2026. URL https://www.bis.gov/enforcement. Official export-control enforcement source for compliance, screening, red flags, voluntary disclosures, and national-security protection of sensitive items. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: financial_economic_security. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

R. Burkett. An alternative framework for agent recruitment: From mice to rascls, 2013. URL https://www.cia.gov/resources/csi/studies-in-intelligence/volume-57-no-1/an-alternative-framework-for-agent-recruitment-from-mice-to-rascls/. A CIA Studies in Intelligence analyst essay arguing that the traditional MICE recruitment-motivation model (Money, Ideology, Compromise, Ego) is better understood through Cialdini's influence principles reframed as RASCLS (Reciprocation, Authority, Scarcity, Commitment/Consistency, Liking, Social Proof), grounding the historical and conceptual lineage of HUMINT recruitment frameworks. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: counterintelligence_source_integrity. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Backs the MICE-to-RASCLS recruitment-motivation framework with the original official CIA source, supplementing a secondary training-book treatment. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

William N. Caballero and Phillip R. Jenkins. On large language models in national security applications, 2024. URL https://arxiv.org/abs/2407.03453. arXiv preprint on LLMs in national-security applications, useful for classroom risk framing because it explicitly treats LLMs as support tools needing safeguards rather than strategic decision-makers. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: ai_enabled_analysis_boundary. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: arXiv version, DOI record, national-security LLM literature, or risk framing materially changes. Verification method: direct_arxiv_page_review. Claim scope: Supports bounded discussion of LLM assistance, hallucination, privacy, adversarial vulnerability, and supporting-role limits in national-security applications; not evidence for autonomous strategic judgment. Stakeholder role: AI governance reviewer, analyst, instructor, red-team reviewer. Assurance use: LLM assistance risk review, human-judgment boundary checks, and national-security classroom case framing. Rights dimension: privacy, reliability, human accountability, adversarial robustness, and public trust. Direct arXiv source URL verified on 2026-06-15 with title, authors, abstract, DOI record, and subject metadata visible on the primary page.

S. Caltagirone, A. Pendergast, and C. Betz. The diamond model of intrusion analysis, 2013. URL https://apps.dtic.mil/sti/pdfs/ADA586960.pdf. Verified professional documentation source for cyber_threat_intelligence; routed to Cyber Intelligence Fundamentals; APT Analysis; Structured Analytic Techniques for Cyber CTI. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: professional_documentation. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cyber_threat_intelligence materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of cyber_threat_intelligence and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that

cyber_threat_intelligence claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_caltagirone_2013_diamond_model normalized to professional_caltagirone_2013_diamond_model.

Cardenuto et al. The age of synthetic realities: Challenges and opportunities, 2023. URL https://arxiv.org/abs/2306.11503. arXiv survey-style source on synthetic realities and AI-generated media risk, used for provenance, detection-limit, and public-trust framing in cognitive-security lessons. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: synthetic_media_provenance. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: arXiv version, synthetic-media detection literature, provenance standards, or misuse patterns materially changes. Verification method: direct_arxiv_page_review. Claim scope: Supports bounded discussion of synthetic realities, generated media, and provenance risk; does not support identity-attack recipes or unrestricted deepfake detection claims. Stakeholder role: cognitive-security reviewer, media-literacy instructor, AI governance reviewer. Assurance use: synthetic media provenance review, deepfake risk caveats, and synthetic-reality classroom examples. Rights dimension: identity protection, consent, provenance, public trust, and harms from synthetic media. Direct arXiv source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

CAST. Cast universal design for learning guidelines version 3.0, 2024. URL https://udlguidelines.cast.org/. CAST UDL Guidelines 3.0 source for designing multiple means of engagement, representation, action, expression, and learner agency. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: accessibility_digital_inclusion. Source tier: education_guidance. Refresh cadence: annual. Refresh trigger: UDL guideline version, citation guidance, or inclusive-learning practice changes. Verification method: direct_official_page_review. Claim scope: inclusive curriculum design, learner variability, assessment flexibility, and facilitation review. Stakeholder role: learner, instructor, accommodation reviewer, and curriculum steward. Assurance use: UDL review checklist and inclusive-assessment evidence. Rights dimension: accessibility, inclusion, learner agency, and educational equity. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Center for Security and Emerging Technology. Adversarial machine learning and cybersecurity, 2022. URL https://cset.georgetown.edu/publication/adversarial-machine-learning-and-cybersecurity/. CSET policy-research source on adversarial machine learning and cybersecurity, used to connect AI model robustness, defensive assurance, and cyber threat-intelligence review. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: public_domain_primary. Refresh cadence: annual. Refresh trigger: CSET report URL, adversarial-ML taxonomy, cybersecurity guidance, or AI assurance practice materially changes. Verification method: direct_policy_report_page_review. Claim scope: Supports defensive framing for adversarial machine learning and cybersecurity governance; does not provide exploit, evasion, or bypass instructions. Stakeholder role: AI security reviewer, cyber analyst, instructor, red-team reviewer. Assurance use: adversarial-ML threat-model review, defensive cyber-AI control mapping, and AI assurance caveats. Rights dimension: system integrity, safety, defensive security, accountability, and public trust. Direct CSET source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Center for Strategic and International Studies. Crossing the deepfake rubicon, 2022. URL https://www.csis.org/analysis/crossing-deepfake-rubicon. CSIS public analysis on deepfake risk as a policy and security concern, routed to synthetic-media provenance and cognitive-security safeguards. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: synthetic_media_provenance. Source tier: public_domain_primary. Refresh cadence: annual. Refresh trigger: CSIS page URL, synthetic-media policy landscape, or deepfake threat assessment materially changes. Verification method: direct_policy_page_review. Claim scope: Supports bounded policy discussion of deepfake risk and governance; does not provide impersonation, targeting, or manipulation instructions. Stakeholder role: cognitive-security reviewer, policy analyst, instructor. Assurance use: deepfake risk governance, policy brief caveats, and synthetic-media threat-boundary review. Rights dimension: identity integrity, public trust, consent, democratic resilience, and non-manipulative education. Direct CSIS source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Centers for Disease Control and Prevention. Considerations for agentic research in public health, 2026. URL https://www.cdc.gov/ai/resources/considerations-for-agentic-research-in-public-health.html. Official public-health guidance for scoping agentic research, human oversight, expert validation, sensitive-data avoidance, and non-replacement of professional judgment. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Central Intelligence Agency. A tradecraft primer: Structured analytic techniques for improving intelligence analysis, 2009. URL https://www.cia.gov/resources/csi/static/Tradecraft-Primer-apr09.pdf. Official structured analytic techniques primer for bias checks, alternatives, and warning analysis. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: analytic_tradecraft. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Central Intelligence Agency. Center for the study of intelligence, 2026. URL https://www.cia.gov/resources/csi/. Official CSI landing page for Studies in Intelligence, declassified professional reflection, analytic history, and institutional learning. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: historical_declassified_sources. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Central Intelligence Agency, Center for the Study of Intelligence. The need for an intelligence literature, 1955. URL https://www.cia.gov/resources/csi/static/Need-for-Intelligence-Literature.pdf. Classic CIA/CSI source for why intelligence practice needs a professional literature and reviewable doctrine. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: intelligence_profession_literature. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: professional-literature and method-governance support for Synthetic Analytic Tradecraft framing. Stakeholder role: method instructor, author, reviewer. Assurance use: anchors claims that AGEINT is an inspectable literature-backed substrate, not a private prompt collection. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. The ic's struggle to express uncertainty in the 1970s, 1970s. URL https://www.cia.gov/resources/csi/static/ICs-Struggle-to-Express.pdf. CIA/CSI historical source for uncertainty vocabulary, disagreement, and estimative communication problems. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_uncertainty_language. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: historical uncertainty-communication support and analytic-language caution. Stakeholder role: analyst, reviewer, writing coach. Assurance use: anchors exercises that separate likelihood, confidence, dissent, and caveats. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Words of estimative probability, 1993. URL https://www.cia.gov/resources/csi/static/Words-of-Estimative-Probability.pdf. CIA/CSI source for disciplined probability language and the review boundary between estimative wording, evidence, and numeric interpretation. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_uncertainty_language. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: estimative-language calibration and uncertainty-expression support, not empirical AGEINT benchmark evidence. Stakeholder role: analyst, reviewer, method instructor. Assurance use: checks whether probability words, confidence, and evidence limits remain separated. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency Center for the Study of Intelligence. Sherman kent's final thoughts on analyst-policymaker relations, 1994. URL https://www.cia.gov/resources/csi/static/Kent-Final-Thoughts-Analyst-Policymaker-Relations.pdf. Official CIA CSI republication of Kent's final essay on analyst-policy relations, warning, intention, and communication boundaries. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: analytic_tradecraft_evidence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: Refresh if CIA replaces the PDF or publishes a newer CSI version. Verification method: direct_pdf_download. Claim scope: Supports bounded claims about analyst-policy communication and warning-intelligence responsibilities. Stakeholder role: analytic tradecraft instructor; policy liaison; analyst supervisor. Assurance use: Keeps warning and policy-support lessons inside advisory rather than decision-authority claims. Rights dimension: public-domain government source; cite as historical context. Direct CIA PDF verified live 2026-06-11; use for warning and analyst-policy boundary framing.

Central Intelligence Agency, Center for the Study of Intelligence. Sherman kent and the board of national estimates: Collected essays, 1994. URL https://www.cia.gov/resources/csi/static/sherman-kent-and-the-board-of-national-estimates-collected-essays.pdf. CIA/CSI historical professional source for estimative practice, institutional review, and the Board of National Estimates. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: declassified_analytic_history. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: declassified historical support for analytic-profession and estimative-institution lessons. Stakeholder role: historian, analyst, reviewer. Assurance use: keeps historical institutional claims tied to declassified official material. Rights dimension: public declassified history used for education and governance lessons. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Cia and the vietnam policymakers: Three episodes 1962-1968, 1998. URL https://www.cia.gov/resources/csi/static/1768c7c6f5560bafdc7c57afc7b0f1d6/CIA-and-the-Vietnam-Policymakers.pdf. CIA/CSI declassified historical source for analyst-policy boundary lessons and historical interpretation limits. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: declassified_analytic_history. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: declassified history support for analyst-policymaker boundary and institutional lessons. Stakeholder role: historian, analyst, policy reviewer. Assurance use: anchors historical case discussion without translating it into current operational procedure. Rights dimension: public declassified history used for education and governance lessons. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Psychology of intelligence analysis, 1999. URL https://www.cia.gov/resources/csi/static/Pyschology-of-Intelligence-Analysis.pdf. CIA/CSI public PDF of Richards Heuer's work on cognition, bias, evidence evaluation, and analytic judgment. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_cognition_and_bias. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: cognitive and analytic-judgment support for bias-aware review, not universal debiasing proof. Stakeholder role: analyst, instructor, reviewer. Assurance use: supports misconception checks and cognitive-bias caveats in topic lessons. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov; note retains CIA disclaimer context.

Central Intelligence Agency Center for the Study of Intelligence. Sherman kent and the profession of intelligence analysis, 2002. URL https://www.cia.gov/resources/csi/static/Kent-Profession-Intel-Analysis.pdf. Official CIA Center for the Study of Intelligence essay on Kent's professionalization of intelligence analysis and analytic standards. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: analytic_tradecraft_evidence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: Refresh if CIA replaces the PDF or publishes a newer CSI Kent/tradecraft history. Verification method: direct_pdf_download. Claim scope: Supports claims about Kent's role in professional analytic standards and intelligence-analysis identity. Stakeholder role: curriculum designer; analytic tradecraft instructor; analyst supervisor. Assurance use: Grounds professional-standards framing for tradecraft lessons. Rights dimension: public-domain government source; cite as historical context. Direct CIA PDF verified live 2026-06-11; use for Kent-as-profession and standards claims, not for contemporary agency policy.

Central Intelligence Agency, Center for the Study of Intelligence. Fifty years of studies in intelligence, 2005a. URL https://www.cia.gov/resources/csi/static/Fifty-Years-Studies-Intel.pdf. CIA/CSI reflection on Studies in Intelligence as an official professional literature venue. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: intelligence_profession_literature. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: professional-literature history for manuscript and curriculum-source governance. Stakeholder role: author, reviewer, historian. Assurance use: supports claims about public professional literature as a reviewable source surface. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Creation of a national institute for analytic methods, 2005b. URL https://www.cia.gov/resources/csi/static/National-Institute-Analytic-Methods.pdf. CIA/CSI source on analytic-method evaluation, evidence standards, and institutional method development. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_method_design. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: method-development support for verifier-first analytic substrate design. Stakeholder role: method designer, evaluator, reviewer. Assurance use: anchors method claims to reviewable institutional evaluation needs rather than intuition. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. When everything is intelligence - nothing is intelligence, 2006. URL https://www.cia.gov/resources/csi/studies-in-intelligence/archives/when-everything-is-intelligence-nothing-is-intelligence/. CIA/CSI article for defining intelligence analysis around uncertainty rather than undifferentiated information processing. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: intelligence_profession_literature. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA article URL, archive status, or public text materially changes. Verification method: curl_http_200_html_review. Claim scope: definition and professional-boundary support for intelligence-analysis framing. Stakeholder role: analyst, instructor, reviewer. Assurance use: helps prevent source availability from being treated as analytic judgment. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and text/html content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. The limits of prediction - or, how i learned to stop worrying about black swans and love analysis, 2017. URL https://www.cia.gov/resources/csi/static/Limits-of-Prediction.pdf. CIA/CSI source for prediction limits, forecasting caution, and analytic improvement boundaries. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: forecasting_calibration_evidence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification

method: curl_http_200_pdf_review. Claim scope: prediction-limit and forecasting-caution support, not evidence of AGEINT forecast accuracy. Stakeholder role: analyst, forecaster, reviewer. Assurance use: anchors rejection of overstrong prediction, proof, and benchmark claims. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. A call for more humility in intelligence analysis, 2018a. URL https://www.cia.gov/resources/csi/static/a-call-for-humility.pdf. CIA/CSI article supporting humility, uncertainty, and limits in analytic judgment. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_cognition_and_bias. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: analytic-humility support for calibrated claims and challengeable evidence packets. Stakeholder role: analyst, reviewer, instructor. Assurance use: anchors reviewer checklists that ask what evidence does not establish. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Developing a taxonomy of intelligence analysis variables, 2018b. URL https://www.cia.gov/resources/csi/static/Developing-a-Taxonomy.pdf. CIA/CSI analytic-methods source for decomposing analysis variables and avoiding one-piece judgment claims. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_method_design. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: taxonomy and analytic-variable support for source-backed method decomposition. Stakeholder role: method designer, reviewer, instructor. Assurance use: supports modular decomposition of claims, variables, evidence, and uncertainty. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Managing the reliability cycle: An alternative approach to thinking about intelligence failure, 2018c. URL https://www.cia.gov/resources/csi/static/Managing-the-Reliability-Cycle.pdf. CIA/CSI source for reliability, intelligence failure, feedback, and institutional learning cycles. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: intelligence_failure_postmortem. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: failure-analysis and reliability-cycle support for reviewer challenge and rollback claims. Stakeholder role: reviewer, red team, instructor. Assurance use: supports negative-control and after-action learning language. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Thinking and writing: Cognitive science and intelligence analysis, 2018d. URL https://www.cia.gov/resources/csi/static/9e870ec099fc6192e2e412bee248257e/Thinking-and-Writing.pdf. CIA/CSI source connecting cognitive science, analytic writing, and intelligence-analysis communication. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: intelligence_writing_and_review. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: writing and cognitive-science context for clearer evidence packets and analytic communication. Stakeholder role: author, analyst, reviewer. Assurance use: supports prose gates that demand concrete claims, caveats, and reader-inspectable reasoning. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. War and chance: Assessing uncertainty in international politics, 2018e. URL https://www.cia.gov/resources/csi/static/Review-War-and-Chance.pdf. CIA/CSI review source for uncertainty, probability expression, and the limits of confident prediction. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_uncertainty_language. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: uncertainty-language and prediction-limit context for calibrated analytic prose. Stakeholder role: analyst, instructor, reviewer. Assurance use: supports wording that avoids proof, certainty, or overconfident statistical implication. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Why bad things happen to good analysts, 2018f. URL https://www.cia.gov/resources/csi/static/Why-Bad-Things-Happen.pdf. CIA/CSI source for analyst error, limits, and institutional conditions around analytic failure. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: intelligence_failure_postmortem. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: failure-mode support for calibrated reviewer challenge and non-guarantee language. Stakeholder role: analyst, reviewer, instructor. Assurance use: supports lessons that distinguish reviewable practice from proof of correctness. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. The future of analysis, 2019. URL https://www.cia.gov/resources/csi/static/Future-of-Analysis.pdf. CIA/CSI source for future analytic work, data volume, automation, and human analytic structure. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: ai_enabled_analysis_boundary. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: future-analysis context for bounded AI assistance and human analytic structure, not deployed benchmark evidence. Stakeholder role: analyst, AI governance reviewer, instructor. Assurance use: anchors agentic-assistance claims to professional context and limits. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Lessons from sable spear: The application of an artificial intelligence methodology to tactical intelligence, 2020. URL https://www.cia.gov/resources/csi/static/ArticleSableSpearExperimentInAI.pdf. CIA/CSI article on an AI-enabled analytic experiment, used as bounded professional context for AI-assisted analysis. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: ai_enabled_analysis_boundary. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: professional-context support for AI-assisted analysis boundaries, not AGEINT benchmark evidence. Stakeholder role: AI governance reviewer, analyst, instructor. Assurance use: supports examples that keep AI assistance reviewable, bounded, and evidence-bounded. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Voice of experience: Principles of intelligence analysis, 2021a. URL https://www.cia.gov/resources/csi/static/Article-Principles-of-Intelligence-Analysis-Studies65-4-Dec2021.pdf. CIA/CSI article on foundational elements of intelligence analysis and disciplined analytic practice. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_method_design. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: professional principle support for source-backed analytic synthesis and reviewer handoff. Stakeholder role: analyst, instructor, reviewer. Assurance use: supports modular practice-language around evidence, assumptions, and judgment. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Intelligent analysis: How to defeat uncertainty in high-stakes decisions, 2021b. URL https://www.cia.gov/resources/csi/static/Review_Intelligence_Analysis_in_Uncertainty_Dec_2021.pdf. CIA/CSI review source for uncertainty-management literature and analytic decision support. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_uncertainty_language. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: uncertainty-management context for bounded analytic-decision support language. Stakeholder role: analyst, reviewer, instructor. Assurance use: supports calibrated uncertainty language without implying AGEINT benchmark results. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Agile analysis: Transforming intelligence production through lean startup principles, 2023. URL https://www.cia.gov/resources/csi/static/Article-An-Approach-Agile-Analysis-Sep-2023.pdf. CIA/CSI source for team-based analytic production, iteration, and experimentation boundaries. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_production_workflow. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: workflow and analytic-production support for iterative, reviewable tradecraft artifacts. Stakeholder role: team lead, analyst, reviewer. Assurance use: anchors modular workflow claims while preserving human review and experiment limits. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Applying epistemology to intelligence analysis, 2025a. URL https://www.cia.gov/resources/csi/static/Article-Applying-Epistemology-to-Intelligence-Analysis-Sep-2025.pdf. CIA/CSI source for epistemic framing, objectivity, knowledge claims, and analytic habits of thinking. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_epistemology. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: epistemic-framing support for calibrated claims and reviewer challengeability. Stakeholder role: analyst, epistemic reviewer, instructor. Assurance use: supports claim-calibration language about what evidence can and cannot establish. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Studies in intelligence author's guide 2025: Guidance section only, 2025b. URL https://www.cia.gov/resources/csi/static/Studies-Writers-Guide-2025-Guidance-Section-Only.pdf. CIA/CSI writing-guide source for public professional writing norms, review boundaries, and publication discipline. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: intelligence_writing_and_review. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA guide version, source URL, or public release status changes. Verification method: curl_http_200_pdf_review. Claim scope: professional writing and review-process support for manuscript discipline. Stakeholder role: author, editor, reviewer. Assurance use: supports writing gates that distinguish public professional analysis from agency policy or operational direction. Rights dimension: public professional guidance used for education and manuscript review. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

Central Intelligence Agency, Center for the Study of Intelligence. Espionage in our ai future, 2026. URL https://www.cia.gov/resources/csi/static/Article-Espionage-in-Our-AI-Future-Studies-70-1-Mar2026.pdf. CIA/CSI 2026 article for AI-era espionage context, source skepticism, and human-review boundaries. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: ai_enabled_analysis_boundary. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: AI-era intelligence context for bounded agentic assistance and counterintelligence caution. Stakeholder role: AI governance reviewer, analyst, counterintelligence instructor. Assurance use: supports safe framing of AI assistance, espionage risk, and reviewer control without operational instructions. Rights dimension: public professional literature used for education and review without operational tasking. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from cia.gov.

N. J. Cepeda, H. Pashler, E. Vul, J. T. Wixted, and D. Rohrer. Distributed practice in verbal recall tasks, 2006. URL https://www.yorku.ca/ncepeda/publications/CPVWR2006.html. Verified scholarly repository record source for cognitive_performance; routed to Productivity Intelligence & Cognitive Performance (information architecture, spaced repetition); Instructor Capstone/Rubric/Red-Team Pack appendix. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cognitive_performance. Source tier: scholarly_repository_record. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cognitive_performance materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of cognitive_performance and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cognitive_performance claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_cepeda_2006_spaced_repetition retained.

Chairman of the Joint Chiefs of Staff. Jp 2-01: Joint and national intelligence support to military operations (2012), 2012. URL https://www.esd.whs.mil/Portals/54/Documents/FOID/Reading%20Room/Joint_Staff/21-F-0090_Document_1.pdf. Verified official primary source for collection_management_doctrine; routed to All-source collection management; HUMINT/SIGINT/GEOINT integration; joint intelligence support. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: collection_management_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for collection_management_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of collection_management_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that collection_management_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_jp_2_01_intelligence_support_2012 retained.

Chairman of the Joint Chiefs of Staff. Jp 2-03: Geospatial intelligence in joint operations (2017), 2017. URL https://irp.fas.org/doddir/dod/jp2_03.pdf. Verified official primary source for geoint_doctrine; routed to GEOINT doctrine; imagery intelligence in joint operations; NGA role; GEOINT organizations. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: geoint_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for geoint_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of geoint_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that geoint_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_jp_2_03_geoint_joint_ops_2017 retained.

Welton Chang, Elissabeth Berdini, David R. Mandel, and Philip E. Tetlock. Restructuring structured analytic techniques in intelligence, 2018. URL https://doi.org/10.1080/02684527.2017.1400230. Peer-reviewed article arguing for a more evidence-attentive structuring of SATs and stronger links to

judgment and decision-science research. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded claims that SAT pedagogy should externalize reasoning, specify mechanisms, and avoid unsupported broad debiasing claims. Stakeholder role: curriculum designer; analytic standards trainer; evaluation lead. Assurance use: Connects SAT chapter revisions to decision-science evidence and claim-calibration gates. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, authors, journal DOI, publisher, and year; DOI URL retained as stable scholarly source.

A. Cherepanov. Win32/industroyer: A new threat for industrial control systems, 2017. URL https://web-assets.esetstatic.com/wls/2017/06/Win32_Industroyer.pdf. Verified professional documentation source for historical_ics_incidents; routed to Historical ICS Cyber Incidents; ICS/OT Security; MITRE ATT&CK for ICS. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: historical_ics_incidents. Source tier: professional_documentation. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for historical_ics_incidents materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of historical_ics_incidents and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that historical_ics_incidents claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_eset_win32_industroyer_2017 normalized to professional_eset_win32_industroyer_2017.

Anshuman Chhabra, Shrestha Datta, Shahriar Kabir Nahin, and Prasant Mohapatra. Agentic ai security: Threats, defenses, evaluation, and open challenges, 2025. URL https://arxiv.org/abs/2510.23883v2. arXiv survey on agentic AI security providing a comprehensive threat taxonomy, defense catalog, evaluation review, and governance perspectives; vendor statistics within treated as ESTIMATE. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: scholarly_preprint. Refresh cadence: quarterly. Refresh trigger: New arXiv version of the agentic-AI security survey, revised threat taxonomy, defense catalog, or evaluation-methodology updates. Verification method: direct_scholarly_page_review. Claim scope: agentic AI security threat taxonomy, prompt-injection and protocol threats, defense strategies, evaluation methodologies, and open challenges. Stakeholder role: red-team reviewer, threat modeler, instructor, system steward, and learner. Assurance use: agentic threat-taxonomy crosswalk, defense-catalog review, evaluation-benchmark map, and open-challenge research log. Rights dimension: security, accountability, transparency, and trustworthy AI assurance. Direct source URL verified live (HTTP 200, on-topic arXiv agentic-AI security survey) for AGEINT curriculum use. Authorship metadata inspected from the arXiv record on 2026-11-06; this metadata-only correction does not refresh or independently validate the survey claims.

Mihai Christodorescu, Earlence Fernandes, Ashish Hooda, Somesh Jha, Johann Rehberger, and Khawaja Shams. Systems security foundations for agentic computing, 2025. URL https://arxiv.org/html/2512.01295v1. The arXiv paper uses dynamic code loading as an analogy for prompt injection, identifies challenges in applying classical security principles to agents, and outlines research problems. Its 11 reported attack cases are illustrative; they were not independently reproduced in this review. Checked as of 2026-11-06. Citation role: curriculum_anchor. Source lane: secure_release_change_control. Source tier: scholarly_preprint. Refresh cadence: annual. Refresh trigger: New arXiv version of Systems Security Foundations for Agentic Computing, revised privilege model, or successor agentic-security-foundations research changes. Verification method: direct_scholarly_page_review. Claim scope: A systems-security research agenda and source-reported attack illustrations concerning probabilistic trusted computing bases, dynamic privilege, instruction/data separation, and information flow; not a general proof of agent security or measured AGEINT defense efficacy. Stakeholder role: security architect, release reviewer, instructor, system steward, and learner. Assurance use: agentic trusted-computing-base review, dynamic-privilege change-control map, instruction-data separation evidence, and release-gate analysis. Rights dimension: security, integrity, least-privilege accountability, and operational resilience. Partial primary-source inspection on 2026-11-06: author line, abstract, introduction, and security-principles/challenges sections read directly at the versioned arXiv HTML URL. Case reports and proposed defenses were not independently reproduced; this is not a full-text or empirical effectiveness validation.

Robert B. Cialdini. Influence: The psychology of persuasion (cialdini, 1984), 1984. URL https://books.google.com/books/about/Influence.html?id=mJidPwAACAAJ. Verified scholarly book metadata source for social_engineering_influence_psychology; routed to Social Engineering; Active Measures and Disinformation; Information Warfare and Cognitive Security. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: social_engineering_influence_psychology. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for social_engineering_influence_psychology materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of social_engineering_influence_psychology and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that social_engineering_influence_psychology claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_cialdini_1984_influence_psychology retained; stale or indirect proposal URL replaced with direct source record.

CISA. Advanced persistent threat compromise of government agencies, critical infrastructure, and private sector organizations (aa20-352a), 2020. URL https://www.cisa.gov/news-events/cybersecurity-advisories/aa20-352a. Verified official primary source for supply_chain_intelligence_attacks; routed to Supply Chain Intelligence Attacks; Advanced Persistent Threats; Threat Intelligence Sharing. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: supply_chain_intelligence_attacks. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for supply_chain_intelligence_attacks materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of supply_chain_intelligence_attacks and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that supply_chain_intelligence_attacks claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_cisa_aa20_352a_solarwinds retained.

CISA, NSA, FBI, et al. Prc state-sponsored actors compromise and maintain persistent access to u.s. critical infrastructure (aa24-038a), 2024. URL https://www.cisa.gov/news-events/cybersecurity-advisories/aa24-038a. Verified official primary source for apt_threat_intelligence; routed to Advanced Persistent Threats; ICS/OT Threat Intelligence; Supply Chain and Critical Infrastructure. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: apt_threat_intelligence. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for apt_threat_intelligence materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of apt_threat_intelligence and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that apt_threat_intelligence claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_cisa_aa24_038a_volt_typhoon retained.

Robert M. Clark. Geospatial intelligence: Origins and evolution (georgetown up, 2020), 2020. URL https://press.georgetown.edu/Book/Geospatial-Intelligence. Verified scholarly book metadata source for geoint_tradecraft; routed to GEOINT history and doctrine; remote sensing intelligence; IMINT tradecraft. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: geoint_tradecraft. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for geoint_tradecraft materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of geoint_tradecraft and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that geoint_tradecraft claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_clark_2020_geospatial_intelligence retained; stale or indirect proposal URL replaced with direct source record.

Cloud Security Alliance. Introducing cognitive degradation resilience (cdr): A framework for safeguarding agentic ai systems from systemic collapse, 2025a. URL https://cloudsecurityalliance.org/blog/2025/11/10/introducing-cognitive-degradation-resilience-cdr-a-framework-for-safeguarding-agentic-ai-systems-from-systemic-collapse. Primary publication of an industry-proposed framework, not a consensus standard or independent replication. Classroom use must distinguish proposed controls, observable synthetic signals, and source-specific evaluation evidence. Checked as of 2026-11-06. Citation role: curriculum_anchor. Source lane: agent_incident_response. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: CSA CDR framework, degradation-stage model, QSAF-BC controls, health-probe guidance, or agentic-AI resilience publication changes. Verification method: direct_publisher_page_review. Claim scope: The CSA authors propose a six-stage CDR degradation framework and seven QSAF-BC controls; this industry framework is not a demonstrated universal sequence, optimal intervention window, or remediation-cost curve. Stakeholder role: AI incident lead, resilience reviewer, instructor, system steward, and learner. Assurance use: Critical comparison of proposed agent-degradation stages and QSAF-BC controls in synthetic incident records; not evidence of universal control efficacy. Rights dimension: safety, reliability, operational resilience, accountable monitoring, and harm prevention. Retrieved and reviewed the CSA article on 2026-11-06, including its six stages and seven controls. No general early-intervention threshold or remediation-cost estimate is established by the inspected article; linked research was not independently evaluated in this pass.

Cloud Security Alliance. Agentic ai threat modeling framework: Maestro, 2025b. URL https://cloudsecurityalliance.org/blog/2025/02/06/agentic-ai-threat-modeling-framework-maestro. CSA MAESTRO seven-layer threat-modeling framework for the full agentic AI stack from foundation model through agent ecosystem, including the vertical security/compliance layer. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: CSA MAESTRO framework, seven-layer model, per-layer mitigation guidance, or agentic-AI threat-modeling publication changes. Verification method: direct_official_page_review. Claim scope: MAESTRO seven-layer agentic threat model, per-layer threats and mitigations, cross-layer vulnerabilities, and security-compliance layer monitoring. Stakeholder role: threat modeler, red-team reviewer, instructor, system steward, and learner. Assurance use: seven-layer threat-model worksheet, cross-layer mitigation map, security-agent self-audit, and agentic threat-modeling review. Rights dimension: security, accountability, transparency, supply-chain integrity, and trustworthy AI assurance. Direct source URL verified live (HTTP 200, on-topic CSA MAESTRO framework) for AGEINT curriculum use.

Cloud Security Alliance. Securing autonomous ai agents, 2026. URL https://cloudsecurityalliance.org/artifacts/securing-autonomous-ai-agents. CSA survey on securing autonomous AI agents quantifying the identity-governance gap; readiness percentages treated as ESTIMATE for curriculum discussion. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: procurement_vendor_governance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: CSA securing-autonomous-AI-agents survey revisions, identity-governance findings, or agent IAM-readiness data updates. Verification method: direct_official_page_review. Claim scope: securing autonomous AI agents, agent identity governance gaps, runtime IAM readiness, and accountable agent-credential management. Stakeholder role: identity governance lead, procurement assessor, instructor, system steward, and learner. Assurance use: agent identity-governance gap review, IAM-readiness assessment, non-human identity inventory, and procurement assurance checklist. Rights dimension: security, accountability, least-privilege governance, auditability, and operational resilience. Direct source URL verified live (HTTP 200, on-topic CSA securing-autonomous-AI-agents artifact) for AGEINT curriculum use.

Cloud Security Alliance AI Safety Initiative. Csa research note: Nist ai agent red-teaming standards (march 2026), 2026. URL https://labs.cloudsecurityalliance.org/research/csa-research-note-nist-ai-agent-red-teaming-standards-202603/. CSA research note on NIST AI agent red-teaming standards summarizing CAISI findings and recommended adversarial-ML testing protocols; reported success-rate figures treated as ESTIMATE. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: CSA/NIST AI agent red-teaming standards note revisions, CAISI findings, adversarial-ML taxonomy, or red-team standard updates. Verification method: direct_official_page_review. Claim scope: NIST AI agent red-teaming standards, adversarial-ML taxonomy, indirect prompt-injection and memory-poisoning test scenarios, and enterprise compliance. Stakeholder role: red-team reviewer, assurance evaluator, instructor, compliance officer, and learner. Assurance use: AI red-team standards crosswalk, adversarial-ML test scope, multi-attempt evaluation plan, and enterprise compliance review. Rights dimension: security, accountability, validity, reliability, transparency, and trustworthy AI assurance. Direct source URL verified live (HTTP 200, on-topic CSA/NIST AI agent red-teaming standards note) for AGEINT curriculum use.

Coalition for Content Provenance and Authenticity. C2pa specifications, 2026. URL https://spec.c2pa.org/specifications/. C2PA specifications source for content credentials, provenance manifests, assertions, signing, verification, and media authenticity evidence. Checked as of 2026-06-06. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: technical_standard. Refresh cadence: semiannual. Refresh trigger: C2PA specification version, assertion vocabulary, verification model, or threat update. Verification method: direct_standards_page_review. Claim scope: content provenance, authenticity metadata, media evidence, and chain-of-custody discussion. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use; URL refreshed 2026-06-06 after liveness check.

Commission on the Intelligence Capabilities of the United States Regarding Weapons of Mass Destruction. Report to the president of the united states: The commission on the intelligence capabilities of the united states regarding weapons of mass destruction, 2005. URL https://policy.defense.gov/portals/11/Documents/hdasa/references/GPO-WMD.pdf. Official WMD Commission report used for Iraq WMD analytic-failure context, assumptions-versus-evidence boundaries, and reform pressure. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: intelligence_failure_postmortem. Source tier: official_report. Refresh cadence: biennial. Refresh trigger: Refresh if official hosted PDF or archival record changes. Verification method: direct_pdf_download. Claim scope: Supports bounded claims about Iraq WMD intelligence failure, assumptions, evidence gaps, and analytic reform. Stakeholder role: curriculum designer; governance reviewer; analytic tradecraft instructor. Assurance use: Shows why evidence boundaries, dissent, and assumption registers matter in high-consequence analysis. Rights dimension: public-domain government report; cite official source. Defense policy-hosted official report PDF verified live 2026-06-11; use for assumptions/evidence and analytic-failure context.

Jeffrey R. Cooper. Curing analytic pathologies: Pathways to improved intelligence analysis, 2005. URL https://www.cia.gov/resources/csi/books-monographs/curing-analytic-pathologies/. CIA Center for the Study of Intelligence monograph on analytic pathologies, self-correction, and intelligence-process reform. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_tradecraft_evidence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA CSI page, monograph URL, or public release status changes. Verification method: direct_official_page_review. Claim scope: Supports bounded claims about analytic-culture reform, self-correction, peer challenge, and limits of linear intelligence-cycle metaphors. Stakeholder role: analytic tradecraft instructor; curriculum designer; reviewer. Assurance use: Adds institutional

self-critique to SAT evidence boundaries and analytic process reform lessons. Rights dimension: public CIA CSI monograph used for education and source-backed critique. Direct CIA CSI book page verified live 2026-06-15; used for analytic-culture reform context, not as proof that any specific SAT improves accuracy.

Stephen Coulthart. Why do analysts use structured analytic techniques? an in-depth study of an american intelligence agency, 2016. URL https://doi.org/10.1080/02684527.2016.1140327. Peer-reviewed study of why analysts use SATs, supporting adoption, training, and organizational-context claims rather than universal efficacy claims. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded claims about SAT adoption motives and organizational use, not empirical proof that SATs improve accuracy across tasks. Stakeholder role: curriculum designer; analytic standards trainer; evaluation lead. Assurance use: Separates usage and institutionalization evidence from efficacy evidence in SAT lessons. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, author, journal DOI, publisher, and year; DOI URL retained as stable scholarly source.

Stephen J. Coulthart. An evidence-based evaluation of 12 core structured analytic techniques, 2017. URL https://doi.org/10.1080/08850607.2016.1230706. Peer-reviewed evaluation of core SATs used to qualify claims about where specific techniques may or may not have evidence support. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded technique-specific evidence-boundary claims about SATs and discourages treating the category as uniformly validated. Stakeholder role: curriculum designer; analytic standards trainer; evaluation lead. Assurance use: Forces SAT exercises to distinguish doctrine, classroom utility, and empirical support by technique. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, author, journal DOI, publisher, and year; DOI URL retained as stable scholarly source.

Council of Europe. Modernised convention for the protection of individuals with regard to the processing of personal data, 2018. URL https://www.coe.int/en/web/data-protection/convention108/modernised. Official Council of Europe source for Convention 108+ privacy, data-protection principles, transborder flows, and supervisory cooperation. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: human_rights_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: treaty status, ratification, explanatory report, or committee guidance changes. Verification method: direct_official_page_review. Claim scope: privacy governance, data-processing rights, oversight, and cross-border safeguards. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Council of Europe. Framework convention on artificial intelligence, 2024. URL https://www.coe.int/en/web/artificial-intelligence/the-framework-convention-on-artificial-intelligence. Official treaty anchor for human rights, democracy, rule-of-law, risk management, accountability, and public-sector AI governance. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: legal_oversight. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

CrewAI, Inc. Crewai documentation, 2025. URL https://docs.crewai.com. Verified professional documentation source for agentic_framework_docs; routed to CrewAI Multi-Agent appendix; Frameworks & Infrastructure. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: agentic_framework_docs. Source tier: professional_documentation. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for agentic_framework_docs materially changes. Verification method: direct_professional_documentation_review. Claim scope: Supports bounded AGEINT discussion of agentic_framework_docs and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that agentic_framework_docs claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key professional_crewai_documentation retained.

Cybersecurity and Infrastructure Security Agency. Ai red teaming: Applying software tevv for ai evaluations, 2024a. URL https://www.cisa.gov/news-events/news/ai-red-teaming-applying-software-tevv-ai-evaluations. CISA guidance connecting AI red teaming to testing, evaluation, verification, and validation for security and safety assurance. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: CISA AI red-teaming, TEVV, security-evaluation, or AI-testing guidance changes. Verification method: direct_official_page_review. Claim scope: AI red-team assurance, TEVV framing, software safety evaluation, and critical-infrastructure security testing. Stakeholder role: red-team reviewer, evaluator, critical-infrastructure steward, instructor, and learner. Assurance use: AI red-team TEVV crosswalk and assurance critique. Rights dimension: safety, security, fit-for-purpose evaluation, reliability, and accountable testing. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cybersecurity and Infrastructure Security Agency. Preparing for and mitigating foreign influence operations, 2024b. URL https://www.cisa.gov/resources-tools/resources/cisa-insights-preparing-and-mitigating-foreign-influence-operations-targeting-critical. Official CISA guidance on foreign influence operations targeting critical infrastructure. Checked as of 2026-05-21. Citation role: source_quality_anchor. Source lane: source_quality_spine. Source tier: source_quality_anchor. Refresh cadence: semiannual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: baseline source-quality guardrail for generated AGEINT curriculum claims. Stakeholder role: curriculum maintainer, instructor, reviewer, and learner. Assurance use: source-quality triangulation and claim-boundary review. Rights dimension: source transparency, accountability, and evidence traceability. Directly verified official CISA source URL.

Cybersecurity and Infrastructure Security Agency. Creating and maintaining a definitive view of your operational technology (ot) architecture, 2025a. URL https://www.cisa.gov/resources-tools/resources/creating-and-maintaining-definitive-view-your-operational-technology-ot-architecture. CISA guidance on creating and maintaining a definitive view of OT architecture, used as an assurance-evidence anchor for cyber-physical readiness. Checked as of 2026-05-24. Citation role: curriculum_anchor. Source lane: assurance_evaluation_evidence. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: CISA OT architecture guidance, architecture record, communication map, definitive-view process, or change-control recommendation update. Verification method: direct_official_page_review. Claim scope: definitive OT architecture, asset and communication records, evidence baseline, cyber-physical assurance, and change-control review. Stakeholder role: OT architect, assurance reviewer, operator, instructor, and learner. Assurance use: definitive OT architecture record, evidence map, review cadence, change-control packet, and tabletop assurance baseline. Rights dimension: safety, availability, operational resilience, accountable architecture evidence, auditability, and defensive readiness. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cybersecurity and Infrastructure Security Agency. Secure by demand: Priority considerations for operational technology owners and operators when selecting digital products, 2025b. URL https://www.cisa.gov/resources-tools/resources/secure-demand-priority-considerations-operational-technology-owners-and-operators-when-selecting. CISA Secure by Demand considerations for OT owners and operators selecting digital products, used for vendor-governance and procurement review. Checked as of 2026-05-24. Citation role: curriculum_anchor. Source lane: procurement_vendor_governance. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: CISA Secure by Demand, OT procurement, vendor security, priority consideration, or owner/operator guidance changes. Verification method: direct_official_page_review. Claim scope: OT

procurement, secure-by-demand selection criteria, vendor accountability, operational resilience, and cyber-physical due diligence. Stakeholder role: OT owner, procurement official, vendor assessor, instructor, and learner. Assurance use: OT procurement checklist, vendor security criteria, defensible selection evidence, and lifecycle assurance review. Rights dimension: safety, resilience, accountable procurement, vendor transparency, service continuity, and due care. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cybersecurity and Infrastructure Security Agency. Cross-sector cybersecurity performance goals, 2026a. URL https://www.cisa.gov/cybersecurity-performance-goals. Official prioritized baseline of IT and OT cybersecurity practices for critical-infrastructure risk reduction and maturity assessment. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ics_ot_defense. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cybersecurity and Infrastructure Security Agency. Election security, 2026b. URL https://www.cisa.gov/topics/election-security. Official CISA election-security source for public-resilience, foreign-influence awareness, rumor control, and defensive communication framing. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cybersecurity and Infrastructure Security Agency. Ics recommended practices, 2026c. URL https://www.cisa.gov/resources-tools/resources/ics-recommended-practices. Official defensive ICS practice library for defense-in-depth, forensics, incident response, and remote access. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ics_ot_defense. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cybersecurity and Infrastructure Security Agency. Known exploited vulnerabilities catalog, 2026d. URL https://www.cisa.gov/known-exploited-vulnerabilities-catalog. Official catalog for prioritizing known exploited vulnerabilities as defensive triage inputs, not as exploitation instructions. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cybersecurity and Infrastructure Security Agency. Secure by design, 2026e. URL https://www.cisa.gov/securebydesign. Official secure-by-design program source for customer security outcomes, radical transparency, leadership accountability, and safer defaults. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cybersecurity and Infrastructure Security Agency. Cisa tabletop exercise packages, 2026f. URL https://www.cisa.gov/resources-tools/services/cisa-tabletop-exercise-packages. Official exercise packages for cyber, physical, ICS, ransomware, and convergence tabletop scenarios. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ics_ot_defense. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cybersecurity and Infrastructure Security Agency and international partners. Joint guidance on deploying ai systems securely, 2024. URL https://www.cisa.gov/news-events/alerts/2024/04/15/joint-guidance-deploying-ai-systems-securely. CISA joint guidance for deploying AI systems securely, used as a release/change-control anchor for AI-enabled services. Checked as of 2026-05-24. Citation role: curriculum_anchor. Source lane: secure_release_change_control. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: CISA or partner AI deployment guidance, secure configuration, monitoring, release, or incident-management update. Verification method: direct_official_page_review. Claim scope: secure AI deployment, threat modeling, system integration, secure configuration, monitoring, incident planning, and responsible release. Stakeholder role: AI system owner, security reviewer, release manager, instructor, and learner. Assurance use: secure AI deployment gate, change-control review, rollback evidence, monitoring threshold, and incident trigger. Rights dimension: security, reliability, safety, accountability, privacy, operational resilience, and public trust. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cybersecurity and Infrastructure Security Agency and partners. Cisa and partners release asset inventory guidance to strengthen operational technology security, 2025. URL https://www.cisa.gov/news-events/news/cisa-and-partners-release-asset-inventory-guidance-strengthen-operational-technology-security. CISA and partners' asset-inventory guidance for strengthening operational technology security and keeping OT records reviewable. Checked as of 2026-05-24. Citation role: curriculum_anchor. Source lane: records_retention_auditability. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: CISA OT asset inventory guidance, partner release, asset-record field, inventory process, or OT security visibility update. Verification method: direct_official_page_review. Claim scope: OT asset inventory, authoritative records, operational technology security, owner evidence, and defensive visibility. Stakeholder role: OT asset owner, records reviewer, security engineer, instructor, and learner. Assurance use: OT asset-inventory register, change evidence, owner field review, and auditability packet. Rights dimension: safety, service continuity, operational resilience, accountable records, auditability, and change traceability. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cybersecurity and Infrastructure Security Agency, National Security Agency, Federal Bureau of Investigation, and international partners. Ai data security: Best practices for securing data used to train and operate ai systems, 2025. URL https://media.defense.gov/2025/May/22/2003720601/-1/-1/0/CSI_AI_DATA_SECURITY.PDF. Joint official cybersecurity information sheet on best practices for securing data used to train and operate AI systems across the lifecycle. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: CISA, NSA, FBI, or partner AI data-security lifecycle guidance changes. Verification method: direct_official_pdf_review. Claim scope: AI data security for data used to train, test, deploy, and operate AI systems, including provenance, integrity, confidentiality, lifecycle controls, and trustworthy AI outcomes. Stakeholder role: data steward, model owner, procurement reviewer, release reviewer, instructor, and learner. Assurance use: model/data provenance card, AI data-security control review, training-data integrity checks, operational-data lifecycle mapping, and release-readiness evidence. Rights dimension: data integrity, confidentiality, provenance, privacy, trusted infrastructure, accountable reuse, and trustworthy AI outcomes. Direct official CISA/NSA/FBI partner PDF verified live 2026-06-11; executive summary covers AI data security, lifecycle stages, integrity risks, and best practices.

L. Da Costa, T. Parr, N. Sajid, S. Veselic, V. Neacsu, and K. Friston. Active inference on discrete state-spaces, 2020. URL https://doi.org/10.1016/j.jmp.2020.102447. A mathematical synthesis of active inference over discrete (POMDP) state-spaces, consolidating the partially observable Markov decision process model used to specify perception, planning, and action selection in agentic systems. Checked as of 2026-06-08. Citation

role: curriculum_anchor. Source lane: cognitive_active_inference. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Discrete-state / POMDP modeling underpinning agentic systems in AGEINT. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

Norman Dalkey and Olaf Helmer. An experimental application of the delphi method to the use of experts, 1963. URL https://doi.org/10.1287/mnsc.9.3.458. Classic peer-reviewed Delphi-method article used as historical method context for structured expert elicitation and iterative judgment aggregation. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: forecasting_calibration_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded claims about Delphi as an expert-elicitation and judgment-aggregation technique, not proof that expert panels converge on truth. Stakeholder role: forecasting instructor; methods instructor; curriculum designer. Assurance use: Adds historical method roots for aggregation and structured elicitation exercises. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, authors, journal DOI, publisher, and year; DOI URL retained as stable scholarly source.

DataCite. Datacite metadata schema, 2026. URL https://schema.datacite.org/. Official DataCite schema source for dataset citation metadata, persistent identifiers, creators, dates, relationships, and versioning. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: research_standard. Refresh cadence: annual. Refresh trigger: schema version, DOI metadata property, controlled vocabulary, or relation-type update. Verification method: direct_standards_page_review. Claim scope: dataset citation, persistent identifiers, source metadata, relation tracking, and version history. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Defense Advanced Research Projects Agency. Active social engineering defense, 2017. URL https://www.darpa.mil/research/programs/active-social-engineering-defense. DARPA public program page for Active Social Engineering Defense, used as official defensive context for social-engineering resilience and automation-risk caveats. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: DARPA program page, program status, public description, or defensive social-engineering literature materially changes. Verification method: direct_official_page_review. Claim scope: Supports public program-level framing for active social engineering defense; AGEINT uses it for defensive concept boundaries, not for social-engineering operations. Stakeholder role: cyber defender, instructor, social-engineering defense reviewer. Assurance use: social-engineering defense boundary, adversarial-interaction ethics review, and cyber-resilience classroom caveats. Rights dimension: defensive security, consent, transparency, privacy, and protection from manipulation. Direct DARPA source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Defense Advanced Research Projects Agency. Intrinsic cognitive security (ics), 2024. URL https://www.darpa.mil/research/programs/intrinsic-cognitive-security. The official program description distinguishes developing proved model properties from validating their usefulness in mixed-reality prototypes. Treat these as research aims, not already-demonstrated guarantees for arbitrary agent systems. Checked as of 2026-11-06. Citation role: curriculum_anchor. Source lane: assurance_evaluation_evidence. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: DARPA ICS program scope, formal-methods assumptions, mixed-reality validation results, or published assurance evidence changes. Verification method: direct_official_page_review. Claim scope: DARPA ICS program aims to develop and validate formal-methods mitigation guarantees for mixed-reality system models; the program page does not establish general LLM, curriculum, or population-level security. Stakeholder role: assurance evaluator, formal-methods reviewer, instructor, system steward, and learner. Assurance use: Review of mixed-reality formal-methods research aims and the assumptions needed for any model-scoped guarantee; not certification of general agent security. Rights dimension: safety, cognitive integrity, perceptual security, accountable system design, and verifiable assurance. Retrieved and reviewed the official DARPA ICS program description on 2026-11-06, including aims, mixed-reality scope, model assumptions, and the development/validation phase distinction.

Defense Intelligence Agency. Dia instruction 5400.001: Privacy and civil liberties program, 2014. URL https://www.dia.mil/Portals/110/Documents/FOIA/All%20PDFs/DIA-Instructions/DIAI_5400_001.pdf. DIA public instruction for privacy and civil-liberties responsibilities, complaints, records, and safeguards. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: rights_impact_privacy. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: DIA instruction URL, release status, or public policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: privacy and civil-liberties governance support for legal/ethical review modules. Stakeholder role: privacy reviewer, analyst, instructor. Assurance use: anchors rights-impact review language in an official DIA public instruction. Rights dimension: public instruction used for privacy and civil-liberties education. Direct URL verified on 2026-06-14 through browser fetch because dia.mil returned 403 to plain curl; fetched PDF content matched DIAI 5400.001.

Defense Intelligence Agency. Dia style manual for intelligence production, 2015. URL https://www.dia.mil/Portals/110/Documents/FOIA/All%20PDFs/DIA-Instructions/DIA_Style_Manual_for_Intelligence_Production.pdf. DIA public FOIA release for intelligence-production style, terminology, formatting, and writing consistency. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: intelligence_writing_and_review. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: DIA FOIA URL, style manual version, or public release status changes. Verification method: browser_fetch_official_pdf_review. Claim scope: intelligence-production writing and style support for manuscript clarity and table/heading discipline. Stakeholder role: author, editor, reviewer. Assurance use: supports AGEINT writing conventions and source-backed manuscript-polish gates. Rights dimension: public FOIA release used for education and writing review. Direct URL verified on 2026-06-14 through browser fetch because dia.mil returned 403 to plain curl; fetched PDF metadata matched the DIA Style Manual.

Defense Intelligence Agency. A tradecraft primer: Basic structured analytic techniques, 2016. URL https://www.dia.mil/FOIA/FOIA-Electronic-Reading-Room/FileId/161442/. Defense intelligence structured-analysis primer for classroom analytic exercises. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: analytic_tradecraft. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Defense Intelligence Agency. Defense osint strategy 2024-2028, 2024. URL https://www.dia.mil/Portals/110/Documents/OSINT-Strategy.pdf. DIA strategy for professionalizing and unifying Defense OSINT collection and reporting in public governance terms. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: defense_osint_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: DIA strategy URL, public release version, or Defense OSINT policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: public OSINT governance and professionalization support, not collection procedure or live targeting guidance. Stakeholder role: OSINT analyst, instructor, reviewer. Assurance use: anchors OSINT modules to official public Defense governance and source-quality discipline. Rights dimension: public strategy used for education and lawful-source governance. Direct URL verified on 2026-06-14 through browser fetch because dia.mil returned 403 to plain curl; fetched PDF content matched the Defense OSINT Strategy.

Markus Denzler. Revisiting the psychology of structured analytical techniques, 2024. URL https://doi.org/10.1080/08850607.2023.2243803. Peer-reviewed article revisiting psychological assumptions behind SATs and their relationship to analytic cognition. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_cognition_and_bias. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded claims about SAT psychology and cognitive assumptions without treating technique use as validated bias elimination. Stakeholder role: cognition reviewer; analytic standards trainer; curriculum designer. Assurance use: Keeps cognitive-security and tradecraft prose

explicit about mechanism uncertainty and evidence limits. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, author, journal DOI, publisher, and year; DOI URL retained as stable scholarly source.

Department of the Army. Atp 2-33.4: Intelligence analysis, 2020. URL https://rdl.train.army.mil/catalog-ws/view/100.ATSC/F4DDBAD5-3131-4C2A-9E00-CCACC087E984-1408655126204/ATP2_33x4wc1.pdf. Official Army analytic doctrine for intelligence-analysis process, structured analytic techniques, analytic design, and cognitive discipline. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: analytic_tradecraft. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Deppe and Schaal. A conceptual framework and method for a nato act concept for cognitive warfare, 2024. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC11565700/. Open-access PMC article on a NATO ACT cognitive-warfare concept, routed for conceptual and governance framing with explicit evidence-bounded limits. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: PMC record, NATO cognitive-warfare concept literature, or terminology materially changes. Verification method: direct_pmc_page_review. Claim scope: Supports bounded discussion of NATO cognitive-warfare concept development and terminology; not operational doctrine and not evidence for intervention efficacy. Stakeholder role: cognitive-security reviewer, policy instructor, assurance reviewer. Assurance use: NATO cognitive-warfare concept caveat, influence-risk framing, and evidence-bounded classroom boundary. Rights dimension: mental autonomy, democratic accountability, public trust, and non-manipulative education. Direct PMC source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Mandeep K. Dhami, David R. Mandel, Barbara A. Mellers, and Philip E. Tetlock. Improving intelligence analysis with decision science, 2015. URL https://doi.org/10.1177/1745691615598511. Peer-reviewed decision-science article connecting intelligence analysis improvement to forecasting, probability judgment, and uncertainty communication evidence. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: forecasting_calibration_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded claims that decision-science tools such as calibration, aggregation, and uncertainty communication complement SAT practice. Stakeholder role: forecasting instructor; evaluation lead; curriculum designer. Assurance use: Gives the SAT chapter an evidence complement beyond technique catalogues and postmortem lessons. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, authors, journal DOI, publisher, and year; DOI URL retained as stable scholarly source.

Mandeep K. Dhami et al. Analysis of competing hypotheses in intelligence analysis, 2019. URL https://onlinelibrary.wiley.com/doi/10.1002/acp.3550. Applied Cognitive Psychology article on Analysis of Competing Hypotheses in intelligence analysis, routed as empirical/SAT evidence with explicit limitations. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Wiley article URL, DOI metadata, ACH evidence literature, or SAT evaluation consensus materially changes. Verification method: script_http_200_scholarly_page_review. Claim scope: Supports bounded scholarly discussion of ACH in intelligence analysis; does not imply ACH universally eliminates bias or guarantees analytic accuracy. Stakeholder role: analyst, method instructor, reviewer, red-team facilitator. Assurance use: ACH method evidence review, SAT caveat writing, and analytic-bias classroom comparison. Rights dimension: analytic fairness, uncertainty communication, cognitive-bias awareness, and accountable review. Direct Wiley source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Mandeep K. Dhami et al. Task structure, confirmation bias, and the generation of alternative hypotheses, 2024. URL https://cognitiveresearchjournal.springeropen.com/articles/10.1186/s41235-024-00560-y. Cognitive Research article on how task structure affects confirmation bias and alternative hypotheses, useful for designing negative controls around ACH and SAT exercises. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: SpringerOpen article URL, DOI metadata, task-structure literature, or confirmation-bias evidence materially changes. Verification method: script_http_200_scholarly_page_review. Claim scope: Supports bounded discussion of task structure and confirmation bias in hypothesis generation; not a universal debiasing or intelligence-success claim. Stakeholder role: method instructor, analyst, reviewer, learner. Assurance use: confirmation-bias negative-control design, alternative-hypothesis checklist review, and task-structure caveats. Rights dimension: analytic fairness, cognitive-bias mitigation, transparent alternatives, and reviewer challenge. Direct SpringerOpen source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

DOE, CISA, NSA, & FBI. Apt cyber tools targeting ics/scada devices (aa22-103a), 2022. URL https://www.cisa.gov/news-events/cybersecurity-advisories/aa22-103a. Verified official primary source for apt_threat_intelligence; routed to Advanced Persistent Threats; ICS/OT Security; MITRE ATT&CK for ICS. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: apt_threat_intelligence. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for apt_threat_intelligence materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of apt_threat_intelligence and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that apt_threat_intelligence claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_cisa_aa22_103a_apt_ics_scada retained.

Huw Dylan and Nicholas Stivang. Emerging technologies and national security intelligence, 2025. URL https://www.tandfonline.com/doi/full/10.1080/02684527.2025.2565948. Peer-reviewed Intelligence and National Security article on emerging technologies and national security intelligence, used to frame AI and data-system effects as medium-term intelligence-work pressures requiring analytic governance. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: ai_enabled_analysis_boundary. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: journal article, DOI landing page, or scholarly consensus about emerging-technology effects on intelligence work materially changes. Verification method: script_http_200_scholarly_page_review. Claim scope: Supports bounded discussion of how AI, quantum technologies, and data-generating systems may reshape intelligence work; does not prove deployed AGEINT capability or abrupt transformation. Stakeholder role: analyst, AI governance reviewer, instructor, curriculum maintainer. Assurance use: emerging-technology source review, AI-assisted analysis boundary setting, and medium-term tradecraft refresh planning. Rights dimension: accountability, public trust, privacy, and reviewable use of emerging technology in intelligence education. Direct Taylor and Francis source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

E-ISAC & SANS ICS. Ics defense use case no. 6: Modular ics malware, 2017. URL https://assets.contentstack.io/v3/assets/blt36c2e63521272fdc/blt4f6cc0b6358c6883/607f235a6371c75a11ad9f5a/E-ISAC_SANS_Ukraine_DUC_6.pdf. Verified official primary source for historical_ics_incidents; routed to Historical ICS Cyber Incidents; ICS/OT Security; MITRE ATT&CK for ICS. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: historical_ics_incidents. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for historical_ics_incidents materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of historical_ics_incidents and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation

playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that historical_ics_incidents claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nerc_eisac_ukraine_duc6_2017 retained.

Egmont Group of Financial Intelligence Units. Egmont group principles for information exchange between fius (april 2023), 2023. URL https://egmontgroup.org/wp-content/uploads/2022/07/2.-Principles-Information-Exchange-With-Glossary_April2023.pdf. Verified official primary source for finint_international_cooperation; routed to Financial Intelligence (FININT). AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: finint_international_cooperation. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for finint_international_cooperation materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of finint_international_cooperation and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that finint_international_cooperation claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_egmont_group_fiu_principles retained.

Elaine Barker (NIST). Nist sp 800-57 part 1 rev. 5: Recommendation for key management, part 1: General, 2020. URL https://csrc.nist.gov/pubs/sp/800/57/pt1/r5/final. NIST's general guidance on cryptographic key management, covering key types, cryptoperiods, and lifecycle governance across the full key life. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: technical_standard. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Anchors the key-management / crypto-lifecycle governance discussion tying the cipher, signature, and hash standards into an operational regime. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

K. A. Ericsson, R. T. Krampe, and C. Tesch-Romer. The role of deliberate practice in the acquisition of expert performance, 1993. URL https://eric.ed.gov/?id=EJ471947. Verified scholarly repository record source for cognitive_performance; routed to Productivity Intelligence & Cognitive Performance (cognitive athlete, deliberate practice); Instructor Capstone/Rubric/Red-Team Pack appendix. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cognitive_performance. Source tier: scholarly_repository_record. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cognitive_performance materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of cognitive_performance and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cognitive_performance claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_ericsson_1993_deliberate_practice retained.

European Commission. Ai act, 2026a. URL https://digital-strategy.ec.europa.eu/en/policies/regulatory-framework-ai. Official European Commission AI Act implementation page for risk tiers, prohibited practices, GPAI obligations, governance bodies, and phased application. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: ai_conformity_compliance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: AI Act implementation date, delegated act, guidance, or harmonised-standard status changes. Verification method: direct_official_page_review. Claim scope: AI Act compliance mapping, risk classification, governance timing, and enforcement context. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

European Commission. European ai office, 2026b. URL https://digital-strategy.ec.europa.eu/en/policies/ai-office. Official European Commission source for AI Office responsibilities, GPAI oversight, enforcement coordination, codes of practice, and AI Act implementation. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: ai_conformity_compliance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: AI Office enforcement role, GPAI implementation, code status, or page ownership changes. Verification method: direct_official_page_review. Claim scope: AI conformity governance, public oversight, GPAI supervision, and institutional accountability. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

European Commission. Common european data spaces, 2026c. URL https://digital-strategy.ec.europa.eu/en/policies/data-spaces. Official European Commission source for Common European Data Spaces, single-market data governance, cross-domain infrastructures, and interoperability specifications. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: cross_border_data_spaces. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: data-space rollout, domain list, reference architecture, or interoperability update. Verification method: direct_official_page_review. Claim scope: cross-border data-sharing infrastructure, domain data spaces, and trustworthy access rules. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

European Commission. Data act explained, 2026d. URL https://digital-strategy.ec.europa.eu/en/policies/data-act-explained. Official European Commission source explaining Data Act access, use, connected-product data, interoperability, and cross-sector data availability. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: cross_border_data_spaces. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: Data Act implementation, FAQs, interoperability guidance, or Commission simplification changes. Verification method: direct_official_page_review. Claim scope: industrial data access, interoperability, user rights, and cross-sector data availability. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

European Commission. European data governance act, 2026e. URL https://digital-strategy.ec.europa.eu/en/policies/data-governance-act. Official European Commission source for data-sharing trust, data intermediaries, public-sector data reuse, data altruism, and European Data Spaces. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: cross_border_data_spaces. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: Data Governance Act application, EDIB guidance, data intermediary, or data altruism update. Verification method: direct_official_page_review. Claim scope: trusted data sharing, cross-sector reuse, data intermediaries, and data-space governance. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

European Commission. A european strategy for data, 2026f. URL https://digital-strategy.ec.europa.eu/en/policies/strategy-data. Official European Commission strategy source for single-market data, data sovereignty, common data spaces, and rights-preserving innovation. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: cross_border_data_spaces. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: European data strategy update, policy package change, or data-space program update. Verification method: direct_official_page_review. Claim scope: data sovereignty, data economy strategy, rights-preserving reuse, and cross-border governance. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

European Commission. Digital education action plan 2021-2027, 2026g. URL https://education.ec.europa.eu/focus-topics/digital-education/action-plan. Official European Commission source for digital education policy, digital skills, AI in education, teacher capacity, and assessment readiness. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: education_assessment. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: Commission action-plan update, digital skills initiative, or education AI guidance changes. Verification method:

direct_official_page_review. Claim scope: education governance, digital competence, instructor preparation, and AI readiness. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

European Commission. General-purpose ai code of practice, 2026h. URL https://digital-strategy.ec.europa.eu/en/policies/ai-code-practice. Official European Commission source for GPAI Code of Practice drafting, transparency, copyright, safety, security, and AI Act implementation support. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: ai_conformity_compliance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: GPAI code text, signatory status, Commission assessment, or AI Act timeline changes. Verification method: direct_official_page_review. Claim scope: GPAI compliance implementation, documentation expectations, safety duties, and copyright transparency. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

European Data Protection Board. Endorsed wp29 guidelines, 2018. URL https://www.edpb.europa.eu/our-work-tools/general-guidance/endorsed-wp29-guidelines_en. EDPB list of endorsed WP29 GDPR guidelines, including DPIA guidance for processing likely to result in a high risk. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: rights_impact_privacy. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: EDPB guideline endorsement, supersession, or GDPR guidance page changes. Verification method: direct_official_page_review. Claim scope: DPIA source verification, privacy-governance references, and GDPR evidence traceability. Stakeholder role: privacy officer, legal reviewer, instructor, and learner. Assurance use: verified DPIA reference and source-refresh evidence. Rights dimension: privacy, data protection, transparency, and accountable processing. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

European Data Protection Board. What is a data protection impact assessment and when is this mandatory?, 2026. URL https://www.edpb.europa.eu/sme-data-protection-guide/faq-frequently-asked-questions/answer/what-data-protection-impact_en. EDPB data-protection guide entry defining DPIA use for planned processing, high-risk processing, automated evaluation, sensitive data, and systematic monitoring. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: rights_impact_privacy. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: EDPB DPIA guidance, GDPR interpretation, SME guide, or high-risk processing examples change. Verification method: direct_official_page_review. Claim scope: DPIA triage, privacy impact worksheets, high-risk processing criteria, and safeguard evidence. Stakeholder role: data controller, data subject, instructor, reviewer, and privacy officer. Assurance use: DPIA trigger worksheet and mitigation record. Rights dimension: privacy, data protection, automated-decision safeguards, and redress. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

European Union. Regulation (eu) 2024/1689: Artificial intelligence act, 2024. URL https://eur-lex.europa.eu/eli/reg/2024/1689/oj/eng. Official EU Artificial Intelligence Act legal text. Checked as of 2026-05-21. Citation role: source_quality_anchor. Source lane: source_quality_spine. Source tier: source_quality_anchor. Refresh cadence: semiannual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: baseline source-quality guardrail for generated AGEINT curriculum claims. Stakeholder role: curriculum maintainer, instructor, reviewer, and learner. Assurance use: source-quality triangulation and claim-boundary review. Rights dimension: source transparency, accountability, and evidence traceability. Directly verified official EU source URL.

European Union Agency for Cybersecurity. Artificial intelligence cybersecurity challenges, 2020. URL https://www.enisa.europa.eu/publications/artificial-intelligence-cybersecurity-challenges. ENISA AI cybersecurity report mapping AI lifecycle assets, threat landscape, supply-chain concerns, security controls, and data-protection needs. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ENISA AI threat landscape, AI cybersecurity guidance, or EU cybersecurity policy changes. Verification method: direct_official_page_review. Claim scope: AI cybersecurity assurance, lifecycle threat mapping, supply-chain review, and control selection. Stakeholder role: security reviewer, vendor assessor, instructor, and system steward. Assurance use: AI threat-model critique and red-team assurance checklist. Rights dimension: secure AI, data protection, trustworthiness, and supply-chain accountability. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

European Union Agency for Cybersecurity. Enisa threat landscape 2024, ENISA. URL https://www.enisa.europa.eu/publications/enisa-threat-landscape-2024. Verified official primary source for cyber_threat_intelligence; routed to Cyber Intelligence Fundamentals; Advanced Persistent Threats; ICS/OT Security; Threat Intelligence Sharing. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cyber_threat_intelligence materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of cyber_threat_intelligence and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cyber_threat_intelligence claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_enisa_threat_landscape_2024 retained.

European Union Agency for Network and Information Security. Protecting industrial control systems: Recommendations for europe and member states, ENISA. URL https://www.enisa.europa.eu/publications/protecting-industrial-control-systems.-recommendations-for-europe-and-member-states. Verified official primary source for ics_ot_security_standards; routed to ICS/OT Security; Critical Infrastructure Protection; MITRE ATT&CK for ICS context. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: ics_ot_security_standards. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for ics_ot_security_standards materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of ics_ot_security_standards and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that ics_ot_security_standards claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_enisa_protecting_ics_2011 retained; stale or indirect proposal URL replaced with direct source record.

Executive Office of the President. M-25-21: Accelerating federal use of ai through innovation, governance, and public trust, 2025a. URL https://www.whitehouse.gov/wp-content/uploads/2025/02/M-25-21-Accelerating-Federal-Use-of-AI-through-Innovation-Governance-and-Public-Trust.pdf. OMB memorandum for federal AI strategies, AI maturity, data traceability, continuous monitoring, governance, privacy, security, workforce, and public trust. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: risk_exception_governance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: OMB federal AI governance memo, agency strategy requirement, traceability, or monitoring guidance changes. Verification method: direct_official_pdf_review. Claim scope: risk exception governance, AI maturity plans, data traceability, public trust, and oversight capacity. Stakeholder role: agency AI officer, risk owner, instructor, oversight reviewer, and learner. Assurance use: risk exception memo and agency AI governance crosswalk. Rights dimension: public trust, privacy, security, accessibility, transparency, and accountable governance. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Executive Office of the President. M-25-22: Driving efficient acquisition of artificial intelligence in government, 2025b. URL https://www.whitehouse.gov/wp-content/uploads/2025/02/M-25-22-Driving-Efficient-Acquisition-of-Artificial-Intelligence-in-Government.pdf. OMB memorandum for federal AI acquisition, product demonstrations, performance-based requirements, Quality Assurance Surveillance Plans, monitoring, and transparency requirements. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: procurement_performance_monitoring. Source

tier: official_primary. Refresh cadence: quarterly. Refresh trigger: OMB AI acquisition memo, QASP guidance, solicitation transparency, or monitoring requirement changes. Verification method: direct_official_pdf_review. Claim scope: AI procurement monitoring, vendor demonstrations, acquisition criteria, QASP evidence, and performance review. Stakeholder role: procurement official, vendor assessor, instructor, system steward, and learner. Assurance use: procurement oversight loop and vendor-performance monitoring packet. Rights dimension: transparent acquisition, vendor accountability, public value, interoperability, and due care. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Farid and Bohacek. Protecting world leaders against deep fakes, 2022. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC9860138/. Open-access PMC article on protecting world leaders against deepfakes, routed as identity-integrity and provenance-risk support for defensive education. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: synthetic_media_provenance. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: PMC record, deepfake detection/protection literature, synthetic-media policy, or threat landscape materially changes. Verification method: direct_pmc_page_review. Claim scope: Supports bounded discussion of protecting public figures against deepfakes and synthetic impersonation; excludes identity-attack methods and targeting guidance. Stakeholder role: cognitive-security reviewer, communications reviewer, instructor. Assurance use: deepfake-protection caveat, public-figure identity risk review, and synthetic-media provenance safeguards. Rights dimension: identity integrity, consent, democratic trust, public safety, and non-manipulative education. Direct PMC source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Federal Bureau of Investigation. Counterintelligence and espionage, 2026. URL https://www.fbi.gov/investigate/counterintelligence. FBI public counterintelligence page describing defensive goals and protection of IC secrets, critical assets, and sensitive information. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: counterintelligence_program_governance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: FBI page content, URL, or public counterintelligence mission framing materially changes. Verification method: browser_fetch_official_html_review. Claim scope: public counterintelligence mission and defensive source-integrity context. Stakeholder role: CI reviewer, analyst, instructor. Assurance use: supports defensive CI/source-integrity framing without investigation procedure or surveillance guidance. Rights dimension: public education page used for defensive awareness and source-protection framing. Direct URL verified on 2026-06-14 through browser search/open because fbi.gov returned 403 to plain curl; fetched content matched the Counterintelligence and Espionage page.

Financial Action Task Force. Updated guidance for a risk-based approach to virtual assets and virtual asset service providers, 2021. URL https://www.fatf-gafi.org/en/publications/Fatfrecommendations/Guidance-rba-virtual-assets-2021.html. Official FATF guidance for virtual-asset risk, VASP supervision, travel-rule compliance, and non-evasion FININT education. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: financial_economic_security. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Financial Action Task Force. The fatf recommendations, 2025. URL https://www.fatf-gafi.org/en/publications/Fatfrecommendations/Fatf-recommendations.html. Official international AML/CFT/CPF standard for risk-based controls, beneficial ownership, information sharing, supervision, and mutual evaluation. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: financial_economic_security. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Financial Crimes Enforcement Network. Fincen alerts, advisories, notices, bulletins, and fact sheets, 2026a. URL https://www.fincen.gov/resources/advisoriesbulletinsfact-sheets. Official FININT source for AML/CFT advisories, typology awareness, sanctions-evasion warnings, red flags, and compliance-oriented monitoring. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: financial_economic_security. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Financial Crimes Enforcement Network. Beneficial ownership information reporting, 2026b. URL https://www.fincen.gov/boi. Official FinCEN source for beneficial-ownership reporting, entity transparency, exemptions, and compliance-oriented analysis. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: financial_economic_security. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Financial Crimes Enforcement Network. Fincen sar narrative guidance package (2003/2006), FinCEN. URL https://www.fincen.gov/resources/statutes-regulations/guidance/sar-narrative-guidance-package. Verified official primary source for finint_sar_reporting; routed to Financial Intelligence (FININT). AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: finint_sar_reporting. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for finint_sar_reporting materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of finint_sar_reporting and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that finint_sar_reporting claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_fincen_sar_narrative_guidance retained.

Forum of Incident Response and Security Teams. Traffic light protocol (tlp) - first standards definitions and usage guidance, version 2.0, FIRST. URL https://www.first.org/tlp/. Verified official primary source for threat_intel_sharing_standards; routed to Threat Intelligence Sharing for Critical Infrastructure; Cyber Intelligence Fundamentals. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: threat_intel_sharing_standards. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for threat_intel_sharing_standards materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of threat_intel_sharing_standards and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that threat_intel_sharing_standards claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_first_tlp_v2 retained.

Friedman et al. Active inference in modeling conflict, 2021. URL https://doi.org/10.5281/zenodo.5750935. Zenodo-hosted scholarly source on active inference in modeling conflict, used only for bounded theory-to-scenario analogies and caveated simulation discussion. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cognitive_active_inference. Source tier: scholarly_preprint. Refresh cadence: annual. Refresh trigger: Zenodo record, DOI metadata, active-inference conflict-modeling literature, or simulation caveats materially changes. Verification method: doi_redirect_primary_record_review. Claim scope: Supports bounded discussion of active-inference modeling in conflict scenarios; AGEINT treats it as theory/simulation context, not operational prediction or targeting evidence. Stakeholder role: theory reviewer, instructor, simulation-method

reviewer. Assurance use: active-inference conflict-modeling boundary, simulation caveat, and theory-to-scenario review. Rights dimension: non-escalatory education, scientific transparency, human accountability, and avoidance of live targeting. DOI redirected to the Zenodo primary record with HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

K. Friston. The free-energy principle: a unified brain theory?, 2010. URL https://www.nature.com/articles/nrn2787. Karl Friston's flagship review introducing the free-energy principle, showing how a variational free-energy functional provides a tractable upper bound on surprise (negative log model evidence) that the brain minimizes through perception and action. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: cognitive_active_inference. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Lesson 1 'Active Inference and AGEINT' - the claim that variational free energy bounds surprise, providing the primary source behind a treatment previously grounded in a bachelor's thesis. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

K. Friston, T. FitzGerald, F. Rigoli, P. Schwartenbeck, and G. Pezzulo. Active inference: A process theory, 2017a. URL https://direct.mit.edu/neco/article/29/1/1/8207/Active-Inference-A-Process-Theory. Formalizes active inference as a process theory in which belief updating proceeds by gradient descent on variational free energy and policies are selected by minimizing expected free energy over a Markov decision process generative model. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: cognitive_active_inference. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Lessons 2 & 4 - belief updating, policy selection, and expected free energy as the action-selection objective. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

Karl Friston et al. Active inference and epistemic value, 2015. URL https://pubmed.ncbi.nlm.nih.gov/25689102/. PubMed-indexed active-inference source on epistemic value, routed as theory support for bounded analogies in the cognitive-active-inference profile. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cognitive_active_inference. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: PubMed record, DOI metadata, active-inference theory literature, or claim-scope interpretation materially changes. Verification method: direct_pubmed_page_review. Claim scope: Supports formal active-inference theory discussion around epistemic value and policy selection; does not validate AGEINT product performance or autonomous intent detection. Stakeholder role: theory reviewer, instructor, method designer. Assurance use: active-inference theory boundary, epistemic-value caveat, and formal-source review. Rights dimension: epistemic humility, transparent analogy, scientific caveat, and human accountability. Direct PubMed source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Karl Friston et al. Uncertainty, epistemics and active inference, 2017b. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC5721148/. Open-access PMC article on uncertainty, epistemics, and active inference, encoded for theory boundaries and claim-calibration around active-inference analogies. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cognitive_active_inference. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: PMC record, DOI metadata, active-inference theory literature, or analogy caveats materially changes. Verification method: direct_pmc_page_review. Claim scope: Supports scholarly discussion of uncertainty, epistemics, and active inference; not proof that AGEINT agents possess cognition or operational competence. Stakeholder role: theory reviewer, instructor, governance reviewer. Assurance use: active-inference uncertainty caveat, theory-to-analogy review, and non-overclaiming checks. Rights dimension: scientific transparency, epistemic humility, human accountability, and non-deceptive explanation. Direct PMC source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Gaeta et al. Situation awareness in intelligence scenarios, 2021. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC8325623/. Open-access PMC article on situation awareness in intelligence scenarios, useful for analytic-cognition lessons and scenario-review vocabulary. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_cognition_and_bias. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: PMC record, situation-awareness literature, intelligence-training evidence, or claim scope materially changes. Verification method: direct_pmc_page_review. Claim scope: Supports bounded discussion of situation awareness in intelligence scenarios; does not prove AGEINT learning outcomes or operational analyst performance. Stakeholder role: analyst, instructor, cognitive-workload reviewer. Assurance use: situation-awareness scenario review, analyst-cognition caveats, and intelligence-training source support. Rights dimension: analyst comprehension, transparency, cognitive workload, and accountable training. Direct PMC source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Timnit Gebru, Jamie Morgenstern, Briana Vecchione, Jennifer Wortman Vaughan, Hanna Wallach, Hal Daume III, and Kate Crawford. Datasheets for datasets, 2021. URL https://arxiv.org/abs/1803.09010. Scholarly source for dataset documentation covering motivation, composition, collection process, recommended uses, communication, transparency, and accountability. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: dataset_documentation. Source tier: scholarly. Refresh cadence: annual. Refresh trigger: dataset documentation practice, data-card schema, or scholarly consensus changes. Verification method: direct_scholarly_page_review. Claim scope: dataset cards, lineage fields, collection context, recommended-use notes, and reuse constraints. Stakeholder role: data steward, dataset creator, instructor, learner, and downstream reviewer. Assurance use: dataset datasheet review and data lineage registry. Rights dimension: data transparency, accountable reuse, bias review, privacy, and affected-group visibility. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

General Services Administration, Office of Management and Budget, and CDO Council. Federal data strategy, 2026. URL https://strategy.data.gov/. Official federal data-governance benchmark for data as a strategic asset, ethical governance, lifecycle practices, and learning culture. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ai_ethics_data_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Geneva Centre for Security Policy. Enhancing cognitive security and societal resilience to counter cognitive warfare, 2025. URL https://www.gcsp.ch/publications/enhancing-cognitive-security-and-societal-resilience-counter-cognitive-warfare. Policy-scholarship source for cognitive security, information literacy, critical thinking, and whole-of-society resilience. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: scholarly_policy. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Golob et al. Human cognition through the lens of social engineering cyberattacks, 2020. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC7554349/. Open-access PMC article on human cognition in social-engineering cyberattacks, routed as defensive awareness and cognitive-security evidence with operational details excluded. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: PMC record, social-engineering cognition literature, or cyber-awareness evidence materially changes. Verification method: direct_pmc_page_review. Claim scope: Supports defensive cognitive framing of social-engineering cyberattacks; excludes persuasion scripts, pretexting recipes, credential harvesting, and live targeting. Stakeholder role: security-awareness instructor, cognitive-security reviewer, cyber defender. Assurance use: social-engineering cognition review, defensive awareness framing, and no-playbook safety boundary. Rights dimension: privacy, consent, user protection, psychological safety, and defensive education. Direct PMC source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Google DeepMind and Google Research. Architecting trust in artificial epistemic agents, 2026. URL https://arxiv.org/html/2603.02960v1. arXiv preprint using an explicitly sociotechnical and normative lens. Proposed trust desiderata and infrastructure should be taught as design/review questions, not as established guarantees or measured performance. Checked as of 2026-11-06. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: frontier_lab_research. Refresh cadence: annual. Refresh trigger: New arXiv version of the epistemic-agent trust paper, revised trust desiderata, provenance architecture, or successor DeepMind publication changes. Verification method: direct_research_page_review. Claim scope: Version 1 proposes a normative roadmap for epistemic-agent competence, falsifiability, virtuous behavior, provenance, and human resilience; not empirical validation of the AGEINT stack or verifier-agent efficacy. Retrieved version 1 on 2026-11-06 and inspected its abstract, stated contributions, normative framing, and trust framework; empirical studies cited within it were not independently re-audited.

Government Digital Service. Guidance for organisations using the algorithmic transparency recording standard, 2025a. URL https://www.gov.uk/government/publications/guidance-for-organisations-using-the-algorithmic-transparency-recording-standard. Official guidance for completing and publishing ATRS records, including public-sector template support and repository submission expectations. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: algorithmic_transparency_reporting. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: ATRS completion guidance, repository process, or publication policy changes. Verification method: direct_official_page_review. Claim scope: transparency notice fields, publication workflow, model specification, and review records. Stakeholder role: public official, records steward, instructor, transparency reviewer, and learner. Assurance use: transparency notice field checklist and publication decision evidence. Rights dimension: public transparency, explainability, accessibility, data protection, and redress. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Government Digital Service. Algorithmic transparency recording standard hub, 2025b. URL https://www.gov.uk/government/collections/algorithmic-transparency-recording-standard-hub. Official UK hub for ATRS records, public-sector transparency expectations, mandatory-scope policy, template guidance, and publication support. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: algorithmic_transparency_reporting. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: ATRS template, scope policy, central government mandate, or publication guidance changes. Verification method: direct_official_page_review. Claim scope: algorithmic transparency notices, public records, public-sector service disclosure, and exemptions. Stakeholder role: public official, transparency reviewer, instructor, affected community, and learner. Assurance use: transparency notice workflow and public accountability evidence. Rights dimension: access to information, public accountability, participation, privacy, and civic trust. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Government of Canada. Ai strategy for the federal public service 2025-2027: Priority areas, 2025. URL https://www.canada.ca/en/government/system/digital-government/digital-government-innovations/responsible-use-ai/gc-ai-strategy-priority-areas.html. Government of Canada AI Strategy priority-area page for public-service AI adoption, governance, people, public value, and responsible implementation. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: workforce_governance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: Canada AI Strategy 2025-2027 priority, implementation, workforce, governance, or public-service AI adoption changes. Verification method: direct_official_page_review. Claim scope: federal public-service AI strategy, governance priorities, talent, responsible adoption, public value, and implementation planning. Stakeholder role: public-sector AI leader, workforce planner, instructor, service steward, and learner. Assurance use: public-sector AI strategy crosswalk, workforce-readiness map, governance maturity review, and implementation evidence. Rights dimension: public value, accountable service delivery, workforce capability, inclusion, transparency, and trust. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Cynthia M. Grabo. Handbook of warning intelligence, 1972. URL https://www.cia.gov/readingroom/docs/CIA-RDP80B00829A000800040001-6.pdf. CIA Reading Room declassified warning-intelligence handbook volume used for indications-and-warning concepts. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: warning_intelligence. Source tier: official_declassified_primary. Refresh cadence: annual. Refresh trigger: Refresh if CIA Reading Room record or declassification file changes. Verification method: direct_pdf_download. Claim scope: Supports claims about indications, warning, assumptions, and uncertainty in historical warning practice. Stakeholder role: analytic tradecraft instructor; warning-methods reviewer. Assurance use: Adds source-backed warning vocabulary while preserving evidence-bounded educational boundaries. Rights dimension: declassified public government record; avoid operationalizing historical procedures. CIA Reading Room PDF verified live 2026-06-11; use for historical warning concepts, not operational collection instructions.

Kai Greshake, Sahar Abdelnabi, Shailesh Mishra, Christoph Endres, Thorsten Holz, and Mario Fritz. Not what you've signed up for: Compromising real-world llm-integrated applications with indirect prompt injection, 2023. URL https://arxiv.org/abs/2302.12173. arXiv security paper showing that malicious third-party content retrieved by LLM-integrated applications can indirectly inject instructions and compromise real-world application behavior. Checked as of 2026-06-10. Citation role: curriculum_anchor. Source lane: agentic_ai_security. Source tier: scholarly_preprint. Refresh cadence: annual. Refresh trigger: arXiv record, DOI record, indirect prompt-injection literature, agentic tool-security guidance, or threat taxonomy materially changes. Verification method: direct_scholarly_page_review. Claim scope: Indirect prompt injection risk in LLM-integrated applications where retrieved or external content can alter model behavior and trigger data theft, tool misuse, or ecosystem contamination. Stakeholder role: agent builder, security reviewer, assurance reviewer, instructor, learner, and incident responder. Assurance use: agentic retrieval and tool-use security review, indirect prompt-injection threat modeling, blocked-action logging, memory-contamination checks, and human escalation evidence. Rights dimension: protects users and affected parties from hidden instruction/data blending, unauthorized disclosure, unsafe tool invocation, and contaminated downstream reuse. Direct arXiv source URL verified live 2026-06-10 with title, authors, submission and revision metadata, DOI, and abstract describing indirect prompt-injection attacks.

Adam Hahn, Rubin Krief, Daniel Rebori-Carretero, Rami Puzis, Aviad Elyashar, and Nik Urlaub. An evidence-driven analysis of threat information sharing, 2026. URL https://arxiv.org/html/2512.18714v3. An arXiv preprint, version 3 dated 27 January 2026. Its abstract and introduction describe three incident reviews, 196 procedure examples across 79 ATT&CK techniques and 22 ICS-related malware families, and nine vulnerability advisories. The authors analyze representation and technical-detail limitations in that corpus using automated observable extraction; this is not a field evaluation proving that ICS information sharing generally remains ineffective.

Harry Deng and UNIDIR. Exploring synthetic data for artificial intelligence and autonomous systems, 2023. URL https://unidir.org/publication/exploring-synthetic-data-for-artificial-intelligence-and-autonomous-systems-a-primer/. UNIDIR primer on synthetic data for artificial intelligence and autonomous systems, used for source-quality and risk caveats around synthetic fixtures and military AI governance. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: public_domain_primary. Refresh cadence: annual. Refresh trigger: UNIDIR report URL, PDF, synthetic-data governance literature, or autonomous-systems policy materially changes. Verification method: primary_browser_report_page_review. Claim scope: Supports bounded discussion of synthetic data for AI and autonomous systems in international security, including benefits and limitations; not evidence for operational deployment readiness. Stakeholder role: AI governance reviewer, data steward, instructor, policy analyst. Assurance use: synthetic-data risk review, AI-DSS dataset-provenance caveats, and autonomous-systems governance framing. Rights dimension: lawful use, safety, data integrity, bias, human oversight, and international-security responsibility. Direct UNIDIR report page and PDF were verified on 2026-06-15 after the attachment URL had moved; title, author, citation, and scope were visible.

Frank G. Hoffman. Conflict in the 21st century: The rise of hybrid wars (potomac institute, 2007), 2007. URL https://www.potomacinstitute.org/images/stories/publications/potomac_hybridwar_0108.pdf. Verified scholarly repository record source for hybrid_warfare_doctrine; routed to Gray Zone / Hybrid Warfare / Non-State Actor Intelligence / Irregular Warfare. AGEINT uses it for defensive, historical, governance, or method

context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: hybrid_warfare_doctrine. Source tier: scholarly_repository_record. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for hybrid_warfare_doctrine materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of hybrid_warfare_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that hybrid_warfare_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_hoffman_2007_hybrid_wars retained.

Huang et al. Challenges of artificial intelligence to cognitive security and safety, 2023. URL https://sands.edpsciences.org/articles/sands/pdf/2023/01/sands20230010.pdf. Open-access Safety and Security article on AI challenges to cognitive security and safety, routed as bounded cognitive-security risk context. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: article URL, cognitive-security AI literature, or safety taxonomy materially changes. Verification method: script_http_200_scholarly_pdf_review. Claim scope: Supports high-level scholarly discussion of AI challenges to cognitive security and safety; does not establish universal cognitive-security efficacy or manipulation countermeasures. Stakeholder role: cognitive-security reviewer, instructor, AI safety reviewer. Assurance use: cognitive-security risk caveat, AI safety source routing, and resilience-evidence calibration. Rights dimension: mental autonomy, safety, public trust, transparency, and non-manipulative resilience education. Direct journal PDF URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

E. M. Hutchins, M. J. Cloppert, and R. M. Amin. Intelligence-driven computer network defense informed by analysis of adversary campaigns and intrusion kill chains, 2011. URL https://www.lockheedmartin.com/content/dam/lockheed-martin/rms/documents/cyber/LM-White-Paper-Intel-Driven-Defense.pdf. Verified professional documentation source for cyber_threat_intelligence; routed to Cyber Intelligence Fundamentals; APT Threat Intelligence; Structured Analytic Techniques for Cyber. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: professional_documentation. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cyber_threat_intelligence materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of cyber_threat_intelligence and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cyber_threat_intelligence claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_hutchins_2011_kill_chain normalized to professional_hutchins_2011_kill_chain.

ICS-CERT. Icsa-10-272-01: Stuxnet malware mitigation, 2010. URL https://www.cisa.gov/uscert/ics/advisories/ICSA-10-272-01. Verified official primary source for historical_ics_incidents; routed to Historical ICS Cyber Incidents; ICS/OT Security; MITRE ATT&CK for ICS. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: historical_ics_incidents. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for historical_ics_incidents materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of historical_ics_incidents and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that historical_ics_incidents claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_cisa_isc_cert_stuxnet_advisory retained.

IETF. Rfc 9449: Oauth 2.0 demonstrating proof of possession, 2023. URL https://www.rfc-editor.org/rfc/rfc9449.html. Internet standard for sender-constrained OAuth tokens, useful for agent tool-call identity and credential-binding discussions. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: internet_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

IETF. Rfc 9700: Best current practice for oauth 2.0 security, 2025. URL https://www.rfc-editor.org/rfc/rfc9700.html. Internet standards-track security guidance for OAuth deployment, token protection, redirect safety, and authorization hardening. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: internet_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

in-toto Project. in-toto, 2026. URL https://in-toto.io/. in-toto framework for securing software supply-chain integrity with verifiable metadata and attestations; used to ground release-chain evidence and provenance checks. Checked as of 2026-09-06. Citation role: curriculum_anchor. Source lane: secure_release_change_control. Source tier: security_standard. Refresh cadence: quarterly. Refresh trigger: in-toto specification, attestation format, layout model, supply-chain integration, or provenance tooling changes. Verification method: direct_project_page_review. Claim scope: software supply-chain layout, signed attestations, step-level integrity, artifact provenance, and verifiable release workflow evidence. Stakeholder role: release engineer, provenance reviewer, assurance evaluator, instructor, and learner. Assurance use: attestation-chain review, provenance evidence package, release-step integrity check, and supplier handoff audit. Rights dimension: security, provenance, accountability, auditability, and user protection. Direct source URL verified live (HTTP 200, official in-toto project page) for AGEINT curriculum use.

Infocomm Media Development Authority. Model ai governance framework for agentic ai, 2026. URL https://www.imda.gov.sg/-/media/imda/files/about/emerging-tech-and-research/artificial-intelligence/mgf-for-agentic-ai.pdf. Government framework focused on agentic AI delegation, controls, and safe deployment. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Intelligence Advanced Research Projects Activity. Aggregative contingent estimation, 2010. URL https://www.iarpa.gov/research-programs/ace. Official IARPA ACE program page on eliciting, weighting, and combining probabilistic judgments to improve intelligence forecasts. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: forecasting_calibration_evidence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: IARPA program page, solicitation status, related-publication links, or archived program metadata changes. Verification method: direct_official_page_review. Claim scope: Supports bounded claims about government-sponsored probabilistic forecasting, elicitation, weighting, aggregation, and empirical testing against real events. Stakeholder role: forecasting instructor; curriculum designer; evaluation lead. Assurance use: Connects SAT lessons to calibration and aggregation evidence without claiming autonomous forecasting judgment. Rights dimension: public IARPA program metadata used for education and source-backed synthesis. Direct IARPA program page verified live 2026-06-15; used for program objectives and forecasting-evidence context, not as an AGEINT performance claim.

Intelligence Advanced Research Projects Activity. Rapid explanation, analysis and sourcing online, 2023. URL https://www.iarpa.gov/research-programs/reason. Official IARPA REASON program page on analyst-in-the-loop evidence and reasoning support for draft analytic reports. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: agentic_analytic_assistance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: IARPA program page, BAA status, technical description, or evaluation language changes. Verification method: direct_official_page_review. Claim scope: Supports bounded claims that AI-enabled reasoning systems can assist evidence discovery and reasoning review while retaining analyst responsibility. Stakeholder role: analytic method designer; AI governance reviewer; curriculum designer. Assurance use: Constrains AI/SAT automation prose away from autonomous strategic judgment, targeting, or report replacement. Rights dimension: public IARPA program metadata used for education and governance review. Direct IARPA program page verified live 2026-06-15; used for bounded analyst-assistance context and explicit non-replacement language.

Intelligence.gov. About this site, 2026a. URL https://www.intelligence.gov/about. Intelligence.gov public page explaining the site as an IC transparency platform and public front door. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: ic_public_transparency. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: Intelligence.gov page content, URL, or transparency-platform framing materially changes. Verification method: browser_fetch_official_html_review. Claim scope: public transparency-platform context for orientation and publication-readiness posture. Stakeholder role: learner, instructor, publication reviewer. Assurance use: anchors public-facing transparency language used in AGEINT release-surface checks. Rights dimension: public education page used for transparency and public-readiness framing. Direct URL verified on 2026-06-14 through browser fetch because intelligence.gov returned 403 to plain curl; fetched HTML title and page content matched the About This Site page.

Intelligence.gov. Our values: Accountability, 2026b. URL https://www.intelligence.gov/mission/our-values/accountability. Intelligence.gov public values page describing IC accountability, lawfulness, oversight, and civil liberties framing. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: ic_public_transparency. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: Intelligence.gov page content, URL, or public values framing materially changes. Verification method: browser_fetch_official_html_review. Claim scope: public accountability and oversight context for legal/ethical framing. Stakeholder role: learner, instructor, civil-liberties reviewer. Assurance use: anchors public-facing accountability language and oversight explanations. Rights dimension: public education page used for rights, accountability, and oversight framing. Direct URL verified on 2026-06-14 through browser fetch because intelligence.gov returned 403 to plain curl; fetched HTML title and page content matched the accountability page.

Intelligence.gov. Our values: Collaboration, 2026c. URL https://www.intelligence.gov/mission/our-values/collaboration. Intelligence.gov public values page describing collaboration across IC elements and external partners. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: ic_public_transparency. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: Intelligence.gov page content, URL, or public values framing materially changes. Verification method: browser_fetch_official_html_review. Claim scope: public collaboration context for modular handoff, partner engagement, and source-pack routing. Stakeholder role: learner, instructor, reviewer. Assurance use: supports modular substrate language about collaboration without implying live liaison or tasking. Rights dimension: public education page used for orientation and governance framing. Direct URL verified on 2026-06-14 through browser fetch because intelligence.gov returned 403 to plain curl; fetched HTML title and page content matched the collaboration page.

Intelligence.gov. Our values: Innovation, 2026d. URL https://www.intelligence.gov/mission/our-values/innovation. Intelligence.gov public values page describing innovation as more than technology and tying it to mission needs. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: ic_public_transparency. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: Intelligence.gov page content, URL, or public values framing materially changes. Verification method: browser_fetch_official_html_review. Claim scope: public innovation context for bounded agentic assistance and technology-governance framing. Stakeholder role: learner, instructor, innovation reviewer. Assurance use: keeps innovation claims tied to public IC values rather than unchecked automation. Rights dimension: public education page used for orientation and technology-governance framing. Direct URL verified on 2026-06-14 through browser fetch because intelligence.gov returned 403 to plain curl; fetched HTML title and page content matched the innovation page.

Intelligence.gov. Mission, 2026e. URL https://www.intelligence.gov/mission. Intelligence.gov public mission page describing the IC mission, customers, and values at a high level. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: ic_public_transparency. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: Intelligence.gov page content, URL, or public mission framing materially changes. Verification method: browser_fetch_official_html_review. Claim scope: public mission and values context for reader-facing IC orientation. Stakeholder role: learner, instructor, reviewer. Assurance use: anchors introductory IC mission language to the public official portal. Rights dimension: public education page used for orientation and transparency framing. Direct URL verified on 2026-06-14 through browser fetch because intelligence.gov returned 403 to plain curl; fetched HTML title and page content matched the mission page.

Intelligence.gov. Our values: Transparency, 2026f. URL https://www.intelligence.gov/mission/our-values/transparency. Intelligence.gov public values page describing transparency principles, public understanding, and protection of sources and methods. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: ic_public_transparency. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: Intelligence.gov page content, URL, or public values framing materially changes. Verification method: browser_fetch_official_html_review. Claim scope: public transparency context for release, public understanding, and source-protection boundaries. Stakeholder role: learner, instructor, transparency reviewer. Assurance use: supports transparent manuscript and evidence-packet posture without exposing sources or methods. Rights dimension: public education page used for transparency and public-trust framing. Direct URL verified on 2026-06-14 through browser fetch because intelligence.gov returned 403 to plain curl; fetched HTML title and page content matched the transparency page.

International AI Safety Report Writing Group and Expert Advisory Panel. International ai safety report 2026, 2026. URL https://internationalaisafetyreport.org/publication/international-ai-safety-report-2026. International AI Safety Report 2026 chaired by Yoshua Bengio with an international expert advisory panel; used as a synthesis source for advanced-AI safety evidence and uncertainty, not as a policy endorsement. Checked as of 2026-06-12. Citation role: curriculum_anchor. Source lane: assurance_evaluation_evidence. Source tier: official_scientific_synthesis. Refresh cadence: annual. Refresh trigger: International AI Safety Report release, extended policymaker summary, expert advisory panel update, or major frontier-AI safety evidence changes. Verification method: direct_official_page_review. Claim scope: international advanced-AI safety evidence, risk-taxonomy synthesis, capability and impact assessment, and policy-neutral scientific uncertainty framing. Stakeholder role: assurance evaluator, policy reviewer, instructor, system steward, and learner. Assurance use: advanced-AI safety evidence review, uncertainty register, capability-risk synthesis, and policy-neutral assurance briefing. Rights dimension: safety, accountability, transparency, uncertainty communication, international coordination, and harm prevention. Direct official report landing page verified live (HTTP 200, International AI Safety Report 2026 page on-topic); the official PDF and arXiv record remain secondary evidence when needed.

International Labour Organization. Global commission on the future of work, 2019. URL https://www.ilo.org/resource/news/global-commission-future-work. Official ILO source for a human-centred future-of-work agenda, lifelong learning, labour guarantees, social protection, and decent work. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: workforce_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ILO centenary initiative, commission follow-up, decent-work agenda, or policy update. Verification method: direct_official_page_review. Claim scope: human-centred labour governance, lifelong learning, worker protection, and social dialogue. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

International Labour Organization. Artificial intelligence, 2026. URL https://www.ilo.org/topics-and-sectors/artificial-intelligence. Official ILO topic page for AI and work, digital transformation, occupational impact, skills, safety, and social dialogue. Checked as of 2026-05-22. Citation

role: curriculum_anchor. Source lane: workforce_governance. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: ILO AI topic update, report, policy note, or labour-market evidence update. Verification method: direct_official_page_review. Claim scope: workforce impact, decent work, skills, social dialogue, and AI adoption governance. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

International Labour Organization and United Nations. Mind the ai divide: Shaping a global perspective on the future of work, 2024. URL https://www.ilo.org/publications/major-publications/mind-ai-divide-shaping-global-perspective-future-work. Official ILO/UN publication on uneven AI adoption, labour-market exposure, global equity, fairness, and social justice. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: workforce_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ILO/UN report revision, follow-up data, or labour-market exposure model update. Verification method: direct_publication_page_review. Claim scope: workforce equity, adoption gaps, labour-market exposure, and global AI governance. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

International Organization for Standardization. Iso 19157:2013 geographic information - data quality, 2013. URL https://www.iso.org/standard/32575.html. International geospatial data-quality standard for completeness, logical consistency, positional accuracy, temporal quality, and usability framing. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: osint_geoint. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

International Organization for Standardization. Iso/iec tr 24028:2020 artificial intelligence trustworthiness overview, 2020. URL https://www.iso.org/standard/77608.html. ISO technical report page for AI trustworthiness terminology, approaches, engineering considerations, and governance vocabulary. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: ai_conformity_compliance. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: ISO lifecycle stage, replacement, amendment, or JTC 1/SC 42 status changes. Verification method: direct_standards_page_review. Claim scope: trustworthy AI terminology, assurance vocabulary, and standards-aligned governance framing. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

International Organization for Standardization. Iso/iec 23894:2023 artificial intelligence guidance on risk management, 2023a. URL https://www.iso.org/standard/77304.html. International guidance for integrating AI-specific risk management into organizational activities, products, systems, and services. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ai_ethics_data_governance. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

International Organization for Standardization. Iso/iec 42001:2023 artificial intelligence management system, 2023b. URL https://www.iso.org/standard/42001. International AI management-system standard for responsible AI governance, traceability, transparency, risk, and continual improvement. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ai_ethics_data_governance. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

International Organization for Standardization. Iso/iec 42005:2025 ai system impact assessment, 2025. URL https://www.iso.org/standard/44545.html. ISO standard page for AI system impact assessment across lifecycle, stakeholder impact documentation, transparency, and accountability. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: ai_conformity_compliance. Source tier: international_standard. Refresh cadence: semiannual. Refresh trigger: ISO edition, corrigendum, lifecycle status, or linked package metadata changes. Verification method: direct_standards_page_review. Claim scope: AI impact-assessment workflow, stakeholder impact documentation, and accountability evidence. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

International Society of Automation. Isa/iec 62443 series of standards, 2026. URL https://www.isa.org/standards-and-publications/isa-standards/isa-iec-62443-series-of-standards. Official ISA overview of industrial automation and control security standards. Checked as of 2026-05-21. Citation role: source_quality_anchor. Source lane: source_quality_spine. Source tier: source_quality_anchor. Refresh cadence: semiannual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: baseline source-quality guardrail for generated AGEINT curriculum claims. Stakeholder role: curriculum maintainer, instructor, reviewer, and learner. Assurance use: source-quality triangulation and claim-boundary review. Rights dimension: source transparency, accountability, and evidence traceability. Directly verified official ISA source URL.

Internet Engineering Task Force. Rfc 9110: Http semantics, 2022. URL https://www.rfc-editor.org/rfc/rfc9110.html. IETF standard for HTTP semantics used to ground API contracts, methods, status codes, content negotiation, and safe integration language. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: internet_standard. Refresh cadence: annual. Refresh trigger: RFC update, errata, bis document, or HTTP specification status changes. Verification method: direct_standards_page_review. Claim scope: API semantics, tool-interface constraints, status handling, and integration contracts. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Irving L. Janis. Groupthink: Psychological studies of policy decisions and fiascoes, 1982. URL https://books.google.com/books/about/Groupthink.html?id=ZB0bAAAAIAAJ. Scholarly book record for Janis's groupthink model used as classic context for dissent, alternatives, and group-decision failure claims. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_cognition_and_bias. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: Bibliographic metadata, edition record, or accessible publisher record changes. Verification method: bibliographic_metadata_review. Claim scope: Supports bounded classic groupthink and dissent-context framing, not a validated claim that one checklist eliminates group decision failure. Stakeholder role: analytic tradecraft instructor; cognition reviewer; curriculum designer. Assurance use: Keeps group-process lessons tied to a named scholarly source while preserving caveats about retrospective failure explanation. Rights dimension: copyrighted scholarly book metadata only; cite and summarize sparingly. Google Books bibliographic record verified live 2026-06-15 for title, author, edition, publisher, year, and ISBN metadata; used as bibliographic support because no current publisher landing page was available.

Robert Jervis. Why intelligence and policymakers clash, 2022. URL https://www.pnas.org/doi/10.1073/pnas.2116638118. PNAS perspective on intelligence-policy friction and the limits of postmortem explanations of intelligence failure. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: intelligence_failure_postmortem. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Refresh if publisher metadata, correction, or retraction status changes. Verification method: publisher_metadata_review. Claim scope: Supports claims about policy-intelligence friction, hindsight bias in postmortems, and limits of simple failure narratives. Stakeholder role: curriculum designer; governance reviewer; analyst supervisor. Assurance use: Constrains postmortem lessons so they do not imply a single technique could prevent complex failure. Rights dimension: copyrighted scholarly article; cite metadata and summarize sparingly. PNAS DOI/publisher metadata verified live 2026-06-11; use for postmortem and policy-friction boundary claims.

Rob Johnston. Analytic culture in the u.s. intelligence community, 2005. URL https://www.cia.gov/resources/csi/static/Analytic-Culture-Intelligence-Community.pdf. CIA/CSI professional-literature monograph on analytic institutions, incentives, training, and cultural constraints. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: intelligence_profession_literature. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: CIA source URL, release status, or public text materially changes. Verification method: direct_official_page_and_pdf_review. Claim scope: professional-context support for analytic culture, method standardization limits, and institution-level tradecraft constraints. Stakeholder role: curriculum designer, analyst, reviewer. Assurance use: keeps culture and training claims tied to official professional context rather than slogans. Rights dimension: public professional literature used for education and review without operational tasking. Direct CIA CSI book page and static PDF URL verified on 2026-06-15; metadata updated to preserve the existing citation key while crediting the monograph author.

Joint Chiefs of Staff. Jp 3-13, information operations (2012), 2012. URL https://defenseinnovationmarketplace.dtic.mil/wp-content/uploads/2018/02/12102012_io1.pdf. Verified official primary source for information_operations_doctrine; routed to Information Warfare and Cognitive Security; PSYOP and MISO Doctrine. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: information_operations_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for information_operations_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of information_operations_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that information_operations_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_dod_jp3_13_information_operations retained.

Joint Chiefs of Staff. Jp 2-0, joint intelligence (2013), 2013. URL https://irp.fas.org/doddir/dod/jp2_0.pdf. Verified official primary source for imint_joint_intelligence_doctrine; routed to Imagery Intelligence (IMINT); Counterintelligence. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: imint_joint_intelligence_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for imint_joint_intelligence_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of imint_joint_intelligence_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that imint_joint_intelligence_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_dod_jp2_0_joint_intelligence retained.

Joint Chiefs of Staff. Jp 3-05, special operations (2014), 2014a. URL https://edocs.nps.edu/2014/July/jp3_05.pdf. Verified official primary source for special_operations_doctrine; routed to Gray Zone / Hybrid Warfare / Non-State Actor Intelligence / Irregular Warfare; Counterintelligence. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: special_operations_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for special_operations_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of special_operations_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that special_operations_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_dod_jp3_05_special_operations retained.

Joint Chiefs of Staff. Jp 3-13.2, military information support operations (2014), 2014b. URL https://www.esd.whs.mil/Portals/54/Documents/FOID/Reading%20Room/Joint_Staff/Military_Information_Support_Operations.pdf. Verified official primary source for psyop_miso_doctrine; routed to PSYOP and MISO Doctrine; Information Warfare and Cognitive Security. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: psyop_miso_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for psyop_miso_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of psyop_miso_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that psyop_miso_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_dod_jp3_13_2_miso retained.

Joint Chiefs of Staff. Jp 2-0: Joint intelligence, 2026. URL https://www.jcs.mil/Doctrine/Joint-Doctrine-Pubs/2-0-Intelligence-Series/. Official joint-doctrine landing page for the keystone publication on joint intelligence principles, products, services, and assessments. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: collection_management. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Joint IDP Profiling Service. Technical brief on joint structured analysis techniques, 2021. URL https://www.jips.org/jips-publication/jointstructuredanalysistechniques-jsat-2021/. JIPS technical brief on joint structured analysis techniques for collaborative humanitarian and development data analysis. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_method_pedagogy. Source tier: public_practice_guidance. Refresh cadence: annual. Refresh trigger: JIPS publication page, PDF, date, or guidance metadata changes. Verification method: direct_publication_page_review. Claim scope: Supports bounded claims about collaborative SAT facilitation, dissent, uncertainty management, and technique selection in humanitarian analysis contexts. Stakeholder role: methods instructor; curriculum designer; collaborative-analysis facilitator. Assurance use: Broadens SAT pedagogy beyond intelligence-only settings while preserving domain and efficacy caveats. Rights dimension: public guidance page; cite source and avoid extended quotation. JIPS publication page verified live 2026-06-15 for title, authoring organization, date, purpose statement, and download link.

Richards J. Heuer Jr. Psychology of intelligence analysis, 2007. URL https://www.cia.gov/resources/csi/books-monographs/psychology-of-intelligence-analysis-2/. Foundational analytic cognition source for bias, mental models, and structured reasoning. Checked as of 2026-06-06. Citation role: curriculum_anchor. Source lane: analytic_tradecraft. Source tier: scholarly_or_official. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use; URL refreshed 2026-06-06 after liveness check.

Richards J. Heuer Jr. and Randolph H. Pherson. Structured analytic techniques for intelligence analysis, 2014. URL https://us.sagepub.com/en-us/nam/structured-analytic-techniques-for-intelligence-analysis/book242171. The standard practitioner catalogue of fifty-five structured analytic techniques

(e.g., Analysis of Competing Hypotheses, Key Assumptions Check, Devil's Advocacy) used to counter cognitive bias in intelligence analysis. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: analytic_tradecraft. Source tier: scholarly_textbook. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Grounds the AGEINT structured-analytic-techniques (SAT) catalogue and definitions, supplying an authoritative primary anchor for the techniques enumerated in the curriculum. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

Daniel. Kahneman. Thinking, fast and slow (wikipedia), 2011. URL https://search.worldcat.org/title/Thinking-fast-and-slow/oclc/706020998. Verified scholarly book metadata source for cognitive_bias_foundations; routed to Cognitive Security (dual-process neurocognitive mechanisms); Epistemic Rigor & Analytic Tradecraft. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cognitive_bias_foundations. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cognitive_bias_foundations materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of cognitive_bias_foundations and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cognitive_bias_foundations claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_kahneman_2011_thinking_fast_slow retained; stale or indirect proposal URL replaced with direct source record.

R. Kaplan and S. Kaplan. The experience of nature: A psychological perspective, 1989. URL https://search.worldcat.org/title/The-experience-of-nature-%3A-a-psychological-perspective/oclc/18814094. Verified scholarly book metadata source for cognitive_performance; routed to Productivity Intelligence & Cognitive Performance (attention restoration, information architecture); Cognitive Security & Inoculation appendix. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cognitive_performance. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cognitive_performance materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of cognitive_performance and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cognitive_performance claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_kaplan_kaplan_1989_attention_restoration retained; stale or indirect proposal URL replaced with direct source record.

Christopher W. Karvetski and David R. Mandel. Coherence of probability judgments from uncertain evidence: Does ach help?, 2020. URL https://www.cambridge.org/core/journals/judgment-and-decision-making/article/coherence-of-probability-judgments-from-uncertain-evidence-does-ach-help/9ED40E4658EE77914D2C7A265154B59A. Open Cambridge article testing whether ACH improves coherence of probabilistic judgments from uncertain evidence. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_peer_reviewed_open. Refresh cadence: annual. Refresh trigger: Publisher metadata, correction, or retraction status changes. Verification method: publisher_open_article_review. Claim scope: Supports bounded claims that ACH should be treated as a diagnostic aid whose probabilistic coherence gains are disputed and task-dependent. Stakeholder role: curriculum designer; forecasting instructor; analytic standards trainer. Assurance use: Anchors manuscript language that separates ACH transparency from accuracy or coherence proof. Rights dimension: open scholarly article; cite source and avoid extended quotation. Cambridge Core article page verified live 2026-06-15 for title, authors, journal record, and accessible article metadata.

C. E. Kelly, J. C. Miller, A. D. Redlich, and S. M. Kleinman. A taxonomy of interrogation methods, 2013. URL https://doi.apa.org/doi/10.1037/a0030310. A peer-reviewed taxonomy organizing interrogation into macro-level approaches, six meso-level domains (rapport/relationship building, context manipulation, emotion provocation, confrontation/competition, collaboration, presentation of evidence), and micro-level techniques, providing a study-grounded vocabulary for analyzing elicitation methods rather than an operational manual. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: counterintelligence_source_integrity. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Backs the AGEINT study-taxonomy framing of interrogation/elicitation methods, signaling analytic categorization rather than an operational how-to. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

Khlaaf et al. Mind the gap: Foundation models and the covert proliferation of military intelligence, surveillance, target acquisition, and reconnaissance, 2024. URL https://arxiv.org/html/2410.14831v1. arXiv HTML source on foundation models and covert proliferation of military ISTAR capabilities, routed as a risk-boundary source for synthetic and defensive education. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: ai_enabled_analysis_boundary. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: arXiv version, military-AI risk literature, or foundation-model capability discussion materially changes. Verification method: direct_arxiv_html_review. Claim scope: Supports bounded discussion of foundation-model risks for military intelligence, surveillance, target acquisition, and reconnaissance; AGEINT uses it for risk framing, not for operational ISTAR guidance. Stakeholder role: AI safety reviewer, intelligence educator, policy analyst, red-team reviewer. Assurance use: foundation-model risk boundary, ISTAR claim calibration, and covert-proliferation scenario review. Rights dimension: non-proliferation, civilian protection, escalation risk, and human accountability. Direct arXiv HTML source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Gary Klein. Performing a project premortem, 2007. URL https://hbr.org/2007/09/performing-a-project-premortem. Professional practice article introducing the premortem as a structured way to surface possible failure causes before commitment. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_method_pedagogy. Source tier: professional_practice. Refresh cadence: annual. Refresh trigger: Publisher page, author metadata, or access status changes. Verification method: publisher_page_review. Claim scope: Supports bounded classroom use of premortem thinking as a failure-imagination aid, not a validated guarantee of risk detection. Stakeholder role: methods instructor; curriculum designer; reviewer. Assurance use: Adds a named structured failure-review technique while retaining explicit evidence limits. Rights dimension: copyrighted professional article; cite metadata and summarize sparingly. Harvard Business Review article page verified live 2026-06-15 for title, author, publication date, and publisher record.

Mariusz Kozera. Fitness osint: Identifying and tracking military and security personnel with fitness applications, 2020. URL https://securityanddefence.pl/Fitness-OSINT-Identifying-and-tracking-military-and-security-personnel-with-fitness,131759,0,2.html. Security and Defence article on identifying and tracking military and security personnel through fitness-app data, routed as a privacy and source-minimization warning. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: osint_geoint. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: journal article URL, fitness-app privacy literature, OSINT leakage patterns, or platform practices materially changes. Verification method: script_http_200_scholarly_page_review. Claim scope: Supports defensive discussion of fitness-app OSINT leakage and privacy risk; does not authorize tracking, doxxing, or targeting of real personnel. Stakeholder role: OSINT instructor, privacy reviewer, assurance reviewer. Assurance use: OSINT privacy-risk review, fitness-app leakage classroom caveat, and public-source minimization checklist. Rights dimension: privacy, physical safety, minimization, consent, and protection from live tracking. Direct journal source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Michael Landon-Murray, Wahid Saifuddin, and Stephen Coulthart. Structured analytic techniques in an intelligence fusion centre: A survey of analyst perspectives and use, 2025. URL https://doi.org/10.1080/18335330.2024.2436384. Peer-reviewed survey of SAT perspectives and use in an intelligence fusion-centre context, useful for adoption and training caveats. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded claims about SAT use and perceptions in fusion-centre practice, not direct proof of analytic accuracy gains. Stakeholder role: curriculum designer; analytic standards trainer; evaluation lead. Assurance use: Adds current practice evidence while keeping adoption, perception, and efficacy as separate claims. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, authors, journal DOI, publisher, and year; DOI URL retained as stable scholarly source.

LangChain, Inc. Langchain documentation, 2025a. URL https://docs.langchain.com. Verified professional documentation source for agentic_framework_docs; routed to LangChain/LangGraph Patterns appendix; AGEINT Python Code Library. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: agentic_framework_docs. Source tier: professional_documentation. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for agentic_framework_docs materially changes. Verification method: direct_professional_documentation_review. Claim scope: Supports bounded AGEINT discussion of agentic_framework_docs and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that agentic_framework_docs claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key professional_langchain_documentation retained.

LangChain, Inc. Langgraph documentation, 2025b. URL https://langchain-ai.github.io/langgraph/. Verified professional documentation source for agentic_framework_docs; routed to LangChain/LangGraph Patterns appendix; AGEINT Python Code Library; Frameworks & Infrastructure. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: agentic_framework_docs. Source tier: professional_documentation. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for agentic_framework_docs materially changes. Verification method: direct_professional_documentation_review. Claim scope: Supports bounded AGEINT discussion of agentic_framework_docs and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that agentic_framework_docs claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key professional_langgraph_documentation retained.

David M.J. Lazer et al. The science of fake news (science, 2018), 2018. URL https://www.science.org/doi/10.1126/science.aao2998. Verified scholarly peer reviewed source for disinformation_misinformation_science; routed to Active Measures and Disinformation; Information Warfare and Cognitive Security; Social Engineering. Chang Lu, Bo Hu, Qiang Li, Chao Bi, and Xing-Da Ju. Psychological inoculation for credibility assessment, sharing, 2023. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC10498317/. A 2023 Journal of Medical Internet Research meta-analysis reporting 42 independent studies with 42,530 participants. The authors report improvements in credibility and sharing discernment but no statistically significant overall effect on misinformation-sharing intention; these measured outcomes do not establish observed sharing behavior or durable real-world protection.

David R. Mandel and Philip E. Tetlock. Correcting judgment correctives in national security intelligence, 2018. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC6309046/. Frontiers in Psychology analysis distinguishes tradecraft endorsement from validity testing and discusses noise, overconfidence/underconfidence, and evaluation of judgment aids. Its policy prescriptions and cited empirical results have different evidentiary roles. Checked as of 2026-11-06. Citation role: curriculum_anchor. Source lane: education_assessment. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Updated peer-reviewed work on analytic debiasing, SAT validation, noise-versus-bias evidence, or replacement of the PMC landing record. Verification method: direct_scholarly_page_review. Claim scope: A peer-reviewed critique and research agenda concerning judgment correctives, noise, bipolar bias, and source-specific studies; not proof that all structured analytic techniques fail or that AGEINT improves accuracy. Assurance use: analytic-bias review checklist, noise-versus-bias diagnostic, recalibration evidence, and SAT-validation critique. Retrieved and reviewed the PMC full-text article on 2026-11-06, distinguishing its critique, cited task-specific studies, and proposed research/policy changes.

David R. Mandel, Christopher W. Karvetski, and Mandeep K. Dhami. Boosting intelligence analysts' judgment accuracy: What works, what fails?, 2018. URL https://www.cambridge.org/core/journals/judgment-and-decision-making/article/boosting-intelligence-analysts-judgment-accuracy-what-works-what-fails/1530E9DAE8F42B2E8FC2B5FE374DB50F. Open Judgment and Decision Making article comparing ACH, coherentization, and aggregation for intelligence analysts' probability judgments. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: forecasting_calibration_evidence. Source tier: scholarly_peer_reviewed_open. Refresh cadence: annual. Refresh trigger: Publisher metadata, correction, or retraction status changes. Verification method: publisher_open_article_review. Claim scope: Supports bounded claims that calibration, coherentization, and aggregation can complement SATs without making ACH a universal accuracy intervention. Stakeholder role: forecasting instructor; curriculum designer; evaluation lead. Assurance use: Routes SAT automation claims toward accountable judgment support, not analyst replacement. Rights dimension: open scholarly article; cite source and avoid extended quotation. Cambridge Core article page verified live 2026-06-15 for title, authors, journal record, and accessible article metadata.

Alexandru Marcoci, Mark Burgman, Ariel Kruger, Elizabeth Silver, Marissa McBride, Felix Singleton Thorn, Hannah Fraser, Bonnie C. Wintle, Fiona Fidler, and Ans Vercammen. Better together: Reliable application of the post-9/11 and post-iraq us intelligence tradecraft standards requires collective analysis, 2019. URL https://www.frontiersin.org/journals/psychology/articles/10.3389/fpsyg.2018.02634/full. Peer-reviewed study of 15 trained raters assessing 64 reports generated for hypothetical intelligence problems using an ICD203-derived rubric. Individual rating reliability was poor, while mathematically averaged ratings were more reliable under the study conditions. Reliability does not establish predictive validity or the truth of highly rated reports. Checked as of 2026-11-06. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Refresh if journal metadata, correction, or retraction status changes. Verification method: open_article_review. Claim scope: Inter-rater reliability of an ICD203-derived rubric applied by 15 trained raters to 64 hypothetical intelligence reports; not evidence of predictive validity, improved forecast accuracy, or effectiveness of collective deliberation. Stakeholder role: curriculum designer; quality reviewer; analytic standards trainer. Assurance use: Informs reviewer-calibration and rating-aggregation lessons while distinguishing assessment reliability from predictive validity. Rights dimension: open-access scholarly article; cite DOI/journal source. Retrieved the Frontiers full article on 2026-11-06; verified all ten authors, the January 7, 2019 publication date, the 15-rater/64-report sample in Methods, and the individual-versus-averaged rating results. Discussion explicitly leaves external and predictive validity, professional senior assessors, and unconstrained real intelligence reports for further study.

Jose Manuel Marcos-Vilchez, Jose Antonio Muniz-Velazquez, Alazne Arraztio-Cordoba, and Milagrosa Sanchez-Martin. Effectiveness of training actions aimed at improving critical thinking, 2026. URL https://www.nature.com/articles/s41599-025-06143-6. A systematic review in Humanities and Social Sciences Communications, published online 9 December 2025 and assigned to volume 13, article 53 (2026), not Nature Communications. The

abstract reports 17 included studies, predominantly involving higher-education students and mainly moderate risks of bias, but only seven studies rigorously meeting its eligibility criteria.

Stephen Marrin. Improving intelligence analysis: Bridging the gap between scholarship and practice, 2012. URL https://doi.org/10.4324/9780203810200. Routledge scholarly book on linking intelligence-analysis scholarship and practice, used for tradecraft pedagogy and evidence-uptake framing. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_method_pedagogy. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, edition, or access status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded claims about bridging intelligence scholarship, analytic practice, and training without treating scholarship uptake as a finished solution. Stakeholder role: curriculum designer; intelligence-studies instructor; methods reviewer. Assurance use: Connects SAT integration to a broader scholarship-practice gap rather than technique cataloging alone. Rights dimension: copyrighted scholarly book metadata only; cite and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, author, publisher, and year; DOI URL retained as stable scholarly source.

Michael J. Mazarr. Mastering the gray zone (usawc press, 2015), 2015. URL https://press.armywarcollege.edu/monographs/428/. Verified scholarly book metadata source for gray_zone_competition_doctrine; routed to Gray Zone / Hybrid Warfare / Non-State Actor Intelligence / Irregular Warfare. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: gray_zone_competition_doctrine. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for gray_zone_competition_doctrine materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of gray_zone_competition_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that gray_zone_competition_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_mazarr_2015_gray_zone retained.

Loren McCarthy. Seeing the futures: Evaluating the application of structured analytic technique alternative futures analysis, 2024. URL https://nationalsecurityjournal.nz/seeing-the-futures-evaluating-the-application-of-structured-analytic-technique-alternative-futures-analysis/. National Security Journal article evaluating Alternative Futures Analysis as an imaginative-thinking SAT and emphasizing purpose-fit and facilitator context. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: warning_intelligence. Source tier: scholarly_peer_reviewed_open. Refresh cadence: annual. Refresh trigger: Journal page, DOI 10.36878/nsj20241103.08, PDF, correction, or access status changes. Verification method: journal_page_and_doi_record_review. Claim scope: Supports bounded claims about Alternative Futures Analysis as a scenario and indicator aid whose value depends on purpose-fit and application context. Stakeholder role: warning instructor; curriculum designer; methods reviewer. Assurance use: Improves AFA and warning lessons without claiming scenario exercises predict the future. Rights dimension: open journal page; cite source and avoid extended quotation. National Security Journal article page verified live 2026-06-15 for title, author, publication date, DOI, abstract, and PDF link.

W. J. McGuire. Resistance to persuasion conferred by active and passive prior refutation of the same and alternative counterarguments, 1961. URL https://doi.apa.org/doi/10.1037/h0048344. Historical scholarly work on active and passive prior refutation of the same and alternative counterarguments, used as context for the development of inoculation theory. This anchor does not establish durable protection against modern influence operations or the effectiveness of AGEINT prebunking exercises. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: bibliographic_metadata_review_primary_fulltext_unavailable. Claim scope: Historical inoculation-theory and experimental foundations concerning prior refutation and resistance to persuasion; methods, population, duration, and transfer to modern influence operations are not verified here. On 2026-11-06 the APA DOI page returned an anti-bot iframe and the publisher PDF linked by Crossref returned HTTP 403. Crossref metadata for DOI 10.1037/h0048344 confirmed the title, W. J. McGuire, September 1961, volume 63(2), pages 326-332. Primary methods and follow-up were unavailable; efficacy, duration, population, and modern operational transfer were not verified. The earlier checked_as_of date is retained, not refreshed as a full-text verification.

Gerald M. McMahon. Analytic tradecraft standards in an age of ai, 2024. URL https://www.belfercenter.org/research-analysis/analytic-tradecraft-standards-age-ai. Belfer Center Intelligence Project report on how AI tools interact with analytic tradecraft standards, especially source distinction, alternatives, uncertainty, and analyst ownership. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_tradecraft_evidence. Source tier: public_domain_primary. Refresh cadence: annual. Refresh trigger: Belfer report URL, PDF, DOI or citation metadata, or public analytic-tradecraft AI guidance materially changes. Verification method: primary_browser_report_page_review. Claim scope: Supports bounded discussion of analytic tradecraft standards under AI assistance; does not represent official U.S. government policy or validate AGEINT performance. Stakeholder role: analyst, tradecraft reviewer, AI governance reviewer, instructor. Assurance use: ICD 203 and AI-tool review, analyst-ownership checklist design, and tradecraft standards caveats. Rights dimension: analytic objectivity, accountability, civil liberties, public confidence, and human responsibility. Direct Belfer report page and linked PDF were verified on 2026-06-15 after the attachment URL had moved; title, author, publication date, and report scope were visible.

C. A. Meissner, F. Surmon-Bohr, S. Oleszkiewicz, and L. J. Alison. Developing an evidence-based perspective on interrogation: A review of the u.s. government's high-value detainee interrogation group research program, 2017. URL https://doi.apa.org/doi/10.1037/law0000136. A peer-reviewed synthesis of the HIG-funded research program summarizing scores of empirical studies showing that rapport-based, non-coercive interviewing reliably outperforms accusatorial or coercive methods for eliciting accurate information, establishing the evidence base for rights-respecting elicitation. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: counterintelligence_source_integrity. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Backs the AGEINT claim that effective, evidence-based elicitation is rapport-based and rights-respecting rather than coercive. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

Melissa L. Rethlefsen, Shona Kirtley, Siw Waffenschmidt, Ana Patricia Ayala, David Moher, Matthew J. Page, Jonathan B. Koffel, and the PRISMA-S Group. Prisma-s: An extension to the prisma statement for reporting literature searches in systematic reviews, 2021. URL https://systematicreviewsjournal.biomedcentral.com/articles/10.1186/s13643-020-01542-z. Systematic Reviews article introducing the PRISMA-S extension, a 16-item checklist for transparent, reproducible reporting of search methods in evidence syntheses. Checked as of 2026-06-10. Citation role: curriculum_anchor. Source lane: source_construction_reporting. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: PRISMA-S guideline, PRISMA statement, systematic-review reporting practice, or journal record materially changes. Verification method: direct_scholarly_page_review. Claim scope: PRISMA-S reporting guideline for documenting literature searches, search strategies, information sources, limits, records, and reproducibility details. Stakeholder role: curriculum maintainer, assurance reviewer, instructor, learner, and source-refresh reviewer. Assurance use: source-construction reporting protocol, search-surface documentation, inclusion and exclusion evidence, deduplication notes, and refreshable citation workflow. Rights dimension: supports transparent source selection, reproducible search records, auditability, and limits on unverified discovery-source reuse. Direct journal landing page verified live 2026-06-10 with title, authors, publication date, journal metadata, and abstract describing the 16-item PRISMA-S checklist.

Dmitry I. Mikhailov. Optimizing national security strategies through llm-driven artificial intelligence integration, 2023. URL https://arxiv.org/ab

s/2305.13927. arXiv preprint on LLM-driven AI integration in national-security strategy, encoded with a narrow claim scope because it is useful as a strategic-policy framing source rather than as empirical validation. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: ai_enabled_analysis_boundary. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: arXiv version, related DOI, national-security AI literature, or claim scope materially changes. Verification method: direct_arxiv_page_review. Claim scope: Provides discovery-grounded context for LLM-driven national-security strategy claims while requiring AGEINT prose to keep strategic claims bounded and evidence-bounded. Stakeholder role: policy analyst, AI governance reviewer, instructor. Assurance use: strategic-AI claim calibration and cautionary national-security AI planning context. Rights dimension: human oversight, strategic accountability, institutional due care, and non-escalatory educational framing. Direct arXiv source URL verified on 2026-06-15 with title, author, abstract, DOI metadata, and version history visible on the primary page.

Rad Miksa. Assessment tabling: An integrated structured analytic technique for improved intelligence analysis and reasoning visualisation, 2024. URL https://doi.org/10.1080/02684527.2024.2370129. Peer-reviewed article proposing assessment tabling as an integrated SAT and reasoning-visualization approach. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_method_pedagogy. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded claims about reasoning visualization as an analytic artifact design pattern, not empirical proof of accuracy improvement. Stakeholder role: methods instructor; visualization reviewer; curriculum designer. Assurance use: Feeds figure-caption and classroom-artifact language about visible reasoning without calling the visual a score. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, author, journal DOI, publisher, and year; DOI URL retained as stable scholarly source.

Margaret Mitchell, Simone Wu, Andrew Zaldivar, Parker Barnes, Lucy Vasserman, Ben Hutchinson, Elena Spitzer, Inioluwa Deborah Raji, and Timnit Gebru. Model cards for model reporting, 2019. URL https://arxiv.org/abs/1810.03993. Scholarly source for documenting intended use, evaluation procedures, benchmarked performance, limitations, and model-release context. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: model_card_reporting. Source tier: scholarly. Refresh cadence: annual. Refresh trigger: model reporting practice, model-card schema, or scholarly consensus changes. Verification method: direct_scholarly_page_review. Claim scope: model documentation cards, intended-use statements, evaluation caveats, and release notes. Stakeholder role: model steward, assurance reviewer, instructor, learner, and affected user. Assurance use: model card review and model-release evidence packet. Rights dimension: transparency, fairness, informed use, contestability, and accountable deployment. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

MITRE. Mitre atlas, 2026a. URL https://atlas.mitre.org/. MITRE ATLAS is a living knowledge base for adversarial threats to AI-enabled systems, useful for defensive red-team mapping and control coverage. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: research_standard. Refresh cadence: quarterly. Refresh trigger: MITRE ATLAS tactic, technique, mitigation, case-study, or matrix-version changes. Verification method: direct_standards_page_review. Claim scope: Adversarial Threat Landscape for Artificial-Intelligence Systems tactics, techniques, mitigations, and case-study vocabulary for defensive AI security analysis. Stakeholder role: AI security analyst, red-team reviewer, incident responder, instructor, and learner. Assurance use: adversarial-AI threat taxonomy, defensive red-team mapping, AI control coverage, and incident-response exercise scoping. Rights dimension: security, accountable defensive testing, risk communication, incident readiness, and harm prevention. Direct MITRE ATLAS source URL verified live 2026-06-11; page identifies ATLAS as a globally accessible living knowledge base of adversary tactics and techniques against AI systems.

MITRE. Mitre att&ck enterprise matrix, 2026b. URL https://attack.mitre.org/matrices/enterprise/. Source lane: cyber_threat_intelligence. Source tier: research_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

MITRE. Mitre att&ck for ics matrix, 2026c. URL https://attack.mitre.org/matrices/ics/. Threat-informed defensive matrix for ICS tactics and techniques, used for coverage mapping. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ics_ot_defense. Source tier: research_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

MITRE. D3fend matrix, 2026d. URL https://d3fend.mitre.org/. MITRE D3FEND knowledge base of cybersecurity countermeasure techniques and relationships to offensive/adversary techniques; used to ground defensive-control mapping without operationalizing attacks. Checked as of 2026-09-06. Citation role: curriculum_anchor. Source lane: assurance_evaluation_evidence. Source tier: research_standard. Refresh cadence: quarterly. Refresh trigger: D3FEND matrix, countermeasure taxonomy, ATT&CK relationship model, ontology release, or defensive-control mapping changes. Verification method: direct_official_page_review. Claim scope: defensive cybersecurity countermeasure taxonomy, relationships between defensive techniques and adversary techniques, and evidence-backed control selection. Stakeholder role: cyber defense analyst, control assessor, red-team debriefer, instructor, and learner. Assurance use: defensive-control crosswalk, countermeasure-evidence checklist, ATT&CK-to-D3FEND debrief, and assurance remediation backlog. Rights dimension: security, defensive proportionality, accountability, resilience, and harm prevention. Direct source URL verified live (HTTP 200, official MITRE D3FEND page with on-topic title and description metadata) for AGEINT curriculum use.

Model Context Protocol Project. Security best practices - model context protocol, 2025a. URL https://modelcontextprotocol.io/docs/tutorials/security/security_best_practices. Official MCP security best practices page describing security considerations, attack vectors, and implementation practices for MCP deployments. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: secure_release_change_control. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: MCP security guidance, authorization/security-best-practice page, confused-deputy mitigation, token-handling guidance, or tool-consent requirements change. Verification method: direct_official_page_review. Claim scope: MCP security best practices, confused-deputy and token-passthrough risks, human consent, least privilege, authorization boundaries, and agent-tool threat modeling. Stakeholder role: security architect, release reviewer, agent-platform engineer, instructor, and learner. Assurance use: MCP deployment threat model, confused-deputy mitigation checklist, token-handling review, human-consent gate, least-privilege scope, and release-gate security evidence. Rights dimension: security, consent, least privilege, credential protection, accountability, user control, and harm prevention. Direct official MCP security best-practices page verified live 2026-06-11; page describes security considerations, attack vectors, and best practices for MCP implementations.

Model Context Protocol Project. Specification - model context protocol, 2025b. URL https://modelcontextprotocol.io/specification/2025-06-18. Official Model Context Protocol specification page for the 2025-06-18 version, grounding agent-tool interoperability language and protocol-boundary examples. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: MCP specification version, protocol capability model, authorization profile, transport guidance, or security model changes. Verification method: direct_official_page_review. Claim scope: Model Context Protocol specification, client-server-tool interoperability, capability negotiation, authorization boundaries, and agentic context integration assumptions. Stakeholder role: agent-platform engineer, interoperability reviewer, procurement assessor, instructor, and learner. Rights dimension: interoperability, transparency, least-privilege integration, tool accountability, auditable agent context exchange, and user consent. Direct official MCP specification page verified live 2026-06-11; security and trust language retained as a boundary, not a deployment guarantee.

National Archives and Records Administration. Executive order 12333: United states intelligence activities (historical dci-era text), 1981. URL https://www.archives.gov/federal-register/codification/executive-order/12333.html. National Archives transcription of the historical EO 12333

text citing the December 4, 1981 order at 46 FR 59941. Its institutional structure includes the Director of Central Intelligence, including section 1.5; use for historical legal context, not current consolidated authority. The separate official_eo_12333_odni_text anchor identifies an ODNI edition amended through 2008; neither edition alone establishes exhaustive current law. Checked as of 2026-11-06. Citation role: curriculum_anchor. Source lane: legal_oversight. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: Historical DCI-era EO 12333 text for institutional roles, analytic competition, rights protections, and oversight; not a current consolidated statement of intelligence authorities. Retrieved the National Archives transcription on 2026-11-06; sections 1.3 and 1.5 retain the Director of Central Intelligence structure. Compared with the separately keyed ODNI PDF, retrieved via redirect to archive.dni.gov, whose first page explicitly lists amendments in 2003, 2004, and 2008. This is edition/provenance verification, not a complete current-law review.

National Archives and Records Administration. Nara 2025 ai compliance plan, 2025. URL https://www.archives.gov/files/nara-2025-ai-compliance-plan-final-v1-09-18-2025.pdf. NARA plan for AI governance, public trust, audits, records-aware AI use, transparency, and compliance with federal AI policy. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: records_retention_auditability. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: NARA AI compliance plan, records policy, AI use-case inventory, audit, or federal AI governance update. Verification method: direct_official_pdf_review. Claim scope: agency AI compliance planning, records governance, AI use-case oversight, transparency, and auditability evidence. Stakeholder role: records officer, public-sector AI steward, compliance reviewer, instructor, and learner. Assurance use: records-retention and AI compliance audit trail. Rights dimension: public records, transparency, auditability, privacy-by-design, accountability, and public trust. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Archives and Records Administration. Inventory of nara artificial intelligence (ai) use cases, 2026a. URL https://www.archives.gov/ai. Official NARA inventory of current and planned AI use cases, including production, pilot, and planned AI applications tied to records, discovery, FOIA, and archival access. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: records_retention_auditability. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: NARA AI use-case inventory, agency AI use-case disclosure, records policy, or FOIA workflow changes. Verification method: direct_official_page_review. Claim scope: AI use-case inventory, records-oriented AI auditability, archival access, and public disclosure. Stakeholder role: records officer, public official, instructor, transparency reviewer, and learner. Assurance use: AI use-case inventory review and records-audit trail. Rights dimension: records access, public transparency, privacy, archival integrity, and FOIA accountability. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Archives and Records Administration. Records of the central intelligence agency, 2026b. URL https://www.archives.gov/research/guide-fed-records/groups/263.html. Official NARA guide to CIA Record Group 263, archival provenance, record series, and declassified intelligence research pathways. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: historical_declassified_sources. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Commission on Terrorist Attacks Upon the United States. The 9/11 commission report, 2004. URL https://9-11commission.gov/report/911Report.pdf. Official commission report used for postmortem context on warning, information sharing, imagination, and reform pressures after September 11, 2001. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: intelligence_failure_postmortem. Source tier: official_report. Refresh cadence: biennial. Refresh trigger: Refresh if official commission site or report URL changes. Verification method: direct_pdf_download. Claim scope: Supports bounded claims about post-9/11 warning and reform context. Stakeholder role: curriculum designer; governance reviewer; analyst supervisor. Assurance use: Connects warning lessons to postmortem learning and reform without hindsight simplification. Rights dimension: public-domain government report; cite official source. Official commission PDF verified live 2026-06-11; use for postmortem and reform context, not as a one-size failure formula.

National Counterintelligence and Security Center. The national counterintelligence strategy, 2024. URL https://www.odni.gov/index.php/ncsc-features/2741-the-national-counterintelligence-strategy-of-the-united-states-of-america. Official strategy for defensive CI integration, foreign-intelligence threat awareness, strategic advantage protection, and future readiness. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: counterintelligence_source_integrity. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Counterintelligence and Security Center. National counterintelligence strategy 2020-2022 (ncsc/odni), NCSCa. URL https://www.dni.gov/files/NCSC/documents/features/20200205-National_CI_Strategy_2020_2022.pdf. Verified official primary source for counterintelligence_strategy; routed to Counterintelligence (fundamentals + against non-state actors). AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: counterintelligence_strategy. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for counterintelligence_strategy materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of counterintelligence_strategy and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that counterintelligence_strategy claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_ncsc_national_ci_strategy_2020 retained.

National Counterintelligence and Security Center. National counterintelligence strategy 2024 (ncsc/odni), NCSCb. URL https://www.dni.gov/files/NCSC/documents/features/NCSC_CI_Strategy-pages-20240730.pdf. Verified official primary source for counterintelligence_strategy; routed to Counterintelligence (fundamentals + against non-state actors). AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: counterintelligence_strategy. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for counterintelligence_strategy materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of counterintelligence_strategy and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that counterintelligence_strategy claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_ncsc_national_ci_strategy_2024 retained.

National Geospatial-Intelligence Agency. Geoint basic doctrine publication 1, 2017. URL https://www.nga.mil/assets/files/170901-038_GEOINT_Basic_Doctrine_Pub_1.pdf. NGA doctrine source for GEOINT definitions, mission context, and professional geospatial intelligence framing. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: geoint_professional_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: NGA doctrine URL, publication version, or public doctrine text materially changes. Verification method: curl_http_200_pdf_review. Claim scope: GEOINT doctrine and geospatial-intelligence framing support. Stakeholder role: GEOINT analyst, instructor, reviewer. Assurance use: anchors GEOINT modules to official doctrine rather than broad imagery claims. Rights dimension: public

doctrine used for education and source-provenance review. Direct URL verified on 2026-06-14 with curl HTTP 200 and application/pdf content from nga.mil.

National Geospatial-Intelligence Agency. Nga pub 1.0: Geoint basic doctrine (2018), 2018. URL https://irp.fas.org/agency/nga/doctrine-2018.pdf. Verified official primary source for geoint_doctrine; routed to GEOINT doctrine; NGA mission; GEOINT principles and definitions. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: geoint_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for geoint_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of geoint_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that geoint_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nga_geoint_pub1_doctrine_2018 retained.

National Geospatial-Intelligence Agency. Nga releases new data strategy to navigate digital, geoint revolution, 2021. URL https://www.nga.mil/news/NGA_releases_new_data_strategy_to_navigate_digital.html. NGA public release on data strategy, geospatial data management, and digital transformation in GEOINT. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: geoint_data_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: NGA page content, data strategy version, or public URL materially changes. Verification method: curl_http_200_html_review. Claim scope: GEOINT data-governance and digital-transformation context for modular source substrate claims. Stakeholder role: GEOINT data steward, analyst, reviewer. Assurance use: supports data-lineage and GEOINT-source governance language. Rights dimension: public release used for education and data-governance framing. Direct URL verified on 2026-06-14 with curl HTTP 200 and text/html content from nga.mil.

National Geospatial-Intelligence Agency. Geoint artificial intelligence, 2026a. URL https://www.nga.mil/news/GEOINT_Artificial_Intelligence_.html. Official NGA source on GEOINT AI, data quality, model performance, interoperability, analyst interaction, and standards leadership. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: osint_geoint. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Geospatial-Intelligence Agency. Nga strategy, 2026b. URL https://www.nga.mil/about/NGA_Strategy.html. Official NGA strategy anchor for GEOINT readiness, warning, partnership resilience, resource stewardship, and AI integration. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: osint_geoint. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Guide to test, training, and exercise programs for it plans and capabilities, 2006. URL https://csrc.nist.gov/pubs/sp/800/84/final. Official methodology for designing, conducting, and evaluating test, training, and exercise programs. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ics_ot_defense. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Information security continuous monitoring, nist sp 800-137, 2011a. URL https://csrc.nist.gov/pubs/sp/800/137/final. Official continuous-monitoring guidance for metrics, status awareness, ongoing authorization, and governance feedback loops. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Managing information security risk, nist sp 800-39, 2011b. URL https://csrc.nist.gov/pubs/sp/800/39/final. Official enterprise-risk source for mission, organization, and system tiers, risk framing, assessment, response, and monitoring. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: legal_oversight. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Guide for conducting risk assessments, nist sp 800-30 rev. 1, 2012. URL https://csrc.nist.gov/pubs/sp/800/30/r1/final. Official risk-assessment method for threat, vulnerability, impact, likelihood, uncertainty, and residual-risk reasoning. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: legal_oversight. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Guide to cyber threat information sharing, nist sp 800-150, 2016. URL https://csrc.nist.gov/pubs/sp/800/150/final. Official guidance for establishing threat-information sharing goals, communities, distribution rules, and defensive use of indicators and TTPs. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Framework for cyber-physical systems: Volume 1, overview, 2017. URL https://www.nist.gov/publications/framework-cyber-physical-systems-volume-1-overview. Official NIST cyber-physical systems framework for functions, timing, trustworthiness, interoperability, and safety-aware architecture. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ics_ot_defense. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Protecting information and system integrity in industrial control system environments, nist sp 1800-10, 2018a. URL https://csrc.nist.gov/pubs/sp/1800/10/final. Official NCCoE practice guide for manufacturing-sector ICS integrity, monitoring, architecture, and defensive lab validation. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ics_ot_defense. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Risk management framework for information systems and organizations, nist sp 800-37 rev. 2, 2018b. URL https://csrc.nist.gov/pubs/sp/800/37/r2/final. Official RMF lifecycle source for preparation, categorization, control selection, implementation, assessment, authorization, and monitoring. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: legal_oversight. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Security and privacy controls for information systems and organizations, nist sp 800-53 rev. 5, 2020a. URL https://csrc.nist.gov/pubs/sp/800/53/r5/upd1/final. Official security and privacy control catalog for control baselines, assessment language, privacy controls, and inherited-control reasoning. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: legal_oversight. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Zero trust architecture, nist sp 800-207, 2020b. URL https://csrc.nist.gov/pubs/sp/800/207/final. Official zero-trust architecture guidance for identity-centric authorization, continuous evaluation, least privilege, and policy enforcement. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Enhanced security requirements for protecting controlled unclassified information, nist sp 800-172, 2021. URL https://csrc.nist.gov/pubs/sp/800/172/final. Official enhanced security requirements for high-value CUI, source handling analogies, system integrity, and advanced persistent threat resistance. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: counterintelligence_source_integrity. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Towards a standard for identifying and managing bias in artificial intelligence, 2022a. URL https://nvlpubs.nist.gov/nistpubs/SpecialPublications/NIST.SP.1270.pdf. Official NIST source for AI bias concepts, socio-technical framing, measurement limits, and governance-oriented mitigation. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ai_ethics_data_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Engineering trustworthy secure systems, nist sp 800-160 vol. 1 rev. 1, 2022b. URL https://csrc.nist.gov/pubs/sp/800/160/v1/r1/final. Systems-security engineering foundation for trustworthy systems in contested operational environments and related training programs. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ics_ot_defense. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Cybersecurity supply chain risk management practices, nist sp 800-161 rev. 1, 2022c. URL https://csrc.nist.gov/pubs/sp/800/161/r1/upd1/final. Official supply-chain risk-management guidance for identifying, assessing, and mitigating product, service, vendor, and process risks. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Secure software development framework, nist sp 800-218, 2022d. URL https://csrc.nist.gov/pubs/sp/800/218/final. Official secure development framework for agent tooling, connectors, and software supply chains. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Artificial intelligence risk management framework (ai rmf 1.0), 2023a. URL https://nvlpubs.nist.gov/nistpubs/ai/NIST.AI.100-1.pdf. Official NIST.AI.100-1 risk-management framework. Checked as of 2026-05-21. Citation role: source_quality_anchor. Source lane: source_quality_spine. Source tier: source_quality_anchor. Refresh cadence: semiannual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: baseline source-quality guardrail for generated AGEINT curriculum claims. Stakeholder role: curriculum maintainer, instructor, reviewer, and learner. Assurance use: source-quality triangulation and claim-boundary review. Rights dimension: source transparency, accountability, and evidence traceability. Directly verified official NIST source URL.

National Institute of Standards and Technology. Guide to operational technology security, nist sp 800-82 rev. 3, 2023b. URL https://csrc.nist.gov/pubs/sp/800/82/r3/final. NIST SP 800-82 Revision 3 was published in September 2023. The July 2024 potential-updates attachment is not the original publication date. The landing page inspected on 2026-11-06 links a Revision 4 initial public draft; a draft is not silently substituted for the retained final Revision 3 identity. Checked as of 2026-11-06. Citation role: source_quality_anchor. Source lane: source_quality_spine. Source tier: source_quality_anchor. Refresh cadence: semiannual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: NIST guidance on OT security and its performance, reliability and safety constraints; not proof of compliance, plant safety or AGEINT efficacy. Stakeholder role: curriculum maintainer, instructor, reviewer, and learner. Assurance use: source-quality triangulation and claim-boundary review. Rights dimension: source transparency, accountability, and evidence traceability. Directly inspected official landing page, abstract, publication date, document history and draft-status notice on 2026-11-06; no independent audit of the full standard or implementation.

National Institute of Standards and Technology. Adversarial machine learning: A taxonomy and terminology of attacks and mitigations, 2024a. URL https://csrc.nist.gov/pubs/ai/100/2/e2023/final. Official adversarial-ML taxonomy for defensive AI threat modeling, mitigation vocabulary, evaluation limits, and safe red-team framing. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Reducing risks posed by synthetic content: An overview of technical approaches to digital content transparency, 2024b. URL https://nvlpubs.nist.gov/nistpubs/ai/NIST.AI.100-4.pdf. NIST AI 100-4 report on reducing risks posed by synthetic

content through digital content transparency, provenance, labeling, watermarking, detection, testing, auditing, and maintenance approaches. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: NIST AI 100-4 revision, synthetic-content transparency standard, provenance technology, watermarking guidance, or digital-content policy materially changes. Verification method: direct_official_pdf_review. Claim scope: Synthetic-content provenance, watermarking, labeling, detection, testing, auditing, maintenance, disclosure, and digital content transparency for generated media and influence-risk review. Stakeholder role: provenance reviewer, model-card steward, synthetic-media evaluator, instructor, learner, and affected-person representative. Rights dimension: transparency, provenance, disclosure, privacy, child safety, non-consensual intimate imagery prevention, and accountable synthetic-media governance. Direct NIST AI 100-4 PDF and publication landing page verified live 2026-06-11; report covers provenance, labeling, watermarking, detection, testing, auditing, and maintenance.

National Institute of Standards and Technology. A plan for global engagement on ai standards, 2024c. URL https://nvlpubs.nist.gov/nistpubs/ai/NIST.AI.100-5.pdf. NIST AI 100-5 plan for global engagement on AI standards, used to ground standards coordination and cross-jurisdiction AI-governance discussions without claiming a single universal compliance regime. Checked as of 2026-06-06. Citation role: curriculum_anchor. Source lane: ai_conformity_compliance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: NIST global AI standards plan, standards-development priorities, international AI standards coordination, or conformity-assessment guidance changes. Verification method: direct_official_pdf_review. Claim scope: global AI standards engagement, standards-development coordination, AI governance interoperability, and conformity-assessment planning. Stakeholder role: standards lead, compliance reviewer, procurement assessor, instructor, and learner. Rights dimension: accountability, interoperability, standards participation, transparency, and cross-border governance consistency. Direct source URL verified live (HTTP 200 PDF, title metadata and first pages on-topic) for AGEINT curriculum use.

National Institute of Standards and Technology. Artificial intelligence risk management framework: Generative ai profile, 2024d. URL https://nvlpubs.nist.gov/nistpubs/ai/NIST.AI.600-1.pdf. Official NIST AI 600-1 generative AI profile. Checked as of 2026-05-21. Citation role: source_quality_anchor. Source lane: source_quality_spine. Source tier: source_quality_anchor. Refresh cadence: semiannual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: baseline source-quality guardrail for generated AGEINT curriculum claims. Stakeholder role: curriculum maintainer, instructor, reviewer, and learner. Assurance use: source-quality triangulation and claim-boundary review. Rights dimension: source transparency, accountability, and evidence traceability. Directly verified official NIST source URL.

National Institute of Standards and Technology. Artificial intelligence risk management framework: Generative artificial intelligence profile, 2024e. URL https://nvlpubs.nist.gov/nistpubs/ai/NIST.AI.600-1.pdf. NIST AI 600-1 profile for generative AI risk management, risk framing, evaluation actions, misuse considerations, and AI RMF alignment. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: assurance_evaluation_evidence. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: NIST AI 600-1 revision, AI RMF profile update, generative-AI risk guidance, or evaluation action changes. Verification method: direct_official_pdf_review. Claim scope: Generative-AI risk profile, AI RMF implementation actions, evaluation controls, misuse-risk review, and trustworthiness evidence mapping. Stakeholder role: AI governance lead, assurance reviewer, instructor, system steward, procurement assessor, and learner. Assurance use: AI risk profile crosswalk, generative-AI evaluation evidence, misuse-risk review, and source-backed trustworthiness caveats. Rights dimension: trustworthy AI, safety, security, privacy, fairness, transparency, accountability, and documented evaluation limits. Direct NIST AI 600-1 PDF and NIST publication landing page verified live 2026-06-11 for GenAI Profile scope and AI RMF alignment.

National Institute of Standards and Technology. The nist cybersecurity framework (csf) 2.0, 2024f. URL https://www.nist.gov/publications/nist-cybersecurity-framework-csf-20. Official cybersecurity-risk governance framework that adds the Govern function and supplies a common language for AI, OT, and enterprise risk. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ics_ot_defense. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Fips 203: Ml-kem post-quantum key-encapsulation standard, 2024a. URL https://csrc.nist.gov/pubs/fips/203/final. Verified official primary source for cryptography_standards; routed to Cryptography standards; post-quantum SIGINT resilience; communications security modernization. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cryptography_standards. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cryptography_standards materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of cryptography_standards and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cryptography_standards claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nist_fips_203_ml_kem retained.

National Institute of Standards and Technology. Fips 204: Ml-dsa post-quantum digital signature standard, 2024b. URL https://csrc.nist.gov/pubs/fips/204/final. Verified official primary source for cryptography_standards; routed to Cryptography standards; post-quantum digital signatures; authentication in collection systems. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cryptography_standards. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cryptography_standards materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of cryptography_standards and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cryptography_standards claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nist_fips_204_ml_dsa retained.

National Institute of Standards and Technology. Fips 205: Slh-dsa post-quantum hash-based signature standard, 2024c. URL https://csrc.nist.gov/pubs/fips/205/final. Verified official primary source for cryptography_standards; routed to Cryptography standards; post-quantum signature diversity; long-term data integrity. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cryptography_standards. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cryptography_standards materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of cryptography_standards and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cryptography_standards claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nist_fips_205_slh_dsa retained.

National Institute of Standards and Technology. Mapping relationships between documentary standards, regulations, frameworks, and guidelines, nist

ir 8477, 2024. URL https://csrc.nist.gov/pubs/ir/8477/final. Official mapping-method source for comparing controls, regulations, frameworks, and guidance without collapsing their separate purposes. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: legal_oversight. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Nist ir 8547: Transition to post-quantum cryptography standards, 2024. URL https://nvlpubs.nist.gov/nistpubs/ir/2024/NIST.IR.8547.ipd.pdf. Verified official draft source for cryptographic_standards; routed to Cryptographic Methods appendix; Security & Adversarial Considerations. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cryptographic_standards. Source tier: official_draft. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cryptographic_standards materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of cryptographic_standards and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cryptographic_standards claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nist_pqc_migration_ir8547 retained.

National Institute of Standards and Technology. Secure software development practices for generative ai and dual-use foundation models, 2024. URL https://csrc.nist.gov/pubs/sp/800/218/a/final. NIST SSDF Community Profile for AI model development, AI systems using models, AI system acquisition, and secure lifecycle practices. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: secure_release_change_control. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: NIST SSDF, SP 800-218A, generative-AI profile, or AI secure-development practice changes. Verification method: direct_official_page_review. Claim scope: release gates, secure lifecycle controls, AI model acquisition, and change-control evidence. Stakeholder role: system steward, security reviewer, vendor assessor, instructor, and learner. Assurance use: release and change-control gate with secure-development evidence. Rights dimension: security, resilience, due care, accountability, and harm prevention. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Assessing risks and impacts of ai (aria): Pilot evaluation report, 2025a. URL https://www.nist.gov/publications/assessing-risks-and-impacts-ai-aria-pilot-evaluation-report. NIST ARIA pilot report describing evaluation scenarios, model testing, red teaming, field testing, dialogue annotation, tester questionnaires, and measurement trees. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: assurance_evaluation_evidence. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: ARIA evaluation program, pilot report, scenario design, or AI measurement guidance changes. Verification method: direct_official_page_review. Claim scope: assurance evaluation evidence, scenario design, red-team testing, field testing, and measurement trees. Stakeholder role: assurance lead, evaluator, instructor, learner, and affected user. Assurance use: agent evaluation protocol and adversarial assurance evidence. Rights dimension: validity, reliability, safety, fairness, user impact, and accountable testing. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Digital identity guidelines, nist sp 800-63-4, 2025b. URL https://csrc.nist.gov/pubs/sp/800/63/4/final. Official digital-identity guidance for authentication, federation, identity proofing, and agent/tool authorization analogies. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Incident response recommendations and considerations, nist sp 800-61 rev. 3, 2025c. URL https://csrc.nist.gov/pubs/sp/800/61/r3/final. Official incident-response profile for preparation, detection, response, recovery, and continuous improvement under CSF 2.0. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Incident response recommendations and considerations for cybersecurity risk management: A csf 2.0 community profile, 2025d. URL https://csrc.nist.gov/pubs/sp/800/61/r3/final. NIST SP 800-61 Rev. 3 source for integrating incident response with risk management, preparation, detection, response, and recovery. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: agent_incident_response. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: NIST SP 800-61 revision, CSF 2.0 community profile update, or incident-response terminology changes. Verification method: direct_official_page_review. Claim scope: agent incident tabletop design, incident lifecycle, recovery evidence, and post-incident review. Stakeholder role: incident commander, system steward, instructor, learner, and risk owner. Assurance use: agent incident response drill and escalation evidence. Rights dimension: resilience, accountability, due care, and harm minimization. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Accelerating the adoption of software and artificial intelligence agent identity and authorization, 2026a. URL https://csrc.nist.gov/pubs/other/2026/02/05/accelerating-the-adoption-of-software-and-ai-agent/ipd. NIST concept paper for applying identity and authorization standards to software and AI agents. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Practices for automated benchmark evaluations of language models and ai agent systems, nist ai 800-2 initial public draft, 2026b. URL https://nvlpubs.nist.gov/nistpubs/ai/NIST.AI.800-2.ipd.pdf. NIST AI 800-2 initial public draft provides voluntary practices for automated benchmark evaluations of language models and AI agent systems. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: assurance_evaluation_evidence. Source tier: official_draft. Refresh cadence: quarterly. Refresh trigger: NIST AI 800-2 draft revision, final publication, benchmark evaluation practice update, public comment resolution, or agent-system evaluation guidance changes. Verification method: direct_official_pdf_review. Claim scope: Initial public draft practices for automated benchmark evaluations of language models and AI agent systems, including defining evaluation context, conducting benchmark evaluation, and communicating results. Stakeholder role: AI evaluator, procurement assessor, assurance reviewer, instructor, system steward, and learner. Assurance use: automated benchmark evaluation protocol, agent benchmark documentation, validity and reproducibility review, and evaluation-report caveats. Rights dimension: validity, reliability, reproducibility, transparency, accountability, procurement review, and documented evaluation limits. Direct NIST AI 800-2 PDF and NIST announcement verified live 2026-06-11; draft status retained explicitly for AGEINT curriculum use.

National Institute of Standards and Technology. Ai agent standards initiative, 2026c. URL https://www.nist.gov/artificial-intelligence/ai-agent-standards-initiative. Official NIST initiative for trusted, interoperable, and secure AI-agent standards, protocols, identity, and evaluation research. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: NIST AI-agent standards initiative, RFI, guidance, technical convening, protocol, identity, or evaluation deliverable changes. Verification method: direct_official_page_review. Claim scope: AI-agent interoperability, secure delegation, agent identity, standards

gaps, protocol coordination, and evaluation research for autonomous digital actors. Stakeholder role: standards steward, agent architect, assurance reviewer, procurement assessor, instructor, and learner. Assurance use: agent standards crosswalk, secure delegation review, identity evidence, interoperability claims, and evaluation-scope caveats. Rights dimension: secure delegated action, accountable non-human identity, interoperability, least-privilege user control, and auditable agent behavior. Direct NIST source URL verified live 2026-06-11; page identifies the AI Agent Standards Initiative as focused on trusted, interoperable, and secure agentic AI.

National Institute of Standards and Technology. Nist ai resource center, 2026d. URL https://airc.nist.gov/. NIST AI Resource Center source for AI RMF operationalization, playbook resources, crosswalks, profiles, and testing, evaluation, verification, and validation support. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: AI RMF revision, playbook revision, AIRC technical reports, or TEVV resources change. Verification method: direct_official_page_review. Claim scope: AI RMF operationalization, TEVV evidence, crosswalks, profiles, and assurance planning. Stakeholder role: assurance lead, instructor, compliance reviewer, and learner. Assurance use: TEVV evidence plan and AI RMF crosswalk. Rights dimension: trustworthy AI, accountability, safety, and rights-preserving evaluation. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Concept note: Ai rmf profile on trustworthy ai in critical infrastructure, 2026e. URL https://www.nist.gov/programs-projects/concept-note-ai-rmf-profile-trustworthy-ai-critical-infrastructure. NIST concept note for a critical-infrastructure AI RMF profile covering AI-enabled IT, OT, and industrial-control environments. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: assurance_evaluation_evidence. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: NIST AI RMF critical-infrastructure profile concept, draft, final profile, or public-comment update. Verification method: direct_official_page_review. Claim scope: critical-infrastructure AI trustworthiness, AI RMF profiling, infrastructure risk review, and sector assurance evidence. Stakeholder role: critical-infrastructure steward, OT defender, assurance reviewer, instructor, and learner. Assurance use: critical-infrastructure AI RMF profile crosswalk and tabletop assurance review. Rights dimension: safety, resilience, reliability, security, public service continuity, and accountable infrastructure governance. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Nist ai rmf playbook, 2026f. URL https://airc.nist.gov/airmf-resources/playbook/. Official AI RMF playbook for translating Govern, Map, Measure, and Manage functions into curriculum controls and review prompts. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ai_ethics_data_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Ai research: Security and resilience, 2026g. URL https://www.nist.gov/artificial-intelligence/ai-research-security-and-resilience. NIST AI security and resilience research hub for secure-and-resilient AI trustworthiness, adversarial machine learning taxonomy, and mitigation work. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: NIST AI security report, adversarial machine learning taxonomy, or AI RMF security update changes. Verification method: direct_official_page_review. Claim scope: AI red-team assurance, adversarial ML terminology, mitigation taxonomy, and resilience evidence. Stakeholder role: red-team reviewer, assurance lead, instructor, and learner. Assurance use: adversarial assurance cycle and mitigation evidence. Rights dimension: security, reliability, harm prevention, and accountable AI testing. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Nist big data interoperability framework, 2026h. URL https://www.nist.gov/publications/nist-big-data-interoperability-framework-volume-1-definitions. Official NIST program source for big-data interoperability, reference architecture, data interfaces, vocabulary, and technology roadmap. Checked as of 2026-06-06. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: NIST big-data framework volume, version, roadmap, or program update. Verification method: direct_official_page_review. Claim scope: data interoperability, architecture vocabulary, data lifecycle, and provenance-aware systems. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use; URL refreshed 2026-06-06 after liveness check.

National Institute of Standards and Technology. Dioptra, 2026i. URL https://pages.nist.gov/dioptra/. NIST Dioptra test platform for evaluating AI system risks, adversarial robustness, and measurement workflows in controlled settings. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: NIST Dioptra release, documentation, testbed capability, AI measurement, or adversarial-evaluation update. Verification method: direct_official_page_review. Claim scope: AI testbed evaluation, adversarial testing, red-team assurance, reproducible measurement, and risk assessment workflow. Stakeholder role: assurance evaluator, red-team reviewer, instructor, system steward, and learner. Assurance use: AI red-team testbed evidence, reproducible evaluation run, measurement packet, and assurance artifact. Rights dimension: trustworthy AI, safety, security, validity, reliability, transparency, and accountable testing. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology. Oscal - open security controls assessment language, 2026j. URL https://pages.nist.gov/OSCAL/. NIST Open Security Controls Assessment Language project, used to ground machine-readable control catalogs, assessment evidence, and compliance traceability. Checked as of 2026-09-06. Citation role: curriculum_anchor. Source lane: records_retention_auditability. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: OSCAL model version, NIST control catalog, assessment result schema, component definition, or compliance automation guidance changes. Verification method: direct_official_page_review. Claim scope: machine-readable security controls, assessment plans/results, system security plans, component definitions, and compliance evidence exchange. Stakeholder role: control assessor, compliance engineer, audit-trail steward, instructor, and learner. Assurance use: machine-readable control-evidence package, assessment-result review, audit-trail crosswalk, and compliance automation readiness check. Rights dimension: accountability, auditability, transparency, security, privacy, and due-process traceability. Direct source URL verified live (HTTP 200, official NIST OSCAL page) for AGEINT curriculum use.

National Institute of Standards and Technology. Nist privacy framework, 2026k. URL https://www.nist.gov/privacy-framework. Official privacy risk-management framework for identifying and managing privacy risk, data governance, workforce roles, and enterprise controls. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: privacy_ip_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Institute of Standards and Technology (NIST). Fips 197: Advanced encryption standard (aes), 2001. URL https://csrc.nist.gov/pubs/fips/197/final. The U.S. federal standard specifying the AES block cipher, the canonical symmetric algorithm providing data confidentiality. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: technical_standard. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Anchors the symmetric-encryption / confidentiality element of the SIGINT chapter's crypto-assurance discussion. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

National Institute of Standards and Technology (NIST). Fips 180-4: Secure hash standard (shs), 2015. URL https://csrc.nist.gov/pubs/fips/180-4/upd1/final. The U.S. federal standard specifying the SHA family of cryptographic hash functions used to produce fixed-length digests for data-integrity

verification. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: technical_standard. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Anchors the integrity / hashing layer of the SIGINT chapter's crypto-assurance discussion. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

National Institute of Standards and Technology (NIST). Fips 186-5: Digital signature standard (dss), 2023. URL https://csrc.nist.gov/pubs/fips/186-5/final. The U.S. federal standard specifying approved digital-signature algorithms (e.g., ECDSA, EdDSA, RSA) used to authenticate signatories and detect unauthorized data modification. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: technical_standard. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Anchors the digital-signature / authentication / provenance element of the crypto-assurance figure. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

National Reconnaissance Office. Declassified nro programs and projects, 2026a. URL https://www.nro.gov/foia-home/foia-declassified-nro-programs-and-projects/. Official declassified satellite-reconnaissance program archive for CORONA, GAMBIT, POPPY, QUILL, and other historical technical-intelligence cases. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: historical_declassified_sources. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Reconnaissance Office. About nro history, 2026b. URL https://www.nro.gov/About-NRO/history/. NRO public history page describing the Center for the Study of National Reconnaissance and declassified history resources. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: declassified_reconnaissance_history. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: NRO history page content, URL, or declassification-resource structure materially changes. Verification method: browser_fetch_official_html_review. Claim scope: declassified reconnaissance history support for historical and GEOINT source-provenance lessons. Stakeholder role: historian, GEOINT analyst, instructor. Assurance use: anchors national reconnaissance history to official declassified-history resources. Rights dimension: public history page used for education and source-provenance review. Direct URL verified on 2026-06-14 through web search/open; official NRO page content matched the history and Center for the Study of National Reconnaissance description.

National Research Council. Intelligence analysis for tomorrow: Advances from the behavioral and social sciences, 2011. URL https://nap.nationalacademies.org/catalog/13040/intelligence-analysis-for-tomorrow-advances-from-the-behavioral-and-social-sciences. National Academies report connecting behavioral and social science to intelligence-analysis training, judgment, and organizational improvement. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_cognition_and_bias. Source tier: scholarly_public_report. Refresh cadence: annual. Refresh trigger: National Academies record, DOI metadata, edition, or access status changes. Verification method: publisher_record_and_crossref_doi_review. Claim scope: Supports bounded claims about using behavioral and social science to improve analysis, training, and evaluation without claiming technique-level guarantees. Stakeholder role: curriculum designer; cognition reviewer; evaluation lead. Assurance use: Links analytic-cognition lessons to a public expert-report baseline and keeps SAT claims evidence-sensitive. Rights dimension: National Academies publication metadata and public report access; cite and summarize sparingly. National Academies publisher record verified live 2026-06-15; Crossref DOI metadata for 10.17226/13040 verified title, publisher, and year.

National Security Agency. About nsa mission, 2026a. URL https://www.nsa.gov/about/. NSA public mission page for SIGINT and cybersecurity mission context. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: ic_public_transparency. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: NSA public mission page content or URL materially changes. Verification method: browser_fetch_official_html_review. Claim scope: public mission context for SIGINT/cybersecurity orientation. Stakeholder role: learner, instructor, reviewer. Assurance use: anchors public NSA mission descriptions to the official page. Rights dimension: public education page used for orientation and governance framing. Direct URL verified on 2026-06-14 through browser fetch because nsa.gov returned 403 to plain curl; fetched HTML title and content matched the NSA mission page.

National Security Agency. Nsa joins the asd's acsc and others to release guidance on agentic artificial intelligence systems, 2026b. URL https://www.nsa.gov/Press-Room/Press-Releases-Statements/Press-Release-View/Article/4475134/nsa-joins-the-asds-acsc-and-others-to-release-guidance-on-agentic-artificial-in/. NSA public release announcing joint guidance on careful adoption of agentic AI services. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: agentic_ai_security_governance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: NSA press release, linked guidance, or public agentic AI adoption posture materially changes. Verification method: browser_fetch_official_html_review. Claim scope: agentic AI adoption and security-governance context, not an AGEINT benchmark. Stakeholder role: AI security reviewer, system owner, instructor. Assurance use: supports agentic AI safety-boundary and adoption-gate language. Rights dimension: public cybersecurity release used for defensive AI-governance education. Direct URL verified on 2026-06-14 through browser fetch because nsa.gov returned 403 to plain curl; fetched HTML title and content matched the agentic AI services release.

National Security Agency. Nsa cybersecurity advisories and guidance, 2026c. URL https://www.nsa.gov/press-room/cybersecurity-advisories-guidance/. NSA public index for cybersecurity advisories, information sheets, technical reports, and operational risk notices. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: cyber_defense_guidance_index. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: NSA guidance index structure, source URL, or public guidance inventory materially changes. Verification method: browser_fetch_official_html_review. Claim scope: defensive cyber guidance index support for source routing and refresh duties. Stakeholder role: cyber analyst, instructor, reviewer. Assurance use: supports defensive CTI source routing without citing exploit instructions. Rights dimension: public guidance index used for defensive education and source-refresh planning. Direct URL verified on 2026-06-14 through browser fetch because nsa.gov returned 403 to plain curl; fetched HTML title and content matched the advisories and guidance page.

National Security Agency. Foreign intelligence surveillance act, 2026d. URL https://www.nsa.gov/Signals-Intelligence/FISA/. Official NSA public explanation of FISA oversight for signals intelligence collection governed by statutory and court-authorized controls. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: legal_oversight. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Security Agency. Nsa historical releases, 2026e. URL https://www.nsa.gov/helpful-links/nsa-foia/declassification-transparency-initiatives/historical-releases/. Official declassified historical-release library for cryptologic history, SIGINT history, COMSEC, oral histories, and historical cases. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: historical_declassified_sources. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

National Security Agency. Security design considerations for ai-driven automation leveraging mcp, 2026f. URL https://www.nsa.gov/Press-Room/Press-Releases-Statements/Press-Release-View/Article/4496698/nsa-releases-security-design-considerations-for-ai-driven-automation-leveraging/. Official NSA Model Context Protocol design guidance. Official indexed PDF metadata identifies May 2026, version 1.0; the earlier 2025 year was incorrect. Primary full-text access was unavailable during this review, so detailed recommendations and efficacy remain

unverified. Checked as of 2026-05-21. Citation role: source_quality_anchor. Source lane: source_quality_spine. Source tier: source_quality_anchor. Refresh cadence: semiannual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: official_search_index_with_primary_access_limit. Claim scope: Official organizational MCP design-guidance identity; not measured effectiveness, general LLM security, or the separately authored MCP scanner experiment. Stakeholder role: curriculum maintainer, instructor, reviewer, and learner. Assurance use: source-quality triangulation and claim-boundary review. Rights dimension: source transparency, accountability, and evidence traceability. Official NSA search-index PDF result inspected on 2026-11-06 identifies U/OO/6030316-26, PP-26-1834, May 2026 Ver. 1.0. Direct primary retrieval returned HTTP 403. Retained the prior checked_as_of date rather than claiming a fresh full-text verification.

National Security Agency. Model context protocol (mcp): Security design considerations for organizations, 2026g. URL https://www.nsa.gov/Portals/75/documents/Cybersecurity/CSI_MCP_SECURITY.pdf. NSA cybersecurity information sheet on MCP security design considerations for organizations adopting MCP-based AI toolchains. Checked as of 2026-09-07. Citation role: curriculum_anchor. Source lane: secure_release_change_control. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: NSA MCP security guidance, MCP protocol security profile, implementation vulnerability guidance, or secure-adoption recommendations change. Verification method: direct_official_pdf_review. Claim scope: Official cybersecurity information sheet on Model Context Protocol security design considerations, deliberate controls beyond protocol suggestions, and secure adoption safeguards for MCP implementations. Stakeholder role: security architect, release reviewer, agent-platform engineer, procurement assessor, instructor, and learner. Assurance use: MCP security design review, implementation threat model, privilege boundary checklist, reverse-proxy and sandboxing control discussion, and secure-release gate evidence. Rights dimension: security, credential protection, least privilege, supply-chain integrity, sandboxing, auditability, and harm prevention. Direct NSA PDF URL verified live 2026-06-11; guidance frames MCP security adoption controls and recommendations for organizations.

National Security Agency. Tempest: A signal problem (nsa declassified), n.d. URL https://www.nsa.gov/portals/75/documents/news-features/declassified-documents/cryptologic-spectrum/tempest.pdf. Verified official primary source for sigint_emanations_intelligence; routed to SIGINT fundamentals; emanations intelligence; EMSEC/TEMPEST history. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: sigint_emanations_intelligence. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for sigint_emanations_intelligence materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of sigint_emanations_intelligence and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that sigint_emanations_intelligence claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nsa_tempest_signal_problem retained.

National Security Agency, Center for Cryptologic History. Nsa center for cryptologic history: Historical publications, Various years. URL https://www.nsa.gov/History/Cryptologic-History/Historical-Publications/. Verified official primary source for sigint_history; routed to SIGINT history; NSA organizational development; cryptologic heritage; ELINT/TELINT history. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: sigint_history. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for sigint_history materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of sigint_history and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that sigint_history claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nsa_center_cryptologic_history_publications retained.

National Security Agency, Cybersecurity and Infrastructure Security Agency, and Federal Bureau of Investigation. Contextualizing deepfake threats to organizations, 2023. URL https://media.defense.gov/2023/Sep/12/2003298925/-1/-1/0/CSI_DEEPFAKE_THREATS.PDF. Joint Cybersecurity Information Sheet on contextualizing deepfake threats, routed as official defensive guidance for provenance and synthetic-media risk review. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: synthetic_media_provenance. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: NSA/CISA/FBI deepfake guidance, PDF URL, or official synthetic-media threat framing materially changes. Verification method: direct_official_pdf_review. Claim scope: Supports defensive awareness and contextualization of deepfake threats; excludes impersonation guidance, targeting, evasion, and manipulation playbooks. Stakeholder role: cyber defender, cognitive-security reviewer, instructor, communications reviewer. Assurance use: deepfake-threat defensive control review, provenance triage, and public-sector awareness caveats. Rights dimension: identity protection, trust, privacy, safety, and defensive awareness. Direct defense.gov PDF source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

NATO Allied Command Transformation. Alternative analysis handbook, 2017. URL https://www.act.nato.int/wp-content/uploads/2023/05/alta-handbook.pdf. Official NATO handbook presenting alternative-analysis techniques and facilitation practices for analytic teams. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: analytic_tradecraft_evidence. Source tier: official_alliance_guidance. Refresh cadence: annual. Refresh trigger: Refresh if NATO publishes a newer alternative-analysis handbook or relocates the PDF. Verification method: direct_pdf_download. Claim scope: Supports claims about alternative-analysis practice menus and facilitation, with empirical limits stated separately. Stakeholder role: analytic tradecraft instructor; team facilitator; curriculum designer. Assurance use: Provides official practice examples for alternative-analysis workflows. Rights dimension: official alliance publication; cite handbook and avoid long excerpts. NATO ACT PDF verified live 2026-06-11; use as doctrine/practice guidance, not empirical proof of SAT effectiveness.

NATO Cooperative Cyber Defence Centre of Excellence. New ccdcoe research reconceptualises cognitive warfare, 2026. URL https://ccdcoe.org/news/2026/new-ccdcoe-research-reconceptualises-cognitive-warfare/. CCDCOE research summary and linked Ontological Foundations of Cognitive Warfare publication describe epistemic, value, identity, trust, and future-orientation structures. The publication disclaims necessarily representing CCDCOE or NATO policy; conceptual framing does not establish attribution or intervention efficacy. Checked as of 2026-11-06. Citation role: curriculum_anchor. Source lane: human_rights_governance. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: CCDCOE cognitive warfare research, systemic-invariants model, cognitive-decoherence framing, or NATO CoE cognitive-security publication changes. Verification method: direct_official_page_and_linked_publication_review. Claim scope: A conceptual account of systemic invariants and cognitive decoherence in sociotechnical systems; not NATO doctrine, a validated biological/psychological/social taxonomy, or evidence of a one-to-one human/agent failure mechanism. Retrieved the CCDCOE news and publication pages and inspected the linked PDF abstract, conceptual framework, and policy disclaimer on 2026-11-06; narrowed the claim boundary to the conceptual account actually offered.

NATO Strategic Communications Centre of Excellence. Nato stratcom coe strategic communications hybrid threats toolkit (2021), 2021. URL https://stratcomcoe.org/publications/download/Strategic-Communications-Hybrid-Threats-Toolkit.pdf. Verified official primary source for hybrid_warfare_stratcom; routed to Gray Zone / Hybrid Warfare / Non-State Actor Intelligence / Irregular Warfare; Active Measures and Disinformation. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: hybrid_warfare_stratcom. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for hybrid_warfare_stratcom materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of hybrid_warfare_stratcom and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target

procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that hybrid_warfare_stratcom claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nato_stratcom_hybrid_threats_toolkit retained.

David A. Neequaye and Par Anders Granhag. Using shared experiences to recruit committed human intelligence, 2024. URL https://bpspsychub.onlinelibrary.wiley.com/doi/10.1111/lcrp.12251. A Stage 2 registered report in Legal and Criminological Psychology 29(1), 48-64 (February 2024), DOI 10.1111/lcrp.12251. The final analyzed sample was 182 after attention-check exclusions. Neither preregistered commitment hypothesis was supported: greater felt closeness and perceived social connection did not establish greater commitment under the study's monetary-investment proxy.

North American Electric Reliability Corporation. Nerc cip reliability standards (cip-002 through cip-015), NERC. URL https://www.nerc.com/pa/Stand/Pages/CIPStandards.aspx. Verified official primary source for ics_ot_security_standards; routed to ICS/OT Security; Critical Infrastructure Protection; Threat Intelligence Sharing for Critical Infrastructure. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: ics_ot_security_standards. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for ics_ot_security_standards materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of ics_ot_security_standards and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that ics_ot_security_standards claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nerc_cip_standards retained.

North Atlantic Treaty Organization. Countering information threats, 2026a. URL https://www.nato.int/cps/en/natohq/topics_219728.htm. Official NATO counter-information-threat guidance. Checked as of 2026-05-21. Citation role: source_quality_anchor. Source lane: source_quality_spine. Source tier: source_quality_anchor. Refresh cadence: semiannual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: baseline source-quality guardrail for generated AGEINT curriculum claims. Stakeholder role: curriculum maintainer, instructor, reviewer, and learner. Assurance use: source-quality triangulation and claim-boundary review. Rights dimension: source transparency, accountability, and evidence traceability. Directly verified official NATO source URL.

North Atlantic Treaty Organization. Countering hybrid threats, 2026b. URL https://www.nato.int/en/what-we-do/deterrence-and-defence/countering-hybrid-threats. Official NATO source for hybrid-threat resilience across cyber, information, economic, political, and military pressure. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

NSA & CISA. Control system defense: Know the opponent, 2022. URL https://media.defense.gov/2022/Sep/22/2003083007/-1/-1/0/CSA_ICS_Know_the_Opponent_.PDF. Verified official primary source for ics_ot_security_standards; routed to ICS/OT Security; Advanced Persistent Threats; MITRE ATT&CK for ICS. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: ics_ot_security_standards. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for ics_ot_security_standards materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of ics_ot_security_standards and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that ics_ot_security_standards claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_cisa_nsa_ics_know_opponent_2022 retained.

NSA, CISA, ASD ACSC, and partners. Principles for the secure integration of artificial intelligence in operational technology, 2025. URL https://www.nsa.gov/Press-Room/Press-Releases-Statements/Press-Release-View/Article/4347041/nsa-cisa-and-others-release-guidance-on-integrating-ai-in-operational-technology/. Joint government guidance for AI governance, assurance, safety, and security in OT environments. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ics_ot_defense. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

NSA, CISA, FBI, et al. Prc state-sponsored cyber actor living off the land to evade detection (aa23-144a), 2023. URL https://www.cisa.gov/news-events/cybersecurity-advisories/aa23-144a. Verified official primary source for apt_threat_intelligence; routed to Advanced Persistent Threats; Cyber Intelligence Fundamentals; ICS/OT Security. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: apt_threat_intelligence. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for apt_threat_intelligence materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of apt_threat_intelligence and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that apt_threat_intelligence claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_cisa_aa23_144a_volt_typhoon_lotl retained.

J. Nunan, I. Stanier, R. Milne, A. Shawyer, and D. Walsh. Eliciting human intelligence: police source handlers' perceptions and experiences of rapport during covert human intelligence sources (chis) interactions, 2020. URL https://www.tandfonline.com/doi/full/10.1080/13218719.2020.1734978. A peer-reviewed study of UK police source handlers' lived perceptions of rapport during interactions with covert human intelligence sources, grounding how rapport functions in real source-handler tradecraft and the governance of HUMINT/CHIS relationships. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: counterintelligence_source_integrity. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Backs the AGEINT treatment of source-handler rapport and CHIS governance in operational HUMINT. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

OASIS Cyber Threat Intelligence Technical Committee. Taxii version 2.1, 2021. URL https://docs.oasis-open.org/cti/taxii/v2.1/taxii-v2.1.html. OASIS CTI exchange standard specifying request-response Collections, discovery, API roots, and API contracts. Section describes the publish-subscribe Channel concept but explicitly excludes Channel services from this version; section 6 is RESERVED. Checked as of 2026-11-06. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: TAXII 2.1 RESTful HTTPS API requirements for defensive CTI exchange through Collections, discovery and API roots; Channel keywords are reserved,

but Channel services are not specified. Official OASIS HTML specification retrieved and inspected directly on 2026-11-06. Section 1.6 states that Channel keywords are reserved but Channel services are not specified; section 6, TAXII API - Channels, is RESERVED. The conceptual Channel description in section 1.6.5 is not a specified Channel API.

OASIS Cyber Threat Intelligence Technical Committee. Stix version 2.1, 2025. URL https://docs.oasis-open.org/cti/stix/v2.1/stix-v2.1.html. OASIS CTI standard for expressing cyber threat and observable information with structured objects, relationships, sightings, and markings. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

OASIS Open. Common security advisory framework version 2.0, 2022. URL https://docs.oasis-open.org/csaf/csaf/v2.0/os/csaf-v2.0-os.html. OASIS Common Security Advisory Framework Version 2.0 standard for machine-readable vulnerability and remediation advisories, used to ground audit-ready incident and procurement evidence. Checked as of 2026-06-12. Citation role: curriculum_anchor. Source lane: records_retention_auditability. Source tier: technical_standard. Refresh cadence: annual. Refresh trigger: CSAF version, errata, vulnerability-advisory schema, product-status vocabulary, remediation field, or OASIS standard status changes. Verification method: direct_standards_page_review. Claim scope: machine-readable security advisories, vulnerability disclosure structure, product status, remediation metadata, and advisory exchange governance. Stakeholder role: PSIRT lead, vulnerability coordinator, procurement reviewer, instructor, and learner. Assurance use: security-advisory evidence package, vulnerability-status table, remediation-record review, and supplier disclosure audit. Rights dimension: security transparency, accountable disclosure, remediation traceability, procurement accountability, and harm reduction. Direct canonical OASIS OS HTML source URL verified live (HTTP 200, CSAF Version 2.0 OASIS Standard page on-topic) for AGEINT curriculum use.

OECD. Recommendation of the council on public procurement, 2015. URL https://legalinstruments.oecd.org/api/print?ids=320&lang=en. OECD public procurement legal instrument for transparency, integrity, access, risk management, accountability, evaluation, and supplier participation. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: procurement_vendor_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: OECD legal instrument revision, public procurement toolkit update, or procurement policy change. Verification method: direct_official_pdf_review. Claim scope: public procurement oversight, vendor-risk review, transparency, evaluation, and accountability. Stakeholder role: public buyer, vendor, contract manager, auditor, and affected public. Assurance use: vendor oversight gate, procurement evidence register, and contract-review checklist. Rights dimension: public accountability, fairness, transparency, and anti-corruption safeguards. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

OECD. Recommendation of the council on open government, 2017. URL https://legalinstruments.oecd.org/api/print?ids=359&lang=en. OECD open government legal instrument for transparency, integrity, accountability, stakeholder participation, civic space, and public-sector disclosure. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: public_sector_transparency. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: OECD open government legal instrument, public governance guidance, or civic-space update changes. Verification method: direct_official_pdf_review. Claim scope: public-sector transparency, accountable disclosure, stakeholder participation, and open-government review. Stakeholder role: public official, civic reviewer, instructor, affected community, and learner. Assurance use: public transparency statement and stakeholder-review evidence. Rights dimension: access to information, participation, accountability, and democratic governance. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

OECD. Oecd ai principles, 2024. URL https://oecd.ai/en/ai-principles. Official OECD principles for human-centered values, robustness, transparency, accountability, and inclusive AI growth. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ai_ethics_data_governance. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

OECD. The agentic ai landscape and its conceptual foundations, 2026a. URL https://www.oecd.org/en/publications/the-agentic-ai-landscape-and-its-conceptual-foundations_396cf758-en.html. Official OECD conceptual foundation for agentic AI. Checked as of 2026-05-21. Citation role: source_quality_anchor. Source lane: source_quality_spine. Source tier: source_quality_anchor. Refresh cadence: semiannual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: baseline source-quality guardrail for generated AGEINT curriculum claims. Stakeholder role: curriculum maintainer, instructor, reviewer, and learner. Assurance use: source-quality triangulation and claim-boundary review. Rights dimension: source transparency, accountability, and evidence traceability. Directly verified official OECD source URL.

OECD. Artificial intelligence in education, 2026b. URL https://www.oecd.org/en/topics/sub-issues/artificial-intelligence-in-education.html. Official OECD topic page for AI in education, learning systems, assessment, teacher support, and education policy. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: education_assessment. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: OECD topic update, education report, indicator, or policy brief changes. Verification method: direct_official_page_review. Claim scope: education policy, assessment modernization, teacher support, and learner equity. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

OECD. Disinformation and misinformation, 2026c. URL https://www.oecd.org/en/topics/disinformation-and-misinformation.html. Official OECD policy source for information integrity, governance responses, public trust, and democratic resilience. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

OECD.AI Policy Observatory. Ai and work, 2026a. URL https://oecd.ai/en/dashboards/policy-areas/PA8. Official OECD.AI source for AI, work, labour-market transitions, skills, productivity, workplace governance, and policy responses. Checked as of 2026-06-06. Citation role: curriculum_anchor. Source lane: workforce_governance. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: OECD AI work theme, labour indicator, report, or policy-dashboard update. Verification method: direct_official_page_review. Claim scope: workforce transition, skills, productivity, workplace governance, and responsible adoption. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use; URL refreshed 2026-06-06 after liveness check.

OECD.AI Policy Observatory. Ai in the public sector, 2026b. URL https://oecd.ai/en/dashboards/policy-areas/PA12. Official OECD.AI source for public-sector AI adoption, governance, public value, accountability, and government service transformation. Checked as of 2026-06-06. Citation role: curriculum_anchor. Source lane: public_sector_agentic_ai. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: OECD public-sector theme, country practice, policy guidance, or measurement update. Verification method: direct_official_page_review. Claim scope: public-sector AI adoption, accountability, service design, and institutional capacity. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use; URL refreshed 2026-06-06 after liveness check.

Office of Foreign Assets Control. A framework for ofac compliance commitments, 2019. URL https://ofac.treasury.gov/media/16331/download?inline. Official OFAC compliance framework for management commitment, risk assessment, internal controls, testing, auditing, and training. Checked as

of 2026-05-21. Citation role: curriculum_anchor. Source lane: financial_economic_security. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Office of Foreign Assets Control. Sanctions programs and country information, 2026. URL https://ofac.treasury.gov/sanctions-programs-and-country-information. Official OFAC sanctions-program library for understanding legal program structure, list maintenance, and compliance-oriented economic statecraft. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: financial_economic_security. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Office of the Director of National Intelligence. Icd 302: Document and media exploitation, 2007. URL https://www.dni.gov/files/documents/ICD/ICD-302.pdf. Verified official primary source for humint_doctrine; routed to HUMINT collection; document and media analyzeation; all-source integration. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: humint_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for humint_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of humint_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that humint_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_odni_icd_302_domex retained.

Office of the Director of National Intelligence. Intelligence community directive 207: National intelligence council, 2008. URL https://www.dni.gov/files/documents/ICD/ICD-207.pdf. ODNI directive describing the National Intelligence Council and national intelligence production responsibilities. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: national_intelligence_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: IC governance and national-intelligence production context. Stakeholder role: analyst, instructor, governance reviewer. Assurance use: anchors national intelligence council references to public ODNI policy text. Rights dimension: public directive used for governance education and source routing. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 207.

Office of the Director of National Intelligence. Icd 304: Human intelligence, 2008. URL https://www.odni.gov/files/documents/ICD/ICD-304.pdf. Verified official primary source for humint_doctrine; routed to HUMINT governance; IC collection management; CI integration. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: humint_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for humint_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of humint_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that humint_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_odni_icd_304_humint retained.

Office of the Director of National Intelligence. Intelligence community directive 209: Tearline production and dissemination, 2012. URL https://www.dni.gov/files/documents/ICD/ICD-209-Tearline-Production-and-Dissemination.pdf. ODNI directive for tearlines and broader dissemination while protecting sources and methods. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: tearlines_and_release_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: tearline and release-governance support for public-facing evidence boundaries. Stakeholder role: analyst, disclosure reviewer, instructor. Assurance use: anchors safe discussion of sanitized outputs without teaching live release decisions. Rights dimension: public directive used for governance education, not disclosure authorization. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 209.

Office of the Director of National Intelligence. Intelligence community directive 205: Analytic outreach, 2013a. URL https://www.dni.gov/files/documents/ICD/ICD-205-Analytic-Outreach.pdf. ODNI directive for analytic outreach, outside expertise, risk management, and citation of outreach insights. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_outreach_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: analytic-outreach governance support for expert engagement and risk controls. Stakeholder role: analyst, outreach lead, reviewer. Assurance use: supports source-pack routing for external expertise while preserving CI, privacy, and citation boundaries. Rights dimension: public directive used for governance education, not outreach tasking. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF title and text matched ICD 205 Analytic Outreach.

Office of the Director of National Intelligence. Intelligence community directive 403: Foreign disclosure and release of classified national intelligence, 2013b. URL https://www.dni.gov/files/documents/ICD/ICD-403.pdf. ODNI directive for foreign disclosure and release governance, marking, records, and release authority. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: foreign_disclosure_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: foreign-disclosure governance support for release-boundary and control-marking lessons. Stakeholder role: disclosure reviewer, analyst, instructor. Assurance use: supports evidence-bounded disclosure-boundary teaching and release-control caveats. Rights dimension: public directive used for governance education, not disclosure authorization. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 403.

Office of the Director of National Intelligence. Intelligence community directive 710: Classification and control markings system, 2013c. URL https://www.dni.gov/files/documents/ICD/ICD-710.pdf. ODNI directive for classification and control markings, including release and foreign-disclosure marking relationships. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: classification_marking_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: classification-marking context for caveat and dissemination-boundary lessons. Stakeholder role: marking reviewer, analyst, instructor. Assurance use: anchors marking references to public ODNI policy without handling classified material. Rights dimension: public directive used for governance education, not classification authority. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 710.

Office of the Director of National Intelligence. Intelligence community directive 731: Supply chain risk management, 2013d. URL https://www.dni.gov/files/documents/ICD/ICD-731-Supply-Chain-Risk-Management.pdf. ODNI directive for IC supply-chain risk management across mission-critical products, materials, and services. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: supply_chain_risk_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: supply-chain risk governance support for defensive procurement and assurance lessons.

Stakeholder role: procurement reviewer, security analyst, instructor. Assurance use: supports supplier-risk and source-integrity language without evasion or exploitation guidance. Rights dimension: public directive used for governance education and defensive assurance. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 731.

Office of the Director of National Intelligence. Intelligence community directive 750: Counterintelligence programs, 2013e. URL https://www.dni.gov/files/documents/ICD/ICD-750.pdf. ODNI directive establishing a baseline for counterintelligence programs across the IC. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: counterintelligence_program_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: counterintelligence program governance support for source-integrity and defensive awareness. Stakeholder role: CI reviewer, analyst, instructor. Assurance use: supports defensive CI/source-integrity language without surveillance or handling playbooks. Rights dimension: public directive used for governance education and defensive source-integrity framing. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 750.

Office of the Director of National Intelligence. Intelligence community directive 900: Integrated mission management, 2013f. URL https://www.dni.gov/files/documents/ICD/ICD-900-Integrated-Mission-Managemement.pdf. ODNI directive for integrated mission management and IC mission alignment. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: integrated_mission_management. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: mission-management governance support for requirements-to-evidence substrate design. Stakeholder role: mission manager, analyst, governance reviewer. Assurance use: anchors mission-alignment language in public ODNI policy. Rights dimension: public directive used for governance education and source routing. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 900.

Office of the Director of National Intelligence. Intelligence community directive 203: Analytic standards, 2015. URL https://www.intel.gov/assets/documents/Intelligence%20Community%20Directives/ICD_203.pdf. Official ODNI analytic tradecraft standards directive. Checked as of 2026-05-21. Citation role: source_quality_anchor. Source lane: source_quality_spine. Source tier: source_quality_anchor. Refresh cadence: semiannual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: baseline source-quality guardrail for generated AGEINT curriculum claims. Stakeholder role: curriculum maintainer, instructor, reviewer, and learner. Assurance use: source-quality triangulation and claim-boundary review. Rights dimension: source transparency, accountability, and evidence traceability. Directly verified official ODNI source URL.

Office of the Director of National Intelligence. Icd 310: Coordination of clandestine human source collection outside the us, 2016. URL https://www.dni.gov/files/documents/ICD/ICD-310-Coord-of-Clandestine-Human-and-Human-enabled-FI-and-CI-outside-the-US-2016-06-27.pdf. Verified official primary source for humint_doctrine; routed to HUMINT deconfliction; CI integration; overseas collection coordination. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: humint_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for humint_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of humint_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that humint_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_odni_icd_310_clandestine_humint_outside_us retained.

Office of the Director of National Intelligence. Intelligence community directive 121: Managing the intelligence community information environment, 2017a. URL https://www.dni.gov/files/documents/ICD/ICD-121-Managing-the-IC-Information-Environment-2017-01-19.pdf. ODNI directive for the IC information environment, discovery, retrieval, sharing, and safeguarding. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: ic_information_environment_risk. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: information environment support for modular discovery, retrieval, and safeguarding claims. Stakeholder role: system owner, analyst, reviewer. Assurance use: anchors substrate modularity in information-sharing and safeguarding governance. Rights dimension: public directive used for governance education, not classified system operation. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 121.

Office of the Director of National Intelligence. Intelligence community directive 208: Maximizing the utility of analytic products, 2017b. URL https://www.dni.gov/files/documents/ICD/ICD-208-Maximizing-the-Utility-of-Analytic-Products-2017-01-09.pdf. ODNI directive for customer utility, analytic standards, tearlines, discoverability, and transparent products. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: analytic_product_dissemination. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: analytic-product utility, discoverability, and dissemination-governance support. Stakeholder role: analyst, editor, dissemination reviewer. Assurance use: supports generated prose about product utility, reusable evidence packets, and customer-aware outputs. Rights dimension: public directive used for governance education, not release authorization. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 208.

Office of the Director of National Intelligence. Intelligence community directive 211: Ic support to the cfius threat analysis process, 2022. URL https://www.dni.gov/files/documents/ICD/ICD-211-CFIUS-09-04-22-REDACTED.pdf. ODNI directive for intelligence support to CFIUS threat analysis, economic-security review, and covered transactions. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: economic_security_review. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: economic-security and due-diligence governance support for threat-analysis framing. Stakeholder role: economic-security analyst, reviewer, instructor. Assurance use: supports safe CFIUS-context teaching without transaction targeting or proprietary data use. Rights dimension: public directive used for governance education and due-diligence framing. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 211.

Office of the Director of National Intelligence. Odni commercially available information fact sheet (may 2024), 2024. URL https://www.dni.gov/files/ODNI/documents/CAI/Commercially-Available-Information-Fact-Sheet-May2024.pdf. Verified official primary source for osint_doctrine; routed to OSINT/PAI governance; CAI policy framework; privacy in collection. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: osint_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for osint_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of osint_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that osint_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_odni_cai_fact_sheet_2024 retained.

Office of the Director of National Intelligence. Intelligence community directive 405: Intelligence diplomacy, 2024a. URL https://www.dni.gov/files/documents/ICD/ICD-405-Intelligence-Diplomacy.pdf. ODNI directive for intelligence diplomacy, synchronization, and foreign-policy support boundaries. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: intelligence_diplomacy_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: governance context for intelligence diplomacy and partner-engagement boundaries. Stakeholder role: policy reviewer, analyst, instructor. Assurance use: keeps diplomacy references policy-bound and evidence-bounded. Rights dimension: public directive used for governance education, not diplomatic action guidance. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 405.

Office of the Director of National Intelligence. Intelligence community directive 406: Ic engagement with non-state entities, 2024b. URL https://www.dni.gov/files/documents/ICD/ICD-406-IC-Engagement-with-Non-State-Entities.pdf. ODNI directive for non-state entity engagement, analytic outreach, privacy/civil-liberties, and no-tasking boundaries. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: non_state_engagement_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: non-state engagement governance support for source, outreach, and no-tasking boundaries. Stakeholder role: outreach lead, analyst, reviewer. Assurance use: anchors public-source and expert-engagement rules without authorizing collection tasking. Rights dimension: public directive used for governance education and civil-liberties framing. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 406.

Office of the Director of National Intelligence. Intelligence community directive 503: Intelligence community information environment risk management, 2024c. URL https://www.dni.gov/files/documents/ICD/ICD-503.pdf. ODNI directive for risk management in the IC information environment. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: ic_information_environment_risk. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: ODNI directive version, source URL, or policy text materially changes. Verification method: browser_fetch_official_pdf_review. Claim scope: information-environment risk governance support for secure, auditable intelligence systems. Stakeholder role: security reviewer, system owner, instructor. Assurance use: supports modular substrate controls around access, risk, and auditability. Rights dimension: public directive used for governance education, not classified-system design. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF content matched ICD 503.

Office of the Director of National Intelligence. Intelligence community directive 504: Intelligence community data management, 2025a. URL https://www.dni.gov/files/documents/ICD/ICD-504.pdf. Official IC data-management directive for data governance, data stewardship, CDO authority, interoperability, and data lifecycle management. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ai_ethics_data_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Office of the Director of National Intelligence. Intelligence community directive 505: Artificial intelligence, 2025b. URL https://www.dni.gov/files/documents/ICD/ICD-505-Artificial-Intelligence.pdf. Official IC AI governance directive covering CAIO roles, oversight, interoperability, civil-liberties review, training data, and impact assessment. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ai_ethics_data_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Office of the Director of National Intelligence. Annual threat assessment of the u.s. intelligence community 2026, 2026a. URL https://www.dni.gov/files/ODNI/documents/assessments/ATA-2026-Unclassified-Report.pdf. ODNI unclassified annual threat assessment used as current public threat-context baseline, not as operational guidance. Checked as of 2026-06-14. Citation role: curriculum_anchor. Source lane: current_threat_baseline. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: new Annual Threat Assessment, source URL change, or report correction is released. Verification method: browser_fetch_official_pdf_review. Claim scope: public threat-context grounding and warning-topic baseline, not operational targeting or AGEINT benchmark evidence. Stakeholder role: analyst, instructor, policy reviewer. Assurance use: anchors public threat-context examples to an official unclassified IC baseline. Rights dimension: public unclassified report used for education and contextual analysis. Direct URL verified on 2026-06-14 through browser fetch because dni.gov returned 403 to plain curl; fetched PDF title and content matched the Annual Threat Assessment.

Office of the Director of National Intelligence. Authorized classification and control markings register, 2026b. URL https://www.dni.gov/files/documents/FOIA/Authorized%20Classification%20and%20Control%20Markings%20Register%20V1.2.pdf. Official CAPCO register for classification and control-marking vocabulary, abbreviations, portion markings, and dissemination syntax. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: governed_intelligence_cycle. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Office of the Director of National Intelligence. Intelligence community directive 204: National intelligence priorities framework, 2026c. URL https://www.dni.gov/files/documents/ICD/ICD_204_National_Intelligence_Priorities_Framework_U_FINAL-SIGNED.pdf. Official prioritization directive for translating national intelligence priorities into collection, analysis, risk management, and responsiveness evaluation. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: collection_management. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Office of the Director of National Intelligence. Intelligence community directive 206: Sourcing requirements for disseminated analytic products, 2026d. URL https://www.dni.gov/files/documents/ICD/ICD-206.pdf. Official sourcing directive for traceability, citations, source descriptors, and source summaries. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: analytic_tradecraft. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Office of the Director of National Intelligence. Objectivity and ic analytic standards, 2026e. URL https://www.intel.gov/mission/our-values/objectivity. Official ODNI explanation of analytic objectivity, ombuds, and tradecraft standards. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: analytic_tradecraft. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Office of the Director of National Intelligence. Icd 206: Sourcing requirements for disseminated analytic products (with ics 206-01 on pai/cai/osint), Current. URL https://www.dni.gov/index.php/what-we-do/ic-related-menus/ic-related-links/intelligence-community-directives. Verified official primary source for osint_doctrine; routed to OSINT sourcing standards; analytic product integrity; IC information sourcing discipline. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor.

Source lane: osint_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for osint_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of osint_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that osint_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_odni_icd_206_sourcing_osint_pai retained.

Office of the Director of National Intelligence and Central Intelligence Agency. The int of first resort: The ic osint strategy 2024-2026, 2024. URL https://www.dni.gov/files/ODNI/documents/IC_OSINT_Strategy.pdf. Official IC OSINT strategy for professionalizing OSINT, integrated collection management, open-source sharing, innovation, and tradecraft. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: osint_geoint. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Office of the Director of National Intelligence, Senior Advisory Group Panel. Odni declassified report on commercially available information (2022), 2022. URL https://www.dni.gov/files/ODNI/documents/assessments/ODNI-Declassified-Report-on-CAI-January2022.pdf. Verified official primary source for osint_doctrine; routed to OSINT/PAI doctrine; commercially available information; privacy and civil liberties in collection. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: osint_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for osint_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of osint_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that osint_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_odni_cai_report_2022 retained.

Office of the United Nations High Commissioner for Human Rights. Digital space and human rights, 2026a. URL https://www.ohchr.org/en/digital-space-and-human-rights. Official OHCHR portal for human rights in digital space, including technology, privacy, civic space, equality, and remedy concerns. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: human_rights_governance. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: OHCHR thematic report, mandate, or digital-rights guidance updates. Verification method: direct_official_page_review. Claim scope: rights impact mapping, privacy, expression, civic space, remedy, and digital governance. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Office of the United Nations High Commissioner for Human Rights. The right to privacy in the digital age, 2026b. URL https://www.ohchr.org/en/privacy-in-the-digital-age. Official OHCHR privacy-in-the-digital-age page for surveillance, data protection, AI, remedy, and human-rights safeguards. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: human_rights_governance. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: UN report, resolution, special procedure, or digital privacy guidance changes. Verification method: direct_official_page_review. Claim scope: privacy rights, data protection, surveillance safeguards, and rights-based AI review. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

David. Omand. Securing the state - google books, 2010. URL https://books.google.com/books/about/Securing_the_State.html?id=G9FmSQAACAAJ. Verified scholarly book metadata source for ethics_of_intelligence; routed to Ethics of Intelligence and Cognitive Security; legal and ethical constraints on secret intelligence; oversight principles. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: ethics_of_intelligence. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for ethics_of_intelligence materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of ethics_of_intelligence and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that ethics_of_intelligence claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_omand_2010_securing_the_state retained.

David Omand and Mark Phythian. Principled spying - georgetown university press, 2018. URL https://press.georgetown.edu/Book/Principled-Spying. Verified scholarly book metadata source for ethics_of_intelligence; routed to Ethics of Intelligence and Cognitive Security; HUMINT ethics; surveillance ethics; oversight accountability. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: ethics_of_intelligence. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for ethics_of_intelligence materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of ethics_of_intelligence and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that ethics_of_intelligence claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_omand_phythian_2018_principled_spying retained.

Open Contracting Partnership. Open contracting data standard, 2026. URL https://standard.open-contracting.org/latest/en/. International open data standard for publishing public contracting data and documents across planning, tender, award, contract, and implementation stages. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: procurement_vendor_governance. Source tier: technical_standard. Refresh cadence: annual. Refresh trigger: OCDS schema, documentation version, governance page, or procurement transparency model changes. Verification method: direct_standards_page_review. Claim scope: procurement data lineage, vendor transparency, contracting records, and audit-ready disclosure. Stakeholder role: procurement analyst, auditor, vendor, civic reviewer, and instructor. Assurance use: contracting data schema and vendor record provenance check. Rights dimension: public transparency, accountability, anti-corruption, and access to information. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Open Worldwide Application Security Project. Owasp top 10 for large language model applications, 2025. URL https://owasp.org/www-project-top-10-for-large-language-model-applications/. Security taxonomy for prompt injection, excessive agency, data leakage, and LLM application risks. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: security_standard. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

OpenAPI Initiative. Openapi specification, 2026. URL https://spec.openapis.org/oas/. Official OpenAPI specification index for describing HTTP APIs, schemas, operations, errors, and contract validation. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: open_standard. Refresh cadence: semiannual. Refresh trigger: OpenAPI version, schema revision,

or specification publication changes. Verification method: direct_standards_page_review. Claim scope: API contract design, schema validation, tool-call description, and integration evidence. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Organisation for Economic Co-operation and Development. Towards a common reporting framework for ai incidents, 2025a. URL https://www.oecd.org/en/publications/towards-a-common-reporting-framework-for-ai-incidents_f326d4ac-en.html. OECD policy paper proposing a common AI incident reporting framework for jurisdictions and sectors, including criteria for impact and risk characterization. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: agent_incident_response. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: OECD AI incident reporting framework, criteria, DOI landing page, implementation, or interoperable incident-reporting guidance changes. Verification method: direct_official_page_review. Claim scope: common AI incident reporting framework, 29 reporting criteria, interoperability, high-risk systems, impact assessment, and emerging-risk review. Stakeholder role: AI incident lead, assurance reviewer, policy analyst, instructor, and learner. Assurance use: AI incident reporting template, classification checklist, impact review, and lessons-learned loop. Rights dimension: safety, accountability, impact transparency, redress evidence, cross-border interoperability, and harm learning. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Organisation for Economic Co-operation and Development. Governing with artificial intelligence: The state of play and way forward in core government functions, 2025b. URL https://www.oecd.org/en/publications/2025/06/governing-with-artificial-intelligence_398fa287/full-report/enablers-guardrails-and-engagement-for-unlocking-trustworthy-ai_2f817983.html. OECD public-sector AI governance report framing enablers, guardrails, and engagement for trustworthy AI in government. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: public_sector_transparency. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: OECD government AI governance, enabler, guardrail, engagement, or public-sector use-case update. Verification method: direct_official_page_review. Claim scope: public-sector AI governance, guardrails, engagement, transparency, and trustworthy service delivery. Stakeholder role: public-sector steward, policy reviewer, service designer, instructor, and learner. Assurance use: public-sector AI guardrail and transparency crosswalk. Rights dimension: public trust, accountability, transparency, inclusion, service quality, and citizen-facing safeguards. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Organisation for Economic Co-operation and Development. The agentic ai landscape and its conceptual foundations, 2026a. URL https://www.oecd.org/en/publications/the-agentic-ai-landscape-and-its-conceptual-foundations_396cf758-en.html. OECD AI paper clarifying the agentic AI landscape and conceptual foundations by comparing definitions and mapping shared features to the OECD AI system definition. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: official_policy_analysis. Refresh cadence: semiannual. Refresh trigger: OECD agentic AI paper, definition update, policy analysis, uptake data, or OECD AI-system definition guidance changes. Verification method: direct_official_page_review. Claim scope: OECD expert analysis of agentic AI definitions, frequently cited features, conceptual foundations, uptake trends, and mapping to the OECD AI system definition. Stakeholder role: policy analyst, standards steward, curriculum maintainer, instructor, and learner. Assurance use: agentic AI definition crosswalk, standards landscape map, policy-neutral concept boundary, and adoption-trend caveat review. Rights dimension: conceptual clarity, public-policy coherence, transparent terminology, accountability, and bounded claims about agentic capability. Direct OECD publication page verified live 2026-06-11; abstract describes definition comparison, OECD AI-system mapping, and uptake trends.

Organisation for Economic Co-operation and Development. Ai risks and incidents, 2026b. URL https://www.oecd.org/en/topics/ai-risks-and-incidents.html. OECD topic page on AI risks and incidents, including AI incident monitoring, hazard evidence, and the need for common incident reporting. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: agent_incident_response. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: OECD AI incident monitor, risk taxonomy, AI incident topic, or AI hazard reporting changes. Verification method: direct_official_page_review. Claim scope: AI risks, incidents, hazards, incident monitoring, accountable risk management, and cross-jurisdictional learning. Stakeholder role: incident reviewer, AI risk owner, instructor, policy analyst, and learner. Assurance use: AI incident monitor review, risk pattern briefing, incident taxonomy, and debrief evidence. Rights dimension: safety, security, privacy, discrimination, accountability, workplace rights, and public trust. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Ortega et al. The ai incident regime, 2025. URL https://arxiv.org/html/2503.19887. arXiv HTML source on AI incident regimes, routed as comparative governance context for incident reporting, risk exceptions, and assurance evidence. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: agent_incident_response. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: arXiv version, AI incident reporting regimes, official policy changes, or scholarly governance literature materially changes. Verification method: direct_arxiv_html_review. Claim scope: Supports bounded scholarly discussion of AI incident regimes and reporting design; does not replace official incident-reporting standards already encoded in AGEINT. Stakeholder role: AI incident reviewer, legal/oversight reviewer, instructor, risk owner. Assurance use: AI incident-regime comparison, governance-exception review, and reporting-system caveats. Rights dimension: transparency, accountability, due process, public safety, and affected-party protection. Direct arXiv HTML source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

OWASP Foundation CycloneDX Project. Cyclonedx specification overview, 2026. URL https://cyclonedx.org/specification/overview/. CycloneDX specification overview for bill-of-materials formats, used to ground component inventory, dependency provenance, and supplier evidence in agentic AI systems. Checked as of 2026-09-06. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: security_standard. Refresh cadence: quarterly. Refresh trigger: CycloneDX specification version, BOM type, vulnerability extension, AI/component metadata, or supply-chain provenance guidance changes. Verification method: direct_project_specification_review. Claim scope: software bill of materials, service and operations BOMs, vulnerability and dependency metadata, and supply-chain component provenance. Stakeholder role: supply-chain analyst, SBOM steward, procurement assessor, secure-release reviewer, instructor, and learner. Assurance use: component-inventory evidence, dependency-risk review, supplier BOM checklist, and release-gate provenance record. Rights dimension: transparency, supply-chain accountability, security, auditability, and user harm reduction. Direct source URL verified live (HTTP 200, official CycloneDX specification overview page) for AGEINT curriculum use.

OWASP Gen AI Security Project (Agentic Security Initiative). Agentic ai - threats and mitigations, 2025. URL https://genai.owasp.org/resource/agentic-ai-threats-and-mitigations/. OWASP Agentic Security Initiative threat-model-based reference of emerging agentic AI threats and mitigations; standards-body guidance for defensive curriculum use. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: OWASP Agentic Security Initiative whitepaper revisions, threat-model updates, or new agentic threats-and-mitigations guidance changes. Verification method: direct_official_page_review. Claim scope: agentic AI threats and mitigations, threat-model-based reference, and OWASP Agentic Security Initiative mitigation baseline. Stakeholder role: red-team reviewer, threat modeler, instructor, system steward, and learner. Assurance use: agentic threat-model reference, mitigation baseline checklist, red-team scope guide, and ASI-aligned assurance review. Rights dimension: security, accountability, transparency, and trustworthy AI assurance. Direct source URL verified live (HTTP 200, on-topic OWASP agentic threats-and-mitigations resource) for AGEINT curriculum use.

OWASP GenAI Security Project. Owasp top 10 for agentic applications for 2026, 2026. URL https://genai.owasp.org/resource/owasp-top-10-for-agentic-applications-for-2026/. OWASP GenAI Security Project resource identifying critical risks and mitigations for autonomous and agentic AI applications. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: agentic_ai_security. Source tier: security_standard. Refresh cadence: semiannual. Refresh trigger: OWASP Agentic Applications Top 10 version, risk category, mitigation guidance, or project URL changes.

Verification method: direct_standards_page_review. Claim scope: Peer-reviewed OWASP security-risk taxonomy for autonomous and agentic AI applications, including agent-goal hijack, tool misuse, privilege abuse, supply-chain exposure, and inter-agent communication risk. Stakeholder role: security architect, red-team reviewer, release owner, instructor, and learner. Assurance use: agentic application risk taxonomy, tool-misuse review, identity-and-privilege checks, supply-chain checklist, and secure-release gate evidence. Rights dimension: security, least privilege, supply-chain integrity, safe tool use, accountable agent behavior, and harm prevention. Direct OWASP GenAI Security Project resource verified live 2026-06-11 with the 2026 Agentic Applications Top 10 scope and peer-reviewed security-risk framing.

James Pamment and Victoria Smith. Attributing information influence operations (nato stratcom coe, 2022), 2022. URL https://stratcomcoe.org/publications/download/Nato-Attributing-Information-Influence-Operations-DIGITAL-v4.pdf. Verified official primary source for active_measures_attribution; routed to Active Measures and Disinformation; Counterintelligence; Information Warfare and Cognitive Security. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: active_measures_attribution. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for active_measures_attribution materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of active_measures_attribution and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that active_measures_attribution claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_nato_stratcom_attributing_iio retained.

Joon Sung Park, Joseph C. O'Brien, Carrie J. Cai, Meredith Ringel Morris, Percy Liang, and Michael S. Bernstein. Generative agents: Interactive simulacra of human behavior, 2023. URL https://arxiv.org/abs/2304.03442. Demonstrates a multi-agent sandbox of twenty-five LLM agents whose memory-stream, reflection, and planning architecture produces believable emergent social behavior, grounding the memory/planning/multi-agent-simulation pattern. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Backs the memory/planning/multi-agent simulation design pattern. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

T. Parr, G. Pezzulo, and K. J. Friston. Active inference: The free energy principle in mind, brain, and behavior, 2022. URL https://direct.mit.edu/books/oa-monograph/5299/Active-InferenceThe-Free-Energy-Principle-in-Mind. The open-access MIT Press monograph giving the book-length, chapter-organized foundational treatment of active inference, from the free-energy principle to discrete and continuous generative models and their behavioral implications. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: cognitive_active_inference. Source tier: scholarly_textbook. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Chapter-level foundational reference for the active inference material across the AGEINT curriculum. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

S. G. Patil, T. Zhang, X. Wang, and J. E. Gonzalez. Gorilla: Large language model connected with massive apis, 2023. URL https://arxiv.org/abs/2305.15334. Verified scholarly preprint source for tool_use_agents; routed to Foundations of AGEINT (tool-use patterns); AGEINT Python Code Library; LangChain/LangGraph Patterns appendix. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: tool_use_agents. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for tool_use_agents materially changes. Verification method: direct_arxiv_record_review. Claim scope: Supports bounded AGEINT discussion of tool_use_agents and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that tool_use_agents claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_patil_2023_gorilla retained.

Christopher Paul and Miriam Matthews. The russian "firehose of falsehood" propaganda model (rand, 2016), 2016. URL https://www.rand.org/pubs/perspectives/PE198.html. Verified professional documentation source for active_measures_disinformation; routed to Active Measures and Disinformation; Information Warfare and Cognitive Security. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: active_measures_disinformation. Source tier: professional_documentation. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for active_measures_disinformation materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of active_measures_disinformation and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that active_measures_disinformation claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_rand_paul_matthews_firehose_falsehood normalized to professional_rand_paul_matthews_firehose_falsehood.

Penmetsa et al. Adversarial machine learning in cybersecurity, 2025. URL https://ejaset.com/index.php/journal/article/view/294. Journal article reviewing adversarial machine learning in cybersecurity, encoded as supplemental scholarly support for defensive AI red-team assurance. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: journal article URL, adversarial-ML literature, AI security taxonomy, or defensive testing guidance materially changes. Verification method: script_http_200_scholarly_page_review. Claim scope: Supports defensive literature-review discussion of adversarial machine learning in cybersecurity; excludes exploit, evasion, and bypass procedures. Stakeholder role: AI security reviewer, cyber instructor, red-team reviewer. Assurance use: adversarial-ML literature review, cyber-AI control mapping, and defensive testing caveats. Rights dimension: security, system integrity, safety, accountable testing, and defensive education. Direct journal source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Gordon Pennycook and David G. Rand. The psychology of fake news (trends in cognitive sciences, 2021), 2021. URL https://pubmed.ncbi.nlm.nih.gov/33736957/. Verified scholarly repository record source for disinformation_cognitive_psychology; routed to Active Measures and Disinformation; Social Engineering; Information Warfare and Cognitive Security. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: disinformation_cognitive_psychology. Source tier: scholarly_repository_record. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for disinformation_cognitive_psychology materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of disinformation_cognitive_psychology and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that disinformation_cognitive_psychology claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_pennycook_rand_2021_psychology_fake_news retained.

Gordon Pennycook, Ziv Epstein, Mohsen Mosleh, et al. Shifting attention to accuracy - nature, 2021. URL https://www.nature.com/articles/s41586-021-03344-2. Verified scholarly peer reviewed source for cognitive_security_misinformation; routed to Cognitive Security (psychological inoculation & prebunking); Cognitive Security Operations (scalable interventions). AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cognitive_security_misinformation. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cognitive_security_misinformation materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of cognitive_security_misinformation and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cognitive_security_misinformation claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_pennycook_2021_accuracy_nudge_nature retained.

F. Perez and I. Ribeiro. Ignore previous prompt: Attack techniques for language models, 2022. URL https://arxiv.org/abs/2211.09527. Verified scholarly preprint source for adversarial_ai_security; routed to Security & Adversarial Considerations; ATT&CK & Kill Chain Templates appendix; Cognitive Security & Inoculation appendix. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: adversarial_ai_security. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for adversarial_ai_security materially changes. Verification method: direct_arxiv_record_review. Claim scope: Supports bounded AGEINT discussion of adversarial_ai_security and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that adversarial_ai_security claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_perez_2022_prompt_injection retained.

Katherine Hibbs Pherson and Randolph H. Pherson. Critical thinking for strategic intelligence, 2020. URL https://collegepublishing.sagepub.com/products/critical-thinking-for-strategic-intelligence-3-265236. SAGE/CQ Press textbook page for critical-thinking questions, analytic techniques, uncertainty, graphics, and source evaluation in intelligence education. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_method_pedagogy. Source tier: scholarly_textbook. Refresh cadence: annual. Refresh trigger: Publisher page, edition, ISBN, or access status changes. Verification method: publisher_page_review. Claim scope: Supports bounded claims about critical-thinking pedagogy, source evaluation, uncertainty communication, and analytic graphics rather than automated judgment replacement. Stakeholder role: curriculum designer; analytic tradecraft instructor; writing reviewer. Assurance use: Strengthens SAT-adjacent teaching language around critical questions, source evaluation, and accountable presentation. Rights dimension: copyrighted textbook metadata only; cite and summarize sparingly. SAGE College Publishing product page verified live 2026-06-15 for title, authors, third edition, publisher, date, ISBNs, and description.

Privacy and Civil Liberties Oversight Board. Oversight reports, 2026. URL https://www.pclob.gov/Oversight. Official oversight-report library for privacy, civil-liberties, surveillance, watchlisting, facial-recognition, and redress analysis. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: legal_oversight. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Mahima Pushkarna, Andrew Zaldivar, and Oddur Kjartansson. Data cards: Purposeful and transparent dataset documentation for responsible ai, 2022. URL https://arxiv.org/abs/2204.01075. ACM FAccT paper introducing Data Cards as structured, purposeful, human-centered summaries of dataset facts needed by stakeholders across a dataset lifecycle for responsible AI development. Checked as of 2026-06-09. Citation role: curriculum_anchor. Source lane: dataset_documentation. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Data Cards paper, ACM record, arXiv record, dataset-documentation practice, or scholarly consensus materially changes. Verification method: direct_scholarly_page_review. Claim scope: Data Cards for purposeful, stakeholder-centered dataset documentation across origins, collection, annotation, intended use, evaluation context, lifecycle changes, and responsible AI review. Stakeholder role: data steward, dataset creator, model owner, assurance reviewer, instructor, learner, and affected-user representative. Assurance use: dataset card review, stakeholder-specific documentation checklist, dataset lifecycle governance, and model/data release evidence. Rights dimension: dataset transparency, stakeholder comprehension, fairness review, accountable reuse, and lifecycle documentation. Direct arXiv source URL verified live 2026-06-09 with title, authors, abstract, and ACM FAccT 2022 metadata matching the cited Data Cards paper.

Y. Qin, S. Liang, Y. Ye, K. Zhu, L. Yan, Y. Lu, Y. Lin, X. Cong, X. Tang, B. Qian, S. Zhao, R. Tian, R. Xie, J. Zhou, M. Gerstein, D. Li, Z. Liu, and M. Sun. Toolllm: Facilitating large language models to master 16000+ real-world apis, 2023. URL https://arxiv.org/abs/2307.16789. Verified scholarly preprint source for tool_use_agents; routed to Foundations of AGEINT (tool-use); AGEINT Python Code Library; LangChain/LangGraph Patterns appendix. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: tool_use_agents. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for tool_use_agents materially changes. Verification method: direct_arxiv_record_review. Claim scope: Supports bounded AGEINT discussion of tool_use_agents and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that tool_use_agents claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_qin_2023_toolllm retained.

Michael. Quinlan. Just intelligence: Prolegomena - semantic scholar, 2007. URL https://www.semanticscholar.org/paper/Just-intelligence:-Prolegomena-to-an-ethical-theory-Quinlan/4b55eed16d59a1f2c103394b2ae0eef592af2728. Verified scholarly repository record source for ethics_of_intelligence; routed to Ethics of Intelligence and Cognitive Security; just-intelligence theory. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: ethics_of_intelligence. Source tier: scholarly_repository_record. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for ethics_of_intelligence materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of ethics_of_intelligence and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that ethics_of_intelligence claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_quinlan_2007_just_intelligence retained.

A. S. Rao and M. P. Georgeff. Bdi agents: From theory to practice, 1995. URL https://aaai.org/papers/icmas95-042-bdi-agents-from-theory-to-practice/. Verified scholarly repository record source for agent_foundations; routed to Foundations of AGEINT (agent architectures); Design Patterns & Archetypes (goal-directed agent archetypes). AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: agent_foundations. Source tier: scholarly_repository_record. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for agent_foundations materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of agent_foundations and

related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that agent_foundations claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_rao_georgeff_1995_bdi retained.

Ronald. Reagan. Eo 12333 - odni, 1981. URL https://www.odni.gov/files/NCSC/documents/Regulations/EO_12333.pdf. Verified official primary source for legal_authorities_intelligence_collection; routed to Legal Authorities and Constraints; EO-based authorities for IC collection. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: legal_authorities_intelligence_collection. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for legal_authorities_intelligence_collection materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of legal_authorities_intelligence_collection and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that legal_authorities_intelligence_collection claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_eo_12333_odni_text retained; stale or indirect proposal URL replaced with direct source record.

Revanth Gangi Reddy, Daniel Lee, Yi R. Fung, Khanh Duy Nguyen, Qi Zeng, Manling Li, Ziqi Wang, Clare Voss, and Heng Ji. Smartbook: Ai-assisted situation report generation for intelligence analysts, 2023. URL https://arxiv.org/abs/2303.14337. SmartBook preprint describing AI-assisted situation-report generation for intelligence analysts, including source grounding, analyst preferences, and evaluation caveats relevant to generated-product review. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: ai_enabled_analysis_boundary. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: arXiv version, published venue metadata, evaluation claims, or analyst-support literature materially changes. Verification method: direct_arxiv_page_review. Claim scope: Supports bounded discussion of AI-assisted situation-report generation and grounded summaries; reported study results are treated as source-specific, not AGEINT performance evidence. Stakeholder role: analyst, instructor, AI product reviewer, assurance evaluator. Assurance use: AI-assisted analytic product review, source-grounding checklist design, and classroom situation-report caveats. Rights dimension: source traceability, analyst comprehension, transparency, and non-automation of judgment. Direct arXiv source URL verified on 2026-06-15 with title, authors, abstract, version metadata, and DOI record visible on the primary page.

Tom Ritchey. General morphological analysis: A general method for non-quantified modelling, 2013. URL https://www.swemorph.com/ma.html. Swedish Morphological Society page explaining general morphological analysis as a method for structuring non-quantified complex problem spaces. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_method_pedagogy. Source tier: public_scholarly_method_note. Refresh cadence: annual. Refresh trigger: Method page, PDF, revision note, or licensing statement changes. Verification method: public_method_page_review. Claim scope: Supports bounded claims about morphological analysis as a structuring method for non-quantified multidimensional problems, not as analytic validation by itself. Stakeholder role: methods instructor; curriculum designer; visualization reviewer. Assurance use: Adds method-root support for morphological and scenario matrix exercises while preserving review gates. Rights dimension: public method page; cite source and avoid extended quotation. Swedish Morphological Society method page verified live 2026-06-15 for title, author, revision note, and method description; used as a public method source for Zwicky-derived morphological analysis.

Jon Roozenbeek, Sander van der Linden, Beth Goldberg, Steve Rathje, and Stephan Lewandowsky. Psychological inoculation improves resilience against misinformation on social media, 2022. URL https://www.science.org/doi/10.1126/sciadv.abo6254. Science Advances article showing that psychological inoculation campaigns on social media can improve misinformation resilience at scale under measured study conditions. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: cognitive_resilience_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Science Advances record, DOI metadata, replication literature, meta-analysis, or evidence boundary materially changes. Verification method: direct_scholarly_page_review. Claim scope: Peer-reviewed Science Advances study testing psychological inoculation videos for improving misinformation resilience at scale, with bounded transfer from measured outcomes to curriculum claims. Stakeholder role: instructor, cognitive-security reviewer, learner, assurance reviewer, and affected-community representative. Assurance use: prebunking evidence boundary, inoculation mechanism caveat, outcome-measure review, and cognitive-security lesson-scope limits. Rights dimension: cognitive autonomy, transparent educational framing, anti-manipulation safeguards, measured-outcome limits, and rights-aware prebunking practice. Direct Science Advances DOI page verified live 2026-06-11 with title, journal, DOI, and abstract-level claim that inoculation campaigns improved misinformation resilience at scale.

S. Russell and P. Norvig. Artificial intelligence: A modern approach, 4th ed., 2020. URL https://aima.cs.berkeley.edu. Verified scholarly repository record source for agent_foundations; routed to Foundations of AGEINT (agent definition, PEAS framework, rational agents); AGEINT Python Code Library. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: agent_foundations. Source tier: scholarly_repository_record. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for agent_foundations materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of agent_foundations and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that agent_foundations claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_russell_norvig_2020_aima retained.

Timo Schick, Jane Dwivedi-Yu, Roberto Dessi, Roberta Raileanu, Maria Lomeli, Luke Zettlemoyer, Nicola Cancedda, and Thomas Scialom. Toolformer: Language models can teach themselves to use tools, 2023. URL https://arxiv.org/abs/2302.04761. Shows an LLM self-supervising when and how to call external APIs (calculator, search, QA, translation, calendar), grounding the tool-use / API-calling pattern for agents. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: scholarly_preprint. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Backs the tool-use / API-calling design pattern. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

Paul Allan. Schott. World bank/imf reference guide to aml/cft (2006), 2006. URL https://documents.worldbank.org/en/publication/documents-reports/documentdetail/558401468134391014/reference-guide-to-anti-money-laundering-and-combating-the-financing-of-terrorism-second-edition-and-supplement-on-special-recommendation-ix. Verified official primary source for finint_aml_cft_international; routed to Financial Intelligence (FININT). AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: finint_aml_cft_international. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for finint_aml_cft_international materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of finint_aml_cft_international and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that finint_aml_cft_international claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review,

privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official__worldbank__aml__reference__guide retained.

Shah et al. Large language models and disinformation: A double-edged sword, 2024. URL https://ieeexplore.ieee.org/document/10540581/. IEEE article on large language models and disinformation, routed as risk-and-defense context with explicit no-generation and no-campaign boundaries. Checked as of 2026-06-15. Citation role: curriculum__anchor. Source lane: cognitive__influence__security. Source tier: scholarly__peer__reviewed. Refresh cadence: annual. Refresh trigger: IEEE record, LLM disinformation literature, detection methods, or policy guidance materially changes. Verification method: script__http__200__scholarly__page__review. Claim scope: Supports bounded discussion of LLMs as both disinformation risks and defensive tools; does not authorize generation of deceptive content or manipulation campaigns. Stakeholder role: cognitive-security reviewer, AI safety reviewer, instructor. Assurance use: LLM disinformation risk review, model-misuse caveats, and defensive detection limits. Rights dimension: information integrity, democratic trust, transparency, privacy, and non-manipulative education. Direct IEEE source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Noah Shinn, Federico Cassano, Edward Berman, Ashwin Gopinath, Karthik Narasimhan, and Shunyu Yao. Reflexion: Language agents with verbal reinforcement learning, 2023. URL https://arxiv.org/abs/2303.11366. Proposes agents that verbally reflect on task feedback and store reflections in episodic memory to improve on later trials, grounding the self-reflection and stop-condition pattern for iterative agents. Checked as of 2026-06-08. Citation role: curriculum__anchor. Source lane: agentic__ai__governance. Source tier: scholarly__preprint. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct__source__url__review. Claim scope: Backs the self-reflection / stop-condition design pattern for iterative LLM agents. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

Sigstore Project. Overview - sigstore, 2026. URL https://docs.sigstore.dev/. Sigstore documentation overview for software signing and transparency-log backed artifact verification, used to ground tamper-evident release and provenance evidence. Checked as of 2026-09-06. Citation role: curriculum__anchor. Source lane: secure__release__change__control. Source tier: security__standard. Refresh cadence: quarterly. Refresh trigger: Sigstore documentation, signing workflow, transparency log, identity binding, provenance verification, or project governance changes. Verification method: direct__project__documentation__review. Claim scope: software signing, transparency logs, artifact identity, provenance verification, and tamper-evident release evidence. Stakeholder role: release signer, supply-chain security reviewer, procurement assessor, instructor, and learner. Assurance use: artifact-signing evidence, transparency-log verification, release authenticity check, and supply-chain audit trail. Rights dimension: security, transparency, accountability, provenance, and harm prevention. Direct source URL verified live (HTTP 200, official Sigstore documentation overview page) for AGEINT curriculum use.

Ryan Smith et al. A step-by-step tutorial on active inference and its application to empirical data, 2022. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC8956124/. Open-access tutorial on active inference and empirical-data applications, routed as a learner-facing formal-method source for bounded AGEINT analogies. Checked as of 2026-06-15. Citation role: curriculum__anchor. Source lane: cognitive__active__inference. Source tier: scholarly__peer__reviewed. Refresh cadence: annual. Refresh trigger: PMC record, active-inference tutorial literature, implementation practice, or pedagogy materially changes. Verification method: direct__pmc__page__review. Claim scope: Supports step-by-step active-inference pedagogy and empirical-data modeling caveats; does not transfer automatically to intelligence-agent performance claims. Stakeholder role: learner, theory instructor, method reviewer. Assurance use: active-inference tutorial review, implementation-analogy caveat, and learner-facing theory learning support. Rights dimension: scientific transparency, learner comprehension, accessibility, and non-overclaiming. Direct PMC source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

SPDX Project, Linux Foundation. Spdx specification 3.0.1, 2024. URL https://spdx.github.io/spdx-spec/v3.0.1/. SPDX 3.0.1 specification for creating software bills of materials and related machine-readable provenance records; used to ground model/data/software documentation evidence. Checked as of 2026-06-06. Citation role: curriculum__anchor. Source lane: model__data__provenance. Source tier: technical__standard. Refresh cadence: annual. Refresh trigger: SPDX specification version, profile model, security/licensing field, SBOM practice, or Linux Foundation governance update changes. Verification method: direct__project__specification__review. Claim scope: software bill of materials, package and file metadata, licensing provenance, security and lifecycle profiles, and machine-readable supply-chain documentation. Stakeholder role: documentation steward, provenance reviewer, license/compliance assessor, instructor, and learner. Assurance use: SBOM/provenance field checklist, documentation-card evidence, licensing/security review, and audit-trail crosswalk. Rights dimension: transparency, accountability, licensing clarity, security, and auditability. Direct source URL verified live (HTTP 200, official SPDX Specification 3.0.1 page with SBOM description metadata) for AGEINT curriculum use.

Special Competitive Studies Project and Australian Strategic Policy Institute. The future of intelligence analysis: U.s.-australia project on ai and human-machine teaming, 2024. URL https://www.scsp.ai/wp-content/uploads/2024/09/AI-The-Future-of-Intelligence-Analysis-SCSP-ASPI-Report.pdf. SCSP/ASPI public report on AI and human-machine teaming for intelligence analysis, routed for governance, training, and analytic-workflow boundary discussion. Checked as of 2026-06-15. Citation role: curriculum__anchor. Source lane: ai__enabled__analysis__boundary. Source tier: public__domain__primary. Refresh cadence: annual. Refresh trigger: SCSP report URL, PDF, AI analytic-team recommendations, or public policy context materially changes. Verification method: primary__browser__pdf__review. Claim scope: Supports bounded discussion of AI human-machine teaming for all-source analysis; forward-looking recommendations remain policy context, not AGEINT performance evidence. Stakeholder role: analytic manager, AI governance reviewer, instructor, alliance liaison educator. Assurance use: human-machine teaming review, analytic-workflow modernization caveats, and alliance-interoperability discussion. Rights dimension: human oversight, analytic accountability, alliance coordination, lawful use, and public trust. Direct SCSP report PDF was verified on 2026-06-15 through the current SCSP resource page after the attachment URL had moved.

A. Srivastava, A. Rastogi, A. Rao, A. A. M. Shoeb, A. Abid, A. Fisch, A. R. Brown, A. Santoro, A. Gupta, A. Garriga-Alonso, et al. Beyond the imitation game: Quantifying and extrapolating the capabilities of llms, 2022. URL https://arxiv.org/abs/2206.04615. Verified scholarly preprint source for llm__evaluation; routed to Frameworks & Infrastructure (model evaluation); Security & Adversarial Considerations; AGEINT Python Code Library. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum__anchor. Source lane: llm__evaluation. Source tier: scholarly__preprint. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for llm__evaluation materially changes. Verification method: direct__arxiv__record__review. Claim scope: Supports bounded AGEINT discussion of llm__evaluation and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that llm__evaluation claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly__srivastava__2022__bigbench retained.

Kate Starbird, Ahmer Arif, and Tom Wilson. Disinformation as collaborative work (acm cscw, 2019), 2019. URL https://dl.acm.org/doi/10.1145/3359229. Verified scholarly repository record source for active__measures__information__operations; routed to Active Measures and Disinformation; Information Warfare and Cognitive Security; Social Engineering. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum__anchor. Source lane: active__measures__information__operations. Source tier: scholarly__repository__record. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for active__measures__information__operations materially changes. Verification method: direct__source__url__review. Claim scope:

Supports bounded AGEINT discussion of active_measures_information_operations and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that active_measures_information_operations claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_starbird_arif_wilson_2019_disinfo_collaborative retained.

Jennifer Stromer-Galley, Jonathan A. W. R. Mitchell, et al. Flexible versus structured support for reasoning: Enhancing analytical reasoning through a flexible analytic technique, 2020. URL https://eprints.gla.ac.uk/272733/. Scholarly record and abstract for an experimental comparison of flexible SAT support and structured/no-SAT conditions for reasoning quality. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_repository_record. Refresh cadence: annual. Refresh trigger: Refresh if repository metadata, DOI, or publisher record changes. Verification method: repository_metadata_review. Claim scope: Supports bounded claims that flexible SAT support can improve reasoning quality in a specific experimental setting. Stakeholder role: curriculum designer; analytic standards trainer; evaluation lead. Assurance use: Adds a positive but bounded empirical counterpoint to SAT critique and doctrine sources. Rights dimension: repository metadata and scholarly article; cite source and avoid extended quotation. University of Glasgow repository metadata verified live 2026-06-11; use for flexible-SAT evidence as one bounded study, not all-purpose SAT proof.

Supply-chain Levels for Software Artifacts Project. Slsa specification, 2026. URL https://slsa.dev/spec/v1.1/. SLSA specification for describing and incrementally improving software supply-chain security, used to ground artifact provenance and release-control claims. Checked as of 2026-09-06. Citation role: curriculum_anchor. Source lane: secure_release_change_control. Source tier: security_standard. Refresh cadence: quarterly. Refresh trigger: SLSA specification version, provenance model, build-level requirement, dependency track, or supply-chain security guarantee changes. Verification method: direct_project_specification_review. Claim scope: supply-chain security levels, build provenance, artifact integrity, dependency risk, and incremental release-control guarantees. Stakeholder role: release engineer, supply-chain reviewer, procurement assessor, instructor, and learner. Assurance use: release-gate provenance checklist, build-integrity assessment, supply-chain risk review, and rollback evidence package. Rights dimension: security, accountability, resilience, transparency, and harm reduction. Direct source URL verified live (HTTP 200, official SLSA v1.1 specification page with on-topic description metadata) for AGEINT curriculum use.

Peter Svenmarck. Overview of structured analytic techniques for assessment and judgement of major events, 2021. URL https://foi.se/en/foi/reports/report-summary.html?reportNo=FOI-R--5116--SE. Swedish Defence Research Agency report summary on 42 structured analytic techniques for assessment and judgement of major events. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: analytic_method_pedagogy. Source tier: official_research_report. Refresh cadence: annual. Refresh trigger: FOI report page, report number, download link, or abstract metadata changes. Verification method: direct_official_report_page_review. Claim scope: Supports bounded claims that SAT catalogues are used in public-sector training contexts and classify techniques by purpose and facilitation needs. Stakeholder role: curriculum designer; public-sector method instructor; reviewer. Assurance use: Adds a non-US official SAT training reference while keeping efficacy claims separate from technique catalog coverage. Rights dimension: public official report summary; cite source and avoid extended quotation. FOI report-summary page verified live 2026-06-15 for title, author, report number FOI-R–5116–SE, date, abstract, and keywords.

Mariarosaria Taddeo and Luciano Floridi. Regulate artificial intelligence to avert cyber arms race, 2018. URL https://www.nature.com/articles/d41586-018-04602-6. Nature Comment article arguing for AI-cyber governance before escalation risks intensify, useful for high-level cyber policy and non-escalatory classroom framing. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cyber_threat_intelligence. Source tier: scholarly_commentary. Refresh cadence: annual. Refresh trigger: Nature article URL, DOI metadata, or AI-cyber policy literature materially changes. Verification method: primary_browser_article_review. Claim scope: Supports bounded policy discussion of AI-enabled cyber escalation and arms-race risk; not technical guidance and not empirical AGEINT validation. Stakeholder role: policy reviewer, cyber instructor, governance analyst. Assurance use: AI-cyber escalation caveat, policy-risk review, and cyber-arms-race boundary setting. Rights dimension: non-escalation, public safety, accountability, proportionality, and international stability. Direct Nature article page was opened and verified on 2026-06-15 after the script fetch timed out; title, authors, date, and DOI were visible on the primary page.

Terp and Breuer. Disarm: A framework for analysis of disinformation campaigns, 2022. URL https://ieeexplore.ieee.org/document/9830669/. IEEE source on the DISARM framework for disinformation and influence operations, used for defensive taxonomy and reviewable incident mapping. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: IEEE record, DISARM framework version, influence-operation taxonomy, or defensive analysis practice materially changes. Verification method: script_http_200_scholarly_page_review. Claim scope: Supports defensive taxonomy and incident-analysis framing for influence operations; excludes persuasion campaign design, targeting, and manipulation guidance. Stakeholder role: cognitive-security analyst, instructor, incident reviewer. Assurance use: DISARM taxonomy review, defensive influence-incident mapping, and provenance checklist design. Rights dimension: transparency, public trust, freedom of expression, privacy, and defensive resilience. Direct IEEE source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Philip E. Tetlock. Expert political judgment - internet archive, 2005. URL https://archive.org/details/expertpoliticalj0000tetl_u0t8. Verified scholarly book metadata source for analytic_tradecraft_forecasting; routed to Epistemic Rigor & Analytic Tradecraft (Advanced Analysis Methods); forecasting accuracy and calibration. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: analytic_tradecraft_forecasting. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for analytic_tradecraft_forecasting materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of analytic_tradecraft_forecasting and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that analytic_tradecraft_forecasting claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_tetlock_2005_expert_political_judgment retained.

Philip E. Tetlock and Dan Gardner. Superforecasting - google play books, 2015. URL https://books.google.com/books/about/Superforecasting.html?id=ICgWrgEACAAJ. Verified scholarly book metadata source for analytic_tradecraft_forecasting; routed to Epistemic Rigor & Analytic Tradecraft (Advanced Analysis Methods); Good Judgment Project findings. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: analytic_tradecraft_forecasting. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for analytic_tradecraft_forecasting materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of analytic_tradecraft_forecasting and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that analytic_tradecraft_forecasting claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_tetlock_gardner_2015_superforecasting retained; stale or indirect proposal URL replaced with direct source record.

The White House. About | office of the director of national intelligence, 2014. URL https://www.odni.gov/index.php/ic-legal-reference-book/president

ial-policy-directive-28/123-about. Historical Presidential Policy Directive 28 (PPD-28), Signals Intelligence Activities, issued 17 January 2014; it is not Executive Order 12333 or a complete statement of current signals-intelligence safeguards. National Security Memorandum 14 of 7 October 2022 partially revoked PPD-28, except sections 3 and 6 and its classified annex, and states that the accompanying executive order establishes enhanced safeguards superseding PPD-28 personal-information safeguards.

The White House, National Security Decision Directive 298. National operations security program, nsdd 298, 1988. URL https://www.reaganlibrary.gov/public/archives/reference/scanned-nsdds/nsdd298.pdf. National Security Decision Directive 298 establishing national operations security program policy, used as public historical doctrine context for defensive OPSEC governance. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: opsec_doctrine_governance. Source tier: official_primary. Refresh cadence: biennial. Refresh trigger: Reagan Library URL, public archive metadata, or official OPSEC historical-policy citation materially changes. Verification method: direct_official_pdf_review. Claim scope: Provides official historical OPSEC policy context for critical-information protection and public doctrine framing; not an operational OPSEC playbook. Stakeholder role: instructor, OPSEC reviewer, collection-governance reviewer. Assurance use: OPSEC doctrine provenance review, critical-information boundary setting, and defensive classroom governance. Rights dimension: lawful authority, source protection, public safety, records accountability, and evidence-bounded education. Direct Reagan Library PDF source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Treasury Board of Canada Secretariat. Canada launches first register of ai uses in federal government, 2025. URL https://www.canada.ca/en/treasury-board-secretariat/news/2025/11/canada-launches-first-register-of-ai-uses-in-federal-government.html. Official announcement of Canada's federal AI register, used as a transparency anchor for AI use-case inventories and public-facing disclosure. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: public_sector_transparency. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: Canada AI register launch, register schema, public inventory, disclosure requirement, or federal AI-use publication changes. Verification method: direct_official_page_review. Claim scope: public AI register, government AI use disclosure, use-case inventory, public transparency, and refresh accountability. Stakeholder role: public official, transparency reviewer, records officer, instructor, and learner. Assurance use: public AI-use inventory review, disclosure checklist, register refresh, and transparency evidence. Rights dimension: public transparency, accountability, accessible notice, public trust, privacy, and service-user awareness. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Treasury Board of Canada Secretariat. Guide on the use of agentic artificial intelligence, 2026a. URL https://www.canada.ca/en/government/system/digital-government/digital-government-innovations/responsible-use-ai/guide-use-agentic-artificial-antelligence.html. Government of Canada guide for accountable public-sector use of agentic AI, including governance, risk, transparency, testing, monitoring, and human oversight considerations. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: public_sector_agentic_ai. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: Canada agentic-AI guide, public-sector AI policy, autonomy control, transparency, or monitoring guidance changes. Verification method: direct_official_page_review. Claim scope: agentic AI governance, bounded autonomy, human approval, monitoring, recoverability, and public-sector accountable deployment. Stakeholder role: public-sector AI steward, service owner, instructor, learner, and oversight reviewer. Assurance use: bounded-autonomy run card, recoverability review, approval threshold, monitoring evidence, and public-sector service assurance. Rights dimension: public trust, accountability, transparency, privacy, accessibility, human review, and service fairness. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Treasury Board of Canada Secretariat. Algorithmic impact assessment tool, 2026b. URL https://www.canada.ca/en/government/system/digital-government/digital-government-innovations/responsible-use-ai/algorithmic-impact-assessment.html. Government of Canada Algorithmic Impact Assessment tool for structured impact-level scoring, mitigation planning, and accountable review of automated decision systems. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: rights_impact_privacy. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: Algorithmic Impact Assessment tool, directive, scoring, mitigation, or government automated-decision policy changes. Verification method: direct_official_page_review. Claim scope: algorithmic impact assessment, risk level, mitigation evidence, accountability, and rights-impact review. Stakeholder role: AI program owner, privacy reviewer, rights-impact assessor, instructor, and learner. Assurance use: algorithmic impact worksheet, rights-risk triage, mitigation evidence, and review threshold. Rights dimension: privacy, equality, procedural fairness, redress, transparency, accessibility, and affected-group review. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Amos Tversky and Daniel Kahneman. Judgment under uncertainty: Heuristics and biases, 1974. URL https://pubmed.ncbi.nlm.nih.gov/17835457/. Verified scholarly repository record source for cognitive_bias_foundations; routed to Cognitive Security (neurocognitive mechanisms); Epistemic Rigor & Analytic Tradecraft (cognitive bias in analysis). AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cognitive_bias_foundations. Source tier: scholarly_repository_record. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cognitive_bias_foundations materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of cognitive_bias_foundations and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cognitive_bias_foundations claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_tversky_kahneman_1974_judgment_uncertainty retained.

Uchendu et al. Fighting fire with fire: Using large language models to combat disinformation, 2023. URL https://aclanthology.org/2023.emnlp-main.883.pdf. ACL EMNLP paper on using large language models for disinformation detection, routed as defensive method evidence with explicit reliability and rights caveats. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: ACL Anthology PDF, detection benchmark literature, LLM model changes, or method limitations materially changes. Verification method: script_http_200_scholarly_pdf_review. Claim scope: Supports bounded discussion of using LLMs for defensive disinformation detection; does not establish universal detection reliability or endorse automated moderation. Stakeholder role: AI evaluator, cognitive-security reviewer, instructor. Assurance use: LLM-based disinformation detection caveat, defensive NLP review, and method-limit discussion. Rights dimension: free expression, transparency, fairness, accountable moderation, and detection-limit communication. Direct ACL Anthology PDF URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

UK Department for Science, Innovation and Technology and AI Safety Institute. Ai safety institute approach to evaluations, 2024. URL https://www.gov.uk/government/publications/ai-safety-institute-approach-to-evaluations/ai-safety-institute-approach-to-evaluations. Official evaluation guidance for advanced AI systems, including agent evaluations for tool use, semi-autonomy, and real-world actions. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

UK National Cyber Security Centre and international partners. Guidelines for secure ai system development, 2024. URL https://www.ncsc.gov.uk/collection/guidelines-secure-ai-system-development. NCSC Guidelines for secure AI system development for providers of systems that use AI, including systems built from scratch and systems built on top of third-party tools or services. Checked as of 2026-06-06. Citation role: curriculum_anchor. Source lane: secure_release_change_control. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: NCSC secure-AI-development

guidance, joint-authority updates, secure-by-design AI controls, supply-chain guidance, or provider responsibility model changes. Verification method: direct_official_page_review. Claim scope: secure AI system development across design, development, deployment, operation, supply-chain security, and provider-customer responsibility boundaries. Stakeholder role: secure-AI engineer, release reviewer, procurement assessor, instructor, and learner. Assurance use: secure-AI lifecycle review, provider-customer responsibility map, supply-chain checklist, and release-readiness evidence. Rights dimension: security, resilience, accountability, supply-chain integrity, transparency, and harm prevention. Direct source URL verified live (HTTP 200, on-topic NCSC secure-AI-development guidance page) for AGEINT curriculum use.

UNESCO. Recommendation on the ethics of artificial intelligence, 2021. URL https://www.unesco.org/en/artificial-intelligence/recommendation-ethics. Official UNESCO recommendation source for human rights, fairness, transparency, accountability, education, culture, environment, and governance. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: human_rights_governance. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: UNESCO implementation guidance, monitoring tool, or recommendation resource changes. Verification method: direct_official_page_review. Claim scope: human-rights-based AI governance, ethics education, accountability, and societal impact. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

UNESCO. Guidance for generative ai in education and research, 2023. URL https://unesdoc.unesco.org/ark:/48223/pf0000386693. Official UNESCO publication for generative AI education governance, assessment integrity, age safeguards, teacher roles, and research use. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: education_assessment. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: UNESCO education guidance, generative-AI policy, or assessment recommendations change. Verification method: direct_publication_page_review. Claim scope: education policy, classroom AI governance, assessment integrity, and learner protection. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

UNESCO. Ai competency frameworks for teachers and students, 2024. URL https://www.unesco.org/en/articles/what-you-need-know-about-unescos-new-ai-competency-frameworks-students-and-teachers. Official UNESCO overview of the 2024 AI competency frameworks for students and teachers, linking both publications. It describes human-centred, ethical AI education and the frameworks' competency areas as guidance for policy, curriculum design, and professional development, not an evaluation demonstrating learning-effectiveness. Checked as of 2026-11-06. Citation role: curriculum_anchor. Source lane: education_assessment. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: UNESCO framework publication, competency revision, or education resource update. Verification method: direct_official_page_review. Claim scope: UNESCO guidance on student and teacher AI competencies, human agency, ethics, curriculum design, and teacher development; not evidence of measured learning gains. Retrieved the on-topic UNESCO overview on 2026-11-06, replacing the obsolete article URL. The page is dated September 3, 2024, displays an October 27, 2026 update, and links the 2024 student framework (pf0000391105) and teacher framework (pf0000391104). This review checked the overview and its publication links, not the full framework publications or empirical learning outcomes.

UNESCO Global Education Monitoring Report. Ai and education, 2026. URL https://www.unesco.org/gem-report/en/ai-and-education. Official UNESCO GEM source hub for AI and education evidence, policy, access, assessment, and equity analysis. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: education_assessment. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: GEM report, policy note, dashboard, or education indicator update. Verification method: direct_official_page_review. Claim scope: education evidence, access and equity, assessment policy, and AI literacy governance. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

United Nations. Global digital compact, 2024. URL https://www.un.org/digital-emerging-technologies/global-digital-compact. United Nations Global Digital Compact page and adopted compact context for inclusive, rights-based digital cooperation and global AI governance. Checked as of 2026-05-24. Citation role: curriculum_anchor. Source lane: accessibility_digital_inclusion. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: UN Global Digital Compact implementation, adopted text, digital cooperation portal, AI governance, or digital-inclusion update. Verification method: direct_official_page_review. Claim scope: global digital cooperation, digital divides, human rights online, safe and secure digital future, and AI governance cooperation. Stakeholder role: rights reviewer, inclusion lead, instructor, learner, and public-interest steward. Assurance use: digital-inclusion and AI-governance crosswalk, human-rights review, public participation note, and inclusion evidence. Rights dimension: human rights, digital inclusion, accessibility, online safety, public participation, equality, and international cooperation. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

United Nations Office on Drugs and Crime. Unodc money laundering, proceeds of crime and the financing of terrorism, UNODC. URL https://www.unodc.org/unodc/en/money-laundering/index.html. Verified official primary source for finint_aml_cft_international; routed to Financial Intelligence (FININT). AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: finint_aml_cft_international. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for finint_aml_cft_international materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of finint_aml_cft_international and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that finint_aml_cft_international claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_unodc_money_laundering_overview retained.

United Nations University, Institute in Macau. Why agentic ai needs boundaries before freedom, 2026. URL https://unu.edu/macau/blog-post/why-agentic-ai-needs-boundaries-freedom. UNU Macau policy analysis arguing agentic AI requires boundaries before freedom - minimum necessary privilege, delimited scope, sandboxes, explicit permissions, and accountable oversight. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: human_rights_governance. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: UNU Macau agentic-AI governance publications, minimum-privilege doctrine, oversight guidance, or UN academic agentic-AI policy changes. Verification method: direct_official_page_review. Claim scope: agentic AI governance, minimum necessary privilege, bounded scope, accountable oversight, and well-governed agency over maximal autonomy. Stakeholder role: AI governance steward, oversight reviewer, instructor, policy analyst, and learner. Assurance use: bounded-autonomy boundary review, minimum-necessary-privilege checklist, oversight-and-accountability map, and governance-design rationale. Rights dimension: accountability, public trust, human oversight, institutional values alignment, and harm prevention. Direct source URL verified live (HTTP 200, on-topic UNU Macau agentic-AI governance analysis) for AGEINT curriculum use.

United States Access Board. Revised 508 standards and 255 guidelines, 2017. URL https://www.access-board.gov/ict/. Official ICT accessibility standards for federal information and communication technology, including procurement, development, maintenance, use, exceptions, and documentation. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: learner_support_accommodations. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: federal ICT accessibility standard, accessibility rule, exception, or documentation requirement changes. Verification method: direct_official_page_review. Claim scope: learner support plans, accessibility exception documentation, alternative means, and artifact remediation. Stakeholder role: learner, instructor, accessibility reviewer, procurement reviewer, and public-service owner. Assurance use: accommodation plan, accessibility remediation log, and alternative-means decision. Rights dimension: accessibility, equal participation, public-service access, and reasonable accommodation. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

United States Congress. Intelligence reform and terrorism prevention act of 2004, 2004. URL https://www.govinfo.gov/link/plaw/108/public/458. Official GovInfo public law record establishing post-9/11 intelligence reform requirements including alternative analysis and analytic integrity provi-

sions. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: intelligence_failure_postmortem. Source tier: official_law. Refresh cadence: biennial. Refresh trigger: Refresh if GovInfo metadata or statutory-citation links change. Verification method: official_law_record_review. Claim scope: Supports claims that post-9/11 reforms created statutory pressure for analytic integrity and alternative analysis. Stakeholder role: curriculum designer; governance reviewer; public-sector analyst. Assurance use: Links tradecraft standards to public-law reform context without turning law into technique guidance. Rights dimension: public-domain legal source; preserve statutory context. GovInfo public law landing page verified live 2026-06-11; use for statutory reform context, not implementation-detail claims.

United States Copyright Office. Copyright and artificial intelligence, part 3: Generative ai training, 2025. URL https://www.copyright.gov/ai/Copyright-and-Artificial-Intelligence-Part-3-Generative-AI-Training-Report-Pre-Publication-Version.pdf. Official U.S. copyright policy source for generative-AI training, rights-holder impacts, transparency, licensing, and IP governance. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: privacy_ip_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

United States Department of State. Open source intelligence strategy, 2024. URL https://2021-2025.state.gov/open-source-intelligence-strategy/. Official strategy source for lawful OSINT governance, discovery, validation, and dissemination. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: osint_geoint. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

United States Intelligence Community. Artificial intelligence ethics framework for the intelligence community, 2020a. URL https://www.intelligence.gov/ai/ai-ethics-framework. Official IC framework for AI goals, authorities, human judgment, bias mitigation, testing, documentation, explainability, and review. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ai_ethics_data_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

United States Intelligence Community. Principles of artificial intelligence ethics for the intelligence community, 2020b. URL https://www.intelligence.gov/ai/principles-of-ai-ethics. Official IC principles for lawful, accountable, objective, human-centered, secure, resilient, and science-informed AI. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: ai_ethics_data_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

United States Intelligence Community. How the ic works, 2026. URL https://www.intelligence.gov/how-the-ic-works. Official public explanation of the intelligence cycle, collection disciplines, dissemination, evaluation, oversight, and partners. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: governed_intelligence_cycle. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

United States Senate Select Committee on Intelligence. Report on the u.s. intelligence community's prewar intelligence assessments on iraq, 2004. URL https://www.intelligence.senate.gov/sites/default/files/publications/108301.pdf. Official Senate report on prewar Iraq intelligence assessments used as postmortem context for assumptions, dissent, caveats, and source-confidence failures. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: intelligence_failure_postmortem. Source tier: official_report. Refresh cadence: biennial. Refresh trigger: Senate report URL, archival location, or official record status changes. Verification method: direct_official_pdf_review. Claim scope: Supports bounded postmortem claims about Iraq WMD assessment failures and the need for explicit assumptions, source quality, dissent, and caveats. Stakeholder role: curriculum designer; governance reviewer; analytic tradecraft instructor. Assurance use: Prevents failure lessons from implying that any single SAT would have prevented a complex institutional failure. Rights dimension: public-domain government report; cite official source. Official Senate Intelligence Committee PDF URL verified live 2026-06-15 with successful redirect to current Senate-hosted PDF asset.

United States Senate Select Committee to Study Governmental Operations with Respect to Intelligence Activities. Church committee final report (internet archive), 1976. URL https://archive.org/details/ChurchCommittee_FullReport. Verified public domain primary source for legal_oversight_intelligence; routed to Legal Authorities and Constraints; Historical Intelligence Services (American); oversight reform history. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: legal_oversight_intelligence. Source tier: public_domain_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for legal_oversight_intelligence materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of legal_oversight_intelligence and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that legal_oversight_intelligence claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key public_church_committee_1976_final_report retained.

U.S. AI Safety Institute, National Institute of Standards and Technology. Managing misuse risk for dual-use foundation models, nist ai 800-1 initial public draft, 2024. URL https://nvlpubs.nist.gov/nistpubs/ai/NIST.AI.800-1.ipd.pdf. NIST AI 800-1 initial public draft on managing misuse risk for dual-use foundation models; used as draft official guidance, not as finalized regulation. Checked as of 2026-09-06. Citation role: curriculum_anchor. Source lane: ai_red_team_assurance. Source tier: official_draft. Refresh cadence: quarterly. Refresh trigger: NIST AI 800-1 finalization, draft revision, U.S. AI Safety Institute misuse-risk framework, dual-use foundation-model safeguard guidance, or evaluation practice changes. Verification method: direct_official_pdf_review. Claim scope: dual-use foundation-model misuse-risk management, safeguards, evaluation planning, governance roles, and draft-status caveats for frontier-model assurance. Stakeholder role: AI safety evaluator, red-team reviewer, release-gate owner, instructor, and learner. Assurance use: dual-use misuse-risk assessment, safeguard-evidence review, release-gate critique, and frontier-model red-team scope planning with draft-status caveat. Rights dimension: safety, misuse prevention, accountability, evaluation validity, incident readiness, and harm reduction. Direct source URL verified live (HTTP 200 PDF, title metadata and first pages on-topic); Draft status retained explicitly for AGEINT curriculum use.

U.S. Congress. Fisa 1978 - govinfo (statutes at large), 1978. URL https://www.govinfo.gov/content/pkg/STATUTE-92/pdf/STATUTE-92-Pg1783.pdf. Verified official primary source for legal_authorities_surveillance; routed to Legal Authorities and Constraints; oversight of domestic electronic surveillance. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: legal_authorities_surveillance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for legal_authorities_surveillance materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of legal_authorities_surveillance and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical

actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that legal_authorities_surveillance claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_fisa_1978_statute retained.

U.S. Congress. Usa patriot act - govinfo compilation, 2001. URL https://www.govinfo.gov/content/pkg/COMPS-1507/pdf/COMPS-1507.pdf. Verified official primary source for legal_authorities_surveillance; routed to Legal Authorities and Constraints; post-9/11 surveillance expansion. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: legal_authorities_surveillance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for legal_authorities_surveillance materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of legal_authorities_surveillance and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that legal_authorities_surveillance claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_usa_patriot_act_2001 retained.

U.S. Congress. Usa freedom act - govinfo, 2015. URL https://www.govinfo.gov/content/pkg/PLAW-114publ23/pdf/PLAW-114publ23.pdf. Verified official primary source for legal_authorities_surveillance; routed to Legal Authorities and Constraints; surveillance reform and civil liberties. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: legal_authorities_surveillance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for legal_authorities_surveillance materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of legal_authorities_surveillance and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that legal_authorities_surveillance claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_usa_freedom_act_2015 retained.

U.S. Department of Defense. Irregular warfare annex to the national defense strategy - summary (dod, 2020), 2020. URL https://media.defense.gov/2020/Oct/02/2002510472/-1/-1/0/Irregular-Warfare-Annex-to-the-National-Defense-Strategy-Summary.PDF. Verified official primary source for irregular_warfare_strategy; routed to Gray Zone / Hybrid Warfare / Non-State Actor Intelligence / Irregular Warfare. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: irregular_warfare_strategy. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for irregular_warfare_strategy materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of irregular_warfare_strategy and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that irregular_warfare_strategy claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_dod_iw_annex_2020 retained.

U.S. Department of Justice. Fact sheet: New rule on the accessibility of web content and mobile apps provided by state and local governments, 2024. URL https://www.ada.gov/resources/2024-03-08-web-rule/. DOJ ADA Title II fact sheet for state and local government web and mobile app accessibility obligations, WCAG technical standard use, contractors, and compliance timing. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: accessibility_digital_inclusion. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: ADA Title II rule, Federal Register update, compliance date, or DOJ guidance changes. Verification method: direct_official_page_review. Claim scope: public-sector accessibility obligations, contractor oversight, and digital-service compliance review. Stakeholder role: public entity, contractor, learner, disabled service user, and compliance reviewer. Assurance use: public-sector accessibility gate and vendor deliverable review. Rights dimension: disability rights, equal access, and public-service inclusion. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

U.S. Department of the Army. Fm 2-22.3 human intelligence collector operations, 2006. URL https://www.marines.mil/Portals/1/Publications/FM%202-22.3%20%20Human%20Intelligence%20Collector%20Operations_1.pdf. Verified official primary source for humint_doctrine; routed to HUMINT collection discipline; source operations; interrogation ethics and doctrine. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: humint_doctrine. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for humint_doctrine materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of humint_doctrine and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that humint_doctrine claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key official_army_fm_2_22_3_humint retained.

U.S. General Services Administration. Ai guide for government, 2026. URL https://ai.gov/. Official U.S. government AI resource hub for agency adoption, responsible use, policy references, and public-sector implementation support. Checked as of 2026-08-30. Citation role: curriculum_anchor. Source lane: public_sector_agentic_ai. Source tier: official_primary. Refresh cadence: quarterly. Refresh trigger: federal AI guidance, agency practice, resource hub, or policy source changes. Verification method: direct_official_page_review. Claim scope: public-sector adoption, agency AI governance, and responsible implementation references. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

U.S. Government Accountability Office. Artificial intelligence: An accountability framework for federal agencies and other entities, 2021. URL https://www.gao.gov/products/gao-21-519sp. Official GAO accountability framework for AI governance, data, performance, monitoring, and accountability evidence. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: ai_conformity_compliance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: GAO supplement, agency guidance, or framework revision changes. Verification method: direct_official_page_review. Claim scope: AI accountability controls, data governance, performance monitoring, and audit evidence. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

U.S. National Science Foundation. Advancing artificial intelligence agent ecosystems through the nsf pesose program, 2026. URL https://www.nsf.gov/funding/opportunities/dcl-advancing-artificial-intelligence-ai-agent-ecosystems. Official NSF source for open AI-agent protocol ecosystems, interoperability, identity, access control, auditability, and safe message formats. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

U.S. Senate Select Committee to Study Governmental Operations with Respect to Intelligence Activities. Church committee final report book i: Foreign and military intelligence (s. rep. 94-755), Church Committeea. URL https://www.intelligence.senate.gov/sites/default/files/94755_I.pdf. Verified public domain primary source for humint_oversight_history; routed to HUMINT history and oversight; IC accountability; CI doctrine history. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: humint_oversight_history. Source tier: public_domain_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for humint_oversight_history materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of humint_oversight_history and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that humint_oversight_history claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key public_church_committee_book_i_1976 retained.

U.S. Senate Select Committee to Study Governmental Operations with Respect to Intelligence Activities. Church committee book iii: Nsa surveillance (s. rep. 94-755), Church Committeeb. URL https://www.aarclibrary.org/publib/church/reports/book3/pdf/ChurchB3_10_NSA.pdf. Verified public domain primary source for sigint_oversight_history; routed to SIGINT oversight history; NSA authorities and limitations; domestic surveillance doctrine. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: sigint_oversight_history. Source tier: public_domain_primary. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for sigint_oversight_history materially changes. Verification method: direct_official_url_review. Claim scope: Supports bounded AGEINT discussion of sigint_oversight_history and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that sigint_oversight_history claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key public_church_committee_book_iii_nsasurveillance_1976 retained.

Damien Van Puyvelde and Fernando Tabarez Rienzi. The rise of open-source intelligence, ejis 2025, 2025. URL https://www.cambridge.org/core/journals/european-journal-of-international-security/article/rise-of-opensource-intelligence/21122432399ECB8078BF0D89A76D0586. Verified scholarly repository record source for osint_methodology; routed to OSINT definition and discipline; OSINT methodology; validation and verification; civil society OSINT. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: osint_methodology. Source tier: scholarly_repository_record. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for osint_methodology materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of osint_methodology and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that osint_methodology claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_van_puyvelde_2025_rise_osint retained.

A. Vaswani, N. Shazeer, N. Parmar, J. Uszkoreit, L. Jones, A. N. Gomez, . Kaiser, and I. Polosukhin. Attention is all you need, 2017. URL https://arxiv.org/abs/1706.03762. Verified scholarly preprint source for llm_architecture; routed to Foundations of AGEINT (LLM substrate); LangChain/LangGraph Patterns appendix; CrewAI appendix; AutoGen/MCP appendix. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: llm_architecture. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for llm_architecture materially changes. Verification method: direct_arxiv_record_review. Claim scope: Supports bounded AGEINT discussion of llm_architecture and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that llm_architecture claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_vaswani_2017_attention retained.

M. P. Walker and R. Stickgold. Sleep, memory, and plasticity, 2006. URL https://walkerlab.berkeley.edu/reprints/Walker&Stickgold_AnnRevPsych_2006.pdf. Verified scholarly repository record source for cognitive_performance; routed to Productivity Intelligence & Cognitive Performance (sleep and cognition); Cognitive Security & Inoculation appendix. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: cognitive_performance. Source tier: scholarly_repository_record. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for cognitive_performance materially changes. Verification method: direct_source_url_review. Claim scope: Supports bounded AGEINT discussion of cognitive_performance and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that cognitive_performance claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_walker_stickgold_2006_sleep_memory retained.

Claire Wardle and Hossein Derakhshan. Information disorder: Toward an interdisciplinary framework for research and policy making, 2017. URL https://rm.coe.int/information-disorder-toward-an-interdisciplinary-framework-for-researc/168076277c. Council of Europe report providing an interdisciplinary framework for information disorder, routed as terminology and source-provenance support for defensive cognitive-security lessons. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: public_domain_primary. Refresh cadence: annual. Refresh trigger: Council of Europe PDF URL, information-disorder terminology, or platform-governance literature materially changes. Verification method: direct_public_pdf_review. Claim scope: Supports taxonomy and terminology for information disorder, misinformation, disinformation, and malinformation; does not authorize manipulation or counter-propaganda practice. Stakeholder role: media-literacy instructor, cognitive-security reviewer, policy analyst. Assurance use: information-disorder taxonomy review, provenance checklist design, and cognitive-security rights caveats. Rights dimension: freedom of expression, public trust, media literacy, privacy, and non-censorial resilience education. Direct Council of Europe source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Wasil et al. Ai emergency preparedness, 2024. URL https://arxiv.org/abs/2407.17347. arXiv preprint on AI emergency preparedness, routed to agent incident-response and publication-readiness caveats for tabletop exercises. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: agent_incident_response. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: arXiv version, AI incident-preparedness literature, public-sector guidance, or risk taxonomy materially changes. Verification method: direct_arxiv_page_review. Claim scope: Supports bounded discussion of emergency preparedness for AI incidents; treated as preprint context for readiness planning, not settled policy or AGEINT incident-response evidence. Stakeholder role: incident commander, AI governance reviewer, instructor, tabletop facilitator. Assurance use: AI emergency-preparedness tabletop caveat, incident-readiness review, and public-safety boundary setting. Rights dimension: public safety,

accountability, transparency, due process, and incident learning. Direct arXiv source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

Jason Wei, Xuezhi Wang, Dale Schuurmans, Maarten Bosma, Brian Ichter, Fei Xia, Ed Chi, Quoc Le, and Denny Zhou. Chain-of-thought prompting elicits reasoning in large language models, 2022. URL https://arxiv.org/abs/2201.11903. Shows that prompting an LLM to emit intermediate reasoning steps markedly improves complex reasoning, establishing the reasoning-decomposition pattern that underlies agent planning and ReAct-style traces. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: scholarly_preprint. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Backs the reasoning-decomposition design pattern. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

Tim. Weiner. Legacy of ashes: The history of the cia, 2007. URL https://www.penguinrandomhouse.com/books/188076/legacy-of-ashes-by-tim-weiner/. Verified scholarly book metadata source for intelligence_history_american; routed to Historical Intelligence Services (American); CIA institutional failures and analytic dysfunction. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: intelligence_history_american. Source tier: scholarly_book_metadata. Refresh cadence: annual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for intelligence_history_american materially changes. Verification method: direct_publisher_or_catalog_record_review. Claim scope: Supports bounded AGEINT discussion of intelligence_history_american and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that intelligence_history_american claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_weiner_2007_legacy_ashes retained; stale or indirect proposal URL replaced with direct source record.

L. Weng. Llm-powered autonomous agents, 2023. URL https://lilianweng.github.io/posts/2023-06-23-agent/. Verified professional documentation source for agentic_design_principles; routed to Foundations of AGEINT (agent memory, tool use, planning); Design Patterns & Archetypes. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: agentic_design_principles. Source tier: professional_documentation. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for agentic_design_principles materially changes. Verification method: direct_professional_documentation_review. Claim scope: Supports bounded AGEINT discussion of agentic_design_principles and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that agentic_design_principles claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_weng_2023_agent_survey normalized to professional_weng_2023_agent_survey.

Martha Whitesmith. The efficacy of ach in mitigating serial position effects and confirmation bias in an intelligence analysis scenario, 2019. URL https://doi.org/10.1080/02684527.2018.1534640. Peer-reviewed ACH experiment used to keep confirmation-bias and serial-position claims specific to a study design rather than a general SAT guarantee. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded claims about ACH evidence for bias mitigation under a specific intelligence-analysis scenario. Stakeholder role: curriculum designer; analytic standards trainer; cognition reviewer. Assurance use: Prevents ACH lessons from turning one experimental result into a universal debiasing assertion. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, author, journal DOI, publisher, and year; DOI URL retained as stable scholarly source.

John Wilcox and David R. Mandel. Critical review of the analysis of competing hypotheses technique: Lessons for the intelligence community, 2024. URL https://doi.org/10.1080/02684527.2024.2304934. Peer-reviewed critical review of ACH used to frame ACH as a diagnostic and review aid with contested efficacy claims. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: sat_evaluation_evidence. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Publisher metadata, DOI record, correction, or retraction status changes. Verification method: crossref_doi_metadata_review. Claim scope: Supports bounded ACH caveats and lessons for intelligence practice, not claims that AGEINT validates ACH replacement or automation. Stakeholder role: analytic standards trainer; curriculum designer; evaluation lead. Assurance use: Strengthens SAT chapter language that separates hypothesis bookkeeping, diagnosticity review, and accuracy evidence. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. Crossref DOI metadata verified live 2026-06-15 for title, authors, journal DOI, publisher, and year; DOI URL retained as stable scholarly source.

Williams et al. Large language models can generate election disinformation, 2025. URL https://pmc.ncbi.nlm.nih.gov/articles/PMC11913289/. Open-access PMC article on LLM-generated election disinformation, routed as public-impact evidence for defensive cognitive-security education. Checked as of 2026-06-15. Citation role: curriculum_anchor. Source lane: cognitive_influence_security. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: PMC record, election-disinformation literature, LLM detection evidence, or policy context materially changes. Verification method: direct_pmc_page_review. Claim scope: Supports bounded empirical discussion of LLM-generated election disinformation risk; AGEINT uses it for detection and governance caveats, not for content generation. Stakeholder role: cognitive-security reviewer, election-integrity educator, AI governance reviewer. Assurance use: election-disinformation caveat, LLM risk boundary, and public-impact review. Rights dimension: democratic participation, information integrity, transparency, and public trust. Direct PMC source URL returned HTTP 200 on 2026-06-15 and was deduped against existing AGEINT anchors and source-guide references.

James J. Wirtz. Are intelligence failures still inevitable?, 2023. URL https://www.tandfonline.com/doi/full/10.1080/08850607.2023.2214328. Peer-reviewed discussion revisiting intelligence-failure inevitability in light of collection, analysis, reform, and policy factors. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: intelligence_failure_postmortem. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: Refresh if publisher metadata, correction, or retraction status changes. Verification method: doi_metadata_review. Claim scope: Supports current failure-theory framing that reform can improve systems without eliminating surprise or policy-analysis friction. Stakeholder role: curriculum designer; governance reviewer; analytic standards trainer. Assurance use: Links classic failure theory to contemporary reform and warning lessons. Rights dimension: copyrighted scholarly article; cite DOI metadata and summarize sparingly. DOI/publisher URL retained; scholarly metadata verified live 2026-06-11 from DOI-indexed search results because automated publisher retrieval was rate-limited.

Roberta Wohlstetter. Pearl harbor: Warning and decision, 1962. URL https://www.sup.org/books/history/pearl-harbor. Publisher record for Wohlstetter's classic warning-intelligence study of signal, noise, and surprise before Pearl Harbor. Checked as of 2026-06-11. Citation role: curriculum_anchor. Source lane: warning_intelligence. Source tier: scholarly_publisher_record. Refresh cadence: annual. Refresh trigger: Refresh if publisher metadata or edition details change. Verification method: publisher_record_review. Claim scope: Supports historical warning-intelligence claims about signal-noise and surprise analysis. Stakeholder role: curriculum designer; intelligence history instructor. Assurance use: Frames warning lessons around indicators, noise, and uncertainty rather than hindsight certainty. Rights dimension: copyrighted scholarly book metadata only; do not reproduce extended text. Stanford University Press publisher page verified live 2026-06-11; use as classic warning theory, not as current doctrine.

Michael Wooldridge. An introduction to multiagent systems, 2nd edition, 2009. URL https://www.wiley.com/en-us/An+Introduction+to+MultiAgent+Systems%2C+2nd+Edition-p-9780470519462. Standard graduate textbook on multi-agent systems covering coordination, negotiation, voting, and auctions, grounding the multi-agent-coordination vocabulary used in agentic governance. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: scholarly_textbook. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Backs multi-agent coordination concepts and vocabulary. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

Michael Wooldridge and Nicholas R. Jennings. Intelligent agents: theory and practice, 1995. URL https://www.cambridge.org/core/product/identifier/S0269888900008122/type/journal_article. Foundational survey dividing agent research into theory, architectures, and languages, providing the canonical agent definition and multi-agent-systems vocabulary that predates the LLM era. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: scholarly_peer_reviewed. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Backs the foundational agent definition and MAS vocabulary. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.

World Bank. Govtech: Putting people first, 2026. URL https://www.worldbank.org/en/programs/govtech. Official World Bank GovTech program source for digital public infrastructure, citizen engagement, core systems, and public-sector modernization. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: public_sector_agentic_ai. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: GovTech Maturity Index, program priority, case repository, or public-sector digital update. Verification method: direct_official_page_review. Claim scope: government digital transformation, AI-in-government context, and public service accountability. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Bank GovTech and Public Sector Innovation Global Team. Artificial intelligence working group, 2026. URL https://www.worldbank.org/en/programs/govtech/artificial-intelligence. Official World Bank GovTech source for public-sector AI policy instruments, implementation knowledge exchange, and inclusive government capacity. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: public_sector_agentic_ai. Source tier: official_primary. Refresh cadence: semiannual. Refresh trigger: working-group membership, policy instrument, repository, or public-sector case update. Verification method: direct_official_page_review. Claim scope: public-sector AI implementation, GovTech capacity, inclusive services, and institutional governance. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Intellectual Property Organization. Artificial intelligence and intellectual property, 2026. URL https://www.wipo.int/en/web/frontier-technologies/artificial-intelligence/index. Official WIPO source for AI and IP policy, training-data rights, copyright infrastructure, transparency, attribution, and member-state dialogue. Checked as of 2026-05-21. Citation role: curriculum_anchor. Source lane: privacy_ip_governance. Source tier: official_primary. Refresh cadence: annual. Refresh trigger: source URL, policy status, standard version, or legal text materially changes. Verification method: direct_source_url_review. Claim scope: curriculum grounding and source-backed synthesis. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Wide Web Consortium. Prov-o: The prov ontology, 2013a. URL https://www.w3.org/TR/prov-o/. W3C Recommendation for the PROV ontology supporting machine-readable provenance relationships among entities, activities, agents, and roles. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: W3C Recommendation errata, ontology update, or provenance best-practice change. Verification method: direct_standards_page_review. Claim scope: machine-readable source lineage, claim ledgers, transformation records, and agent roles. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Wide Web Consortium. Prov overview, 2013b. URL https://www.w3.org/TR/prov-overview/. W3C Recommendation overview for provenance interchange, entities, activities, agents, and provenance-family specifications. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: W3C PROV errata, successor work, or provenance vocabulary update. Verification method: direct_standards_page_review. Claim scope: provenance modeling, source lineage, transformation evidence, and claim-ledger vocabulary. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Wide Web Consortium. Data on the web best practices, 2017. URL https://www.w3.org/TR/dwbp/. W3C Recommendation for publishing data with metadata, licenses, provenance, quality, versioning, identifiers, and machine-readable formats. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: W3C best-practice update, errata, or linked data publication guidance change. Verification method: direct_standards_page_review. Claim scope: dataset publication, provenance, quality, machine readability, identifiers, and reuse conditions. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Wide Web Consortium. Decentralized identifiers (dids) v1.0, 2022. URL https://www.w3.org/TR/did-core/. W3C Recommendation for decentralized identifiers, DID documents, verification methods, service endpoints, privacy, and security considerations. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: W3C Recommendation, errata, DID method guidance, or registry changes. Verification method: direct_standards_page_review. Claim scope: identifier design, verification methods, agent identity analogies, and provenance controls. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Wide Web Consortium. Web of things (wot) architecture 1.1, 2023a. URL https://www.w3.org/TR/wot-architecture11/. W3C Recommendation for Web of Things architecture, thing models, security considerations, interoperability, and application patterns. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: W3C Recommendation, errata, successor specification, or WoT architecture update. Verification method: direct_standards_page_review. Claim scope: tool and thing interoperability, cyber-physical interface modeling, and security-aware architecture. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Wide Web Consortium. Web of things (wot) discovery, 2023b. URL https://www.w3.org/TR/wot-discovery/. W3C Recommendation for discovering Web of Things resources using directories, metadata, privacy, and security considerations. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: W3C Recommendation, errata, successor specification, or discovery security update. Verification method: direct_standards_page_review. Claim scope: safe discovery patterns, directory governance, privacy-aware metadata, and interoperability review. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Wide Web Consortium. Web of things (wot) thing description 1.1, 2023c. URL https://www.w3.org/TR/wot-thing-description11/. W3C Recommendation for machine-readable thing descriptions, interaction affordances, metadata, security, and protocol bindings. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: W3C Recommendation, errata, successor specification, or thing-description vocabulary update. Verification

method: direct_standards_page_review. Claim scope: machine-readable tool affordances, interface descriptions, security metadata, and binding discipline. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Wide Web Consortium. Data catalog vocabulary (dcat) version 3, 2024. URL https://www.w3.org/TR/vocab-dcat-3/. W3C Recommendation for cataloging datasets and data services with metadata, distributions, provenance, access, and quality signals. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: W3C Recommendation, vocabulary term, errata, or data-catalog practice update. Verification method: direct_standards_page_review. Claim scope: dataset cataloging, metadata records, provenance fields, and data-service documentation. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Wide Web Consortium. Verifiable credential data integrity 1.0, 2025a. URL https://www.w3.org/TR/vc-data-integrity/. W3C Recommendation for data integrity proofs, proof sets, proof chains, verification methods, and transformed data protection in verifiable credentials. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: model_data_provenance. Source tier: technical_standard. Refresh cadence: semiannual. Refresh trigger: W3C VC Data Integrity recommendation, errata, cryptosuite, or implementation report changes. Verification method: direct_standards_page_review. Claim scope: data integrity proofs, credential provenance, verification records, and signed evidence chains. Stakeholder role: data steward, verifier, instructor, learner, and provenance auditor. Assurance use: data lineage registry and verifiable-evidence check. Rights dimension: data integrity, provenance, authenticity, and accountable reuse. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Wide Web Consortium. Verifiable credentials data model v2.0, 2025b. URL https://www.w3.org/TR/vc-data-model-2.0/. W3C Recommendation for verifiable credentials, issuers, holders, verifiers, security, privacy, internationalization, and accessibility considerations. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: agent_interoperability_standards. Source tier: international_standard. Refresh cadence: annual. Refresh trigger: W3C Recommendation, errata, implementation report, or data-model update. Verification method: direct_standards_page_review. Claim scope: credential provenance, trust model, machine-verifiable claims, and identity evidence. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

World Wide Web Consortium Web Accessibility Initiative. Wcag 2 overview, 2026. URL https://www.w3.org/WAI/standards-guidelines/wcag/. W3C WAI overview for WCAG 2.0, 2.1, and 2.2 conformance, success criteria, and accessibility standard selection in digital curriculum artifacts. Checked as of 2026-05-22. Citation role: curriculum_anchor. Source lane: accessibility_digital_inclusion. Source tier: technical_standard. Refresh cadence: semiannual. Refresh trigger: WCAG publication, conformance guidance, or public-sector accessibility requirement changes. Verification method: direct_standards_page_review. Claim scope: web accessibility, conformance checks, inclusive digital artifacts, and WCAG-aligned review. Stakeholder role: learner, instructor, public-sector service user, and accessibility reviewer. Assurance use: accessibility acceptance criteria and remediation evidence. Rights dimension: disability access, equal participation, and digital inclusion. Direct source URL verified against an official, standards, public-domain, or scholarly source for AGEINT curriculum use.

Q. Wu, G. Bansal, J. Zhang, Y. Wu, B. Li, E. Zhu, L. Jiang, X. Zhang, S. Zhang, J. Liu, A. H. Awadallah, R. W. White, D. Burger, and C. Wang. Autogen: Enabling next-gen llm applications via multi-agent conversation, 2023. URL https://arxiv.org/abs/2308.08155. Verified scholarly preprint source for multi_agent_frameworks; routed to AutoGen and MCP Patterns appendix; Frameworks & Infrastructure; CrewAI appendix (comparison context). AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: multi_agent_frameworks. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for multi_agent_frameworks materially changes. Verification method: direct_arxiv_record_review. Claim scope: Supports bounded AGEINT discussion of multi_agent_frameworks and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that multi_agent_frameworks claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_wu_2023_autogen retained.

S. Yao, D. Yu, J. Zhao, I. Shafran, T. L. Griffiths, Y. Cao, and K. Narasimhan. Tree of thoughts: Deliberate problem solving with llms, 2023a. URL https://arxiv.org/abs/2305.10601. Verified scholarly preprint source for agentic_reasoning; routed to Foundations of AGEINT (reasoning architectures); Design Patterns & Archetypes (planning patterns); LangChain/LangGraph Patterns appendix. AGEINT uses it for defensive, historical, governance, or method context, not for operational execution. Checked as of 2026-06-16. Citation role: curriculum_anchor. Source lane: agentic_reasoning. Source tier: scholarly_preprint. Refresh cadence: semiannual. Refresh trigger: source URL, source status, edition/version, or claim-scope boundary for agentic_reasoning materially changes. Verification method: direct_arxiv_record_review. Claim scope: Supports bounded AGEINT discussion of agentic_reasoning and related source evidence. It does not authorize collection tasking, exploit steps, covert-action guidance, manipulation playbooks, unsafe cyber-physical actions, or live-target procedures. Stakeholder role: instructor, analyst, reviewer, and curriculum maintainer. Assurance use: Checks that agentic_reasoning claims stay source-backed, bounded, and separated from operational practice. Rights dimension: public-source education, accountable review, privacy/civil-liberties awareness, and evidence-bounded safety boundary. Direct source URL reviewed on 2026-06-16; original proposal key scholarly_yao_2023_tree_of_thoughts retained.

Shunyu Yao, Jeffrey Zhao, Dian Yu, Nan Du, Izhak Shafran, Karthik Narasimhan, and Yuan Cao. React: Synergizing reasoning and acting in language models, 2023b. URL https://arxiv.org/abs/2210.03629. Introduces the interleaved reason-then-act loop in which an LLM alternates verbal reasoning traces with tool/environment actions, grounding the reason-act/tool-use pattern at the core of modern agent design. Checked as of 2026-06-08. Citation role: curriculum_anchor. Source lane: agentic_ai_governance. Source tier: scholarly_preprint. Refresh cadence: annual. Refresh trigger: source URL, DOI, edition/standard version, or claim scope materially changes. Verification method: direct_source_url_review. Claim scope: Backs the reason-act/tool-use design pattern, replacing a secondary blog/LinkedIn discussion with the canonical primary source. Direct source URL verified 2026-06-08 against the primary scholarly or standards source for AGEINT curriculum grounding.
